List of abbreviations	170
Investor information	171
Financial calendar and contacts	172
Cautionary statement regarding forward-looking information	173

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of "-" indicates not meaningful or not applicable.

MESSAGE FROM THE CHAIRMAN AND THE CHIEF EXECUTIVE OFFICER

Dear shareholders

3Q16 was a period of continued progress for Credit Suisse. The Group and all operating divisions were profitable. We remained focused on implementing our strategy with discipline, delivering further reductions in cost as we lower our break-even point. Our client franchises across Swiss Universal Bank (SUB), Asia Pacific (APAC) and International Wealth Management (IWM) achieved a profitable quarter, with continued healthy net asset inflows at solid margins. Our advisory and underwriting teams in Investment Banking & Capital Markets (IBCM) stayed close to our clients during the quarter, gaining market share in key product areas. In Global Markets (GM), we had a second profitable quarter this year with notable strength in our Credit franchises. The Strategic Resolution Unit (SRU) achieved further reductions in risk-weighted assets (RWA) and leverage exposure as well as a significant reduction in adjusted* costs. This is an important source of capital for the Group, allowing resources to be reinvested in APAC, IWM, SUB and IBCM, where we expect to generate higher returns. We further strengthened our capital position with a CET1 ratio of 12.0% and CET1 leverage ratio of 3.4% on a look-through basis as of end-3Q16.

Financial performance

Credit Suisse reported net income attributable to shareholders of CHF 41 million and pre-tax income of CHF 222 million in 3Q16 (adjusted*: CHF 327 million). SUB, APAC and IWM were significant contributors to this result, generating combined adjusted* pre-tax income of CHF 847 million. They attracted net new assets (NNA) of CHF 9.2 billion in their wealth management businesses during the quarter and a total of CHF 30.9 billion since the beginning of 2016.

In our Swiss home market, where we offer expert service and advice to the full spectrum of clients, SUB delivered adjusted* pre-tax income of CHF 431 million in 3Q16. We made further progress in growing our *Bank for Entrepreneurs*, which combines our wealth management and corporate banking capabilities. More clients signed up to our *Credit Suisse Invest* offering, which drove mandates penetration of 29% at end-3Q16, an increase of 5 percentage points compared to 3Q15. Our investment bank in Switzerland maintained its leading market share in terms of announced mergers and acquisitions transactions¹ and debt capital market deals². Our Swiss legal entity Credit Suisse (Schweiz) AG is on track to start operations in November 2016. This important step will enhance the Group's resolvability in accordance with regulatory requirements. The planned partial (20-30%) initial public offering of Credit Suisse (Schweiz) AG is scheduled to take place by end-2017, market conditions permitting³.

In APAC, we delivered adjusted* pre-tax income of CHF 175 million in 3Q16. Our integrated approach to serving ultra-high-net-worth-individuals (UHNWI) and entrepreneur clients has allowed us to grow revenues in APAC. We reported record assets under

Urs Rohner, Chairman of the Board of Directors (left) and Tidjane Thiam, Chief Executive Officer.

management of CHF 169 billion and NNA of CHF 4.6 billion at end-3Q16, driven by the quality and effectiveness of the integrated approach we take between wealth management and investment banking. The division achieved an annualized NNA growth rate of 12%. Our advisory and underwriting business ranked #1 in terms of share of wallet in Asia Pacific ex-Japan among international banks⁴ in 9M16.

In IWM, we delivered a robust performance in 3Q16 with adjusted* pre-tax income of CHF 241 million despite lower levels of client activity. In wealth management, we achieved strong NNA of CHF 4.4 billion, representing an annualized growth rate of 6%. Our growth initiatives, including the launch of the Strategic Client Partners unit with a dedicated coverage team, have allowed us to create further value for our UHNWI clients. In Asset Management, we had a strong quarter with asset inflows of CHF 5.0 billion, including notable contributions from emerging markets and fixed income products.

IBCM had a profitable quarter with adjusted* pre-tax income of USD 55 million. In Advisory, we continued to leverage the strength of our global franchise, with a number of marquee transactions exceeding USD 10 billion⁵ announced during 3Q16. Across our IBCM franchise, our global reach and the connectivity between teams is stronger than ever. This reflects our integrated approach to client coverage across our UHNWI, corporate and financial sponsor client base, combined with industry and financing capabilities.

GM was profitable with adjusted* pre-tax income of USD 150 million in 3Q16 in spite of a reduction of 16% of RWA and of 14% of revenues year on year. A number of our client franchises had a strong quarter compared to 3Q15, particularly in Credit.

Global Credit Products globally delivered its best third quarter performance since 2013 as our teams stayed close to clients across high yield and investment grade markets. This was offset by a weaker contribution from our equities businesses, particularly in equity derivatives and equities trading in Europe. In the US, our Equities franchise held up well and we maintained our strong positions with our core clients across Cash and Prime Services. We continue to make progress in creating operating leverage in GM and expect to approach our end-2018 cost target of USD 5.4 billion by end-2016. Our focus on costs played a key role in GM's 3Q16 profitability.

The SRU continued to make progress in reducing costs and capital. Since 3Q15, RWA, leverage exposure and adjusted* operating costs were reduced by USD 20 billion, USD 78 billion and USD 310 million, respectively.

Improved capital position

We further improved our capital position and reported a look-through CET1 capital ratio of 12.0% at end-3Q16, compared to 11.8% at end-2Q16. The look-through CET1 leverage ratio was 3.4% at end-3Q16.

Outlook

We are delivering on our strategy and are maintaining a quality dialogue with our clients across wealth management and investment banking. Looking ahead, we expect market activity to continue to be influenced by geopolitical and macro-economic uncertainty over the next several quarters and the outlook to remain challenging. We believe that we are on the right path and are making progress on implementing our strategy. These efforts are driven by the hard work and dedication of our employees, whom we thank wholeheartedly for their relentless and daily efforts, and the support of our clients, who entrust us with their business, and of our shareholders around the globe.

Best regards

Urs Rohner
Chairman of the
Board of Directors

Tidjane Thiam
Chief Executive Officer

Important information

When we refer to wealth management focused divisions throughout this document, we mean APAC, IWM and SUB. References to the "wealth management" businesses in APAC, IWM and SUB refer to those divisions' Private Banking businesses.

