⁵ Paid out of reserves from capital contributions.

Brady W. Dougan, Chief Executive Officer (left) and Urs Rohner, Chairman of the Board of Directors.

DEAR SHAREHOLDERS

In 2013, our priorities were to further improve profitability, continue to strengthen our capital position and reduce risks and leverage exposure while expanding market share in targeted markets. We made strong progress towards these objectives, while at the same time taking a number of additional strategic measures, both on a Group level and in our two divisions, to continue the transformation of our business.

Credit Suisse also made progress towards resolving legacy issues. In February 2014, Credit Suisse announced that it reached a settlement with the US Securities and Exchange Commission (SEC) and agreed to pay USD 196 million for violations of US securities laws that centered on activities between 2002 and 2008. The investigation by the US Department of Justice (DOJ) in the US tax-related matter remains outstanding. Primarily due to an increase in the litigation provision held against this matter, Credit Suisse announced in April 2014 that it incurred an after-tax charge of CHF 468 million in respect of its preliminary full-year 2013 and fourth-quarter 2013 results. In March 2014, we announced that Credit Suisse reached an agreement with the Federal Housing

Finance Agency (FHFA), as conservator for Fannie Mae and Freddie Mac. As a result of this settlement, we incurred an after-tax charge in respect of our preliminary fourth quarter and full-year 2013 results of CHF 275 million.

For the full-year of 2013, underlying* Core pre-tax income was CHF 5,745 million, up 15% from 2012, and the return on equity was 10%. Including significant items, such as certain litigation provisions recognized in the fourth quarter, as well as realignment costs and fair value losses on own debt due to the improvement in our own credit spreads, reported Core pre-tax income for the full year was CHF 3,504 million, compared to CHF 1,888 million in 2012, and the reported return on equity was 6%.

In October 2013, we created non-strategic units within our two divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and to shift resources to focus on our strategic businesses and growth initiatives. Under this new reporting structure, our strategic businesses reported Core pre-tax income of CHF 7,132 million for the full-year 2013. The

return on equity of 13% for our strategic businesses in the full year 2013 demonstrates the strength of our core franchises within our two divisions. In addition, we showed continued cost discipline with compensation and benefits expense down 9% from 2012 for the Group and down 10% in Investment Banking.

Our result for the fourth quarter of 2013 reflects strong profitability in Private Banking & Wealth Management and a solid performance in the strategic businesses of Investment Banking, with particular strength in Equities and Underwriting. On an underlying* basis, Core pre-tax income for the quarter was CHF 1,256 million and return on equity was 8%. Reported Core pre-tax loss was CHF 466 million for the fourth quarter and return on equity was a negative 5%.

Strategic achievements in 2013

In 2013, we made significant progress in transforming our business to the changing environment through a number of strategic measures. We accelerated the shift of resources to focus on growth in high-returning businesses – particularly in Private Banking & Wealth Management by creating non-strategic units. This also represented an important step toward achieving a more balanced allocation of capital between our two divisions.

During the year, we made significant further progress in our efforts to address the “Too Big to Fail” topic. We largely completed the capital plan announced in July 2012 and ended the year with a Look-through Basel III CET1 ratio of 10.0%. At the same time, we further reduced leverage exposure and reported a Look-through Swiss Total Capital leverage ratio of 3.7% at year end. Based on our preliminary assessment, the Basel Committee’s revised guidelines on the calculation of the leverage ratio would increase our year-end 2013 ratio to around 4%, which would meet the 2019 Swiss requirement. We completed the exchange of CHF 3.8 billion of hybrid tier 1 notes into high-trigger capital instruments, successfully issued CHF 6 billion of low-trigger capital notes and are now just approximately CHF 3 billion away from meeting the Swiss 2019 progressive capital requirement. Furthermore, as part of our 2013 compensation structure, we introduced a similar instrument which aligns compensation incentives to the capital strength of the Group, as well as providing additional tier 1 benefits. In November 2013, we announced our program to evolve the Group’s legal entity structure, which is designed to both meet future requirements for global recovery and resolution planning and result in a substantially less complex and more efficient operating infrastructure in view of the new regulatory requirements.

In Private Banking & Wealth Management, we improved the profitability of our strategic businesses in 2013, also completing the integration of our former Private Banking and Asset Management divisions. The integrated Private Banking & Wealth Management division allows us to better manage the alignment of the products, advice and services that we deliver to our clients and is expected to further enhance the productivity and efficiency of our businesses. With this integrated value chain, we can support

our highly scalable business model in Private Banking & Wealth Management, which is suited to the new regulatory environment. The pre-tax income in the strategic businesses of Asset Management increased 32% from 2012 to 2013, which underscores the strength of the ongoing business and its importance in profit generation within the Private Banking & Wealth Management franchise.

In 2013, we continued to reallocate resources to growth areas, with a particular focus on emerging markets businesses, our global ultra-high-net-worth individual (UHNWI) client franchise and on leveraging our strong market position in Switzerland. In 2013, net new assets from Wealth Management Clients were CHF 18.9 billion, with emerging markets growing at 8%, and continued strong growth in the UHNWI client segment. We also recorded CHF 15.0 billion in net new assets from Asset Management, reflecting significant inflows from higher-margin products, and we continued to see strong inflows of CHF 8.8 billion from the Corporate & Institutional Clients business.

During 2013, we continued to adapt our onshore client service model for Western Europe, adjusting capacity to meet client needs, efficiently managing costs across our businesses and improving our overall market position. We announced the sale of our domestic private banking business booked in Germany in December, while at the same time remaining highly committed to serving the German wealth management market.

We will remain focused on further improving the profitability of our Private Banking & Wealth Management businesses by delivering growth in emerging markets and continuing to adjust our capacity in mature markets to client needs.

In Investment Banking, we continued to see the benefit of our sustained market share positions across our high-returning businesses, combined with a reduced cost base and lower leverage and capital usage. In October 2013, we announced the restructuring of our Rates business, given the increasing focus of regulators on leverage exposures and in view of the fundamental changes in the Rates market. This step forms part of the evolution of our Investment Banking business model and is expected to provide us with a simplified and more capital-efficient business, with a focus on meeting client liquidity needs. In connection with this measure, we also announced the creation of a cross-asset Global Macro Products group, combining our Rates, Foreign Exchange and Commodities businesses into a single platform. This set-up offers clients a comprehensive approach across the macro asset classes and allows us to focus our resources on those areas and products that matter most to them.

We believe that our Investment Banking division, featuring a top-three Equities franchise, a strong and profitable Underwriting & Advisory business and a Fixed Income franchise focused on high-returning yield businesses, is well positioned to continue to serve our clients’ needs and deliver strong returns and profitability in 2014.

Performance of our businesses in the fourth quarter and the full-year 2013

In Private Banking & Wealth Management, we delivered pre-tax income of CHF 1,048 million for our strategic businesses in the fourth quarter of 2013 and a return on Basel III allocated capital of 34%. Pre-tax income for Private Banking & Wealth Management in the fourth quarter was CHF 424 million, taking into account litigation provisions of CHF 600 million in connection with the US tax matter, including in connection with the settlement with the SEC in February 2014 and an increase in litigation provisions relating to the ongoing DOJ investigation. Net revenues of CHF 3,429 million in the fourth quarter were higher compared to the prior quarter and last year's fourth quarter, driven by stronger transaction- and performance-based revenues with robust performance fees and an increase in management fees in Asset Management. Total operating expenses increased, reflecting the higher litigation provisions.

For the full year, Private Banking & Wealth Management reported increased pre-tax income of CHF 3,627 million for its strategic businesses, mainly driven by the successful restructuring of Asset Management business and growth in emerging markets and in the Wealth Management Clients business. Pre-tax income for the full-year 2013 was CHF 3,240 million.

In Investment Banking, we delivered pre-tax income of CHF 468 million for our strategic businesses in the fourth quarter of 2013 and a return on Basel III allocated capital of 10%. Including an after-tax charge of CHF 275 million relating to the FHFA settlement in March 2014 recognized in the fourth quarter, Investment Banking reported a pre-tax loss of CHF 564 million. Net revenues of CHF 2,668 million increased compared to both the prior quarter and the fourth quarter of 2012. This increase reflected solid performance in the strategic businesses, with particular strength in our Equities, Credit and Underwriting franchises, and reduced revenue losses from the non-strategic unit, partially offset by lower Rates results. Total operating expenses increased compared to both the third quarter of 2013 and the fourth quarter of 2012, primarily driven by the higher litigation provisions.

For the full year, Investment Banking reported increased pre-tax income of CHF 3,853 million for its strategic business. Continued sustained market share positions across our high-returning businesses, combined with a reduced cost base and lower leverage

and capital usage, helped us achieve a return on Basel III allocated capital of 19% for 2013. Reported pre-tax income for 2013 was CHF 1,719 million. Total compensation and benefit expense was 10% lower in 2013 than in 2012. Since the fourth quarter of 2012, we reduced Basel III risk-weighted assets by USD 11 billion to USD 176 billion. Business reductions of USD 27 billion in 2013 were partially offset by increases relating to methodology changes and parameter updates of CHF 10 billion and, in the fourth quarter, an operational risk-related add-on of USD 6 billion.

We are confident that the continued momentum we see in our strategic businesses, combined with the successful execution of the run-off of positions and losses in our non-strategic units, will allow us to achieve our targeted return on equity of 15% over the cycle.

Given the progress that we have made in executing our capital plan and in reducing leverage and risk-weighted asset usage while, at the same time, improving the operational efficiency of the bank, the Board of Directors will propose a cash distribution of CHF 0.70 per share to be paid out of reserves from capital contributions for the financial year 2013 at the annual general meeting of Credit Suisse Group on May 9, 2014. This is intended to provide a basis for future progression in our dividend payments as we continue to execute our strategy and resolve legacy issues.

We would like to thank our shareholders and clients for the trust they have placed in Credit Suisse and, in particular, our employees for their contribution to the success of our business.

Sincerely

Urs Rohner

Brady W. Dougan

April 2014

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown herein. Capital and ratio numbers for periods prior to 2013 are based on estimates, which are calculated as if the Basel III framework had been in place in Switzerland during such periods. For Private Banking & Wealth Management's strategic businesses, return on Basel III allocated capital is calculated using income after tax denominated in Swiss francs and assumes (i) a tax rate of 30% in 4Q13 and 29% in 2013; and (ii) that capital is allocated at 10% of average Basel III risk-weighted assets. For Investment Banking's strategic businesses, return on Basel III allocated capital is calculated using income after tax denominated in US dollars and assumes (i) a tax rate of 30% in 4Q13 and 28% in 2013; and (ii) that capital is allocated at 10% of average Basel III risk-weighted assets.

Unless otherwise noted, leverage ratio, leverage exposure and total capital amounts included herein are based on the current FINMA framework. The Swiss Total Capital leverage ratio is calculated as Swiss Total Capital, divided by a three-month average leverage exposure, which consists of balance sheet assets, off-balance sheet exposures, which consist of guarantees and commitments, and regulatory adjustments, which include cash collateral netting reversals and derivative add-ons.

All references to pre-tax income for Core results refer to income from continuing operations before taxes.

Explanation of revision

As announced on March 21, 2014, we entered into an agreement with the Federal Housing Finance Agency (FHFA) to end all claims in two pending securities lawsuits filed by the FHFA against Credit Suisse. As a result of this settlement, we increased our existing FHFA-related litigation provisions by CHF 467 million, resulting in an after tax charge of CHF 275 million in respect of our previously reported unaudited financial results for 4Q13 and 2013.

As announced on April 3, 2014, we updated our previously reported unaudited financial results for 4Q13 and 2013 to reflect additional after tax charges of CHF 468 million. These charges primarily reflect an increase in the litigation provision relating to the ongoing US Department of Justice investigation into the US tax-related matter, as well as other less significant adjustments for certain unrelated matters.

This revised 4Q13 Financial Report updates those financial results and related information to reflect these events and does not update or modify any other information contained in the report originally published on February 6, 2014 that does not relate to these events.

▶ Refer to “Note 29 – Litigation” in III – Condensed consolidated financial statements – unaudited for further information.

For purposes of this report, unless the context otherwise requires, the terms “Credit Suisse,” “the Group,” “we,” “us” and “our” mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term “the Bank” when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of “–” indicates not meaningful or not applicable.

Credit Suisse at a glance

Credit Suisse

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients and to high-net-worth individuals worldwide, as well as to private clients in Switzerland. Founded in 1856, today we have a global reach with operations in over 50 countries and 46,000 employees from approximately 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture diverse growth opportunities around the world. We serve our diverse clients through our two divisions, which cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

Private Banking & Wealth Management

Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients we serve ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across diverse asset classes and investment styles, serving governments, institutions, corporations and individuals worldwide.

Investment Banking

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client-driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with Private Banking & Wealth Management to provide clients with customized financial solutions.

Operating environment

Global economic activity remained robust in 4Q13. Equity markets ended the quarter stronger and volatility remained at low levels. Government bond yields remained stable. The performance of the US dollar against most major currencies was mixed in 4Q13.

ECONOMIC ENVIRONMENT

The global economic environment was robust in 4Q13. The negative effects of a government shutdown in the US during October on US economic growth were limited. Leading indicators in the US remained at relatively high levels and improved further. Indicators for the labor and housing market in the US continued to show further strength. The mild recovery in the Eurozone continued, though there was a growing divergence between the accelerated growth in Germany and the weaker data in France towards the end of the year. In the emerging markets, China displayed further signs of growth stabilizing at robust levels, while business confidence in the manufacturing sectors of Russia and Brazil was more muted.

At its meeting in mid-December 2013, the US Federal Reserve (Fed) decided to reduce the pace of its monthly asset purchases from USD 85 billion to USD 75 billion effective as of January 2014. It also continued to signal its intent to keep the federal funds rate low for the foreseeable future. The European Central Bank

(ECB) cut its main refinancing rate in early November in reaction to very low inflation rates in the Eurozone. In Latin America, central banks pursued diverging courses, with Mexico and Chile lowering rates and Brazil increasing them for the sixth time in 2013. In Asia, Indonesia and India raised rates further, while central banks in Eastern Europe left rates largely unchanged.

Global equity markets had positive returns in 4Q13. Developed markets, led by Japan, the US and Germany, continued to outperform emerging markets despite good performance from China and India (refer to the charts "Equity markets"). All global sectors had gains during the quarter. In general, the more cyclical sectors such as IT, industrials and consumer discretionary continued to outperform the global market reflecting the improved global growth outlook. Equity market volatility, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), continued at low levels for most of the quarter. Risk appetite increased and the Credit Suisse Hedge Fund Index increased 4.2% in 4Q13.

Yield curves

Bond yields for most currencies increased slightly during the quarter.

Benchmark bond yields moved slightly higher in 4Q13 (refer to the charts "Yield curves"). The US debt ceiling debate in October temporarily increased market uncertainties and kept bond yields lower; however, once an agreement on the debt ceiling was reached, improving economic data helped to push global benchmark bond yields higher again. With the global improvement of macroeconomic indicators and a supportive liquidity market, credit markets posted a good performance in 4Q13 (refer to the chart "Credit spreads"). Emerging market sovereign bonds were more volatile, especially in local currency, mainly as a result of exchange rate volatility.

US dollar performance in 4Q13 against most major currencies was mixed. The euro, Swiss franc and British pound appreciated against the US dollar, helped by signs of economic recovery in Europe. However, commodity currencies such as the Australian and Canadian dollars weakened, as growth in both countries remained weak. The Japanese yen continued to weaken against the US dollar as higher US interest rates provided the US dollar with support. Currencies of certain emerging market economies, such as the Brazilian real, the South African rand and the Turkish lira weakened. The Chinese yuan continued its strengthening trend against the US dollar.

Commodity markets were mixed in 4Q13. In the first half of the quarter, commodity prices declined, partly driven by seasonality and higher bond yields. In the second half, the overall commodity index recovered, driven by oil and gas markets as well as industrial metals which benefited from recovering economic growth and strengthening demand. In contrast, gold prices declined during November and December as concerns about the Fed's tapering of future asset purchases resulted in further investment outflows.

Credit spreads

With the global improvement of macroeconomic data, credit spreads tightened in 4Q13.

SECTOR ENVIRONMENT

After outperforming the broader market in the beginning of the quarter, European bank stocks increased 8% in 4Q13, in line with global equity markets as measured by the MSCI World index, while North American bank stocks increased 9% (refer to the charts “Equity Markets”).

In private banking, clients maintained a cautious investment stance, with cash deposits remaining high despite the low interest rates. The low interest rate environment continued to adversely impact earnings. Although the Swiss National Bank (SNB) reiterated concerns about the build-up of imbalances in mortgage and real estate markets in Switzerland, Swiss mortgage rates remained at low levels. Overall the wealth management sector continued to adapt to further industry-specific regulatory changes.

For investment banking, global equity trading volumes increased compared to 3Q13, driven by higher volumes across

European and US cash equities and equity derivatives. Compared to 4Q12, volumes were higher across European cash equities, but weaker across US cash equities and equity derivatives. Global announced mergers and acquisitions (M&A) volumes decreased compared to 3Q13 and 4Q12 as the pace of new announcements decreased in December. Global completed M&A volumes increased compared to 3Q13 and remained stable versus 4Q12. Global equity underwriting volumes increased significantly versus both 3Q13 and 4Q12, driven by increased initial public offering (IPO) issuance activity levels. Global debt underwriting volumes decreased compared to both 3Q13 and 4Q12. US fixed income volumes decreased compared to 3Q13 with lower corporate and mortgage-backed volumes partially offset by higher volumes of federal agency and stable treasuries. Compared to 4Q12, weaker federal agency and mortgage-backed volumes were partially offset by higher volumes of treasuries and corporates.

Credit Suisse

In 4Q13, we recorded a net loss attributable to shareholders of CHF 476 million. Diluted loss per share was CHF (0.37) and return on equity attributable to shareholders was (4.5)%. For 2013, we had net income attributable to shareholders of CHF 2,326 million and return on equity attributable to shareholders was 5.7%, up from 3.9% in 2012.

As of the end of 4Q13, our CET1 ratio under Basel III was 15.7% and 10.0% on a look-through basis. Our risk-weighted assets increased slightly compared to 3Q13 to CHF 273.8 billion.

INFORMATION AND DEVELOPMENTS

Format of presentation and changes in reporting

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

As of January 1, 2013, the Basel Committee on Banking Supervision (BCBS) Basel III framework was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our calculations of 4Q12 capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

References to Swiss leverage exposure refer to the aggregate of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments, including cash collateral netting reversals and derivative add-ons.

▶ Refer to “Swiss leverage ratio” in II – Treasury, risk, balance sheet and off-balance sheet – Capital management – Capital metrics under Swiss requirements for further information.

Beginning in 1Q13, assets within the Private Banking & Wealth Management and Investment Banking segments exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

Strategic development of our businesses

In 4Q13, we created non-strategic units within our Investment Banking and Private Banking & Wealth Management divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and positions and to shift resources to focus on our strategic businesses and growth initiatives. The results are disclosed separately within the divisional results and we have implemented a governance structure to accelerate position and expense reductions. We believe this new reporting structure, which clearly delineates between strategic and non-strategic results, enhances the transparency of our financial disclosures while providing increased focus on our strategic businesses within the business divisions and on the Group level. Prior periods have been restated to conform to the current presentation.

We decided to retain these non-strategic units within the divisions, rather than establishing a single non-strategic unit, so as to benefit from senior management’s expertise and focus. The non-strategic units have separate management within each division and a clear governance structure through the establishment of a Non-Strategic Oversight Board. As a result, we expect that the establishment of

these non-strategic units will drive further reductions in Swiss leverage exposure and risk-weighted assets. It is also expected to free up capital for future growth in Private Banking & Wealth Management,

accelerating a move towards a more balanced capital allocation between Investment Banking and Private Banking & Wealth Management, and to allow us to return capital to our shareholders.

Credit Suisse reporting structure

Credit Suisse					
Core Results				Non-controlling interest without significant economic interest	
Private Banking & Wealth Management			Investment Banking		Corporate Center
Strategic results	Wealth Management Clients	Corporate & Institutional Clients	Asset Management		
Non-strategic results	Non-strategic unit Private Banking & Wealth Management		Non-strategic unit Investment Banking	Non-strategic items	

Non-strategic activities and positions are defined as:

- activities with significant capital absorption under new regulations and returns below expectations;
- activities with significant leverage exposures identified for de-risking;
- activities no longer feasible or economically attractive under emerging regulatory frameworks;
- assets and liabilities of business activities we are winding down;
- infrastructure associated with activities deemed non-strategic or redundant; and
- other items reported in the Corporate Center, which we do not consider representative of our core performance.

