Access the CSX Invest function via the Credit Suisse – CSX app.

1.

Answer a few questions about your financial situation, risk appetite, and time horizon.

2.

Review our recommended investment strategy and decide whether you wish to adjust it.

3.

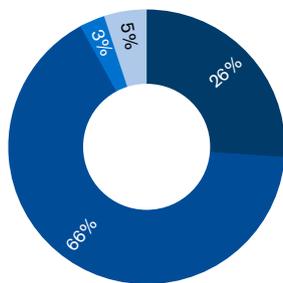

Decide on how much you want to invest and confirm details directly on your device – without any paperwork.

Choose from three investment strategies

During the digital advisory session, CSX Invest determines your financial situation, risk appetite, and time horizon. Based on these criteria, we will recommend one of three possible investment strategies.

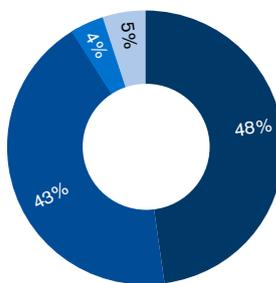

Cautious Promenader

Prefers getting to the destination safely while minimizing any hurdles along the way. This strategy has a low share of equities and helps to minimize losses while allowing for some upside potential.

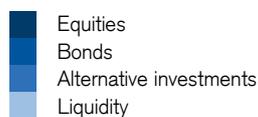

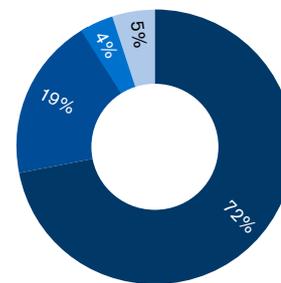

Balanced Hiker

Enjoys uneven terrain, for the rewarding views at the top are worth the uphill strides and some downhill paths. This strategy has a medium share of equities and offers a balance between potential gains during market upswings and losses when markets drop.

Adventurous Climber

Seeks the shortest way to the top and doesn't mind taking a fall now and then. This strategy has a high share in equities and a focus on achieving gains while accepting exposure to loss.

The above asset allocations may vary depending on market conditions.