When we refer to operating divisions throughout this document, we mean SUB, IWM, APAC, IBCM and GM.

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. As of January 1, 2015, the BIS leverage ratio framework, as issued by BCBS, was implemented in Switzerland by FINMA. The related disclosures are in accordance with Credit Suisse's interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of Credit Suisse's assumptions or estimates could result in different numbers from those shown herein.

References to phase-in and look-through included herein refer to Basel III requirements. Phase-in under the Basel III capital framework reflects that for the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets) and for the years 2013 – 2022, there will be a phase out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the full phase out of certain capital instruments.

Unless otherwise noted, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments.

Mandates penetration reflects advisory and discretionary mandates as percentage of total AuM, excluding AuM from the external asset manager (EAM) business.

We may not achieve all of the expected benefits of our strategic initiatives. Factors beyond our control, including but not limited to the market and economic conditions, changes in laws, rules or regulations and other challenges discussed in our public filings, could limit our ability to achieve some or all of the expected benefits of these initiatives.

This document contains forward-looking statements that involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements. A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2015 filed with the US Securities and Exchange Commission, and in other public filings and press releases. We do not intend to update these forward-looking statements except as may be required by applicable law.

Credit Suisse at a glance

Credit Suisse

Our strategy builds on Credit Suisse's core strengths: its position as a leading global wealth manager, its specialist investment banking capabilities and its strong presence in our home market of Switzerland. We take a balanced approach to capture the wealth management opportunities in emerging markets, the largest of which is in the Asia Pacific region, while also serving key developed markets with an emphasis on Switzerland. Founded in 1856, we today have a global reach with operations in about 50 countries and 47,690 employees from over 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture growth opportunities around the world. We serve our clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specializing in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios from the former non-strategic units plus additional businesses and positions that do not fit with our strategic direction. Our business divisions cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

Swiss Universal Bank

The Swiss Universal Bank division offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients primarily domiciled in our home market of Switzerland, which offers attractive growth opportunities and where we can build on a strong market position across our key businesses. Our private banking business has a leading franchise in our Swiss home market and serves ultra-high-net-worth individuals, high-net-worth individuals and retail clients. Our corporate and institutional banking business serves large corporate clients, small and medium-sized enterprises, institutional clients and financial institutions.

Asia Pacific

The Asia Pacific division offers integrated private banking and investment banking financial solutions to wealthy individuals, institutional investors and corporate clients in the Asia Pacific region, drawing on Credit Suisse's global resources. The division is well positioned to capture market opportunities in Asia Pacific, which is experiencing rapid wealth creation and where the number of ultra-high-net-worth individuals is growing. We offer institutional investors access to broader financial markets and differentiated product offerings.

Investment Banking & Capital Markets

The Investment Banking & Capital Markets division offers a broad range of investment banking services to corporations, financial institutions, financial sponsors and ultra-high-net-worth individuals and sovereign clients. Our range of products and services includes advisory services related to mergers and acquisitions, divestitures, takeover defense mandates, business restructurings and spin-offs. The division also engages in debt and equity underwriting of public securities offerings and private placements.

International Wealth Management

The International Wealth Management division offers tailored financial solutions to wealthy private clients and external asset managers in Europe, the Middle East, Africa and Latin America through its private banking business. The division's footprint spans emerging economies as well as mature European markets and it has access to the broad spectrum of Credit Suisse's global resources and capabilities. Our asset management business offers investment solutions and services globally to our private banking businesses and a wide range of other clients, including pension funds, governments, foundations and endowment funds, corporations and individuals.

Global Markets

The Global Markets division offers a broad range of equities and fixed income products and services and focuses on client-driven businesses and on supporting Credit Suisse's private banking businesses and their clients. Our suite of products and services includes global securities sales, trading and execution services, prime brokerage, underwriting and comprehensive investment research. Our clients include financial institutions, corporations, governments, institutional investors – including pension funds and hedge funds – and private individuals around the world.

Strategic Resolution Unit

The Strategic Resolution Unit was created to facilitate the immediate right-sizing of our business divisions from a capital perspective and includes remaining portfolios from former non-strategic units plus transfers of additional exposures from the business divisions. The unit's primary focus is on facilitating the rapid wind-down of capital usage and costs to reduce the negative impact on the Group's performance. Repositioned as a separate division, this provides clearer accountability, governance and reporting.

Operating environment

During 3Q16, global economic indicators were generally positive in developed economies, and there were further signs of stabilization in major emerging markets. Global equity markets ended the quarter higher and world bank stocks outperformed. Government bond yields were mixed. The US dollar depreciated against the euro and Japanese yen.

ECONOMIC ENVIRONMENT

Economic data in the US was mixed in 3Q16, as business surveys showed sentiment weakened and the strong recovery in retail sales that had taken place since the beginning of the year moderated. Sentiment among consumers and in the homebuilding sector remained at relatively high levels, and improvements in the labor market continued. Inflation stayed close to the rates seen during the first two quarters of the year. Eurozone economic data remained largely positive. Recent economic data for the UK indicated that to date the immediate economic impact of the UK referendum on continued EU membership has been relatively limited. Within emerging markets, major economies such as China and Brazil showed signs of stabilization.

The US Federal Reserve (Fed) left policy rates unchanged at its meetings in July and September. The European Central Bank (ECB) and the Swiss National Bank (SNB) also left their monetary policies on hold during the quarter. However, in August the Bank of England (BoE) announced significant additional measures to ease monetary policy by increasing the size of its asset purchase program and cutting the policy rate. The Bank of Japan announced a shift towards targeting specific yield levels and away from specifying the amounts of asset purchases, while the Reserve Bank of Australia again lowered interest rates. Among major emerging

markets, only the Russian central bank lowered interest rates again, while those in China, India and Brazil left them unchanged.