In Private Banking & Wealth Management, we established a non-strategic unit which includes positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

In Investment Banking, we transferred into the divisional non-strategic unit our fixed income wind-down portfolio, legacy rates business, primarily capital instruments that are not compliant with the Basel III capital framework and capital-intensive structured positions, legacy funding costs associated with non-Basel

III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

In the Corporate Center, we separately present non-strategic items, which we do not consider representative of our core performance. Such items include the valuation impacts from movements in credit spreads on our own liabilities carried at fair value, certain business realignment costs and IT architecture simplification expenses, certain litigation provisions, business wind-down costs and impairments not included in the divisional non-strategic units and legacy funding costs associated with non-Basel III compliant debt instruments not included in the results of the Investment Banking non-strategic unit. Corporate Center items previously disclosed as adjustments from our reported to underlying results are now presented as non-strategic items, with the exception of business divisions' non-strategic realignment costs, which beginning 4Q13 are reported directly in the relevant divisional non-strategic unit. Strategic business division realignment costs will continue to be reported in the Corporate Center.

Discontinued operations

The Private Banking & Wealth Management division completed the sale of our Customized Fund Investment Group (CFIG) business in January 2014, and in 4Q13 announced the sale of our domestic private banking business booked in Germany to ABN AMRO, which is expected to close in the course of 2014. These transactions qualify for discontinued operations treatment in 4Q13 under US generally accepted principles (US GAAP), and revenues and expenses of these businesses and the relevant gains on disposal are classified as discontinued operations in the Group's

consolidated statements of operations. In the Private Banking & Wealth Management segment, the gains and expenses related to the business disposals are included in the segment's non-strategic results. The reclassification of the revenues and expenses from the segment results to discontinued operations for reporting at the Group level is effected through the Corporate Center. Prior periods for the Group's results have been restated to conform to the current presentation.

Significant litigation matters in 2013

On March 21, 2014, we entered into an agreement with the Federal Housing Finance Agency (FHFA) to settle litigation claims related to the sale of approximately USD 16.6 billion of residential mortgage-backed securities between 2005 and 2007. Under the terms of the agreement, we will pay USD 885 million to resolve all claims in two pending securities lawsuits filed by the FHFA against us.

For 2013, we recorded litigation provisions of CHF 600 million in our Private Banking & Wealth Management division in connection with the US tax matter, where we continue to work towards a resolution, including CHF 175 million in connection with the settlement with the SEC in February 2014.

► Refer to "Note 29 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information on litigation.

Board of Directors and Management changes

As of December 31, 2013, Tobias Guldemann stepped down from the Executive Board and his position as Chief Risk Officer. Effective January 1, 2014, Joachim Oechslin assumed the role of Chief Risk Officer and joined the Executive Board.

Capital distribution proposal

At the Annual General Meeting on May 9, 2014, the Board of Directors will propose a cash distribution of CHF 0.70 per share to be paid out of reserves from capital contributions for the financial year 2013. The distribution out of reserves from capital contributions will be free of Swiss withholding tax and will not be subject to income tax for Swiss resident individuals holding the shares as a private investment.

Evolution of legal entity structure

Since 2012, we have been developing a program to evolve the Group's legal entity structure to meet developing and future regulatory requirements. This has been prepared in discussion with our primary regulator Swiss Financial Market Supervisory Authority FINMA (FINMA) and will address regulations in Switzerland, the US and the UK with respect to future requirements for global recovery and resolution planning by systemically important banks such as Credit Suisse that will facilitate resolution of an institution in the event of a failure. We expect these changes will result in a substantially less complex and more efficient operating infrastructure for the Group. Furthermore, Swiss banking law provides for the possibility of a limited reduction in capital requirements in the event of an improvement in resolvability which this program intends to deliver.

The key components of the program are:

- in Switzerland we plan to create a subsidiary for our Swiss-booked business (primarily wealth management, retail and corporate and institutional clients as well as the product and sales hub in Switzerland);
- our UK operations will remain the hub of our European investment banking business and we are planning that our two principal UK operating subsidiaries will be consolidated into a single subsidiary. The program will look to align non-European business to the appropriate entities in the Americas and in Asia Pacific;
- in the US, our existing broker-dealer subsidiary is planned to remain a subsidiary of our existing US holding company. The holding company will hold its US-based operating businesses and be subject to the Fed final rules for supervision of foreign banking operations in the US. Additionally, subject to US regulatory approvals, our US derivatives business, currently booked in one of the above noted UK operating subsidiaries, is anticipated to be transferred to the existing US broker-dealer;
- we intend to create a separately capitalized global infrastructure legal entity in Switzerland and a US subsidiary of the above noted US holding company. In principle, these will include all Shared Services functions; and
- once the legal framework is finalized, we plan to issue bail-in eligible debt out of the existing Group holding company to enable a single point of entry bail-in resolution strategy.

The program has been approved by the Board of Directors of the Group, but is subject to final approval by FINMA. Implementation of the program is underway, with a number of key components expected to be implemented from mid-2015.

Allocations and funding

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements, which aim to reflect the pricing structure of unrelated third-party transactions, govern the compensation received by one segment for generating revenue or providing services on behalf of another. Corporate services and business support are provided by the Shared Services area and these costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

We centrally manage our funding activities, with new securities for funding and capital purposes issued primarily by the Bank which lends funds to our operating subsidiaries and affiliates. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital. Transfer pricing, using market rates, is used to record net revenues and expenses relating to this funding in each of the segments, and our businesses are also credited to the extent they provide long-term stable funding.

► Refer to "Allocations and funding" in II – Operating and financial review – Core Results in the Credit Suisse Annual Report 2012 for further information.

Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

► Refer to “Note 1 – Summary of significant accounting policies” and “Note 27 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 4Q13, 47% and 33% of our total assets and total liabilities, respectively, were measured at fair value.

While the majority of our level 3 assets are recorded in Investment Banking, some are recorded in Private Banking & Wealth Management’s Asset Management business, specifically certain private equity investments. Total assets at fair value recorded as level 3 decreased by CHF 0.1 billion during 4Q13, primarily due to a decrease in other investments and loans held-for-sale, partially offset by an increase in loans. The decrease in other investments primarily reflected net sales partially offset by realized and unrealized gains. The decrease in loans held-for-sale primarily reflected net sales and net settlements. The increase in loans primarily reflected net issuances.

Our level 3 assets, excluding assets attributable to noncontrolling interests and assets of consolidated variable interest entities (VIEs) that are not risk-weighted assets under the Basel framework, were CHF 29.8 billion, compared to CHF 29.2 billion as of the end of 3Q13. As of the end of 4Q13, these assets comprised 4% of total assets and 8% of total assets measured at fair value, both adjusted on the same basis, compared to 3% and 7%, respectively, as of the end of 3Q13.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition, however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

Regulatory developments and proposals

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

In October 2013, the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency and the

Federal Deposit Insurance Corporation issued a proposed rule to introduce the Basel III liquidity coverage ratio (LCR) in the US, applicable to certain large US banking organizations. The US LCR proposal is generally consistent with the LCR published by the BCBS in January 2013, but it is stricter in certain respects and would be phased in between January 1, 2015 and January 1, 2017. If Credit Suisse is required to form an intermediate holding company under the Fed’s proposed rules for foreign banking organizations, it might be required to comply with the US LCR proposal.

On November 14, 2013, staff of the US Commodity Futures Trading Commission (CFTC) published an advisory stating that CFTC “transaction-level” requirements, such as mandatory clearing, mandatory exchange trading, real-time public reporting and external business conduct, apply to a swap between a non-US swap dealer, such as Credit Suisse International (CSI) or Credit Suisse Securities Europe Limited (CSSEL), and another non-US person if the swap is arranged, negotiated or executed by US personnel or agents of the non-US swap dealer. This advisory is currently scheduled to go into effect on September 15, 2014, and the CFTC has requested public comments on it. If this advisory is not rescinded or modified, it could result in some market disruption and impose significant compliance costs on CSI and CSSEL. In light of this advisory, on December 4, 2013, several US financial trade associations filed a lawsuit in the US District Court for the District of Columbia challenging the advisory and the CFTC’s July 2013 guidance regarding the cross-border application of its swaps rules. The lawsuit asks the court to vacate the July 2013 guidance and enjoin the CFTC from enforcing its rules outside the US. Depending on the outcome of this lawsuit, the extent to which CSI and CSSEL are subject to CFTC rules may differ significantly from the framework currently applicable under the CFTC’s guidance. We are monitoring the progress of the lawsuit and assessing our contingency plans for the different scenarios that could result from it.

On November 20, 2013, the Swiss Federal Council approved the final Ordinance Against Excessive Compensation (Compensation Ordinance). The Compensation Ordinance came into effect on January 1, 2014 and implements key elements of the so-called “Minder Initiative”. It imposes restrictions and requirements on board and executive compensation for Swiss public companies, implements criminal sanctions in certain cases of intentional non-compliance and is generally intended to strengthen shareholder rights. Specifically, the board members, board chairperson and the compensation committee members must now be directly elected by shareholders annually, for the first time at the annual general meeting in 2014.

On December 10, 2013, US regulators released the final version of the so-called “Volcker Rule”, which limits the ability of banking entities to sponsor or invest in certain private equity or hedge funds and to engage in certain types of proprietary trading. The final rule extended the end of the conformance period for the Volcker Rule until July 21, 2015 (with the possibility of extensions under certain circumstances), by which time financial institutions subject to the rule must bring their activities and investments into compliance. We are analyzing the final rule, assessing how it

affects our businesses, and re-initiating an implementation program to come into compliance.

On December 11, 2013, the European Parliament reached a political agreement with the European Council Presidency on a legislative proposal for a directive establishing a framework for the recovery and resolution of credit institutions and investment firms, known as the Bank Recovery and Resolution Directive. The framework will give national regulators wide-ranging powers (notably new bail-in powers) to intervene where an entity is likely to fail in order to avoid adverse effects on wider financial stability. It is anticipated that the Bank Recovery and Resolution Directive will enter into force on January 1, 2015 and the bail-in powers will become effective on January 1, 2016 at the latest. Our EU subsidiaries will be affected to varying degrees.

On December 13, 2013, the Swiss Federal Council launched a consultation process for a new act to be named Financial Market Infrastructure Act (FMIA). The core purpose of the FMIA is to adjust Swiss regulation of financial market infrastructure and derivatives trading to market developments and international requirements, in particular the regulation on over-the-counter (OTC) Derivatives, Central Counterparties and Trade Repositories (also known as the European Market Infrastructure Regulation, or EMIR) of the EU. In addition, it proposes to amend the Swiss Federal Law on Banks and Savings Banks of November 8, 1934, as amended (Bank Law), seeking to subject parent companies of financial groups or conglomerates and certain unregulated companies of the group domiciled in Switzerland to the Swiss resolution regime that applies to banks. If enacted, Credit Suisse Group would, and certain of its unregulated subsidiaries could, become subject to the Swiss bank resolution regime and the resolution authority of FINMA. The consultation process on FMIA is scheduled to run until March 31, 2014.

On December 18, 2013, the UK Financial Services Act 2013 (Banking Reform Act) was enacted. The Banking Reform Act provides for the creation of a “retail ring-fence” that will prohibit large retail deposit banks from engaging in a broad range of investment and other banking activities in the same entity. However, it is expected that our Private Banking & Wealth Management business in the UK may benefit from the de minimis exemption from the retail ring-fence requirements which is anticipated to exclude certain banks holding core deposits of below £25 billion. The Banking Reform Act also introduces certain other reforms, including requirements for primary loss absorbing capacity in order to facilitate the use of the new bail-in tool, which is itself introduced by the Banking Reform Act. The Banking Reform Act will also establish a more stringent regulatory regime for certain senior personnel of the bank, as well as create a new criminal offense for reckless mismanagement in the banking industry. Secondary legislation to fully implement the Banking Reform Act is expected to be completed by May 2015. The governance rules and the bail-in tool will impact our UK entities, such as CSI and CSSEL.

On December 18, 2013, the Swiss Federal Council adopted the mandate for negotiations regarding a revision of the taxation of savings agreement between the EU and Switzerland. The envisaged revision should bring the agreement in line with the planned revision of the EU

Savings Directive and close current perceived gaps. Switzerland and the EU have officially started negotiations on January 17, 2014.

On December 20, 2013, the CFTC made comparability determinations for some swap dealer entity-level and transaction-level requirements for certain jurisdictions, including the EU. As a result of these determinations, CSI and CSSEL may comply with local EU rules in lieu of certain CFTC requirements regarding risk management, internal controls, chief compliance officer duties and reports, recordkeeping, swap confirmations, portfolio reconciliation and compression, and swap valuation. In addition, the CFTC issued two no-action letters deferring certain CFTC requirements, most notably with respect to trade reporting for swaps with non-US persons, thereby allowing the CFTC more time to consider the comparability of similar rules in other jurisdictions. If the CFTC does not ultimately grant substituted compliance for reporting of swaps with non-US persons, CSI and CSSEL could incur significant operational costs and may lose swap business from non-US clients who do not wish for their trades to be reported to US regulators.

On January 14, 2014, the European Commission, Parliament and Council reached a political agreement on a revised EU Markets in Financial Instruments Directive (MiFID II) and related regulation (MiFIR), which are likely to be enacted in 1Q14. It is expected that the provisions thereof will have to be implemented in the member states and come into effect during the second half of 2016. Although the final text has not yet been published, the European Commission announced that an agreement has been reached to introduce an EU harmonized regime for the cross-border provision of investment services to professional and eligible counterparties in the EU. This new regime for granting access to EU markets for financial services providers based in third countries, including Switzerland, would be based on the positive equivalence determination of the relevant third country jurisdiction by the European Commission and allow for an EU wide passport when providing professional services. Third country financial services providers would be able to continue to provide services and activities to such clients in member states in accordance with national regimes over a transitional period of three years and then pending European Commission’s equivalence decisions.

On January 16, 22 and 27, 2014, specified types of interest rate swaps and index credit default swaps (CDS) were deemed “made available to trade” by CFTC-registered swap execution facilities (SEFs). As a result, effective 30 days after those determinations, those types of swaps must be executed on a SEF or designated contract market, unless an exception or exemption applies. It is possible that certain classes of market participants, including some clients of Credit Suisse, will not be prepared to satisfy this requirement, which could result in market disruption and a loss of swap trading revenue for Credit Suisse.

▶ Refer to “Regulation and supervision” in I – Information on the company in the Credit Suisse Annual Report 2012 for further information.

▶ Refer to “Regulatory developments and proposals” in II – Treasury, risk, balance sheet and off-balance sheet – Capital management – Regulatory capital framework and “Liquidity and funding management” in II – Treasury, risk, balance sheet and off-balance sheet for further information.

Core Results

In 4Q13, we recorded a net loss attributable to shareholders of CHF 476 million. Net revenues were CHF 5,920 million and total operating expenses were CHF 6,396 million.

In our strategic businesses, we reported income from continuing operations before taxes of CHF 1,448 million and in our non-strategic businesses we reported a loss from continuing operations before taxes of CHF 1,977 million in 4Q13.

RESULTS OVERVIEW

Core Results net revenues of CHF 5,920 million increased 5% compared to 4Q12.

In our strategic businesses, net revenues were stable at CHF 6,038 million compared to 4Q12 with stable net revenues in Private Banking & Wealth Management, reflecting higher transaction- and performance based revenues and higher recurring commissions and fees, offset by lower other revenues and lower net interest income. A decrease in Investment Banking was driven by lower client trading activity in the fixed income business and lower advisory results, partially offset by increased revenues from our equity sales and trading and equity underwriting businesses.

In our non-strategic businesses, net revenue losses of CHF 118 million in 4Q13 improved from net revenue losses of CHF 456 million in 4Q12. Improved results in Investment Banking were driven by portfolio valuation gains, particularly in our legacy fixed income wind-down portfolio, reflecting various portfolio management measures, while improved results in Corporate Center were primarily due to lower fair value losses from movements in own credit spreads in 4Q13. An increase in Private Banking & Wealth Management reflected higher investment-related gains partially offset by lower revenues resulting from the sale of businesses.

► Refer to "Private Banking & Wealth Management", "Investment Banking" and "Corporate Center" for further information.

Provision for credit losses of CHF 53 million in 4Q13 primarily reflected net provisions of CHF 44 million in Private Banking & Wealth Management and CHF 8 million in Investment Banking.

Total operating expenses of CHF 6,396 million were up 24% compared to 4Q12, primarily reflecting 53% higher general and administrative expenses and 6% higher compensation and benefits. In strategic businesses, total operating expenses of CHF 4,554 million increased 5% from 4Q12, mainly reflecting higher compensation and benefits, driven by higher discretionary performance-related compensation expense due to variable compensation accruals, reflecting 2013 full-year results, and higher fee-based revenues. In non-strategic businesses total operating expenses of CHF 1,842 million increased 122% from 4Q12, primarily reflecting higher general and administrative expenses, partially offset by a decrease in compensation and benefits. The increase in general and administrative expenses was primarily due to significantly higher litigation provisions in 4Q13. We recorded provisions of CHF 806 million in connection with mortgage-related matters, including in connection with the agreement with the Federal Housing Finance Agency (FHFA) on March 21, 2014 to settle certain litigation relating to mortgage-backed securities, and CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014.

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Wealth Management Clients and Corporate & Institutional Clients, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Asset Management, results are allocated based on the location of the investment advisors and sales teams. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled.

Income tax benefit of CHF 63 million recorded in 4Q13 included the impact of the geographical mix of results, an income tax benefit of CHF 367 million relating to tax deductions arising from participation valuations and the re-measurement of existing deferred tax assets on net operating losses due to changes in forecasted earnings, partially offset by a tax charge of CHF 278 million relating to a valuation allowance recognized on existing deferred tax assets in respect of one of the Group's entities in the UK. Overall, net deferred tax assets decreased CHF 148 million to CHF 5,791 million as of the end of 4Q13 compared to 3Q13. Deferred tax assets on net operating losses decreased by CHF 227 million to CHF 1,380 million during 4Q13. The Core Results effective tax rate was 11.9% in 4Q13, compared to 53.5% in 3Q13.

► Refer to "Note 21 – Tax" in III – Condensed consolidated financial statements – unaudited for further information.

For the full year 2013, net income attributable to shareholders was CHF 2,326 million, up 72% compared to 2012. Net revenues were CHF 25,217 million, up 8% compared to 2012.

Strategic net revenues were stable at CHF 25,543 million compared to 2012 with stable net revenues for Private Banking & Wealth Management, reflecting higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and other revenues. Strategic net revenues for Investment Banking were slightly lower,

reflecting decreased revenues in fixed income sales and trading and advisory revenues, partially offset by increased revenues in equity sales and trading and debt and equity underwriting.

In our non-strategic businesses, net revenue losses of CHF 326 million in 2013 improved from net revenue losses of CHF 2,242 million in 2012. An improvement in Corporate Center mainly reflected fair value losses of CHF 315 million from movements in own credit spreads in 2013 compared to fair value losses from movements in own credit spreads of CHF 2,939 million in 2012. Improved results in Investment Banking were driven by portfolio valuation gains and lower funding costs, while a decrease in Private Banking & Wealth Management was due to lower recurring commissions and fees and lower transaction- and performance-based revenues, reflecting the impact of sales of non-strategic businesses during the course of the year.

Provision for credit losses decreased 2%, reflecting decreases in Private Banking & Wealth Management that were partly offset by increases in Investment Banking.

Compensation and benefits decreased 9%, due to lower discretionary performance-related compensation expense and lower salary expense, reflecting lower headcount. General and administrative expenses increased 19%, reflecting substantially higher litigation provisions in Investment Banking and Private Banking & Wealth Management.

¹ Core Results include the results of our integrated banking business, excluding revenues and expenses in respect of noncontrolling interests without SEI.

² Calculated using income after tax denominated in CHF; assumes tax rate of 30% in 4Q13 and 3Q13, 25% in 4Q12 and capital allocated at 10% of average risk-weighted assets.

³ Represents risk-weighted assets on a fully phased-in "look-through" basis.

Cost savings and strategy implementation

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve our cost structure. We target cost savings of CHF 3.8 billion by the end of 2014 and more than CHF 4.5 billion by the end of 2015. These targets are measured against our annualized 6M11 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

The majority of the expected future savings is expected to be realized from shared infrastructure and support services across the Group, mainly through the consolidation of fragmented and duplicate functions globally and the continued consolidation of IT applications and functions.

We have also targeted further savings within our two operating divisions. Within Private Banking & Wealth Management, we expect to deliver cost benefits from the creation of the integrated Private Banking & Wealth Management division, exiting a number

of small non-strategic markets, repositioning select non-profitable onshore operations, rationalization of front office and support functions, including simplification of our operating platform, streamlining of the offshore affluent and Swiss client coverage model and from announced divestitures. Within Investment Banking, we expect to deliver cost benefits from the restructuring of our rates business, the initiatives already completed in 2012, from continuing to review and realize efficiencies across business lines and geographic regions and from continuing to refine our business mix and align resources with highest returning opportunities. We expect to incur approximately CHF 1.4 billion of business realignment costs associated with these measures during the course of 2014 to 2015.

