reporting**

## Credit Suisse AG Parent Company – 3Q14 Pillar 3 regulatory capital ratio reporting

In December 2013, the Swiss Financial Market Supervisory Authority FINMA (FINMA) issued a decree specifying capital adequacy requirements for the Bank, on a stand-alone basis, and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions (FINMA Decree). The FINMA Decree became effective on February 2, 2014 and required the Group to fully comply with the special requirements for systemically important banks set out in the Capital Adequacy Ordinance.

FINMA requires systematically relevant banks to publish on a quarterly basis:

- Ratios regarding CET1 capital, the conversion capital with a high trigger rate and the conversion capital with a low trigger rate in regard to the coverage of risk-weighted items. For each conversion capital composite, the bank must indicate which part is additional tier 1 and which tier 2. (see below for related disclosure)
- a reconciliation into numbers and percentages which allows an analysis whether the basic requirements of the capital buffer have been maintained. (see page 3 for related disclosure)
- absolute numbers in regard to unweighted capital requirements (leverage ratio). It is divided into minimum requirement, capital buffer and progressive component. (see page 4 for related disclosure)

For further information refer to our quarterly Financial Reports.

### Swiss statistics - Basel III - Credit Suisse AG Parent Company

end of	3Q14	4Q13
<b>Eligible capital (CHF million)</b>		
<b>Swiss CET1 capital <sup>1</sup></b>	<b>44'770</b>	<b>29'493</b>
High-trigger capital instruments <sup>2</sup>	8'214	7'743
Low-trigger capital instruments <sup>3</sup>	8'111	5'192
Additional tier 1 and tier 2 instruments subject to phase out <sup>4</sup>	5'771	–
Deductions from additional tier 1 and tier 2 instruments <sup>4</sup>	(456)	–
<b>Swiss total eligible capital <sup>1</sup></b>	<b>66'410</b>	<b>42'428</b>