Global equities appreciated in 3Q16 on the back of heightened expectations that central banks would continue to implement accommodative monetary policies (refer to the charts "Equity markets"). Among developed markets, UK and Japan equities outperformed global equity markets while Swiss and US equities lagged behind. UK equities mainly benefited from stabilizing commodity prices and a weaker British pound. Japanese equities gained from higher expectations of fiscal and monetary stimulus measures. Emerging markets outperformed developed markets, with Asia leading the outperformance driven by the stabilization of macro-economic data in China. During the quarter, equity market volatility, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), remained low. However in September, volatility was higher due to an increased likelihood that the Fed would raise interest rates in the near term and concerns regarding the financial health of certain European banks (refer to the charts "Equity markets"). Risk appetite, as measured by the Credit Suisse Equity Risk Appetite Index, remained largely unchanged throughout the quarter. The Credit Suisse Hedge Fund Index increased 1.7% in 3Q16.

Yield curves

In 3Q16, USD yield curves increased mainly at the short-end of the maturity curve, EUR yields decreased and CHF yields increased.

Source: Datastream, Credit Suisse

Equity markets

Equity markets ended the quarter higher, with emerging markets equities and European bank equities outperforming. Equity market volatility decreased compared to the previous quarter.

After a decline in the first half of the year, government bond yields were trading lower in euros, higher in Swiss francs, and mixed in US dollars in 3Q16 (refer to the charts “Yield curves”). The yield movement was mainly a reflection of the positive risk environment following the UK referendum, with UK economic data remaining resilient. Nevertheless, government bond yields in British pounds declined, as market participants discounted the potential for monetary easing by the BoE following the UK referendum. High yield and emerging market bonds continued to perform well, with local currency bonds recording the best total returns on a US dollar unhedged basis. Among investment grade corporate bonds, the utility sector performed the best, benefiting from their longer term to maturity as credit spreads compressed. At the same time, the spread tightening was the most significant for industrials, which was also supported by the ECB corporate bond buying program (refer to the charts “Credit spreads”).

The US dollar depreciated slightly against the euro and Japanese yen in 3Q16 as the Fed kept its monetary policy unchanged. In this environment, currencies which offered some interest rate advantage such as the Australian and New Zealand dollar gained modestly. The Swiss franc traded within a narrow band against the euro. Despite some intermittent recoveries, the British pound was again the weakest currency among the G-10 countries in 3Q16. In emerging markets, the South African rand was the strongest currency, while the Mexican peso was the weakest currency.

Commodity prices, as reflected by the Credit Suisse Commodities Benchmark, decreased 1.8%. Energy markets had a

volatile quarter and ended the quarter lower. Agriculture markets underperformed after an increase in autumn harvest estimates in response to good summer weather in key growing regions. Precious and industrial metals markets were less volatile and ended the quarter higher.

Credit spreads

Despite an increase in September, credit spreads were lower at the end of 3Q16.

SECTOR ENVIRONMENT

Bank equities in general outperformed global stocks in 3Q16, partially reversing their underperformance in the first half of 2016. European bank stocks outperformed world bank stocks (refer to the charts “Equity markets”).

In private banking, market conditions remained challenging in light of the political and economic uncertainty around the impact of the UK decision to leave the EU, the persistence of the low interest rate environment, the uncertainty concerning central banks’ monetary policies going forward and increased concerns about global growth. The sector continues to face significant structural pressure as it adapts to industry-specific regulatory changes, tax regularization and anti-money laundering initiatives. In particular, regulatory requirements for investment advisory services continue to increase, including in the areas of client suitability and appropriateness of advice, information and documentation.

In investment banking, equity trading volumes decreased globally and in Europe compared to 2Q16 and 3Q15. Global announced mergers and acquisitions (M&A) and global completed M&A volumes also decreased compared to 2Q16 and 3Q15. European completed M&A volumes increased compared to 2Q16, but decreased compared to 3Q15. Global equity underwriting volumes were higher compared to 2Q16 and 3Q15, while European equity underwriting volumes were lower for both periods. Global and European debt underwriting volumes were lower compared to 2Q16 and higher compared to 3Q15. Compared to 2Q16, total US fixed income trading volumes were higher, mainly driven by an increase in mortgage-backed and corporate volumes, and higher compared to 3Q15, mainly driven by an increase in mortgage-backed, federal agency and corporate volumes.

Credit Suisse

In 3Q16, we recorded net income attributable to shareholders of CHF 41 million. Diluted earnings per share were CHF 0.02 and return on equity attributable to shareholders was 0.4%. As of the end of 3Q16, our BIS CET1 ratio was 12.0% on a look-through basis.

¹ Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders as presented in our balance sheet. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

² Disclosed on a look-through basis.

Credit Suisse reporting structure

Credit Suisse includes the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core Results do not include revenues and expenses from our Strategic Resolution Unit.

RESULTS SUMMARY

In 3Q16, Credit Suisse reported net income attributable to shareholders of CHF 41 million compared to CHF 170 million in 2Q16 and CHF 779 million in 3Q15.

Net revenues of CHF 5,396 million increased 6% compared to 2Q16, primarily reflecting higher net revenues in Swiss Universal Bank, the Strategic Resolution Unit and Corporate Center, partially offset by lower net revenues in Global Markets. The increase in Swiss Universal Bank was mainly due to gains on the sale of real estate of CHF 346 million. The movement in net revenues in the Strategic Resolution Unit was primarily driven by lower negative valuation adjustments in the legacy investment banking portfolio and lower overall funding costs for the division. Net revenues in Corporate Center increased, primarily due to improved treasury results. The decrease in net revenues in Global Markets reflected a seasonal slowdown in client activity exacerbated by challenging market conditions, particularly in equities.

Net revenues decreased 10% compared to 3Q15, primarily reflecting lower net revenues in Corporate Center and Global Markets, partially offset by higher net revenues in Swiss Universal Bank mainly due to the gains on the sale of real estate. Net revenues in Corporate Center decreased, primarily driven by fair value gains from movements in own credit spreads in 3Q15, which, beginning in 1Q16, are no longer recorded in the consolidated income statement under US generally accepted accounting principles (US GAAP). Net revenues in Global Markets declined primarily due to challenging equity trading conditions in Europe, Middle East and Africa (EMEA). The movement in net revenues in the Strategic Resolution Unit was primarily driven by lower revenues from the restructuring of select onshore businesses, in particular the transfer of our US private banking business, which was announced in October 2015, and lower negative valuation adjustments in the legacy investment banking portfolio.

Provision for credit losses of CHF 55 million primarily related to a net provision for credit losses of CHF 34 million in Asia Pacific and CHF 30 million in Swiss Universal Bank.