We incurred CHF 131 million of business realignment costs associated with these measures in 4Q13.

► Refer to "Cost savings and strategy implementation" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2012 for further information.

Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component.

The variable component reflects the performance-based variable compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

► Refer to "Compensation and benefits" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2012 for further information.

Variable compensation for 2013

Part of deferred compensation for 2013 was awarded in the form of Contingent Capital Awards (CCA). The CCA plan is a new deferred compensation plan for Executive Board members, managing directors and directors. These awards convey similar rights and risks to those of certain of the contingent capital instruments that have been issued by us in the market. As CCA qualify as additional tier 1 capital of the Group, their vesting and the form of distribution to employees upon settlement is subject to approval by FINMA. Prior to settlement, CCA are subject to being cancelled in full upon specified triggering events, including the Group's Basel III common equity tier 1 (CET1) ratio falling below specified levels, or a determination by FINMA that cancellation of the CCA and other similar capital instruments is necessary, or that we require public sector capital support, to prevent us from becoming insolvent.

Personnel

Headcount at the end of 4Q13 was 46,000, down 400 from 3Q13 and down 1,400 from 4Q12. The decrease in 4Q13 reflected headcount reductions in Investment Banking and Private Banking & Wealth Management resulting from our cost efficiency initiatives.

Number of employees by division

end of	4Q13	3Q13	4Q12
Number of employees by division (full-time equivalents)			
Private Banking & Wealth Management	26,000	26,100	27,300
Investment Banking	19,700	20,000	19,800
Corporate Center	300	300	300
Number of employees	46,000	46,400	47,400

Key performance indicators

Our key performance indicators (KPIs) for the Group and for our Private Banking & Wealth Management and Investment Banking divisions reflect our strategic plan, the regulatory environment and the market cycle. With the revised presentation of strategic and non-strategic results for the Group, our stated KPIs are measured on the basis of reported results rather than on the basis of underlying results as was the case in prior periods beginning in 1Q13.

We believe the execution of our strategic initiatives including the run-off of non-strategic operations, will enable us achieve our targets over a three to five year period across market cycles.

► Refer to "Key performance indicators" in Private Banking & Wealth Management and Investment Banking results for further information on divisional KPIs.

Collaboration revenues

Beginning 2Q13, collaboration revenues are calculated as the percentage of the Group's net revenues represented by the aggregate collaboration revenues arising when more than one of the Group's divisions participate in a transaction.

Additionally, within the Private Banking & Wealth Management division, collaboration revenues include revenues arising from cross-selling and client referral activities between the Wealth Management Clients and Corporate & Institutional Clients businesses on the one hand and the Asset Management and the securities trading and sales businesses on the other hand. Prior period measures of collaboration revenues were not materially impacted by this change and have not been restated. Collaboration revenues are measured by a dedicated governance structure and implemented through an internal revenue sharing structure. Only the net revenues generated by a transaction are considered. Position risk related to trading revenues, private equity and other investment-related gains, valuation adjustments and centrally managed treasury revenues are not included in collaboration revenues.

Key performance indicators

Our KPIs are targets to be achieved over a three to five year period across market cycles. As such, year to date results may be more meaningful than individual quarterly results. Our KPIs are assessed annually as part of our normal planning process and may be revised to reflect our strategic plan, the regulatory environment and market and industry trends.

in / end of	Target	4Q13	2013	2012
Growth (%)				
Collaboration revenues	18 – 20% of net revenues	18.6	17.7	18.6
Efficiency and performance (%)				
Total shareholder return (Credit Suisse) ¹	Superior return vs. peer group	(1.3)	26.0	4.8
Total shareholder return of peer group ^{1,2}	–	6.5	26.7	49.2
Return on equity attributable to shareholders (annualized)	Above 15%	(4.5)	5.7	3.9
Core Results cost/income ratio	Below 70%	108.0	85.4	91.1

Look-through Swiss Core Capital ratio	Above 10%	10.6	10.6	9.0

¹ Source: Bloomberg. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value at the beginning of the period.

² The peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase, Société Générale and UBS. The total shareholder return of this peer group is calculated as a simple, unweighted average of the return reported by Bloomberg for each of the members of the peer group.

Private Banking & Wealth Management

In 4Q13, we reported income before taxes of CHF 424 million and net revenues of CHF 3,429 million.

In our strategic businesses, we reported income before taxes of CHF 1,048 million and net revenues of CHF 3,260 million. Compared to 4Q12, income before taxes increased 2%, with higher transaction- and performance-based revenues, higher recurring commissions and fees, lower net interest income and slightly higher operating expenses.

In our non-strategic businesses, we reported a loss before taxes of CHF 624 million reflecting higher litigation

provisions in 4Q13 in connection with the US tax matter. In 3Q13, we reported income before taxes of CHF 210 million, which included gains from the sale of former Asset Management businesses.

For 2013, we reported income before taxes of CHF 3,240 million and net revenues of CHF 13,442 million. In our strategic businesses, we reported income before taxes of CHF 3,627 million and net revenues of CHF 12,434 million. In our non-strategic businesses, we reported a loss before taxes of CHF 387 million and net revenues of CHF 1,008 million.

KEY PERFORMANCE INDICATORS

We target a divisional cost/income ratio of 65% for the Private Banking & Wealth Management division. In 4Q13, the cost/income ratio was 86.4%, up 16 percentage points compared to 4Q12 and up 18 percentage points compared to 3Q13. The cost/income ratio for our strategic results was 67.0% in 4Q13, stable compared to 4Q12 and down five percentage points compared to 3Q13.

We also target net new asset growth of 6% for both the Wealth Management Clients and Asset Management businesses. In 4Q13, the annualized quarterly growth rates in Wealth Management Clients and Asset Management were 0.9% and (0.6)%, respectively.

Strategic results

OVERVIEW

Our strategic results comprise businesses from Wealth Management Clients, Corporate & Institutional Clients and Asset Management.

4Q13 results

In 4Q13, our strategic businesses reported income before taxes of CHF 1,048 million and net revenues of CHF 3,260 million.

Net revenues were 11% higher compared to 3Q13 largely driven by significant seasonal performance fees. Compared to 4Q12, net revenues were stable due to higher transaction- and performance-based revenues and higher recurring commissions and fees, offset by lower other revenues and lower net interest income. Provision for credit losses was CHF 27 million on a net loan portfolio of CHF 212 billion. Total operating expenses were slightly higher compared to 3Q13 and 4Q12.

Full-year 2013 results

In 2013, our strategic businesses reported income before taxes of CHF 3,627 million and net revenues of CHF 12,434 million.

Net revenues were stable compared to 2012, with higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and lower other revenues. Provision for credit losses was CHF 82 million in 2013 on a net loan portfolio of CHF 212 billion. Total operating expenses were stable compared to 2012 reflecting slightly lower compensation and benefits offset by higher commission expenses.

² Includes the impact of an operational risk add-on of CHF 1.6 billion in 4Q13.

RESULTS DETAIL

The following provides a comparison of our 4Q13 strategic results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

YoY: Stable at CHF 3,260 million

Net revenues were stable as higher transaction- and performance-based revenues and higher recurring commissions and fees were offset by lower other revenues and lower net interest income. Transaction- and performance-based revenues were higher, mainly driven by higher performance fees and carried interest, higher placement fees, and higher sales and trading income, partially offset by lower revenues from integrated solutions. Higher recurring commissions and fees reflected higher asset management fees, higher investment account and services fees, higher banking services fees, and higher discretionary mandate management fees, partially offset by lower investment product management fees. Lower other revenues mainly reflected an impairment related to Asset Management Finance LLC (AMF) of CHF 68 million in 4Q13, compared to 4Q12 gains of CHF 45 million relating to the sale of Wincasa and gains of CHF 25 million related to a recovery case in Corporate & Institutional Clients, partially offset by a 4Q12 impairment of CHF 16 million related to AMF. In a low

interest rate environment, net interest income decreased due to significantly lower deposit margins and slightly lower loan margins on higher average deposit and loan volumes.

QoQ: Up 11% from CHF 2,934 million to CHF 3,260 million

Higher net revenues primarily reflected significantly higher transaction- and performance-based revenues, partially offset by lower other revenues. Significantly higher transaction- and performance-based revenues reflected seasonally higher performance fees and carried interest and higher placement and transaction fees. Lower other revenues reflected the impairment of CHF 68 million related to AMF in 4Q13 compared to an impairment of CHF 18 million in 3Q13. Stable recurring commissions and fees mainly reflected lower investment product management fees offset by higher asset management fees. Stable net interest income reflected slightly lower deposit and loan margins on stable average deposit and loan volumes.

Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

YoY: Down 43% from CHF 47 million to CHF 27 million

Provision for credit losses decreased. Wealth Management Clients recorded net provisions of CHF 18 million and Corporate & Institutional Clients recorded net provisions of CHF 9 million in 4Q13.

WEALTH MANAGEMENT CLIENTS

Net revenues

Net interest income

YoY: Down 5% from CHF 804 million to CHF 760 million

Lower net interest income reflected significantly lower deposit margins on slightly higher average deposit volumes and lower loan margins on higher average loan volumes.

QoQ: Stable at CHF 760 million

Stable net interest income reflected stable deposit margins and slightly lower loan margins on stable average deposit and loan volumes.

Recurring commissions and fees

YoY: Up 8% from CHF 685 million to CHF 742 million

Higher recurring commissions and fees reflected higher investment account and services fees, higher banking services fees and higher discretionary mandate management fees, partially offset by slightly lower investment product management fees.

QoQ: Stable at CHF 742 million

Recurring commissions and fees were stable, reflecting lower investment product management fees partially offset by slightly higher investment account and services fees.

QoQ: Up 108% from CHF 13 million to CHF 27 million

Provision for credit losses was lower in Wealth Management Clients and higher in Corporate & Institutional Clients. In 3Q13, Wealth Management Clients recorded net provisions of CHF 21 million while Corporate & Institutional Clients recorded a release of provisions of CHF 8 million relating to a small number of large cases.

Operating expenses

Compensation and benefits

YoY: Up 3% from CHF 1,202 million to CHF 1,242 million

Slightly higher compensation and benefits reflected higher discretionary performance-related compensation driven by higher fee-based revenues.

QoQ: Up 3% from CHF 1,205 million to CHF 1,242 million

Slightly higher compensation and benefits reflected higher discretionary performance-related compensation driven by higher fee-based revenues.

General and administrative expenses

YoY: Down 4% from CHF 781 million to CHF 750 million

Lower general and administrative expenses reflected lower travel and entertainment and lower advertising and marketing costs.

QoQ: Up 3% from CHF 726 million to CHF 750 million

Slightly higher general and administrative expenses reflected higher professional services fees, higher advertising and marketing and higher travel and entertainment costs.

Transaction- and performance-based revenues

YoY: Down 5% from CHF 584 million to CHF 554 million

Lower transaction- and performance-based revenues reflected lower revenues from integrated solutions.

QoQ: Stable at CHF 554 million

Stable transaction- and performance-based revenues reflected semi-annual performance fees from Hedging-Griffo and higher brokerage and product issuing fees, offset by lower foreign exchange client business.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation.

¹ Reflects gains of CHF 41 million in 2Q12 related to the sale of a non-core business from the integration of Clariden Leu.

² Net revenues divided by average assets under management.

Gross margin

Our gross margin was 104 basis points in 4Q13, five basis points lower compared to 4Q12, mainly reflecting a continued adverse interest rate environment and 5% higher average assets under management. Compared to 3Q13, the gross margin was one basis point lower.

CORPORATE & INSTITUTIONAL CLIENTS

Net revenues

Net interest income

YoY: Down 7% from CHF 299 million to CHF 278 million

The decrease reflected significantly lower deposit margins on higher average deposit volumes, partially offset by higher loan margins on higher average loan volumes.

QoQ: Stable at CHF 278 million

Stable net interest income reflected lower deposit margins on higher average deposit volumes and slightly lower loan margins on stable average loan volumes.

Recurring commissions and fees

YoY: Down 5% from CHF 114 million to CHF 108 million

The decrease in recurring commissions and fees primarily reflected lower investment product management fees, partially offset by higher investment account and services fees.

QoQ: Down 8% from CHF 117 million to CHF 108 million

Recurring commissions and fees included lower banking services and lower investment product management fees partially offset by higher investment account and services fees.

Transaction- and performance-based revenues

YoY: Stable at CHF 102 million

Stable transaction- and performance-based revenues reflected higher trading and sales income and higher foreign exchange client business, offset by lower revenues from integrated solutions.

QoQ: Down 3% from CHF 105 million to CHF 102 million

Lower transaction- and performance-based revenues reflected lower brokerage and product issuing fees.

ASSET MANAGEMENT

Net revenues

Fee-based revenues

YoY: Up 38% from CHF 559 million to CHF 769 million

The increase reflected higher performance fees, asset management fees and private equity placement fees. Higher performance fees were recognized primarily from single manager hedge funds and Hedging-Griffo. The higher asset management fees reflected higher average assets under management in alternative products.

QoQ: Up 95% from CHF 394 million to CHF 769 million

The increase primarily reflected higher performance fees, carried interest on realized private equity gains and private equity placement fees. The increase in performance fees primarily reflected annual performance fees from single manager hedge funds and semi-annual fees from Hedging-Griffo.

Investment-related gains/(losses)

YoY: Up 27% from CHF 15 million to CHF 19 million

In 4Q13, gains of CHF 19 million reflected gains in hedge fund investments. In 4Q12, gains of CHF 15 million reflected gains in hedge fund investments and the real estate sector.

QoQ: Up from CHF (2) million to CHF 19 million

In 4Q13, gains of CHF 19 million reflected gains in hedge fund investments.

Equity participations and other gains/(losses)

YoY: Down from CHF 35 million to CHF (68) million

In 4Q13, we recognized an impairment of CHF 68 million related to AMF. In 4Q12, we recognized a gain of CHF 45 million from the sale of Wincasa which was partially offset by an impairment of CHF 16 million related to AMF.

QoQ: Down from CHF (18) million to CHF (68) million

In 4Q13, we recognized the impairment related to AMF. In 3Q13, we recognized an impairment of CHF 18 million related to AMF.

Non-strategic results

OVERVIEW

Our non-strategic businesses for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

4Q13 results

In 4Q13, our non-strategic businesses reported a loss before taxes of CHF 624 million reflecting substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014. In 3Q13, we reported income before taxes of CHF 210 million, which included gains from the sale of former Asset Management businesses.

Full-year 2013 results

For 2013, our non-strategic businesses reported a loss before taxes of CHF 387 million compared to CHF 401 million in 2012. Net revenues of CHF 1,008 million were significantly lower compared to 2012 due to lower recurring commissions and fees and lower transaction- and performance-based revenues, reflecting the impact of sales of non-strategic businesses during the course of the year. The results in 2013 also reflected the CHF 237 million gain on the sale of our exchange-traded funds (ETF) and secondary private equity businesses and investment-related gains of CHF 128 million, compared to the gain of CHF 384 million in 2012 on the sale of our ownership interest in Aberdeen.

Provision for credit losses was CHF 70 million in 2013 on a net loan portfolio of CHF 4 billion.

Total operating expenses were higher compared to 2012, mainly reflecting substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014, and higher professional services fees related to the sale of businesses, partially offset by lower compensation and benefits.

RESULTS DETAIL

The following provides a comparison of our 4Q13 non-strategic results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues

YoY: Up 74% from CHF 97 million to CHF 169 million

The increase in net revenues reflected higher investment-related gains partially offset by lower revenues resulting from the sale of businesses. Investment-related gains were CHF 26 million in 4Q13 compared to losses of CHF 90 million primarily related to the planned sale of certain private equity investments in 4Q12. These gains were partially offset by lower asset management and placement fees, primarily reflecting the sales in 3Q13 of our ETF and secondary private equity businesses.

QoQ: Down 56% from CHF 382 million to CHF 169 million

The decrease mainly reflected equity participation gains of CHF 237 million from the sales of our ETF and secondary private equity businesses in 3Q13.

Operating expenses

YoY: Up 300% from CHF 194 million to CHF 776 million

Higher operating expenses reflected substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement

with the SEC in February 2014, and higher professional services fees resulting from the sale of former Asset Management businesses, partially offset by lower commission and compensation expenses relating to the sales. We also recognized a goodwill impairment of CHF 12 million resulting from the creation of the non-strategic reporting unit in 4Q13.

QoQ: Up 414% from CHF 151 million to CHF 776 million

The higher litigation provisions, the goodwill impairment charge and higher professional services fees relating to the sales of businesses were partially offset by lower compensation expense.

Business developments

In December 2013, we completed the sales of a limited partnership interest and a private equity business resulting in a reduction in our consolidated assets of approximately CHF 450 million and Basel III risk-weighted assets of approximately CHF 340 million.

In January 2014, we completed the sale of CFG, our private equity fund of funds and co-investment business, to Grosvenor Capital Management. We expect to recognize a gain of approximately CHF 90 million in 1Q14.

In December 2013, we announced the sale of our domestic private banking business booked in Germany to ABN AMRO. This transaction is expected to close in the course of 2014.

Assets under management

In **4Q13**, assets under management of CHF 1,282.4 billion increased 1.1% compared to the end of 3Q13, as positive market movements and net new assets were partially offset by adverse foreign exchange-related movements and structural effects mostly arising from disposals of businesses in the division.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 1.7 billion in 4Q13 with continued strong inflows from emerging markets, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 4.0 billion in 4Q13. Asset Management reported net asset outflows of CHF 0.5 billion in 4Q13, mainly from multi-asset class solutions and fixed income products partially offset by inflows in index strategies and credit products.

Assets under management of CHF 44.4 billion in our non-strategic portfolio relate to businesses we are exiting, including CFGI and our domestic private banking business booked in Germany.

In **2013**, assets under management of CHF 1,282.4 billion increased 2.5% compared to 2012, reflecting net new assets of CHF 32.1 billion and positive market movements, partially offset by adverse foreign exchange-related movements and structural effects.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 18.9 billion, particularly from inflows from emerging markets and our ultra-high-net-worth individual (UHNWI) client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported strong net new assets of CHF 8.8 billion. Asset Management reported significant net new assets of CHF 15.0 billion, mainly from credit, index strategies and hedge fund products, partially offset by outflows from fixed income.

In our non-strategic portfolio, assets under management declined 47.6% to CHF 44.4 billion mainly reflecting the sale of our ETF and secondary private equity businesses.

¹ Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and non-strategic businesses.

Investment Banking

In 4Q13, Investment Banking reported a loss before taxes of CHF 564 million. Results reflect solid performance in our strategic businesses and an increased loss before taxes in our non-strategic businesses, driven by significantly increased litigation provisions in connection with mortgage-related matters. In our strategic businesses, net revenues declined 5% compared to 4Q12, as lower client trading activity in our fixed income business and lower advisory results offset improved performance from our equities franchise. Compared to 3Q13, our strategic businesses delivered resilient revenues reflecting solid results in our equities and underwriting franchises. Our non-strategic businesses reported a loss before taxes of CHF 1,032 million, including litigation provisions in connection with the agreement with the Federal Housing Finance Agency (FHFA) on March 21, 2014 to settle certain litigation relating to mortgage-backed securities.

For full year 2013, total Investment Banking income before taxes was CHF 1,719 million, with net revenues of CHF 12,565 million. Our income before taxes decreased by 14% while revenues remained stable. We also reported

lower leverage levels and capital usage from 2012. Our strategic businesses reported income before taxes of CHF 3,853 million and net revenues of CHF 13,164 million. Our non-strategic businesses reported a loss before taxes of CHF 2,134 million, including the litigation provisions in connection with the agreement with the FHFA and net revenue losses of CHF 599 million.

As of the end of 4Q13, we reported total assets of USD 565 billion, exceeding our Investment Banking balance sheet target of less than USD 600 billion of assets by year-end 2013. Additionally, we reported Swiss leverage exposure of USD 812 billion, exceeding our target of less than USD 840 billion by year-end 2013.

In 2013, we reduced risk-weighted assets under Basel III by USD 11 billion to USD 176 billion as of the end of 4Q13, compared to our year-end target of USD 175 billion. Business reductions of USD 27 billion were partially offset by increases of USD 10 billion from methodology changes and parameter updates and an operational risk add-on in 4Q13 of USD 6 billion.

Strategic results

OVERVIEW

4Q13 results

In 4Q13, our strategic businesses reported income before taxes of CHF 468 million and net revenues of CHF 2,795 million.

Fixed income sales and trading revenues declined from 4Q12, reflecting continued low client trading activity, particularly in global macro products, which includes our rates, foreign exchange and commodities businesses. Revenues also declined compared to 3Q13 due to lower client trading activity in leveraged finance, emerging markets and rates businesses.

Equity sales and trading revenues increased from 4Q12 reflecting continued market leadership, higher equity values and increased client activity. Compared to 3Q13, equity sales and trading revenues were stable.

Underwriting and advisory results were lower compared to 4Q12 as robust equity underwriting performance was offset by lower debt underwriting and advisory revenues. Compared to 3Q13, revenues increased substantially driven by strong equity underwriting issuance activity as well as higher debt underwriting and advisory results.

Compensation and benefits increased compared to both 4Q12 and 3Q13 driven by higher discretionary performance-related compensation expense. Total other operating expenses declined 7% compared to 4Q12 and were stable compared to 3Q13.

Results in 4Q13 were impacted by the weakening of the average rate of the US dollar against the Swiss franc, compared to 4Q12 and 3Q13, which adversely impacted revenues and favorably impacted expenses. Compared to 4Q12, revenues declined 5% and total operating expenses increased 6% in Swiss francs while revenues declined 2% and total operating expenses increased 9% in US dollars. Compared to 3Q13, revenues were up 2% and total

operating expenses increased 12% in Swiss francs while revenues increased 5% and expenses increased 14% in US dollars.

As of the end of 4Q13, we reported risk-weighted assets under Basel III of USD 156 billion reflecting further progress in reducing our risk-weighted assets. We reduced risk-weighted assets under Basel III by USD 8 billion from 4Q12, as USD 22 billion of business reductions offset increases of USD 8 billion due to methodology changes and parameter updates and an operational risk add-on of USD 6 billion in 4Q13. Additionally, we reported Swiss leverage exposure in our strategic businesses of USD 725 billion, a reduction of USD 46 billion, or 6% from 3Q13.

Full-year 2013 results

The transformed Investment Banking division delivered strong profitability in 2013 on slightly lower revenues, a reduced cost base and lower leverage and capital usage.

Revenues in our strategic businesses were slightly lower as strong performance in our equities, credit and underwriting franchises were offset by lower rates and advisory results. Fixed income sales and trading revenues declined 15% compared to 2012, reflecting difficult trading conditions. Specifically, global macro products revenues declined substantially, primarily in rates, driven by reduced client activity and low trading volumes throughout the year. Emerging markets revenues also declined driven by lower financing and origination activity due to less favorable market conditions. Securitized products revenues decreased as higher asset finance origination was more than offset by lower agency security trading activities. These declines were partially offset by strong global credit products revenues driven by significantly higher revenues in our leveraged finance franchise.

¹ Calculated using income after tax denominated in USD; assumes tax rate of 30% in 4Q13 and 3Q13, 28% in 2013, 25% in 4Q12 and 2012 and capital allocated at 10% of average risk-weighted assets.

Equity sales and trading revenues increased 13%, reflecting continued market leadership and increased client activity notwithstanding reduced balance sheet usage. The gains included higher revenues in derivatives, systematic market making and cash equities, partially offset by lower prime services and fund-linked products results. Underwriting and advisory results increased reflecting significantly higher debt underwriting results. In addition equity underwriting results were significantly higher, driven by substantially higher revenues from IPOs and follow-on offerings. These increases were partially offset by significantly lower advisory revenues, reflecting a decline in the total industry M&A fee pool.

Total operating expenses were CHF 9,300 million, down 7% from 2012. Compensation and benefits of CHF 5,326 million decreased by CHF 555 million, or 9%, from 2012, primarily reflecting lower deferred compensation expense from prior-year awards as 2012 included 2011 Partner Asset Facility (PAF2) expenses of CHF 411 million. Total other operating expenses of CHF 3,974 million were down 3% compared to 2012.

The following provides a comparison of our strategic 4Q13 results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues**Debt underwriting**

YoY: Down 5% from CHF 508 million to CHF 483 million

The decrease was primarily due to lower results in leveraged finance as market share gains were more than offset by lower global high yield industry-wide issuance volumes. The decrease was partially offset by higher investment grade results, as market share gains more than offset lower global industry-wide issuance volumes. We also had higher structured credit revenues.

QoQ: Up 14% from CHF 424 million to CHF 483 million

The increase was due to higher revenues from leveraged finance, despite slightly lower high yield industry volumes. Results included lower investment grade revenues as an increase in global industry-wide issuance volumes was more than offset by lower market share. We also had lower emerging markets revenues driven by weaker structured lending results.

Equity underwriting

YoY: Up 64% from CHF 167 million to CHF 274 million

The improvement was driven by strong performance across most major equity markets. We had substantially higher revenues from IPOs, as higher global industry-wide issuance activity more than offset lower market share. We also had significantly higher revenues from follow-on offerings driven by higher global industry-wide issuance activity.

QoQ: Up 112% from CHF 129 million to CHF 274 million

The increase was due to substantially higher revenues from IPOs and improved convertibles results reflecting significantly higher global industry-wide issuance activity partly offset by lower market share in both products. We also had higher revenues from follow-on offerings reflecting stronger global industry-wide issuance activity.

Advisory and other fees

YoY: Down 37% from CHF 307 million to CHF 194 million

The decrease was primarily due to significantly lower M&A fees reflecting a decline in the total industry fee pool. We also had lower global completed M&A market share.

QoQ: Up 28% from CHF 152 million to CHF 194 million

The increase was driven by higher M&A fees as an improvement in global industry-wide completed M&A volumes more than offset lower global completed M&A market share.

Fixed income sales and trading

YoY: Down 32% from CHF 1,180 million to CHF 808 million

Fixed income revenues declined significantly reflecting lower client trading volumes particularly in global macro products, primarily due to substantially weaker global rates revenues, as well as lower foreign exchange and commodities results. Lower revenues in securitized products were driven by lower client trading activity in non-agency and agency securities, partially offset by stronger asset finance performance due to higher origination volumes. Corporate lending revenues also declined. Emerging markets revenues decreased, as an improved financing environment was offset by lower trading and origination activity in Brazil and Europe, Middle East and Africa (EMEA). Global credit products revenues were slightly lower reflecting higher trading activity offset by lower origination results. At the end of the quarter, fixed income risk-weighted assets under Basel III totaled USD 91 billion, a reduction of USD 10 billion, or 10%, from a year ago.

QoQ: Down 22% from CHF 1,030 million to CHF 808 million

Fixed income sales and trading revenues declined, reflecting reduced client trading activity. The decrease primarily reflected lower global credit products revenues due to significantly lower leveraged finance revenues. Emerging markets revenues were

also lower reflecting volatile trading conditions in Brazil and EMEA. Global macro products revenues declined, primarily driven by lower rates revenues, though commodities and foreign exchange performance improved from subdued 3Q13 levels. The declines were partially offset by strong securitized products results driven by significantly higher agency performance. Fixed income risk-weighted assets under Basel III increased USD 3 billion, or 3%, from 3Q13.

Equity sales and trading

YoY: Up 19% from CHF 900 million to CHF 1,070 million

Increased results reflected continued market leadership, higher equity values and increased client activity. The increase was primarily driven by substantially higher derivatives revenues due to robust client activity and strong performance in Asia. We also had higher results from systematic market making driven by improved global coverage and significant market events including quantitative easing in Japan and strong US equity markets that resulted in higher global equity volumes. Cash equities revenues increased driven by market share gains and more favorable trading conditions. Prime services revenues were resilient, albeit lower, reflecting sustained market leadership and increased client balances.

QoQ: Down 2% from CHF 1,095 to CHF 1,070 million

Results reflected higher derivatives revenues driven by higher industry trading volumes and higher cash equities results due to both higher industry volumes and market share gains in the US. These increases were offset by lower prime services revenues reflecting lower financing revenues.

Operating expenses

Compensation and benefits

YoY: Up 17% from CHF 1,139 million to CHF 1,335 million

The increase was driven by higher discretionary performance-related compensation expense due to variable compensation accruals reflecting 2013 full-year results. This increase was partially offset by lower salaries, reflecting lower headcount.

QoQ: Up 22% from CHF 1,094 million to CHF 1,335 million

The increase was primarily due to higher discretionary performance-related compensation expense due to variable compensation accrual based on full-year results.

General and administrative expenses

YoY: Down 2% from CHF 810 million to CHF 790 million

The decrease was primarily driven by lower technology costs and lower litigation provisions.

QoQ: Up 5% from CHF 754 million to CHF 790 million

The increase was primarily driven by higher legal and other professional fees. These increases were partially offset by lower litigation provisions.

Non-strategic results

OVERVIEW

Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily capital instruments that are not compliant with the Basel III capital framework and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

4Q13 results

In 4Q13, we reported a loss before taxes of CHF 1,032 million and net revenue losses of CHF 127 million. Total operating expenses increased compared to 4Q12 and 3Q13, reflecting significantly higher litigation provisions, primarily in connection with mortgage-related matters of CHF 806 million. Net revenue losses were lower compared to 4Q12 and 3Q13, driven by portfolio valuation gains, particularly in our legacy fixed income wind-down portfolio, reflecting various portfolio management measures.

As of the end of 4Q13, we reported risk-weighted assets under Basel III of USD 20 billion, down USD 3 billion from the end of 4Q12. This compares to our target of USD 6 billion by year-end 2015. Additionally, we reported Swiss leverage exposure of USD 87 billion, a reduction of USD 6 billion, or 6% from 3Q13. This compares to our target of USD 24 billion in Swiss leverage exposure by year-end 2015.

Full-year 2013 results

Results reflected net revenue losses of CHF 599 million in 2013 compared to net revenue losses of CHF 827 million in 2012, driven by portfolio valuation gains and lower funding costs. Total operating expenses increased, primarily driven by significantly higher litigation provisions. In 2013, we reduced risk-weighted assets under Basel III by USD 3 billion to USD 20 billion from the end of 2012.

The following provides a comparison of our non-strategic 4Q13 results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues

YoY: Up 56% from CHF (286) million to CHF (127) million

We had reduced net revenue losses driven by significant valuation gains, particularly in our fixed income wind-down portfolio and our legacy rates business, driven by various portfolio management measures. At the end of the quarter, risk-weighted assets under Basel III totaled USD 20 billion, a reduction of USD 3 billion.

QoQ: Up 35% from CHF (196) million to CHF (127) million

Results reflected reduced net revenue losses driven by significant valuation gains, particularly in our fixed income wind-down portfolio and legacy rates business, driven by various portfolio management measures. At the end of the quarter, risk-weighted assets under Basel III of USD 20 billion were flat compared to 3Q13.

Total operating expenses

YoY: Up 442% from CHF 167 million to CHF 905 million

The increase was driven by significantly higher litigation provisions, primarily CHF 806 million in connection with mortgage-related matters in 4Q13, including in connection with the March 2014 FHFA settlement.

QoQ: Up 268% from CHF 246 million to CHF 905 million

The increase was driven by higher other operating expenses in 4Q13, reflecting the higher litigation provisions.

Corporate Center

In 4Q13, we recorded a loss before taxes of CHF 389 million, primarily reflecting fair value losses from movements in own credit spreads and business realignment costs. These negative impacts were partially offset by gains from the sale of real estate.

For 2013, we reported a loss before taxes of CHF 1,455 million, primarily reflecting business realignment costs, fair value losses from movements in own credit spreads, reclassifications to discontinued operations and gains from the sale of real estate.

RESULTS OVERVIEW

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Corporate Center separately presents non-strategic items, which management does not consider representative of our core performance.

► Refer to "Strategic development of our businesses" in Credit Suisse – Information and developments – Format of presentation and changes in reporting for further information on non-strategic items.

In 4Q13, losses before taxes of CHF 389 million improved from losses before taxes of CHF 824 in 4Q12, mainly reflecting litigation provisions of CHF 227 million in 4Q12, as well as lower fair value losses on own credit spreads in 4Q13 of CHF 202 million compared to CHF 376 million in 4Q12. The fair value losses on own long-term vanilla debt reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. 4Q13 results also included lower business realignment costs of CHF 131 million, compared to CHF 285 million in 4Q12. The business realignment costs primarily consisting of severance and other compensation expenses relating to Group-wide cost efficiency

initiatives. The improvement in 4Q13 results was partly offset by lower gains on sale of real estate of CHF 68 million in 4Q13, compared to CHF 151 million in 4Q12 and IT architecture simplification costs of CHF 69 million in 4Q13.

For full year 2013, losses before taxes of CHF 1,455 million improved from losses before taxes of CHF 3,889 million in 2012, mainly reflecting lower fair value losses on own credit spreads of CHF 315 million, compared to CHF 2,939 million in 2012. 2013 results also included lower business realignment costs of CHF 394 million, compared to CHF 680 million in 2012. Business realignment costs in 2013 primarily consisted of severance and other compensation expenses relating to Group-wide cost efficiency initiatives. 2012 results included litigation provisions related to National Century Financial Enterprises, with no litigation provisions in Corporate Center in 2013. The improvement in 2013 results was partly offset by lower gains on sale of real estate of CHF 68 million in 2013, compared to CHF 533 million in 2012 and IT architecture simplification costs of CHF 128 million in 2013. Additionally, Corporate Center's 2013 results included losses of CHF 220 million comprising reclassifications to discontinued operations of revenues and expenses relating to the sales of our ETF and secondary private equity businesses and of our CFG business, which was completed in January 2014, and the announced sale of our domestic private banking business booked in Germany.

² Represents litigation provisions related to National Century Financial Enterprises.

³ Represents legacy funding costs associated with non-Basel III compliant debt instruments.

⁴ Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of ETF, secondary private equity and CFG businesses and the announced sale of domestic private banking business booked in Germany.

Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

Assets under management

We had net asset inflows from continuing operations of CHF 4.2 billion during 4Q13 and assets under management from continuing operations of CHF 1,253.4 billion as of the end of 4Q13.

Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic business are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

Assets under management from continuing operations of CHF 1,253.4 billion increased 1.1% compared to the end of 3Q13, as positive market movements and net new assets were partially offset by adverse foreign exchange-related movement. Compared to the end of 4Q12, assets under management from continuing operations were CHF 55.6 billion higher, reflecting net new assets of CHF 36.1 billion and positive market movements, partially offset by adverse foreign exchange-related movements and structural effects.

► Refer to "Private Banking & Wealth Management" in I – Credit Suisse results and "Note 36 – Assets under management" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

¹ Excludes our portion of assets under management from our former investment in Aberdeen.

² Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic businesses.

Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management. Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

We recorded net new assets from continuing operations of CHF 4.2 billion in 4Q13.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 1.7 billion in 4Q13 with continued strong inflows from emerging markets partially offset by Western

European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 4.0 billion in 4Q13. Asset Management reported net asset outflows of CHF 0.5 billion in 4Q13, mainly from multi-asset class solutions and fixed income products partially offset by inflows in index strategies and credit products. In our non-strategic portfolio, net asset outflows of CHF 1.0 billion reflected the exit of certain businesses, of which CHF 0.2 billion were classified as discontinued operations.

In 2013, we recorded net new assets of CHF 36.1 billion from continuing operations.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 18.9 billion, particularly with inflows from emerging markets and our UHNWI client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported strong net new assets of CHF 8.8 billion. Asset Management reported significant net new assets of CHF 15.0 billion, mainly from credit and index strategies and hedge funds products, partially offset by outflows from fixed income. In our non-strategic portfolio, net asset outflows of CHF 5.9 billion reflected the exit of certain businesses, of which CHF 4.0 billion were classified as discontinued operations.

Treasury, risk, balance sheet and off-balance sheet

50 Liquidity and funding management

53 Capital management

64 Risk management

75 Balance sheet and off-balance sheet

Liquidity and funding management

During 4Q13, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

Overview

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Our internal liquidity risk management framework is subject to review and monitoring by the FINMA, other regulators and rating agencies.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2012 for further information on liquidity and funding management.

Liquidity risk management framework

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. The assets included in the liquidity pool consist of cash, high grade bonds, major market equity securities and other liquid securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top rated counterparties. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

In December 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a LCR and a net stable funding ratio (NSFR).

In January 2014, the BCBS issued final LCR rules and disclosure requirements that are to be implemented as part of banks' regular disclosures after January 1, 2015. The BCBS also issued proposed revisions to the NSFR, which are expected to become the minimum standard by the previously announced date of January 1, 2018.

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and should always be at least 100%.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as the primary tool to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. We estimate that our NSFR under the current FINMA framework was in excess of 100% as of the end of 4Q13. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions.

In November 2012, the Swiss Federal Council adopted a liquidity ordinance that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making in Switzerland. Both quantitative and qualitative requirements are consistent with existing FINMA liquidity requirements. In January 2014, the Swiss Federal Council and FINMA proposed revisions to the liquidity ordinance to include final Basel III LCR rules. Under the proposed revisions, systemically relevant banks like us will be subject to an initial minimum LCR requirement of 100% beginning in 2015.

Funding sources and uses

We fund our balance sheet primarily through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency, tenor, geography and maturity and whether they are secured or unsecured. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

These assets include our liquidity pool, which as of the end of 4Q13 based on our internal model was CHF 140 billion, net of a stress test level haircut. The liquidity pool consisted of CHF 55 billion of cash held at major central banks, primarily the Fed, SNB and the ECB, CHF 52 billion of securities issued by governments and government agencies, primarily of the US, Britain, France, Germany and Switzerland and CHF 33 billion of other highly liquid assets including equity securities that form part of major indices. As of December 31, 2013, our internal model included the application of a stress test level haircut equal to approximately 60% of the market value of non-cash positions in the liquidity pool. The haircut reflects our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 22% as of the end of 4Q13 compared to 24% as of the end of 3Q13, reflecting a slight increase in loans and a slight decrease in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as a haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 297 billion as of the end of 4Q13 compared to CHF 298 billion as of the end of 3Q13, reflecting a stable customer deposit base in Private Banking & Wealth Management. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

► Refer to the chart "Balance sheet funding structure" and "Balance sheet and off-balance sheet" for further information.

Balance sheet funding structure

as of December 31, 2013 (CHF billion)

Reverse repurchase agreements	84	Match funded	117	Repurchase agreements
Encumbered trading assets	73		40	Short positions
Funding-neutral assets ¹	122		122	Funding-neutral liabilities ¹

Loans ⁴	243		143	demand
			64	savings
			28	fiduciary
Other illiquid assets	131		130	Long-term debt
			47	Total equity
Assets	873			873

¹ Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.

² Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.

³ Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.

⁴ Excludes loans with banks.

⁵ Excludes due to banks and certificates of deposit.

Debt issuances and redemptions

Our long-term debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekar-institute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

In 4Q13, we issued CHF 1.2 billion of senior debt. As of the end of 4Q13, our long-term debt outstanding was CHF 130 billion, which included senior and subordinated instruments. We had CHF 35 billion and CHF 14.3 billion of structured notes and covered bonds outstanding, respectively, as of the end of 4Q13 compared to CHF 36.6 billion and CHF 15.2 billion, respectively, as of the end of 4Q12.

► Refer to "Capital issuances and redemptions" in Capital management for information on issuances of capital notes, all of which constitute subordinated debt instruments.

As of the end of 4Q13, the weighted average maturity of long-term debt was 6.7 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Credit ratings

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 1.4 billion, CHF 3.4 billion and CHF 4.8 billion, respectively, as of the end of 4Q13, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

As of the end of 4Q13, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

► Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Liquidity and funding management in the Credit Suisse Annual Report 2012 for further information.

Capital management

As of the end of 4Q13, our capital position remained strong with a CET1 ratio of 15.7% under Basel III and 10.0% on a look-through basis. Our RWA under Basel III increased slightly to CHF 273.8 billion compared to 3Q13. Our Swiss leverage ratio was 5.1%.

REGULATORY CAPITAL FRAMEWORK

Overview

Effective January 1, 2013, the Basel II.5 framework, under which we operated in 2012, was replaced by the Basel III framework, which was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder (Swiss Requirements). Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business. Our 4Q12 calculations of capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

► Refer to “Capital management” in III – Treasury, Risk, Balance sheet and Off-balance sheet and “Regulation and supervision” in I – Information on the company in the Credit Suisse Annual Report 2012 for further information.

Capital structure under Basel III

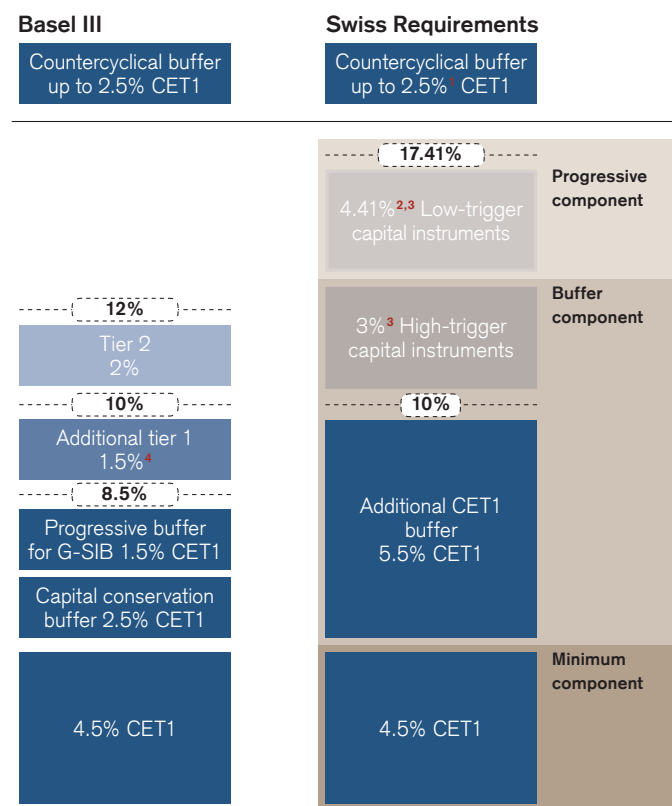

The BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

► Refer to the table “Basel III phase-in requirements for Credit Suisse” for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum CET1 requirement is 4.5% of risk-weighted assets (RWA).