Total operating expenses of CHF 5,119 million increased 4% compared to 2Q16, reflecting a 12% increase in general and administrative expenses, including higher litigation provisions of CHF 357 million, mainly in connection with mortgage-related matters, and a 59% increase in restructuring expenses. These increases were partially offset by a 2% decrease in compensation and benefits, reflecting lower social security costs and lower salaries and variable compensation. We incurred CHF 145 million of restructuring expenses in 3Q16 in connection with our new strategy, of which CHF 123 million related to severance and other compensation expenses.

Total operating expenses increased 2% compared to 3Q15, reflecting a 7% increase in compensation and benefits, mainly due to higher discretionary compensation expenses, reflecting lower compensation accruals in 3Q15, and certain deferred compensation retention awards relating to Global Markets and Investment Banking & Capital Markets, and the restructuring expenses in 3Q16, partially offset by a 6% decrease in general and administrative expenses, mainly due to lower professional services expenses.

Income tax expense of CHF 185 million recorded in 3Q16 mainly reflected the impact of the geographical mix of results, the impact of non-deductible litigation accruals, the provision increase for tax matters in Italy which have been resolved and the impact of a deferred tax asset re-assessment in Switzerland. Overall, net deferred tax assets increased CHF 164 million to CHF 6,435 million, mainly driven by earnings and the 3Q16 deferred tax asset re-assessment, partially offset by a decrease relating to the gains on the sale of real estate. Deferred tax assets on net operating losses increased CHF 362 million to CHF 2,956 million during 3Q16. The Credit Suisse effective tax rate was 83.3% in 3Q16, compared to 10.6% in 2Q16.

EMPLOYEES

Headcount at the end of 3Q16 was 47,690, an increase of 510 compared to 2Q16, primarily reflecting seasonal graduate hiring, business growth in Asia Pacific and International Wealth Management and increases relating to our risk management and compliance functions, partially offset by the impact of our cost efficiency initiatives.

Number of employees

end of	3Q16	2Q16	3Q15
Number of employees (full-time equivalents)			
Swiss Universal Bank	13,440	13,280	13,230

REGULATORY CAPITAL

As of the end of 3Q16, our BIS CET1 ratio was 12.0% and our risk-weighted assets were CHF 270.5 billion, both on a look-through basis.

► Refer to "Capital management" in II – Treasury, risk, balance sheet and off-balance sheet for further information.

INFORMATION AND DEVELOPMENTS

Format of presentation

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

Corporate services and business support in finance, operations, human resources, legal, compliance, risk management and IT are provided by corporate functions and the related costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

Certain reclassifications have been made to prior periods to conform to the current presentation.

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and

regulations thereunder. As of January 1, 2015, the Bank for International Settlements (BIS) leverage ratio framework, as issued by the Basel Committee on Banking Supervision (BCBS), was implemented in Switzerland by the Swiss Financial Market Supervisory Authority FINMA (FINMA). Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions and estimates. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown herein.

The calculation of divisional economic risk capital metrics and associated ratios under the new organization required certain additional assumptions and allocation methods which may not be required for future periods given the level of information then available.

▶ Refer to “Leverage metrics” and “Economic risk capital review” in II – Treasury, risk, balance sheet and off-balance sheet – Capital management and Risk management, respectively, for further information.

Return on regulatory capital

Credit Suisse measures firm-wide returns against total shareholders' equity and tangible shareholders' equity. In addition, it also measures the efficiency of the firm and its divisions with regard to the usage of capital as determined by the minimum requirements set by regulators. This regulatory capital is calculated as the worst of 10% of risk-weighted assets and 3.5% of the leverage exposure. Return on regulatory capital is calculated using income after tax and assumes a tax rate of 30% and capital allocated based on the worst of 10% of average risk-weighted assets and 3.5% of average leverage exposure. For Global Markets and Investment Banking & Capital Markets, return on regulatory capital is based on US dollar denominated numbers. These percentages are used in the calculation in order to reflect the 2019 fully phased in Swiss regulatory minimum requirements for Basel III common equity tier 1 (CET1) capital and leverage ratio.

End of / in 3Q16 (CHF billion, except where indicated)

Shareholders' equity		44.3
Return on equity	0.4%	
Tangible shareholders' equity		39.4
Return on tangible shareholders' equity	0.4%	4.9
Regulatory capital		33.2
Return on regulatory capital	1.8%	6.2

Management changes

Effective September 6, 2016, Brian Chin was appointed to the Executive Board as CEO of Global Markets. Tim O'Hara stepped down from the Executive Board and his position as CEO of Global Markets.

Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

▶ Refer to “Note 1 – Summary of significant accounting policies” and “Note 29 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 3Q16, 41% and 25% of our total assets and total liabilities, respectively, were measured at fair value.

The majority of our level 3 assets are recorded in our investment banking businesses. Total assets at fair value recorded as level 3 decreased CHF 5.0 billion to CHF 24.2 billion as of the end of 3Q16, primarily reflecting net transfers out of level 3, net settlements and net sales mainly in trading assets and loans.

Our level 3 assets, excluding assets attributable to noncontrolling interests and assets of consolidated variable interest entities (VIEs) that are not risk-weighted assets under the Basel framework, were CHF 23.9 billion, compared to CHF 28.8 billion as of the end of 2Q16. As of the end of 3Q16, these assets comprised 3% of total assets and 7% of total assets measured at fair value, both adjusted on the same basis, compared to 4% and 9%, respectively, as of the end of 2Q16.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition, however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

ADJUSTED RESULTS

Adjusted results referred to in this report are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group

and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

CORE RESULTS

In 3Q16, Core Results net revenues of CHF 5,561 million increased 2% compared to 2Q16, primarily reflecting higher net revenues in Swiss Universal Bank and Corporate Center, partially offset by lower net revenues in Global Markets. Provision for credit losses was CHF 50 million, primarily reflecting net provisions of CHF 34 million in Asia Pacific and CHF 30 million in Swiss Universal Bank. Total operating expenses of CHF 4,437 million were stable compared to 2Q16. General and administrative expenses of CHF 1,464 million decreased 4%, primarily related to Global Markets. Compensation and benefits of CHF 2,540 million were stable compared to 2Q16, primarily due to decreases in Global Markets, International Wealth Management and Swiss Universal Bank, partially offset by an increase in Corporate Center. Restructuring expenses of CHF 124 million increased 75% compared to 2Q16 in connection with our new strategy.

Core Results net revenues decreased 8% compared to 3Q15, primarily reflecting lower net revenues in Corporate Center and

Global Markets, partially offset by higher net revenues in Swiss Universal Bank. Total operating expenses increased 2% compared to 3Q15. Compensation and benefits increased 15%, primarily related to increases in Corporate Center, reflecting the deferred compensation retention awards, and in Global Markets and Investment Banking & Capital Markets, due to higher discretionary compensation expenses, reflecting lower compensation accruals in 3Q15. Total operating expenses in 3Q16 were also impacted by restructuring expenses of CHF 124 million. The increases in total operating expenses were largely offset by an 18% decrease in general and administrative expenses, primarily related to Global Markets, reflecting the absence of a CHF 127 million litigation expense in 3Q15 relating to a credit default swap settlement and reduced costs related to the division's risk, regulatory and compliance infrastructure. The decline in general and administrative expenses also reflected decreases in International Wealth Management and Swiss Universal Bank.

EVOLUTION OF LEGAL ENTITY STRUCTURE

The execution of the program evolving the Group's legal entity structure to support the realization of our strategic objectives, increase the resilience of the Group and meet developing and future regulatory requirements has continued to progress.

- On July 1, 2016, Credit Suisse Holdings (USA), Inc. was fully established as our Intermediate Holding Company (IHC), in line with regulatory requirements. The IHC went live with the requisite capital, liquidity, infrastructure and governance, including its newly established board of directors;
- Credit Suisse registered a new Swiss legal entity under the name Credit Suisse (Schweiz) AG in 2015. This new legal entity is a wholly-owned subsidiary of Credit Suisse AG. It will assume and service Credit Suisse AG's clients of Swiss Universal Bank and will include the majority of that division's employees and those parts of the corporate functions that primarily serve Swiss Universal Bank within Credit Suisse AG and will not be outsourced to other Group entities. Credit Suisse (Schweiz) AG was established to support the realization of the Group's strategic objectives, to further increase its resilience and to meet developing and future regulatory requirements. The entity received its banking license as of October 14, 2016, and is expected to start its business operations as an independent Swiss bank on November 20, 2016. As licensed Swiss banks, both Credit Suisse AG and Credit Suisse (Schweiz) AG will be subject to the same rules and standards regarding client protection, asset segregation and Swiss banking confidentiality. In line with our strategy, we are also planning a partial initial public offering (IPO) of Credit Suisse (Schweiz) AG by the end of 2017, market conditions permitting. Any such IPO would involve the sale of a minority stake and would be subject to, among other things, all necessary approvals and would be intended to generate/raise additional capital for Credit Suisse AG or Credit Suisse (Schweiz) AG.

► Refer to "Evolution of legal entity program" in II – Operating and financial review – Credit Suisse in the Credit Suisse Annual Report 2015 for further information.

REGULATORY DEVELOPMENTS AND PROPOSALS

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

On July 4, 2016, the European Commission (EC) published an implementing decision on the equivalence of US designated contract markets (DCM) in the Official Journal of the EU. The decision states that, for the purpose of Article 2(7) of the European Market Infrastructure Regulation (EMIR), the US Commodity Futures Trading Commission (CFTC) designated boards of trade will be considered "equivalent" to EU regulated markets. Accordingly, any derivatives contract executed on a US DCM will not be considered an "over-the-counter (OTC) contract", and so will not be subject to the EMIR central clearing requirements. The implementing decision came into force on July 23, 2016.

On July 6, 2016, the Fed provided its final of three one-year extensions for the conformance of pre-2014 "legacy" investments in, and bank relationships with, certain private funds, extending the deadline to July 21, 2017.

On July 14 and 28, 2016, the EC adopted nine delegated regulations setting various regulatory and technical standards (RTS) in relation to certain provisions of the Markets in Financial Instruments Directive (MiFID II) and the revised Markets in Financial Instruments Regulation (MiFIR). The RTS regulations will now be considered by the European Council and European Parliament and are expected to apply from January 3, 2018, the day on which MiFIR and MiFID II enter into force. On July 15, 2016, the European Parliament stated that it did not object to the proposed delegated directive supplementing MiFID II, which will come into force 20 days after publication in the Official Journal of the EU.

On September 28, 2016, the CFTC adopted rule amendments that will expand mandatory clearing requirements to include certain interest rate swaps and derivatives denominated in Australian, Canadian, Hong Kong, Mexican, Norwegian, Polish, Singapore, Swedish and Swiss currencies, which will take effect over the course of the end of 2016 through 2018. In addition, these swaps and derivatives may potentially become subject to mandatory exchange trading in the US. To the extent other jurisdictions have not adopted similarly broad clearing requirements and mandatory trading requirements, these rules could fragment interest rate swap liquidity, making it more expensive for Credit Suisse to trade in those markets.

► Refer to "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2015 for further information and "Regulatory developments and proposals" and "Regulatory framework" in II – Treasury, risk, balance sheet and off-balance sheet – Capital management and Liquidity and funding management, respectively, for further information.

Swiss Universal Bank

In 3Q16, we reported income before taxes of CHF 758 million and net revenues of CHF 1,667 million. Income before taxes was CHF 305 million higher compared to 2Q16 and CHF 358 million higher compared to 3Q15.

RESULTS SUMMARY

3Q16 results

In 3Q16, we reported income before taxes of CHF 758 million and net revenues of CHF 1,667 million. Compared to 2Q16, net revenues were 25% higher, mainly due to gains on the sale of real estate of CHF 346 million and higher net interest income partly offset by lower transaction-based revenues. Total operating expenses were stable compared to 2Q16, primarily reflecting higher restructuring expenses and higher general and administrative expenses, offset by slightly lower compensation and benefits.

Compared to 3Q15, net revenues were 22% higher, mainly due to the gains on the sale of real estate and slightly higher net interest income, partially offset by lower transaction-based revenues and slightly lower recurring commissions and fees. Total operating expenses decreased 5% compared to 3Q15, reflecting

lower general and administrative expenses, partially offset by restructuring expenses in 3Q16.