In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends or make discretionary bonus payments or other earnings distributions.

Capital frameworks for Credit Suisse

¹ As of September 30, 2013, banks are required to hold CET1 capital in the amount of 1% of RWA pertaining to mortgage loans that finance residential property in Switzerland.

² The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2014, FINMA reduced our 2013 progressive component requirement from 4.41% to 3.66%.

³ Counts towards Basel III minimum requirements as tier 1 or tier 2 capital depending on the quality of the underlying instruments.

⁴ Additional tier 1 instruments must provide for principal loss absorption through a conversion into common equity or write-down feature. The trigger for such a conversion or write-down must include a CET1 ratio of at least 5.125%.

Basel III phase-in requirements for Credit Suisse

Effective January 1, for the applicable year	2013	2014	2015	2016	2017	2018	2019

Capital instruments subject to phase out				Phased out over a 10-year horizon beginning 2013 through 2022			

¹ Indicates transition period.

² Includes goodwill and other intangible assets, certain deferred tax assets and participations in financial institutions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified us as a G-SIB and requires us to maintain a 1.5% progressive buffer.

CET1 capital is subject to certain regulatory deductions and other adjustments to common equity, including the deduction of deferred tax assets for tax-loss carry-forwards, goodwill and other intangible assets and investments in banking and finance entities.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital. To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125%.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1 or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through January 1, 2019.

Beginning January 1, 2013, capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, will be phased out at their effective maturity date, generally the date of the first step-up coupon.

Swiss Requirements

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss Requirements. Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in from 2013 through 2018 and are fully effective January 1, 2019. The legislation on capital requirements builds on Basel III, but in respect of systemically relevant banks goes beyond its minimum standards, including requiring us, as a systemically relevant bank, to have the following minimum, buffer and progressive components.

► Refer to the chart "Swiss capital and leverage ratio phase-in requirements for Credit Suisse" for Swiss capital requirements and applicable effective dates during the phase-in period.

The minimum requirement of CET1 capital is 4.5% of RWA.

The buffer requirement is 8.5% and can be met with additional CET1 capital of 5.5% of RWA and a maximum of 3% of high-trigger capital instruments. High-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below 7%.

The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business. For 2014, FINMA set our progressive component requirement at 3.66%, a decrease from the 4.41% applicable in 2013, reflecting our size and market share based on data as of year-end 2012. The progressive component requirement may be met with CET1 capital or low-trigger capital instruments. In order to qualify, low-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below a specified percentage, the lowest of which may be 5%. In addition, until the end of 2017, the progressive

component requirement may also be met with high-trigger capital instruments. Both high and low-trigger capital instruments must comply with the Basel III minimum requirements for tier 2 capital (including subordination, point-of-non-viability loss absorption and minimum maturity).

Similar to Basel III, the Swiss Requirements include a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth. In February 2013, upon the request of the SNB, the Swiss Federal Council activated the countercyclical capital buffer, which was effective September 30, 2013 and requires banks to hold CET1 capital in the amount of 1% of their RWA pertaining to mortgage loans that finance residential property in Switzerland. As of December 31, 2013, our countercyclical buffer was CHF 144 million, which is equivalent to an additional requirement of 0.05% of CET1 capital. In January 2014, upon the request of SNB, the Swiss Federal

Council further increased the countercyclical buffer from 1% to 2%, effective June 30, 2014.

We also measure Swiss Core Capital and Swiss Total Capital. Swiss Core Capital consists of CET1 capital and tier 1 participation securities, which FINMA advised may be included with a haircut of 20% until December 31, 2018 at the latest, and may include certain other Swiss adjustments. Our Swiss Total Capital consists of Swiss Core Capital, high-trigger capital instruments and low-trigger capital instruments.

As of January 1, 2013, we must also comply with a leverage ratio applicable to Swiss systemically relevant banks (Swiss leverage ratio). This leverage ratio must be at least 24% of each of the respective minimum, buffer and progressive component requirements. Since the ratio is defined by reference to capital requirements subject to phase-in arrangements, the ratio will also be phased in.

Swiss capital and leverage ratio phase-in requirements for Credit Suisse

as of 2013

Excludes countercyclical buffer required as of September 30, 2013.

¹ The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2014, FINMA reduced our 2019 progressive component requirement from 4.41% to 3.66%, which leads to a total capital ratio requirement of 16.66% and a Swiss leverage ratio requirement of 4.0%.

Risk measurement models

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR) and, since January 1, 2013, advanced credit valuation adjustment (CVA). The incremental risk charge is a regulatory capital charge for default and migration risk on positions in the trading books and is intended to complement additional standards being applied to the VaR modeling framework, including stressed VaR. Stressed VaR replicates a VaR calculation on the Group's current portfolio taking into account a one-year observation period relating to significant financial stress and helps reduce the pro-cyclicality of the minimum capital requirements for market risk. Advanced CVA covers the risk of mark-to-market losses on the expected counterparty risk arising from changes in a counterparty's credit spreads.

FINMA, in line with Bank for International Settlements (BIS) requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period. For the purposes of this measurement, backtesting exceptions are calculated using a subset of actual daily trading revenues that includes only the impact of daily movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions. In 4Q13, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

With FINMA approval, we have implemented a Comprehensive Risk Measure framework to calculate a capital charge covering all price risks (default, spread and correlation risk) within the credit correlation products within our trading book portfolio.

Effective January 1, 2013, FINMA introduced increased capital charges for mortgage loans that finance certain residential property in Switzerland (mortgage multiplier). These increased capital charges, which are applied for both BIS and FINMA purposes, will be phased in by January 1, 2019.

► Refer to "Market risk" in Risk management for further information on Credit Suisse's risk measurement models and backtesting exceptions.

Regulatory developments and proposals

In January 2014, the BCBS published the framework and disclosure requirements for the Basel III leverage ratio. The required Basel III leverage ratio, which seeks to measure tier 1 capital against exposure, is expected to be at least 3%. Although the effective date of the Basel III leverage ratio is not until 2018, banks will be required to disclose the ratio on a consolidated basis beginning in 2015, subject to implementation by national regulators.

In accordance with BCBS's G-SIB loss absorbency requirements and FINMA's capital adequacy disclosure requirements, banks with a balance sheet exceeding EUR 200 billion must publish annually 12 financial indicators, such as size and complexity. Depending on these financial indicators, the FSB will set the progressive buffer for G-SIBs. The reporting requirement is effective December 31, 2013 and disclosures must be made by April 30.

From January 1, 2014, the Capital Requirement Directive (CRD) IV package of legislation (comprising a directive and a regulation) will replace the current CRD directive with new measures implementing Basel III and other requirements. As part of the transition to CRD IV, the UK's Prudential Regulation Authority has reviewed the permissions of UK financial institutions, including those of our subsidiaries, to use their current internal modeling for capital calculation purposes as well as new models required for CRD IV compliance. The majority of the models for our subsidiaries were approved and certain models will require updates in line with latest BCBS guidance and regulatory feedback on modeling techniques.

The SNB has previously designated the Group as a financial group of systemic importance under applicable Swiss law. Following that designation, in December 2013, FINMA issued a decree specifying capital adequacy requirements addressed to the Bank on a stand-alone basis and the Bank and the Group, each on a consolidated basis as systemically relevant institutions. It also specified liquidity and risk diversification requirements for the Bank at the stand-alone level. The decree is expected to become effective in 1Q14.

CAPITAL ISSUANCES AND REDEMPTIONS

In December 2013, we issued USD 2.25 billion 7.5% tier 1 capital notes (7.5% tier 1 capital notes).

These notes, together with one other series of tier 1 capital notes and two series of tier 2 capital notes, which were issued in 3Q13, qualify as low-trigger capital instruments and have a write-down feature, which means that the full principal amount of the notes will be permanently written down to zero upon the occurrence of specified triggering events. These events occur when the amount of our CET1 ratio, together with an additional ratio described below that takes into account other outstanding capital instruments, falls below a specified level (5% for the tier 2 capital notes and 5.125% for the tier 1 capital notes). The write-down can only be prevented if FINMA, at our request, is satisfied that certain conditions exist and determines a write-down is not required. The capital notes will also be written down upon a non-viability event, which occurs when FINMA determines that a write-down is necessary, or that we require extraordinary public sector capital support, to prevent us from becoming insolvent, bankrupt or unable to pay a material amount of our debts, or other similar circumstances.

The capital ratio write-down triggers for each of the series of capital notes issued in 2013 take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert or be written down prior to the write-down of the respective 2013 capital notes. The amount of additional capital that is expected to be contributed by such conversion or write down is referred to as the Higher Trigger Capital Amount under the terms of the capital notes issued in 2013.

For the tier 2 capital notes as of the end of 4Q13, the Higher Trigger Capital Amount was CHF 10.0 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 3.7%. For the tier 1 capital notes as of the end of 4Q13, the Higher Trigger Capital Amount was CHF 7.7 billion and the Higher Trigger Capital Ratio was 2.8%.

► Refer to the table "BIS statistics – Basel III" for further information on the BIS statistics used to calculate such measures.

In October 2013, based on a prior agreement with an entity affiliated with Qatar Investment Authority, we exchanged such entity's holding of all of the CHF 2.5 billion 10% tier 1 capital notes and USD 1.72 billion of the 11% tier 1 capital notes into equivalent principal amounts of tier 1 high-trigger capital instruments. In addition, we redeemed USD 55 million of the 11% tier 1 capital notes for cash.

► Refer to "Related party transactions" in IV – Corporate Governance and Compensation – Corporate Governance – Banking relationships with members of the Board and Executive Board and related party transactions in our 2012 Annual Report for further information on the agreement to exchange.

In December 2013, we redeemed USD 1.5 billion of 8.25% subordinated tier 1 participation securities. Prior to the call and as advised by FINMA, these tier 1 participation securities formed part of Swiss Core Capital under Swiss Requirements, whereas under Basel III, these instruments were included in additional tier 1 instruments subject to phase out. Our remaining USD 1.5 billion of outstanding participation securities are similarly treated and we are reviewing a potential early call of them.

All of the issuances and redemptions effected in 2013 were approved by FINMA.

CAPITAL METRICS UNDER BASEL III

Regulatory capital and ratios – Group

Our CET1 ratio was 15.7% as of the end of 4Q13, compared to 16.3% as of the end of 3Q13, due to an increase in RWA and a decrease in CET1 capital. Our tier 1 ratio was 16.8% as of the end of 4Q13, compared to 17.0% as of the end of 3Q13. Our total capital ratio remained stable at 20.6% as of the end of 4Q13 compared to the end of 3Q13.

CET1 capital was CHF 43.0 billion as of the end of 4Q13 compared to CHF 43.8 billion as of the end of 3Q13, reflecting a net loss, a negative foreign exchange translation impact and a quarterly dividend accrual, partially offset by the impact of share-based compensation.

Additional tier 1 capital increased to CHF 3.1 billion, mainly due to the issuance of the 7.5% tier 1 capital notes. Tier 2 capital decreased slightly to CHF 10.2 billion as of the end of 4Q13.

Total eligible capital was stable at CHF 56.3 billion as of the end of 4Q13 compared to the end of 3Q13, reflecting the decrease in CET1 capital and the redemption of the 8.25% subordinated tier 1 participation securities, partially offset by the issuance of the 7.5% tier 1 capital notes.

RWA increased 2%, from CHF 269.3 billion as of the end of 3Q13 to CHF 273.8 billion as of the end of 4Q13, reflecting an increase in operational risk together with a minor increase in market risk, partially offset by a decrease in credit risk and a decrease resulting from foreign exchange translation.

The increase in operational risk resulted from revisions to the model to measure operational risk as of December 31, 2013 to include all litigation provisions, parameter updates and an add-on component relating to the aggregate range of reasonably possible litigation losses not covered by existing provisions.

The increase in market risk was driven by higher exposures, particularly within fixed income, impacting stressed VaR and incremental risk charges. This was partially offset by decreases in trading book mortgage securitization exposures, reduced regular VaR, particularly within securitized products and global credit products, and lower risks not covered by our VaR model following the inclusion of certain risk components into the modeled VaR.

The decrease in credit risk was driven by a decrease in CVA, primarily within Investment Banking, partially offset by an increase in credit risk within Investment Banking. CVA decreased following increased hedging during the period. The increase in Investment Banking credit risk primarily resulted from increases in lending exposures across various business areas, most notably from increased commitments extended by the leverage finance business, partially offset by decreases in secured financing and unsettled trades.

► Refer to the table "BIS statistics – Basel III" for further information.

► Refer to "Market risk", "Credit risk" and "Operational risk" in Risk management for further information.

Other regulatory disclosures

In connection with the implementation of Basel III, additional regulatory disclosures are required. Additional information on capital instruments, including main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base of the Group, subsidiary regulatory reporting, reconciliation requirements and Pillar 3 disclosures can be found on the Investor Relations website.

► Refer to https://www.credit-suisse.com/investors/en/regulatory_disclosures/index.jsp for additional information.

Net income/(loss)	(476)	454
Foreign exchange impact	(516)	(1,033)
Other	201 ¹	(71) ¹
Balance at end of period	42,989	43,780

¹ Reflects the effect of share-based compensation, a dividend accrual and a change in other regulatory adjustments.

Look-through CET1 ratio

For the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions). Assuming fully phased-in deductions of CHF 8.2 billion of goodwill and other intangible assets and CHF 7.5 billion of other regulatory adjustments, we estimate that our Look-through CET1 ratio as of the end of 4Q13 would be 10.0%, calculated based on Look-through RWA of CHF 266 billion.

Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as market, credit, operational and non-counterparty risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in Credit Risk RWA. Operational risk RWA reflect the

capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty-risk RWA primarily reflect the capital requirements for our premises and equipment. It is not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA.

CAPITAL METRICS UNDER SWISS REQUIREMENTS

Swiss Core and Total Capital ratios

Swiss Core Capital consists of CET1 capital, tier 1 participation securities which FINMA advised may be included with a haircut of 20% until December 31, 2018 at the latest, and may include certain other adjustments. Swiss Total Capital also includes

high-trigger capital instruments and low-trigger capital instruments. As of the end of 4Q13, our Swiss Core Capital and Swiss Total Capital ratios were 16.2% and 21.2%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.0% and 8.1%, respectively.

Look-through Swiss Core and Total Capital ratios

The look-through basis assumes fully phased-in goodwill and other intangible assets and other regulatory adjustments. On a look-through basis, our Swiss Core Capital was CHF 28.3 billion and our Swiss Core Capital ratio was 10.6%, compared to a 10.0% ratio that we target. Our Swiss Total Capital was CHF 42.1 billion and our Swiss Total Capital ratio was 15.7%, each on a look-through basis.

Look-through capital ratios – Group

as of December 31, 2013 (CHF billion)

Rounding differences may occur.

¹ Consists of existing tier 1 participation securities of CHF 1.3 billion and other Swiss regulatory adjustments.

Swiss leverage ratio

The Swiss leverage ratio is calculated as Swiss Total Capital, divided by a three-month average exposure, which consists of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments,

including cash collateral netting reversals and derivative add-ons. As of the end of 4Q13, our Swiss leverage ratio was 5.1%. As of the end of 4Q13, our total exposure was CHF 1,131 billion, compared to our year-end 2013 target of CHF 1,190 billion. We have revised our long-term target to CHF 1,070 billion.

Look-through Swiss leverage ratio

The look-through basis assumes fully phased-in goodwill and other intangible assets and other regulatory adjustments. On a look-through basis, the Group's Swiss leverage ratio was 3.7%, compared to the 4% requirement for 2019 taking into account FINMA's reduction of our progressive component requirement beginning in 2014.

Total shareholders' equity

Our total shareholders' equity remained unchanged at CHF 42.2 billion as of the end of 4Q13 compared to the end of 3Q13. Total shareholders' equity was impacted by an actuarial pension adjustment, the effect of share-based compensation and the purchase of subsidiary shares from non-controlling interests, relating to the

redemption of tier 1 participation securities, offset by the impact of foreign exchange-related movements on cumulative translation adjustments, a net loss, financial instruments indexed to own shares and dividend payments.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

¹ Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

Risk management

In 4Q13, overall position risk increased 7%, utilized economic capital increased 5%, average risk management VaR in US dollars was stable at USD 44 million and gross impaired loans decreased 3% to CHF 1.5 billion.

ECONOMIC CAPITAL AND POSITION RISK

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is our core Group-wide risk management tool for measuring and reporting all quantifiable risks. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating).

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of methodology changes, prior-period balances are restated in order to show meaningful trends.

In 4Q13, we made an enhancement to the position risk methodology for risk management purposes. For our non-recourse lending business, we refined the modeling of our equity-based collateral to better capture the market risk associated with liquidating the collateral in a stressed environment. The impact of this methodology change on position risk for the Group as of the end of 3Q13 was an increase of CHF 66 million, or 0.6%. This increase was partially offset by a decrease of CHF 12 million due to an enhancement to the dataset, resulting in a CHF 54 million overall net increase in 3Q13 position risk.

For utilized economic capital used for capital management purposes, the impact of the above methodology change on position risk was simultaneously offset in part by the reversal of our previously budgeted estimate for this planned methodology change as reflected in other risks. The net impact of this methodology change on utilized economic capital for the Group as of the end of 3Q13 was an increase of CHF 40 million, or 0.1%. This increase was partially offset by a decrease of CHF 19 million due to the enhancement to the dataset, resulting in a CHF 21 million overall net increase in 3Q13 utilized economic capital.

► Refer to “Economic capital and position risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information on economic capital and position risk.

Key position risk trends

Position risk for risk management purposes as of the end of 4Q13 increased 7% compared to the end of 3Q13. Excluding the US dollar translation impact, position risk increased 9%, mainly due to higher interest rate, foreign exchange and credit spread exposures in fixed income trading as well as increased exposures in Eastern Europe in emerging markets country event risk. Position risk also increased due to new loan commitments in Investment Banking in international lending & counterparty exposures.

Position risk

	4Q13	3Q13	end of 4Q12	QoQ	% change YoY
Position risk (CHF million)					
Fixed income trading ¹	3,318	2,383	2,489	39	33

Position risk (99% confidence level for risk management purposes)	12,043	11,210	11,230	7	7

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ This category comprises fixed income trading, foreign exchange and commodity exposures.

² This category comprises commercial and residential real estate (including RMBS and CMBS), asset-backed securities exposure, real estate acquired at auction and real estate fund investments.

³ Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Compared to the end of 4Q12, position risk for risk management purposes increased 7%. Excluding the US dollar translation impact, position risk increased 10%, mainly due to higher foreign exchange, interest rate and credit spread exposure in fixed income trading as well as new loan commitments and increased counterparty risk in Investment Banking in international lending & counterparty exposures. Position risk also increased due to increased exposures in Eastern Europe in emerging markets country event

risk. These increases were partially offset by reduced exposures in equity trading & investments due to private equity sales.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ Includes primarily high-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to Look-through CET1 capital to enable comparison between economic capital utilization and economic capital resources under the Basel III framework.

² Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain methodology changes planned for 2014.

³ Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital.

⁴ Includes a diversification benefit of CHF 18 million, CHF 19 million and CHF 19 million as of the end of 4Q13, 3Q13 and 4Q12, respectively.

⁵ Includes a diversification benefit of CHF 18 million, CHF 19 million and CHF 11 million as of the end of 4Q13, 3Q13 and 4Q12, respectively.

Utilized economic capital trends

In 4Q13, our utilized economic capital increased 5%. Excluding the US dollar translation impact, utilized economic capital increased 6%, mainly due to higher position risk primarily in Investment Banking.

For Private Banking & Wealth Management, utilized economic capital decreased 3%, mainly due to decreased position risk in equity trading & investments and private banking corporate & retail lending, partially offset by increased emerging markets country event risk.

For Investment Banking, utilized economic capital increased 10%. Excluding the US dollar translation impact, utilized economic capital increased 12%, mainly due to increased position risk in fixed income trading, international lending & counterparty exposures and emerging markets country event risk.

For Corporate Center, utilized economic capital decreased 1%, mainly due to decreased position risk in equity trading & investments.