Adjusted income before taxes of CHF 431 million was 6% lower compared to 2Q16 and 8% higher compared to 3Q15.

Capital and leverage metrics

As of the end of 3Q16, we reported risk-weighted assets of CHF 65.6 billion, an increase of CHF 1.0 billion compared to the end of 2Q16, driven by methodology changes and business growth. Leverage exposure was CHF 246.3 billion, reflecting an increase of CHF 1.1 billion compared to the end of 2Q16, driven by business growth and an increase in the volume of transactions in the quarter, partially offset by lower high-quality liquid assets (HQLA).

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction-based income. Other revenues include fair value gains/(losses) on synthetic securitized loan portfolios and other gains and losses.

PRIVATE BANKING

RESULTS

Income before taxes of CHF 544 million was significantly higher compared to 2Q16, reflecting higher net revenues, partially offset by higher total operating expenses. Compared to 3Q15, income before taxes increased significantly, reflecting higher net revenues and lower total operating expenses. Adjusted income before taxes of CHF 214 million decreased 16% compared to 2Q16 and increased 5% compared to 3Q15.

Net revenues

Compared to 2Q16, net revenues of CHF 1,160 million were 38% higher due to the gains on the sale of real estate of CHF 346 million reflected in other revenues. Transaction-based revenues of CHF 125 million were 21% lower primarily due to lower equity participations income, driven by higher revenues in 2Q16 from the proceeds from the sale of our equity stake in Visa Europe Ltd. to Visa Inc. and a regular dividend from our ownership interest in SIX Group AG. Recurring commissions and fees of CHF 243 million were stable. Net interest income was stable at CHF 446 million with stable loan margins on slightly higher average loan volumes and slightly higher deposit margins on stable average deposit

volumes. Adjusted net revenues of CHF 814 million were slightly lower compared to 2Q16.

Compared to 3Q15, net revenues increased 35%, reflecting the gains on the sale of real estate in 3Q16. Transaction-based revenues decreased 17% with lower brokerage and product issuing fees, lower fees from foreign exchange client business and lower sales and trading revenues. Recurring commissions and fees decreased 5%, primarily reflecting lower investment product management fees. Net interest income was stable with lower deposit margins on stable average deposit volumes, offset by improved loan margins on stable average loan volumes. Adjusted net revenues decreased 5% compared to 3Q15.

Provision for credit losses

The Private Banking loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities and, to a lesser extent, consumer finance loans.

In 3Q16, Private Banking recorded provision for credit losses of CHF 13 million compared to CHF 7 million in 2Q16 and CHF 14 million in 3Q15. The provision was primarily related to our consumer finance business.

Total operating expenses

Compared to 2Q16, total operating expenses of CHF 603 million increased 4%, primarily reflecting higher restructuring expenses and higher general and administrative expenses. General and administrative expenses of CHF 233 million increased 4% primarily due to higher allocated corporate function costs. Compensation and benefits of CHF 312 million were stable compared to 2Q16, primarily reflecting lower discretionary compensation expenses and slightly lower salary expenses, offset by higher allocated corporate function costs. Adjusted total operating expenses of CHF 587 million were stable compared to 2Q16.

Compared to 3Q15, total operating expenses were 6% lower, despite investments in regulatory and compliance functions, reflecting lower general and administrative expenses, partly offset by restructuring expenses in 3Q16. General and administrative expenses decreased 20%, primarily reflecting decreased allocated corporate function costs. Compensation and benefits were slightly higher, reflecting higher allocated corporate function costs and higher salary expenses, partially offset by lower pension expenses and lower deferred compensation expenses from prior-year awards. Adjusted total operating expenses were 8% lower compared to 3Q15.

MARGINS

Gross margin

Our gross margin was 191 basis points in 3Q16, 51 basis points higher compared to 2Q16, mainly reflecting the gains on the sale of real estate on stable average assets under management. Compared to 3Q15, our gross margin was 50 basis points higher, primarily due to the gains on the sale of real estate on stable average assets under management. On the basis of adjusted net revenues, our gross margin was 134 basis points in 3Q16, six basis points lower compared to 2Q16 and seven basis points lower compared to 3Q15.

► Refer to "Assets under management" for further information.

Net margin

Our net margin was 89 basis points in 3Q16, 47 basis points higher compared to 2Q16, mainly due to the gains on the sale of real estate, partially offset by higher total operating expenses. Compared to 3Q15, our net margin was 55 basis points higher, primarily reflecting the gains on the sale of real estate in 3Q16. On the basis of adjusted income before taxes, our net margin was 35 basis points in 3Q16, seven basis points lower compared to 2Q16 and one basis point higher compared to 3Q15.

ASSETS UNDER MANAGEMENT

As of the end of 3Q16, assets under management of CHF 244.5 billion were CHF 3.1 billion higher compared to the end of 2Q16, mainly driven by favorable market movements. Net new assets of

CHF 0.2 billion were negatively impacted by terminated relationships with certain external asset managers and the regularization of client assets.

CORPORATE & INSTITUTIONAL BANKING**RESULTS**

Income before taxes of CHF 214 million increased 6% compared to 2Q16, driven by lower total operating expenses and slightly higher net revenues, partially offset by higher provision for credit losses. Compared to 3Q15, income before taxes was 9% higher, reflecting slightly lower total operating expenses and lower provision for credit losses. Adjusted income before taxes of CHF 217 million increased 7% and 11% compared to 2Q16 and 3Q15, respectively.

Net revenues

Compared to 2Q16, net revenues of CHF 507 million were slightly higher with higher net interest income, partially offset by lower transaction-based revenues. Net interest income of CHF 278 million increased 15%, mainly driven by provisions taken in 2Q16 relating to interest rate swaps. Transaction-based revenues of

CHF 124 million were 15% lower, mainly due to lower sales and trading revenues, lower revenues from our Swiss investment banking business, lower fees from foreign exchange client business and higher revenues in 2Q16 from a regular dividend from SIX Group. Recurring commissions and fees were CHF 118 million, 4% lower due to decreased investment product management fees.