MARKET RISK

Trading portfolios

We primarily assume market risk through the trading activities in Investment Banking. Private Banking & Wealth Management also engages in trading activities, but to a much lesser extent. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products (some of which are customized transactions using combinations of derivatives and executed to meet specific client or proprietary needs). As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations. Risks associated with the embedded derivative elements of our structured products are actively monitored and managed on a portfolio basis as part of our overall trading portfolio and are reflected in our VaR measures.

Trading risks are measured using VaR along with a number of other risk measurement tools. VaR measures the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon at a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no abrupt changes in market conditions. We use risk management VaR for internal risk management purposes and regulatory VaR for regulatory capital purposes. For risk management VaR, we use a

one-day holding period and a 98% confidence level. This means there is a 1-in-50 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. For regulatory VaR, we present one-day, 99% VaR, which is a ten-day VaR adjusted to a one-day holding period. Our VaR methodology is the same for both VaR measures, except for the confidence levels and holding periods. Other tools, including stress testing, are more appropriate for modeling the impact from severe market conditions.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 4Q13, we updated our VaR models to better reflect that borrowing costs may differ from the risk-free rate when calculating forward equity prices and to better capture the volatility skew risk for foreign exchange products. The cumulative impact of these updates on the average 4Q13 risk management VaR was immaterial and prior periods have not been restated.

For regulatory capital purposes, we operate under the Basel III market risk framework which includes an incremental risk charge, stressed VaR and, since January 1, 2013, consideration of the impact of changes in a counterparty's credit spreads (also known as CVA).

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information.

In order to show the aggregate market risk in our trading books, the chart entitled "Daily risk management VaR" shows the trading-related market risk on a consolidated basis.

We measure VaR in US dollars, as substantially all market risk relates to Investment Banking.

Average risk management VaR was stable at USD 44 million from 3Q13, as an increase in equity exposures was offset by a reduction in interest rate and foreign exchange exposures and lower market volatility. Compared to 4Q12, average risk management VaR decreased 4% due to reduced residential mortgage-backed securities (RMBS), agency collateralized mortgage obligations and cash equity exposures.

Period-end risk management VaR increased 31% to USD 51 million from 3Q13. The increase mainly reflected higher equity exposures, partially offset by a reduction in market volatility. Compared to 4Q12, period-end risk management VaR increased 16%, reflecting increased equity exposures and reduced portfolio diversification benefit, partially offset by lower interest rate and foreign exchange exposures.

One-day, 98% risk management VaR and one-day, 99% regulatory VaR (CHF)

Excludes risks associated with counterparty and own credit exposures.

¹ As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

Various techniques are used to assess the accuracy of the regulatory VaR model used for trading portfolios, including backtesting. We conduct such backtesting using actual daily trading revenues. Actual daily trading revenues are compared with a regulatory 99% VaR calculated using a one-day holding period. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. We had no such backtesting exceptions in 4Q13 and in the 12-month-period ending with such quarter. Since there were fewer than five backtesting exceptions in the rolling 12-month period ending as of the end of 4Q13, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

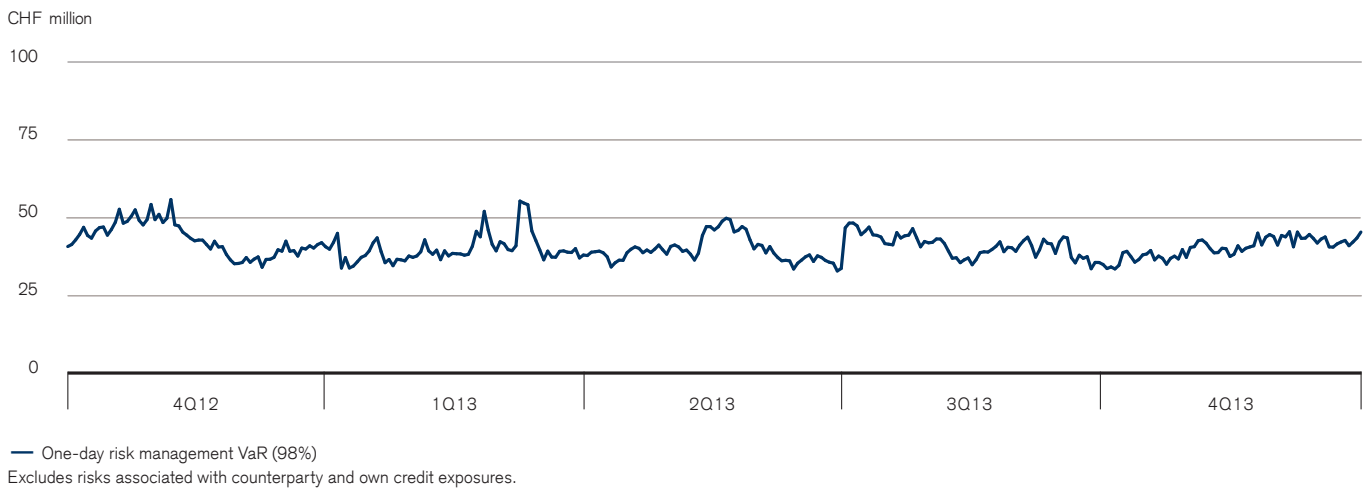

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital

for every regulatory VaR exception over four in the prior rolling 12-month period calculated using a subset of actual daily trading revenues.

► Refer to “Risk measurement models” in Capital management – Regulatory capital framework for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 4Q13 with those for 3Q13 and 4Q12. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 4Q13, we had no trading loss days, compared to one trading loss day in 3Q13.

Daily risk management VaR

Actual daily trading revenues

Excludes Neue Aargauer Bank.
Trading revenues do not include valuation adjustments associated with counterparty and own credit exposures.

Banking portfolios

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking & Wealth Management and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking & Wealth Management to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and certain other areas of the Group running interest rate risk positions actively manage the positions within approved limits. This risk is monitored on a daily basis.

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have amounted to a valuation increase of CHF 8.5 million as of the end of 4Q13 and 3Q13.

CREDIT RISK

Credit risk is the possibility of a loss being incurred by us as the result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a customer default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, or the restructuring of the debtor company. A change in the credit quality of a counterparty has an impact on the valuation of assets eligible for fair value measurement, with valuation changes recorded in the consolidated statements of operations.

Sources of credit risk

The majority of our credit risk is concentrated in the Wealth Management Clients and Corporate & Institutional Clients businesses within the Private Banking & Wealth Management division and in the Investment Banking division. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions.

Our regular review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment. We regularly review the appropriateness of allowances for credit losses. Changes in the credit quality of counterparties of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance.

► Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information on credit risk.

► Refer to "Note 27 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information on counterparty credit risk.

Selected European credit risk exposures

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion. We believe this external rating is a useful measure in determining the financial ability of countries to meet their financial obligations, including giving an indication of vulnerability to adverse business, financial and economic conditions.

Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses on our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G-7 and non-G-7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

Presentation of selected European credit risk exposures

The basis for the presentation of the country exposure is our internal risk domicile view. The risk domicile view is based on the domicile of the legal counterparty, i.e., it may include exposure to a legal entity domiciled in the reported country where its parent is located outside of the country.

The credit risk exposure in the table and the related description of developments is presented on a risk-based view before deduction of any related allowance for loan losses. Prior to our 4Q13 Financial Report, gross and net credit risk exposures were presented net of the allowance for loan losses. The net impact of this change in presentation was an increase of EUR 0.1 billion in both gross and net sovereign credit risk exposures to Greece as of the end of 4Q13. We present our credit risk exposure and related risk mitigation for the following distinct categories:

- *Gross credit risk exposure* includes the principal amount of loans drawn, letters of credit issued and undrawn portions of committed facilities, the positive replacement value (PRV) of derivative instruments after consideration of legally enforceable netting agreements, the notional value of investments in money market funds and the market values of securities financing transactions and the debt cash trading portfolio (short-term securities) netted at issuer level.
- *Risk mitigation* includes CDS and other hedges, at their net notional amount, guarantees, insurance and collateral (primarily cash, securities and, to a lesser extent, real estate, mainly for Private Banking & Wealth Management exposure to corporates & other). Collateral values applied for the calculation of the net exposure are determined in accordance with our risk management policies and reflect applicable margining considerations.
- *Net credit risk exposure* represents gross credit risk exposure net of risk mitigation.
- *Inventory* represents the long inventory positions in trading and non-trading physical debt and synthetic positions, each at market value, all netted at issuer level. Physical debt is non-derivative debt positions (e.g., bonds), and synthetic positions are created through OTC contracts (e.g., CDS purchased and/or sold and total return swaps (TRS)).

CDS presented in the risk mitigation column are purchased as a direct hedge to our OTC exposure and the risk mitigation impact is considered to be the notional amount of the contract for risk purposes, with the mark-to-market fair value of CDS risk-managed

against the protection provider. Net notional amounts of CDS reflect the notional amount of CDS protection purchased less the notional amount of CDS protection sold and are based on the origin of the CDS reference credit, rather than that of the CDS counterparty. CDS included in the inventory column represent contracts recorded in our trading books that are hedging the credit risk of the instruments included in the inventory column and are disclosed on the same basis as the value of the fixed income instrument they are hedging.

We do not have any tranching CDS positions on these European countries and only an insignificant amount of indexed credit derivatives is included in inventory.

The credit risk of CDS contracts themselves, i.e., the risk that the CDS counterparty will not perform in the event of a default, is managed separately from the credit risk of the reference credit. To mitigate such credit risk, all CDS contracts are collateralized and executed with counterparties with whom we have an enforceable International Swaps and Derivatives Association (ISDA) master agreement that provides for daily margining.

Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Croatia, Cyprus, Greece, Ireland, Italy, Portugal and Spain as of the end of 4Q13 was EUR 4.3 billion, down from EUR 4.5 billion as of the end of 3Q13. Our net exposure to these sovereigns was stable at EUR 0.8 billion compared to the end of 3Q13. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 4Q13 included net exposure to financial institutions of EUR 2.3 billion and to corporates and other counterparties of EUR 1.9 billion, compared to EUR 1.3 billion and EUR 3.3 billion, respectively, as of the end of 3Q13. A significant majority of the purchased credit protection is transacted with banks outside of the disclosed countries. For credit protection purchased from banks in the disclosed countries, such credit risk is reflected in the gross and net exposure to each respective country.

Sovereign debt rating developments

In 4Q13, the long-term sovereign debt ratings of the countries listed in the table were affected as follows: Standard & Poor's increased Cyprus' rating to B- from CCC+ and Moody's increased Greece's rating to Caa3+ from C. The rating changes did not have a significant impact on the Group's financial position, result of operations, liquidity or capital resources.

² Represents long inventory positions netted at issuer level.

³ Substantially all of which results from CDS; represents long positions net of short positions.

Credit risk overview

The following table represents credit risk from loans, irrevocable loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable

securities or credit hedges. Irrevocable loan commitments include irrevocable credit facilities for Investment Banking and Private Banking & Wealth Management, but do not include unused credit limits which can be revoked at our sole discretion upon notice to the client.

Before risk mitigation, for example, collateral, credit hedges.

¹ Positive replacement value after netting agreements.

² Irrevocable loan commitments do not include unused credit limits which are revocable at the Group's sole discretion upon notice to the client. Prior periods have been adjusted to the current presentation.

Loan exposure

Compared to the end of 3Q13, gross loans increased CHF 1.8 billion to CHF 248.0 billion. In Private Banking & Wealth Management, gross loans were CHF 216.5 billion, up CHF 1.6 billion from 3Q13, reflecting increased lending driven by the real estate sector, loans collateralized by securities and residential mortgages, partially offset by the reclassification of the loans relating to our domestic private banking business booked in Germany to discontinued assets held-for-sale. Gross loans in Investment Banking increased CHF 209 million to CHF 31.5 billion, primarily from increases in commercial and industrial loans, loans to financial institutions and loans to governments and public institutions, partially offset by the US dollar translation impact.

Gross impaired loans decreased 3% to CHF 1.5 billion compared to the end of 3Q13. In Private Banking & Wealth Management, gross impaired loans decreased CHF 36 million to CHF 1.2 billion, primarily due to lower non-performing and non-interest-earning loans, partially offset by higher potential problem loans. In Investment Banking, gross impaired loans decreased CHF 14

million to CHF 252 million, primarily due to the repayment of a restructured loan.

We recorded a net provision for credit losses of CHF 53 million in 4Q13, stable compared to 3Q13, with a net provision of CHF 44 million and CHF 8 million in Private Banking & Wealth Management and Investment Banking, respectively.

Compared to the end of 4Q12, gross loans increased 2%. An increase in Private Banking & Wealth Management of 4% was primarily due to an increase in loans collateralized by securities, higher residential mortgages and higher loans to the real estate sector, partially offset by the US dollar translation impact, a decrease in consumer finance and the reclassification of the loans relating to our domestic private banking business booked in Germany. In Investment Banking, a decrease of 9% was related to lower loans to financial institutions and consumer finance and the US dollar translation impact, partially offset by higher loans to governments and public institutions, commercial and industrial loans and loans to the real estate sector. Gross impaired loans decreased 14% driven by decreases in potential problem loans and non-interest-earning loans across the Group.

¹ Includes Corporate Center, in addition to Private Banking & Wealth Management and Investment Banking.

² Prior periods have been corrected to reclassify certain counterparty exposures from real estate and commercial and industrial loans to loans to financial institutions and from governments and public institutions to commercial and industrial loans, respectively.

³ Includes loans secured by financial collateral and mortgages. The value of financial collateral and mortgages, considered up to the amount of the related loans, was CHF 67,522 million, CHF 65,953 million and CHF 64,536 million as of the end of 4Q13, 3Q13 and 4Q12, respectively.

⁴ Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value.

⁵ Excludes loans carried at fair value.

OPERATIONAL RISK

We have used an internal model to calculate the regulatory capital requirement for operational risk under the Advanced Measurement Approach (AMA) since 2008. In 2012, following discussions with FINMA, we initiated a project to enhance our internal model to reflect recent developments regarding operational risk measurement methodology and associated regulatory guidance. The revised model has been approved by FINMA for calculating the regulatory capital requirement for operational risk with effect from January 1, 2014. We view the revised model as a significant enhancement to our capability to measure and understand the operational risk profile of the Group that is also more conservative compared with the previous approach.

The model is based on a loss distribution approach that uses historical data on internal and relevant external losses of peers to generate frequency and severity distributions for a range of potential operational risk loss scenarios, such as an unauthorized trading incident or a material business disruption. Business experts and senior management review, and may adjust, the parameters

of these scenarios to take account of business environment and internal control factors, such as risk and control self-assessment results and risk and control indicators, to provide a forward-looking assessment of each scenario. The AMA capital calculation approved by FINMA includes all litigation-related provisions and also an add-on component relating to the aggregate range of reasonably possible litigation losses that are disclosed in our financial statements but are not covered by existing provisions. In 4Q13, this new approach to litigation-related provisions and reasonably possible litigation losses has been applied to the previous AMA model used to calculate regulatory capital requirements as of December 31, 2013. Insurance mitigation is included in the regulatory capital requirement for operational risk where appropriate, by considering the level of insurance coverage for each scenario and incorporating haircuts as appropriate. The internal model then uses the adjusted parameters to generate an overall loss distribution for the Group over a one-year time horizon. The AMA capital requirement represents the 99.9th percentile of this overall loss distribution.

Balance sheet and off-balance sheet

Total assets were CHF 872.8 billion, total liabilities were CHF 825.6 billion and total equity was CHF 47.2 billion. Both total assets and total liabilities were down 2% for the quarter, driven in both cases by the foreign exchange translation impact and a decrease from operating activities. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

BALANCE SHEET

Total assets were CHF 872.8 billion as of the end of 4Q13, down CHF 22.4 billion, or 2%, from the end of 3Q13, reflecting the foreign exchange translation impact and a decrease from operating activities. Excluding the foreign exchange translation impact, total assets decreased CHF 9.5 billion.

Compared to the end of 3Q13, trading assets decreased CHF 15.0 billion, or 6%, due to decreases in debt and equity securities and derivative instruments. Brokerage receivables decreased CHF 4.7 billion, or 8%, primarily reflecting a decrease in open trades and the foreign exchange translation impact. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions were stable at CHF 160.0 billion. Cash and due from banks were stable at CHF 68.7 billion. Net loans increased CHF 1.8 billion, primarily reflecting increased lending in Private Banking & Wealth Management, driven by the real estate sector, loans collateralized by securities and residential mortgages. All other assets were stable at CHF 115.6 billion, including decreases of CHF 1.8 billion in securities received as collateral, CHF 0.8 in other investments and CHF 0.5 billion in other assets, offset by an increase of CHF 1.5 billion in assets of discontinued operations reclassified as held-for-sale.

Total liabilities were CHF 825.6 billion as of the end of 4Q13, down CHF 20.5 billion, or 2%, from the end of 3Q13, driven by a decrease from operating activities and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total liabilities decreased CHF 9.8 billion.

Compared to the end of 3Q13, trading liabilities decreased CHF 15.7 billion, or 17%, reflecting decreases in derivative instruments and short positions. Brokerage payables decreased CHF 5.3 billion, or 7%, primarily due to lower client activity and the foreign exchange translation impact. Due to banks decreased

CHF 4.4 billion, or 16%, mainly driven by maturing of deposits with central banks. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions were stable at CHF 94.0 billion. Long-term debt was stable at CHF 130.0 billion, as issuances of senior and subordinated debt were offset by maturing of senior debt and the foreign exchange translation impact. Customer deposits increased CHF 4.8 billion, or 1%, primarily driven by an increase in certificates of deposits. All other liabilities were stable at CHF 95.6 billion, including decreases of CHF 1.8 billion in obligation to return securities received as collateral and CHF 0.4 billion in other liabilities, offset by an increase of CHF 1.1 billion in liabilities of discontinued operations reclassified as held-for-sale.

► Refer to "Funding sources and uses" in Liquidity and funding management and "Capital management" for further information, including our funding of the balance sheet and the leverage ratio.

OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

► Refer to "Liquidity and funding management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2012 and "Note 25 – Guarantees and commitments" and "Note 29 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information.

Notes to the condensed consolidated financial statements – unaudited

Note 1 Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2012 included in the Credit Suisse Annual Report 2012.

▶ Refer to “Note 1 – Summary of significant accounting policies” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for a description of the Group’s significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made

to the prior period’s consolidated financial statements to conform to the current period’s presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 3Q13 consolidated statements of operations and comprehensive income, the 3Q13 consolidated balance sheets and the 3Q13 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 2 Recently issued accounting standards

Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

▶ Refer to “Note 2 – Recently issued accounting standards” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for a description of accounting standards adopted in 2012.

ASC Topic 210 – Balance Sheet

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, “Disclosures about Offsetting Assets and Liabilities” (ASU 2011-11), an update to Accounting Standards Codification (ASC) Topic 210 – Balance Sheet. The amendments in ASU 2011-11 require an entity to prepare additional disclosures about offsetting and related arrangements. In January 2013, the FASB issued ASU 2013-01, “Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities” (ASU 2013-01), an update to ASC Topic 210 – Balance Sheet. ASU 2013-01 clarifies the scope of ASU 2011-11. The adoption of ASU 2011-11 and ASU 2013-01 on January 1, 2013 did not have an impact on the Group’s financial position, results of operations or cash flows.

▶ Refer to “Note 20 – Offsetting of financial assets and financial liabilities” for further information.

ASC Topic 220 – Comprehensive Income

In January 2013, the FASB issued ASU 2013-02, “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income” (ASU 2013-02), an update to ASC Topic 220 – Comprehensive Income. The amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. The adoption

of ASU 2013-02 on January 1, 2013 did not have an impact on the Group’s financial position, results of operations or cash flows.

▶ Refer to “Note 19 – Accumulated other comprehensive income and additional share information” for further information.

In June 2011, the FASB issued ASU 2011-05, “Presentation of Comprehensive Income” (ASU 2011-05), an update to ASC Topic 220 – Comprehensive Income. ASU 2011-05 provides the entity with an option to present total comprehensive income either in a single continuous statement or in two separate but consecutive statements. The adoption of ASU 2011-05 on January 1, 2012 did not have an impact on the Group’s financial position, results of operations or cash flows.

ASC Topic 360 – Property, Plant and Equipment

In December 2011, the FASB issued ASU 2011-10, “Derecognition of in Substance Real Estate – a Scope Clarification, a consensus of the FASB Emerging Issues Task Force” (ASU 2011-10), an update to ASC Topic 360 – Property, Plant and Equipment. The ASU specifies that the guidance in ASC Subtopic 360-20, Property, Plant and Equipment – Real Estate Sales, would apply to an entity that ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary’s non-recourse debt. The adoption of ASU 2011-10 on July 1, 2012 did not have a material impact on the Group’s financial position, results of operations or cash flows.

ASC Topic 830 – Foreign Currency Matters

In March 2013, the FASB issued ASU 2013-05, “Parent’s Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or

of an Investment in a Foreign Entity" (ASU 2013-05), an update to ASC Topic 830 – Foreign Currency Matters. The amendments provide guidance for the treatment of the cumulative translation adjustment when an entity ceases to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity. ASU 2013-05 is effective prospectively for interim and annual reporting periods beginning after December 15, 2013 with early adoption permitted. The Group elected to early adopt ASU 2013-05 on January 1, 2013 which did not have a material impact on the Group's financial position, results of operations or cash flows.

Standards to be adopted in future periods

ASC Topic 946 – Financial Services – Investment Companies

In June 2013, the FASB issued ASU 2013-08, "Amendments to the Scope, Measurement, and Disclosure Requirements" (ASU 2013-08) an update to Topic 946 – Financial Services – Investment Companies. The amendments change the approach to the investment company assessment in Topic 946, clarify the characteristics of an investment company and provide comprehensive guidance for assessing whether an entity is an investment company. The adoption of ASU 2013-08 on January 1, 2014 did not have a material impact on the Group's financial position, results of operations or cash flows.

Note 3 Business developments and subsequent events

Business developments

► Refer to "Note 4 – Discontinued operations" for information on business divestitures in 4Q13.

Subsequent events

In March 2014, the Group completed the spin-off of its DLJ Merchant Banking Partners business for no consideration to an entity controlled by members of current management. The Group will retain certain carried interest rights.

In March 2014, the Group required employees who hold outstanding 2011 Partner Asset Facility (PAF2) awards to reallocate their PAF2 awards. PAF2 awards were linked to a portfolio of the Group's credit exposures, providing risk offset and capital relief. Due to regulatory changes, this capital relief would no longer be

available. As a result, the Group terminated the PAF2 awards and exchanged them at fair value for other compensation awards.

On March 21, 2014, the Group entered into an agreement with the Federal Housing Finance Agency (FHFA) to settle litigation claims related to the sale of approximately USD 16.6 billion of residential mortgage-backed securities between 2005 and 2007. Under the terms of the agreement, the Group will pay USD 885 million to resolve all claims in two pending securities lawsuits filed by the FHFA against Credit Suisse.

On April 3, 2014, the Group announced that its previously reported 2013 results were updated to reflect additional litigation provisions in connection with the US tax matter.

► Refer to "Note 29 – Litigation" for further information.

Note 4 Discontinued operations

In July 2013, the Group completed the sale of its ETF business to BlackRock and recognized a pre-tax gain on disposal of CHF 146 million in 3Q13 net of allocated goodwill of CHF 72 million. The sale price received by the Group may increase through future contingent payments, if specified thresholds are met. BlackRock is a company unrelated to the Group.

In August 2013, the Group announced the sale of CFGI, its private equity fund of funds and co-investment business, to Grosvenor Capital Management. This transaction was completed in January 2014 and related gains of approximately CHF 90 million will be recognized in 1Q14. As of the end of 4Q13, CFGI had total assets of CHF 31 million that were held-for-sale. The Group will continue to hold investments in and have unfunded commitments

to investment funds managed by CFGI. Grosvenor Capital Management is a company unrelated to the Group.

In August 2013, the Group completed the sale of Strategic Partners, its dedicated secondary private equity business, to Blackstone and recognized a pre-tax gain on disposal of CHF 91 million in 3Q13 net of allocated goodwill of CHF 37 million. The Group will continue to receive carried interest from (and guarantee related claw-back obligations), hold limited partner interests in and have unfunded commitments to investment funds managed by Strategic Partners. The Group will also continue to guarantee minimum investment returns to certain third-party investors under existing side letter agreements. Blackstone is a company unrelated to the Group.

In November 2013, the Group announced the spin-off of DLJ Investment Partners, a dedicated private equity mezzanine investment business of the Group, to Portfolio Advisors, LLC. The transaction was completed in December 2013 with no gain or loss from disposal and insignificant impact on net revenues, operating expenses and net income/(loss) from discontinued operations for any of the periods reported. Portfolio Advisors, LLC is a company unrelated to the Group.

In December 2013, the Group announced the sale of its domestic private banking business booked in Germany (German private banking business) to ABN AMRO. This transaction is subject to customary closing conditions and is expected to close in the course of 2014. As of the end of 4Q13, the German private banking business had total assets and liabilities of CHF 1,553 million and CHF 1,140 million, respectively, that were held-for-sale. ABN AMRO is a company unrelated to the Group.

For the operations discontinued in 4Q13 and 3Q13, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center.

The results of operations of the businesses sold have been reflected in income/(loss) from discontinued operations in the consolidated statements of operations for the relevant periods presented. The assets and liabilities of discontinued operations for which the sale has not yet been completed are presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, and prior periods are not reclassified.

Note 5 Segment information

Overview

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of two segments: Private Banking & Wealth Management and Investment Banking. The two segments are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT. Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues

and expenses. For the operations discontinued, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center. Beginning in 1Q13, segment assets exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

► Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on segment information, revenue sharing and cost allocation, funding and taxes.

Prior periods have been adjusted to reflect the increase in the number of shares outstanding that arose from the 2Q13 stock dividend, as required under US GAAP.

¹ Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.

² Reflects changes in the fair value of the PAF2 units which are reflected in the net profit of the Group until the awards are finally settled. Fair value of the PAF2 units which are reflected in the net profit of the Group are not adjusted for 4Q13, 3Q13, 4Q12, 2013 and 2012, respectively, as the effect would be antidilutive.

³ Reflects weighted-average shares outstanding on PAF2 units. Weighted-average shares on PAF2 units for 4Q13, 3Q13, 4Q12, 2013 and 2012, respectively, were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

⁴ Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 36.0 million, 33.7 million, 50.6 million, 35.9 million and 50.3 million for 4Q13, 3Q13, 4Q12, 2013 and 2012, respectively.

⁵ Due to the net loss in 4Q13, 1.7 million weighted-average share options and warrants outstanding and 0.8 million weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

Note 16 Loans, allowance for loan losses and credit quality

Loans are divided in two portfolio segments, “consumer” and “corporate & institutional”. Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

The determination of the loan classes is primarily driven by the customer segmentation in the two business divisions, Private Banking & Wealth Management and Investment Banking, both of which are engaged in credit activities.

The Group assigns both counterparty and transaction ratings to its credit exposures. The counterparty rating reflects the probability of default of the counterparty. The transaction rating reflects the expected loss, considering collateral, on a given transaction if the counterparty defaults. Credit risk is assessed and monitored on the single obligor and single obligation level as well as on the credit portfolio level as represented by the classes of loans. Credit limits are used to manage counterparty credit risk.

► Refer to “Note 18 – Loans, allowance for loan losses and credit quality” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on loans, allowance for loan losses, credit quality and impaired loans.

² Includes loans previously reclassified to held-for-sale that were not sold and were reclassified back to loans held-to-maturity.

³ All loans held at amortized cost which are sold are reclassified to loans held-for-sale on or prior to the date of the sale.

Credit quality of loans held at amortized cost

Management monitors the credit quality of loans through its credit risk management processes, which are structured to assess, quantify, measure, monitor and manage risk on a consistent basis. This process requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Management evaluates many factors when assessing the credit quality of loans. These factors include the volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic

factors. For the purpose of credit quality disclosures, the Group uses internal risk ratings as credit quality indicators.

The Group employs a set of credit ratings for the purpose of internally rating counterparties. Credit ratings are intended to reflect the risk of default of each obligor or counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

► Refer to "Credit quality of loans held at amortized cost" in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality in the Credit Suisse Annual Report 2012 for further information on internal ratings and the scope of the credit quality disclosures.

¹ Includes the value of collateral up to the amount of the outstanding related loans. For mortgages, collateral values are generally values at the time of granting the loan.

² Prior period has been corrected to reclassify certain counterparty exposures from real estate and commercial and industrial loans to loans to financial institutions.

Value of collateral

In Private Banking & Wealth Management, all collateral values for loans are regularly reviewed according to our risk management policies and directives, with maximum review periods determined by market liquidity, market transparency and appraisal costs. For example, traded securities are revalued on a daily basis and property values are appraised over a period of more than one year considering the characteristics of the borrower, current developments in the relevant real estate market and the current level of credit exposure to the borrower. If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be appraised more frequently. Management judgment is applied in assessing

whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macro-economic research. For impaired loans, the fair value of collateral is determined within 90 days of the date the impairment was identified and thereafter regularly revalued by Group credit risk management within the impairment review process.

In Investment Banking, few loans are collateral dependent. The collateral values for these loans are appraised on at least an annual basis, or when a loan-relevant event occurs.

In addition to the treasury shares, a maximum of 771,499,654 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 732,326,910 of these shares were reserved for capital instruments (including MACCS).

Note 20 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

Derivatives

The Group transacts bilateral OTC derivatives (OTC derivatives) mainly under International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of

the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcated hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

¹ Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at

inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, substantially all of the collateral received that may be sold or repledged was sold or repledged as of December 31, 2013 and December 31, 2012. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

Offsetting of securities purchased under resale agreements and securities borrowing transactions

end of	4Q13			4Q12		
	Gross	Offsetting	Net	Gross	Offsetting	Net
Securities purchased under resale agreements and securities borrowing transactions (CHF billion)						
Securities purchased under resale agreements	112.0	(25.1)	86.9	141.4	(41.1)	100.3
Securities borrowing transactions	22.7	(1.7)	21.0	20.9	(2.0)	18.9
Total subject to enforceable master netting agreements	134.7	(26.8)	107.9	162.3	(43.1)	119.2
Total not subject to enforceable master netting agreements¹	52.1	–	52.1	64.3	–	64.3
Total	186.8	(26.8)	160.0²	226.6	(43.1)	183.5²

¹ Represents securities purchased under resale agreements and securities borrowing transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

² CHF 96,587 million and CHF 113,664 million of the total net amount as of the end of 4Q13 and 4Q12, respectively, are reported at fair value.

The following table presents the gross amount of securities sold under repurchase agreements and securities lending transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities sold under repurchase

agreements and securities lending transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

Offsetting of securities sold under repurchase agreements and securities lending transactions

end of	4Q13			4Q12

¹ Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

² CHF 76,104 million and CHF 108,784 million of the total net amount as of the end of 4Q13 and 4Q12, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and

borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

Amounts not offset in the consolidated balance sheets

end of	4Q13				4Q12			
	Net	Financial instruments ¹	Cash collateral received/pledged ¹	Net exposure	Net	Financial instruments ¹	Cash collateral received/pledged ¹	Net exposure
Financial assets subject to enforceable master netting agreements (CHF billion)								
Derivatives	23.6	4.9	0.1	18.6	27.3	5.8	0.0	21.5
Securities purchased under resale agreements	86.9	86.9	0.0	0.0	100.3	100.3	0.0	0.0
Securities borrowing transactions	21.0	20.2	0.0	0.8	18.9	17.4	0.0	1.5
Total financial assets subject to enforceable master netting agreements	131.5	112.0	0.1	19.4	146.5	123.5	0.0	23.0
Financial liabilities subject to enforceable master netting agreements (CHF billion)								
Derivatives	25.6	9.9	0.0	15.7	29.4	10.8	0.0	18.6
Securities sold under repurchase agreements	59.7	59.7	0.0	0.0	56.6	56.4	0.2	0.0
Securities lending transactions	6.6	6.2	0.0	0.4	10.8	10.2	0.0	0.6
Obligation to return securities received as collateral, at fair value	18.5	17.5	0.0	1.0	25.9	24.2	0.0	1.7
Total financial liabilities subject to enforceable master netting agreements	110.4	93.3	0.0	17.1	122.7	101.6	0.2	20.9

¹ The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of CDS and credit insurance contracts. Therefore the net exposure

presented in the table above is not representative for the Group's counterparty exposure.

Note 21 Tax

The income tax benefit of CHF 63 million recorded in 4Q13 included the impact of the geographical mix of results, an income tax benefit of CHF 367 million relating to tax deductions arising from participation valuations and the re-measurement of existing deferred tax assets on net operating losses due to changes in forecasted earnings, partially offset by a tax charge of CHF 278 million related to a valuation allowance recognized on existing deferred tax assets in respect of one of the Group's entities in the UK.

The presentation of net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities is in accordance with ASC Topic 740 – Income Taxes guidance to interim reporting. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of December 31, 2013, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 6.1 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 72 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2009; Brazil – 2008; Japan – 2008; the UK – 2006; the US – 2006; and the Netherlands – 2005.

Effective tax rate

in	4Q13	3Q13	4Q12	2013	2012

Changes in deferred tax valuation allowance	276
Lower taxed income	(6)
Income taxable to noncontrolling interests	(80)
Tax deductible impairments of Swiss subsidiary investments	(255)
Other	(67)
Income tax expense/(benefit)	(63)

Foreign tax rate differential

4Q13 included a foreign tax benefit of CHF 26 million in respect of earnings in higher tax jurisdictions, mainly Brazil and the US.

Changes in tax law and rates

4Q13 included a tax expense of CHF 11 million related to the re-measurement of deferred tax assets resulting from the impact of the reduction of the UK corporate income tax rate from 23% to 20%.

Other non-deductible expenses

4Q13 included non-deductible interest expenses of CHF 46 million, non-deductible bank levy costs and other non-deductible expenses of CHF 8 million and non-deductible provision accruals of CHF 103 million.

Changes in deferred tax valuation allowance

4Q13 included the impact of the net increase of valuation allowances of CHF 39 million in respect of four of the Group's operating entities, two in the UK and two in Asia, relating to current year earnings. Additionally, it also included an increase in valuation allowance for previously recognized deferred tax assets in respect of a Group operating entity in the UK of CHF 278 million, partially offset by the release of valuation allowances in respect of another Group operating entity in the UK of CHF 41 million, both relating to changes in future profitability assumptions.

Lower taxed income

4Q13 included a CHF 19 million income tax benefit related to non-taxable life insurance income, partially offset by a change in the effective tax rate due to actual fourth quarter earnings as compared to the full-year forecast of CHF 13 million.

Other

4Q13 included a tax benefit of CHF 71 million relating to the increase of deferred tax assets in one of the Group's operating entities in Switzerland. This benefit is related to the re-measurement of pre-existing deferred tax assets due to changes in future profitability assumptions. It also included a benefit for other various smaller items, partially offset by a CHF 19 million income tax charge relating to the increase of tax contingency accruals.

Net deferred tax assets

end of	4Q13	3Q13
Net deferred tax assets (CHF million)		
Deferred tax assets	6,185	6,106
of which net operating losses	1,380	1,607
of which deductible temporary differences	4,805	4,499
Deferred tax liabilities	(394)	(167)
Net deferred tax assets	5,791	5,939

Note 22 Employee deferred compensation

The Group's current and previous deferred compensation plans include share awards, performance share awards, Plus Bond awards, Partner Asset Facilities awards, Adjustable Performance Plan awards, Restricted Cash Awards, Scaled Incentive Share Units (SISUs), Incentive Share Units (ISUs) and other cash awards.

► Refer to "Note 27 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

The following tables show the expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 4Q13 and prior periods and the associated remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized deferred compensation expense was based on the fair value of each award on the date of grant and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

Deferred compensation expense

in	4Q13	3Q13	4Q12	2013	2012
Deferred compensation expense (CHF million)					
Share awards	174	183	186	814	786
Performance share awards	122	138	81	590	366
Plus Bond awards ¹	11	10	0	37	0

Discontinued operations	(4)	(11)	(5)	(21)	(23)
Total deferred compensation expense	511	541	597	2,242	3,025

¹ Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.

² 2011 Partner Asset Facility awards were granted and expensed in 1Q12. For subsequent periods, compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

³ Includes clawbacks.

⁴ Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

Note 24 Derivatives and hedging activities

► Refer to "Note 30 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to "Note 27 – Financial instruments" for further information.

Foreign exchange products ¹	0	2	(2)	2	75
Total	0	2	(2)	2	75

Represents gains/(losses) on effective portion.

¹ Included in other revenues.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to “Note 8 – Trading revenues” for gains and losses on trading activities by product type.

Disclosures relating to contingent credit risk

Certain of the Group’s derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group’s current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

Contingent credit risk

end of	4Q13				4Q12			
	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total

Current net exposure	11.7	1.1	0.1	12.9	15.3	1.4	0.6	17.3
Collateral posted	10.6	1.2	–	11.8	13.4	1.4	–	14.8
Additional collateral required in a one-notch downgrade event	0.6	0.8	0.0	1.4	0.2	0.5	0.0	0.7
Additional collateral required in a two-notch downgrade event	2.3	1.1	0.0	3.4	2.7 ¹	1.5	0.5	4.7

¹ Additional collateral required in a two-notch downgrade event has been corrected.

Credit derivatives

► Refer to “Note 30 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on credit derivatives.

Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other derivative instruments were excluded as they do not fall within the scope of US GAAP rules. TRS of CHF 7.4 billion and CHF 6.0 billion as of the end of 4Q13 and 4Q12, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

Credit protection sold/purchased

Note 25 Guarantees and commitments

Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the

Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, securities lending indemnifications, derivatives and other guarantees.

► Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a detailed description of guarantees.

Guarantees

end of	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount ¹	Carrying value	Collateral received
4Q13 (CHF million)						
Credit guarantees and similar instruments	2,826	2,090	4,916	4,768	34	2,333
Performance guarantees and similar instruments	4,428	2,937	7,365	6,444	87	3,312

Securities lending indemnifications	12,211	0	12,211	12,211	0	12,211
Derivatives ²	21,197	14,218	35,415	35,415	985	- ³
Other guarantees	4,297	1,122	5,419	5,397	3	2,812
Total guarantees	52,969	22,194	75,163	74,016	1,180	20,279

¹ Total net amount is computed as the gross amount less any participations.

² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

³ Collateral for derivatives accounted for as guarantees is not significant.

⁴ Prior period has been corrected.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2013 to June 30, 2014 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees.

PAF2 transaction

The Group's results are impacted by the risk of counterparty defaults and the potential for changes in counterparty credit spreads related to derivative trading activities of the Group. In 1Q12, the Group entered into the PAF2 transaction to hedge the counterparty credit risk of a referenced portfolio of derivatives and their credit spread volatility. The hedge covered approximately USD 12 billion notional amount of expected positive exposure from counterparties of the Group, and was addressed in three layers: (i) first loss (USD 0.5 billion), (ii) mezzanine (USD 0.8 billion) and (iii) senior (USD 11 billion). The first loss element was retained by the Group and actively managed through normal credit procedures. The mezzanine layer was hedged by transferring the risk of default and counterparty credit spread movements to eligible employees in the form of PAF2 awards, as part of their deferred compensation granted in the annual compensation process.

The model used to value the PAF2 awards is the standard Gaussian copula valuation model used for synthetic collateralized

debt obligation (CDO) trades with adjustments necessary to incorporate the specific nature of the PAF2 transaction. The key model inputs are notional value, correlation assumption, credit spreads, liquidity and recovery rates of the portfolio, the Group's own credit spread and the maturity of the trade. In the model, the credit spreads of the counterparties determine the respective probability of default. Such probability is used to compute the expected value of the cash flows contingent on survival and on default of the counterparties in the reference portfolio. The credit spreads are sourced using observable data from CDS on the specific reference entity. Where a specific reference entity curve does not exist for a reference name in the portfolio, a proxy curve is used. The expected value of the counterparty exposure on default determines the equivalent notional value for the given name. This is computed from the effective positive exposure which is the weighted average over time of the expected exposure used by the Group for counterparty risk management. As of the end of 4Q13, the carrying value of the PAF2 awards was CHF 652 million. The amount of the PAF2 awards compensation expense for 4Q13 was CHF 57 million and is included in the amount reflected in the "Deferred compensation expense" table in Note 22 – Employee deferred compensation, which includes deferred compensation expense for a smaller plan unrelated to the hedging aspects of this transaction.

The Group had purchased protection on the senior layer to hedge against the potential for future counterparty credit spread volatility. This was executed through a CDS, accounted for at fair value, with a third-party entity. The value of the senior layer was calculated using the same model as for the PAF2 awards. The Group also had a credit support facility with this entity that allowed the Group to provide credit support in connection with other assets that are commonly financed through the issuance of commercial paper (CP) and, in connection with the CDS, to provide immediately available funding to this entity in certain circumstances. Among others, such circumstances included: (i) a disruption of the CP market such that the entity could not issue or roll a CP to fund the CDS payment or repay a maturing CP; (ii) the interest payable on the CP exceeded certain thresholds and the Group instructed the entity to draw on the facility instead of issuing a CP; (iii) a CP was issued by the entity to fund a CDS payment and subsequently the short-term rating of the facility provider was downgraded; or (iv) to repay any outstanding CP at the maturity date of the facility. Any funded amount could be settled by the assignment of the rights and obligations of the CDS to the Group. The credit support facility was accounted for on an accrual basis.