Compared to 3Q15, net revenues were stable, with higher net interest income offset by lower transaction-based revenues. Net interest income increased 9%, driven by slightly improved loan margins on stable average loan volumes and improved deposit margins on decreased average deposit volumes. Transaction-based revenues decreased 14% with lower sales and trading revenues, decreased corporate advisory fees and lower fees from foreign exchange client business. Recurring commissions and fees were stable.

Provision for credit losses

The Corporate & Institutional Banking loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

In 3Q16, Corporate & Institutional Banking recorded provision for credit losses of CHF 17 million compared to CHF 2 million in 2Q16 and CHF 25 million in 3Q15. The increase compared to 2Q16 reflected several individual cases.

Total operating expenses

Compared to 2Q16, total operating expenses of CHF 276 million were 6% lower, primarily reflecting lower compensation and benefits. Compensation and benefits of CHF 162 million decreased 11%, driven by lower allocated corporate function costs and lower discretionary compensation expenses. General and administrative expenses of CHF 87 million increased slightly due to higher litigation provisions.

Compared to 3Q15, total operating expenses were slightly lower, driven by lower general and administrative expenses and slightly lower compensation and benefits. General and administrative expenses decreased 9% with lower allocated corporate function costs partly offset by higher professional services fees. Compensation and benefits were slightly lower mainly due to lower allocated corporate function costs, partially offset by higher discretionary compensation and salary expenses.

ASSETS UNDER MANAGEMENT

As of the end of 3Q16, assets under management of CHF 284.6 billion were CHF 3.7 billion higher compared to the end of 2Q16, driven by favorable market movements, partially offset by net asset outflows of CHF 1.2 billion from a small number of individual cases.

International Wealth Management

In 3Q16, we reported income before taxes of CHF 245 million and net revenues of CHF 1,081 million.

RESULTS SUMMARY

3Q16 results

In 3Q16, we reported income before taxes of CHF 245 million and net revenues of CHF 1,081 million. Compared to 2Q16, net revenues decreased 6% due to lower transaction- and performance-based revenues in Private Banking, including seasonally lower client activity and lower sales and trading revenues, and lower investment and partnership income in Asset Management in 3Q16. This decrease was partially offset by higher net interest income. Provision for credit losses was zero, a decrease of CHF 16 million. Total operating expenses were 5% lower compared to 2Q16, mainly driven by lower compensation and benefits and lower general and administrative expenses.

Net revenues were stable compared to 3Q15, reflecting higher net interest income and higher investment-related gains in 3Q16 reflected in other revenues, offset by lower transaction- and

performance-based revenues and lower recurring commissions and fees. Provision for credit losses was zero, a decrease of CHF 11 million. Total operating expenses were 6% lower as lower general and administrative expenses were partially offset by higher compensation and benefits and restructuring expenses.

Adjusted income before taxes of CHF 241 million decreased 7% and 2% compared to 2Q16 and 3Q15, respectively.

Capital and leverage metrics

As of the end of 3Q16, we reported risk-weighted assets of CHF 33.5 billion, a decrease of CHF 0.2 billion compared to the end of 2Q16. Leverage exposure was CHF 88.9 billion, reflecting a decrease of CHF 6.5 billion compared to the end of 2Q16, driven by decreased HQLA balances associated with funding requirements.

PRIVATE BANKING

RESULTS

Income before taxes of CHF 196 million increased 7% compared to 2Q16 reflecting slightly lower total operating expenses and lower provision for credit losses, partially offset by slightly lower net revenues. Compared to 3Q15, income before taxes increased 26% mainly due to lower total operating expenses and lower provision for credit losses. Adjusted income before taxes of CHF 190 million decreased 4% and 8% compared to 2Q16 and 3Q15, respectively.

Net revenues

Compared to 2Q16, net revenues of CHF 789 million were slightly lower, with a decline in transaction- and performance-based revenues, partially offset by higher net interest income. Transaction- and performance-based revenues of CHF 197 million decreased 17%, mainly driven by lower sales and trading revenues, an absence of equity participations income as 2Q16 included a regular dividend from SIX Group, lower fees from foreign exchange client business and lower brokerage and product issuing fees.

Recurring commissions and fees of CHF 267 million were slightly lower mainly due to lower investment product management fees. Net interest income of CHF 326 million increased 7%, reflecting stable loan margins on slightly higher average loan volumes and higher deposit margins on stable average deposit volumes.

Compared to 3Q15, net revenues were stable, with higher net interest income offset by lower transaction- and performance-based revenues and lower recurring commissions and fees. Net interest income increased 26%, primarily reflecting higher loan margins on higher average loan volumes and higher deposit margins on slightly higher average deposit volumes. Transaction- and performance-based revenues decreased 16%, driven by lower corporate advisory fees related to integrated solutions, lower fees from foreign exchange client business and lower brokerage and product issuing fees. Recurring commissions and fees decreased 9%, mainly due to a decline in banking services fees and lower security account and custody services fees.

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction- and performance-based income.

¹ Net revenues divided by average assets under management.

² Income before taxes divided by average assets under management.

Provision for credit losses

In 3Q16, provision for credit losses was zero, compared to provision for credit losses of CHF 16 million and CHF 11 million in 2Q16 and 3Q15, respectively.

Total operating expenses

Compared to 2Q16, total operating expenses of CHF 593 million decreased slightly due to lower general and administrative expenses partially offset by slightly higher compensation and benefits. General and administrative expenses of CHF 173 million decreased 9%, mainly reflecting the release of litigation provisions in 3Q16. Compensation and benefits of CHF 369 million increased slightly, mainly driven by higher discretionary compensation expenses, partially offset by lower pension expenses and lower deferred compensation expenses from prior-year awards. Restructuring expenses of CHF 13 million were stable compared to 2Q16. Adjusted total operating expenses of CHF 599 million were stable compared to 2Q16.

Compared to 3Q15, total operating expenses decreased 4%, with lower general and administrative expenses, partially offset by an increase in compensation and benefits and restructuring expenses. General and administrative expenses decreased 28%, driven by significantly lower litigation provisions, partially offset by higher professional services fees. Compensation and benefits increased 11%, reflecting higher discretionary compensation expenses and higher salary expenses, partially offset by lower deferred compensation expenses from prior-year awards and lower pension expenses. Adjusted total operating expenses increased 5% compared to 3Q15.