In December 2012, the BCBS published updated regulatory guidance that made the PAF2 transaction as it was structured ineligible for counterparty credit spread hedging under the Basel III framework. As a result of this new guidance, the Group had the right to exercise a regulatory call to restructure or terminate the CDS and the credit support facility layer at par and terminate the mezzanine layer at fair value. In October 2013, the Group exercised the call to terminate the CDS and the credit support layer at par. As of the end of 4Q13, the mezzanine layer remained in place.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac (GSEs); institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

With respect to its outstanding repurchase claims, the Group is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to December 31, 2013 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims in 4Q13, 3Q13 and 4Q12, including realized losses from the repurchase of residential mortgage loans sold.

Residential mortgage loans sold

January 1, 2004 to December 31, 2013 (USD billion)

Government-sponsored enterprises	8.2
Private investors ¹	23.5
Non-agency securitizations	133.8 ²
Total residential mortgage loans sold	165.5

¹ Primarily banks.

² The outstanding balance of residential mortgage loans sold was USD 26.2 billion as of the end of 4Q13. The difference of the total balance of mortgage loans sold and the outstanding balance as of the end of 4Q13 is attributable to borrower payments of USD 88.9 billion and losses of USD 18.7 billion due to loan defaults.

¹ Settled at a repurchase price of USD 0 million and USD 2 million in 4Q13 and 4Q12, respectively.

² Settled at USD 3 million, USD 20 million and USD 21 million in 4Q13, 3Q13 and 4Q12, respectively.

³ Refer to "Note 29 – Litigation" for repurchase claims that are in arbitration or litigation.

⁴ Transfers to arbitration and litigation disclosed in 3Q13 include portfolios of claims of approximately USD 0.6 billion for which formal legal proceedings had commenced in prior periods.

¹ Settled at a repurchase price of USD 6 million and USD 15 million in 2013 and 2012, respectively.

² Settled at USD 48 million and USD 41 million in 2013 and 2012, respectively.

³ Refer to "Note 29 – Litigation" for repurchase claims that are in arbitration or litigation.

⁴ Transfers to arbitration and litigation disclosed in 2013 include portfolios of claims of approximately USD 0.3 billion for which formal legal proceedings had commenced in prior periods.

Provisions for outstanding repurchase claims

	4Q13	3Q13	4Q12	2013	2012
Provisions for outstanding repurchase claims (USD million)¹					
Balance at beginning of period	88	98	53	55	59
Increase/(decrease) in provisions, net	61	10	25	145	52
Realized losses ²	(3) ³	(20) ⁴	(23) ⁵	(54) ⁴	(56) ³
Balance at end of period	146⁴	88⁶	55⁶	146⁴	55⁶

¹ Excludes provisions for repurchase claims related to residential mortgage loans sold that are in arbitration or litigation. Refer to "Note 29 – Litigation" for further information.

² Includes indemnifications paid to resolve loan repurchase claims.

³ Primarily related to government-sponsored enterprises and non-agency securitizations.

⁴ Primarily related to government-sponsored enterprises and private investors.

⁵ Primarily related to non-agency securitizations.

⁶ Primarily related to government-sponsored enterprises.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

▶ Refer to "Note 29 – Litigation" for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Repurchase claims relating to residential mortgage loans sold may increase in the future based on the large number of defaults in residential mortgages, including those sold or securitized by the Group.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the "Guarantees" table.

▶ Refer to "Disposal-related contingencies and other indemnifications" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a description of these guarantees.

Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

▶ Refer to "Other commitments" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a description of these commitments.

Other commitments

¹ Total net amount is computed as the gross amount less any participations.

² Irrevocable loan commitments do not include a total gross amount of CHF 90,254 million and CHF 78,887 million of unused credit limits as of the end of 4Q13 and 4Q12, respectively, which were revocable at the Group's sole discretion upon notice to the client. The prior period has been adjusted to the current presentation.

Note 26 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

TRANSFERS OF FINANCIAL ASSETS

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, CP and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2013 and 2012 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

Securitizations

in	2013	2012
Gains and cash flows (CHF million)		
CMBS		
Net gain ¹	4	56
Proceeds from transfer of assets	5,574	6,156
Cash received on interests that continue to be held	70	57
RMBS		
Net gain/(loss) ¹	(8)	3
Proceeds from transfer of assets	24,523	15,143
Purchases of previously transferred financial assets or its underlying collateral	(10)	(25)
Servicing fees	4	3
Cash received on interests that continue to be held	486	554
Other asset-backed financings		
Net gain ¹	15	83
Proceeds from transfer of assets	915	591
Purchases of previously transferred financial assets or its underlying collateral ²	(213)	(621)
Cash received on interests that continue to be held	633	1,350

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

² Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

► Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 4Q13 and 4Q12, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	4Q13	4Q12
CHF million		
CMBS		
Principal amount outstanding	37,308	30,050
Total assets of SPE	48,715	45,407
RMBS		
Principal amount outstanding	45,571	58,112
Total assets of SPE	48,741	60,469
Other asset-backed financings		
Principal amount outstanding	27,854	32,805
Total assets of SPE	27,854	32,805

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

▶ Refer to "Note 27 – Financial instruments" for information on fair value hierarchy levels.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer	4Q13		4Q12	
	CMBS	RMBS	CMBS	RMBS
CHF million, except where indicated				
Fair value of beneficial interests	633	2,993	761	2,219
of which level 2	476	2,879	654	2,090
of which level 3	156	114	107	129
Weighted-average life, in years	7.3	7.7	8.4	5.0
Prepayment speed assumption (rate per annum), in % ¹	- ²	2.0–31.0	- ²	0.1–34.9
Cash flow discount rate (rate per annum), in % ³	1.6–11.6	0.0–45.9	0.8–10.7	0.1–25.7
Expected credit losses (rate per annum), in %	0.0–7.5	0.0–45.8	0.5–9.0	0.0–25.1

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

³ The rate was based on the weighted-average yield on the beneficial interests.

Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 4Q13 and 4Q12.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

	4Q13			4Q12

Impact on fair value from 10% adverse change	(25.5)	(65.0)	(2.4)	(14.8)	(62.8)	(1.0)
Impact on fair value from 20% adverse change	(50.0)	(124.9)	(4.9)	(19.9)	(93.5)	(1.8)
Expected credit losses (rate per annum), in %	0.2–36.6	0.1–17.3	0.7–21.0	0.9–49.5	0.9–42.8	0.3–51.4
Impact on fair value from 10% adverse change	(10.9)	(42.2)	(0.4)	(14.4)	(55.9)	(0.8)
Impact on fair value from 20% adverse change	(21.5)	(79.6)	(0.7)	(19.2)	(80.3)	(1.6)

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

² CDOs within this category are generally structured to be protected from prepayment risk.

³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

⁴ The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 4Q13 and 4Q12.

► Refer to "Note 28 – Assets pledged and collateral" for further information.

Liability to SPE, included in Other liabilities	(373)	(2,084)

VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 19 days and 27 days as of 4Q13 and 4Q12, respectively. As of 4Q13 and 4Q12, Alpine had the highest short-term ratings from Moody's and Dominion Bond Rating Service and was rated A-1 by Standard & Poor's and F-1 by Fitch. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including residential mortgages and advance financing receivables, and auto and equipment loans or leases. As of 4Q13 and 4Q12, those assets had an average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 2.1 years and 2.9 years as of 4Q13 and 4Q12, respectively.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 4Q13 and 4Q12.

Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory,

certain single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for further information on non-consolidated VIEs.

Note 27 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes)
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

► Refer to "Note 33 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on the Group's concentrations of credit risk.

FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 2013, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers were primarily in exchange traded derivatives as they moved closer to maturity and pricing inputs became more observable. Transfers out of level 1 to level 2 were primarily from trading assets. The transfers were primarily in equity as suitable closing prices were unobtainable as of the end of 2013.

Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

in	2013			2012		
	Trading revenues	Other revenues	Total revenues	Trading revenues	Other revenues	Total revenues
Gains and losses on assets and liabilities (CHF million)						
Net realized/unrealized gains/(losses) included in net revenues	(746)	536	(210) ¹	(1,018)	268	(750) ¹
Whereof:						
Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date	(2,850)	414	(2,436)	(1,209)	(82)	(1,291)

¹ Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

Transfers in and out of level 3

Transfers into level 3 assets during 2013 were CHF 7,429 million, primarily from loans held-for-sale and trading assets. The transfers were primarily in the corporate credit, private equity and prime services businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2013 were CHF 9,761 million, primarily in trading assets, loans held-for-sale and loans. The transfers out of level 3 assets were primarily in the Brazil trading, private equity, corporate credit, prime services, rates and equity derivatives businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 4Q13 were CHF 1,646 million, primarily from trading assets and loans held-for-sale. The transfers were primarily in the corporate credit business due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 4Q13 were CHF 1,750 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the private equity and equity derivatives businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Qualitative disclosures of valuation techniques

Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Product Control and Risk Management create, review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office, Product Control, Risk Management, and Financial Accounting to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The results of these meetings are aggregated for presentation to the Valuation and Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever

possible, observable market data which may include executed transactions, dealer quotes, or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

Product Control utilizes independent pricing service data as part of their review process. Independent pricing service data is analyzed to ensure that it is representative of fair value including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates, or other inputs. In addition, there may be uncertainty about a valuation, which results from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The Group performs a sensitivity analysis of its significant level 3 financial instruments. This sensitivity analysis estimates a fair value range by changing the related significant unobservable inputs value. This sensitivity analysis is an internal mechanism to monitor the impact of reasonable alternative inputs or prices for level 3 financial instruments. Where a model-based technique is used to determine the fair value of the level 3 financial instrument, an alternative input value is utilized to derive an estimated fair value range. Where a price-based technique is used to determine the fair value of the level 3 financial instruments, Front Office professional judgment is used to estimate a fair value range.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables “Quantitative information about level 3 assets at fair value” and “Quantitative information about level 3 liabilities at fair value”.

Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value

using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. Significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

Debt securities

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price, buyback probability, correlation and credit spread. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instrument. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple, discount rate and capitalization rate.

Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, then the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and

unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

Our valuation of derivatives does not include an adjustment for the cost of funding uncollateralized OTC derivatives due to a lack of clear observability in the marketplace.

Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility, volatility skew, prepayment rate, credit spread, basis spread and mean reversion.

Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

Equity and index-related derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include correlation, volatility, skew and buyback probability.

Generally, the interrelationship between the volatility and correlation is positively correlated.

Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are

valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread, correlation and price. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

Other investments

Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their

published net asset values (NAVs). Most of these investments are classified as level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAV in the near term. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not current with observed market movements, it is probable that these investments will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. Unobservable inputs may include credit spread, contingent probability and EBITDA multiple. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a CDS pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available.

Accrual based Private Banking & Wealth Management loans, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcated and non-bifurcated) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined

call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility and price.

Generally, the interrelationships between volatility, skew, correlation, gap risk and credit spreads inputs are positively correlated.

Other liabilities

Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of buyback probability, EBITDA multiple, market implied life expectancy (for life finance instruments), correlation, recovery rate, price, volatility, volatility skew, contingent probability and market implied life expectancy (for life settlement and premium finance instruments), in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets instruments with a significant unobservable input of capitalization rate, default rate, discount rate, funding spread, loss severity, prepayment rate and credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable inputs basis spread, mean reversion and skew would decrease the fair value. An increase in the significant unobservable input gap risk would increase the fair value.

Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of

each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

Quantitative information about level 3 assets at fair value

end of 4Q13	Fair value	Valuation technique	Unobservable input	Minimum value	Maximum value	Weighted average ¹

Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above result in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest while the higher end of the range relates collateral with a greater risk of default.

Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

Volatility and skew

Volatility and skew are impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility rates may vary significantly between different underlying currencies and expiration dates on the options. Similarly, equity derivatives' volatility may vary greatly depending upon the underlying reference name on the derivative.

Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of each insured.

Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which are generally up to ten years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

Fair value, unfunded commitments and term of redemption conditions

end of	4Q13				4Q12

⁴ 66% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 19% is redeemable on demand with a notice period primarily of less than 30 days, and 11% is redeemable on an annual basis with a notice period of more than 60 days.

⁵ Includes CHF 1,819 million and CHF 1,958 million attributable to noncontrolling interests in 4Q13 and 4Q12, respectively.

⁶ Includes CHF 107 million and CHF 107 million attributable to noncontrolling interests in 4Q13 and 4Q12, respectively.

⁷ Includes CHF 405 million and CHF 418 million attributable to noncontrolling interests in 4Q13 and 4Q12, respectively.

Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

Nonrecurring fair value changes

end of	4Q13	4Q12
Assets held-for-sale recorded at fair value on a nonrecurring basis (CHF billion)		
Assets held-for-sale recorded at fair value on a nonrecurring basis	0.3	0.5
of which level 3	0.3	0.5

FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in Investment Banking and Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

► Refer to "Note 33 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on the Group's election of the fair value option for certain of its financial statement captions.

¹ Primarily recognized in net interest income.

² Primarily recognized in trading revenues.

³ Primarily recognized in other revenues.

⁴ Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF (268) million and CHF (111) million in 2013, respectively, and CHF (1,663) million and CHF (931) million in 2012, respectively.

FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE

The following table provides the carrying value and fair value of financial instruments which are not carried at fair value in the consolidated balance sheet. The disclosure excludes all non-financial instruments such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations.

Note 28 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

Assets pledged

end of	4Q13	4Q12
Assets pledged (CHF million)		
Total assets pledged or assigned as collateral	142,952	151,419
of which encumbered	92,300	90,745

Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Collateral

Note 29 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 37 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012* and updated in subsequent quarterly reports (including below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues litigation provisions (including estimated fees and expenses of external lawyers and other service providers) and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings, the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings

because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 37 referenced above and updated in quarterly reports and below for which the Group believes an estimate is possible is zero to CHF 2.4 billion.

In 4Q13, the Group recorded net litigation provisions of CHF 1,469 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

Mortgage-related matters

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

On December 18, 2013, the New Jersey Attorney General, on behalf of the State of New Jersey, filed a civil action in the Superior Court of New Jersey, Chancery Division, Mercer County, against Credit Suisse Securities (USA) LLC (CSS LLC) and affiliated entities in their roles as issuer, sponsor, depositor and/or underwriter of RMBS transactions prior to 2008. The action, which references 13 RMBS issued, sponsored, deposited and underwritten by CSS LLC and its affiliates in 2006 and 2007, alleges that CSS LLC and its affiliates misled investors and engaged in fraud or deceit in connection with the offer and sale of RMBS, seeks an unspecified amount of damages, and is at an early procedural point.

Class actions

On January 27, 2014, the US District Court for the Southern District of New York entered a final judgment and order of dismissal with prejudice, discontinuing the *Tsereteli v. Residential Asset Securitization Trust 2006-A8* class action, as a result of a settlement in the amount of USD 11 million.

Individual investor actions

On October 29, 2013, following a settlement, CSS LLC and its affiliates and employees filed a stipulation of discontinuance with prejudice to discontinue claims against CSS LLC and its affiliates and employees brought by Stichting Pensioenfonds ABP in the Supreme Court for the State of New York, New York County (SCNY). On November 18, 2013, as a result of settlement, the US District Court for the Southern District of New York entered a stipulation of voluntary dismissal with prejudice, discontinuing Federal Housing Finance Agency (FHFA) v. JPMorgan Chase & Co., one of the FHFA's five actions against CSS LLC and its affiliates and employees, and other financial institutions, relating to approximately USD 870 million of RMBS at issue against the Credit Suisse defendants in that case. On November 26, 2013, the Indiana state court presiding in the action brought by the Federal Home Loan Bank of Indianapolis dismissed with prejudice claims pertaining to certain defendants, including one of the RMBS offerings on which CSS LLC and certain of its affiliates were sued, reducing the RMBS at issue relating to claims against CSS LLC and its affiliates in that case by approximately USD 100 million. On December 5, 2013, the Washington state court presiding in the action brought by the Federal Home Loan Bank of Chicago dismissed with prejudice one of the actions against CSS LLC and other financial institutions, reducing the RMBS at issue relating to claims against CSS LLC by USD 20 million. On December 26, 2013, Commerzbank AG London Branch filed an action against CSS LLC and certain of its affiliates and other financial institutions in the SCNY, relating to approximately USD 148 million of the RMBS at issue (approximately 6% of the USD 2.3 billion at issue against all defendants in the operative pleading). On January 6, 2014, following a settlement, CSS LLC and its affiliates filed a stipulation of discontinuance with prejudice to discontinue claims against CSS LLC and its affiliates relating to approximately USD 35 million of RMBS at issue brought by Sealink Funding Limited in the SCNY. On January 24, 2014, the SCNY dismissed with prejudice certain claims in the action against CSS LLC and its affiliates brought by Allstate Insurance Company, reducing the RMBS at issue for CSS LLC and its affiliates from approximately USD 232 million to approximately USD 187 million. On March 21, 2014, CSS LLC and certain affiliates and employees entered into an agreement with the FHFA to settle all claims in two of three remaining actions filed by the FHFA in the SDNY for USD 885 million, which amount was partially covered by existing provisions. The actions settled on March 21, 2014 related to approximately USD 16.6 billion of RMBS at issue against the Credit Suisse defendants.

Repurchase litigations

On January 3, 2014, the SCNY dismissed with prejudice the consolidated actions brought by Home Equity Asset Trust 2006-5, Home Equity Asset Trust 2006-6 and Home Equity Asset Trust 2006-7 against DLJ Mortgage Capital, Inc., in which the plaintiffs had alleged damages of not less than USD 319 million.

Monoline insurer disputes

On November 15, 2013, CIFG Assurance North America, Inc. (CIFG) filed an action against CSS LLC in the SCNY, relating to financial guaranty insurance issued by CIFG on a credit default swap guaranteeing payment on approximately USD 396 million of notes of a collateralized debt obligation. CIFG alleges material misrepresentation in the inducement of an insurance contract and fraud relating to alleged affirmative misrepresentations and material omissions made to induce CIFG to guarantee the securities.

Tax and securities law matters

Credit Suisse has been responding to subpoenas and other requests for information from the United States Department of Justice (DOJ), the US Securities and Exchange Commission (SEC) and other authorities involving historical Private Banking services provided on a cross-border basis to US persons. US authorities are investigating possible violations of US tax and securities laws. In particular, the DOJ is investigating whether US clients violated their US tax obligations and whether Credit Suisse and certain of its employees assisted such clients. The SEC has investigated whether certain of our relationship managers triggered obligations for Credit Suisse or the relationship managers in Switzerland to register with the SEC as a broker-dealer or investment advisor. A limited number of current or former employees have been indicted and two former employees have pleaded guilty (in one case, as to conduct while employed at other financial institutions that did not involve Credit Suisse and in the other case as to conduct while employed at a former Credit Suisse subsidiary prior to 2006 and other financial institutions after 2006). Credit Suisse received a grand jury target letter from the DOJ. We understand that certain US authorities are also investigating other Swiss and non-US financial institutions. We have been conducting an internal investigation and are continuing to cooperate with the authorities both in the US and Switzerland to resolve this matter in a responsible manner that complies with our legal obligations. Our provision of Swiss-based information to these US authorities has been in accordance with permission granted by Swiss authorities. The Group has established a loss contingency provision of CHF 895 million with respect to the tax and securities law matters described in this subsection. The Group had previously disclosed a provision of CHF 470 million with respect to these matters, including CHF 175 million in connection with the settlement with the SEC described in the following paragraph.

On February 21, 2014, Credit Suisse AG reached a settlement with the SEC that resolves the SEC's investigation regarding registration as an investment advisor and broker-dealer. In a settled administrative and cease-and-desist proceeding, the SEC charged Credit Suisse AG with violating Section 15(a) of the US Securities Exchange Act of 1934 (Exchange Act) and Section 203(a) of the US Investment Advisers Act of 1940 (Advisers Act). Specifically, the SEC's Order finds that from at least 2002 through its exit from the US cross-border securities business which Credit Suisse AG began in 2008, Credit Suisse AG, through actions of certain of its relationship managers, violated the federal securities laws by

providing certain cross-border brokerage and investment advisory services to US clients at a time when Credit Suisse AG was not registered with the SEC as a broker-dealer or investment advisor. As part of the settlement of the investigation, Credit Suisse AG agreed, among other things, to cease-and-desist from committing or causing any future violations of section 15(a) of the Exchange Act or Section 203(a) of the Advisers Act and to pay approximately

USD 196 million, inclusive of disgorgement of approximately USD 82 million, prejudgment interest of approximately USD 64 million, and a civil money penalty in the amount of USD 50 million. Credit Suisse AG also agreed to the appointment of an independent consultant who will review its cross-border compliance policies with respect to the US securities laws and will verify that Credit Suisse AG has exited the US cross-border business.

Note 30 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make

any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

In 4Q13, as part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing Intermediate Holding Companies in the US for non-US banks, several existing legal entities were re-parented as subsidiaries of Credit Suisse (USA), Inc. In the tables below, prior periods have been restated to conform to the current presentation to reflect the impact of these transactions.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;

- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2012.

Our 2012 annual publication suite consisting of Annual Report and Corporate Responsibility Report, which also contains the Company Profile 2012, is available on our website www.credit-suisse.com/investors