MARGINS**Gross margin**

Our gross margin was 104 basis points in 3Q16, a decline of six basis points compared to 2Q16, mainly reflecting lower transaction- and performance-based revenues and a 3.4% increase in average assets under management, partially offset by higher net interest income. Our gross margin was two basis points lower compared to 3Q15, mainly reflecting lower transaction- and performance-based revenues, lower recurring commissions and fees and a 3.1% increase in average assets under management, partially offset by higher net interest income.

► Refer to "Assets under management" for further information.

Net margin

Our net margin was 26 basis points in 3Q16, an increase of one basis point compared to 2Q16, reflecting slightly lower total operating expenses and lower provision for credit losses, partially offset by slightly lower net revenues and the 3.4% increase in average assets under management. Our net margin was five basis points higher compared to 3Q15, reflecting lower total operating expenses and lower provision for credit losses, partially offset by the 3.1% increase in average assets under management. On the basis of adjusted income before taxes, our net margin was 25 basis points in 3Q16, two basis points lower compared to 2Q16 and three basis points lower compared to 3Q15.

ASSETS UNDER MANAGEMENT

As of the end of 3Q16, assets under management of CHF 311.4 billion were CHF 12.8 billion higher compared to the end of 2Q16, reflecting favorable market movements and net new assets of CHF 4.4 billion. The net new assets reflected solid inflows from emerging markets and Europe.

Management fees include fees on assets under management, asset administration revenues and transaction fees related to the acquisition and disposal of investments in the funds being managed. Performance revenues relate to the performance or return of the funds being managed and includes investment-related gains and losses from proprietary funds. Placement revenues arise from our third-party private equity fundraising activities and secondary private equity market advisory services. Investment and partnership income includes equity participation income from seed capital returns and from minority investments in third-party asset managers, income from strategic partnerships and distribution agreements, and other revenues.

RESULTS

Income before taxes of CHF 49 million decreased 20% compared to 2Q16, driven by lower net revenues, partially offset by lower total operating expenses. Income before taxes increased 20% compared to 3Q15, reflecting lower total operating expenses, partially offset by lower net revenues.

Net revenues

Compared to 2Q16, net revenues of CHF 292 million decreased 13%, mainly driven by lower investment and partnership income. Investment and partnership income of CHF 33 million decreased CHF 39 million mainly due to an investment gain from Asset Management Finance LLC in 2Q16 and lower income from the real estate sector. Performance and placement revenues decreased slightly to CHF 41 million. Management fees of CHF 218 million were stable.

Compared to 3Q15, net revenues were 5% lower, primarily reflecting lower investment and partnership income. Investment and partnership income decreased 33%, primarily reflecting lower equity participations income from single manager hedge funds.

Performance and placement revenues increased 17%, primarily driven by higher investment-related gains, partially offset by lower placement fees. Management fees were slightly lower.

Total operating expenses

Compared to 2Q16, total operating expenses of CHF 243 million decreased 11%, reflecting lower compensation and benefits, partially offset by higher general and administrative expenses. Compensation and benefits of CHF 144 million decreased 19%, reflecting lower discretionary compensation expenses and lower deferred compensation expenses from prior-year awards. General and administrative expenses of CHF 83 million increased 11%, mainly due to higher professional services fees.

Compared to 3Q15, total operating expenses decreased 9%, reflecting lower compensation and benefits and lower general and administrative expenses. Compensation and benefits were CHF 13 million lower, reflecting lower deferred compensation expenses from prior-year awards. General and administrative expenses were CHF 11 million lower, mainly driven by lower allocated corporate function costs.

ASSETS UNDER MANAGEMENT

As of the end of 3Q16, assets under management of CHF 324.3 billion were CHF 9.4 billion higher compared to the end of 2Q16, reflecting favorable market movements and net new assets of CHF 5.0 billion. Net new assets reflected inflows from an emerging market joint venture and fixed income products.

Asia Pacific

In 3Q16, we reported income before taxes of CHF 152 million and net revenues of CHF 917 million. Income before taxes decreased 26% compared to 2Q16 and 6% compared to 3Q15.

RESULTS SUMMARY

3Q16 results

In 3Q16, we reported income before taxes of CHF 152 million and net revenues of CHF 917 million. Compared to 2Q16, net revenues were stable, as higher underwriting and advisory revenues and higher revenues from the ultra-high-net-worth individual and high-net-worth individual client business in Private Banking were offset by lower fixed income sales and trading revenues. Provision for credit losses was CHF 34 million in 3Q16, compared to a provision of CHF 3 million in 2Q16. Total operating expenses of CHF 731 million increased 4%, primarily due to higher general and administrative and restructuring expenses.

Compared to 3Q15, net revenues increased 4%, driven by higher revenues from Private Banking, underwriting and advisory and fixed income sales and trading, partially offset by lower equity sales and trading revenues reflecting the absence of the strong market conditions experienced in 3Q15. Total operating expenses

increased 5%, primarily from restructuring expenses in 3Q16 reflecting ongoing cost management initiatives, higher general and administrative expenses, and slightly increased compensation and benefits driven by growth-related higher headcount, including in risk and compliance functions, partially offset by lower commission expenses.

Adjusted income before taxes of CHF 175 million decreased 19% compared to 2Q16 and increased 8% compared to 3Q15.

Capital and leverage metrics

At the end of 3Q16, we reported risk-weighted assets of CHF 32.3 billion, an increase of CHF 0.6 billion compared to the end of 2Q16, mainly reflecting methodology changes, partially offset by lower risk levels. Leverage exposure was CHF 108.5 billion, reflecting an increase of CHF 0.9 billion compared to the end of 2Q16, primarily driven by stronger equity trading volumes and increased lending.

PRIVATE BANKING

RESULTS

Income before taxes of CHF 66 million decreased 27% compared to 2Q16, primarily reflecting higher provision for credit losses, partially offset by higher net revenues. Compared to 3Q15, income before taxes decreased 4%, primarily from higher total operating expenses and higher provision for credit losses, partially offset by higher net revenues. Adjusted income before taxes of CHF 69 million decreased 23% compared to 2Q16 and was stable compared to 3Q15.

Net revenues

Net revenues of CHF 346 million increased slightly compared to 2Q16, due to higher net interest income. Net interest income increased 11% to CHF 159 million reflecting higher loan margins and stable deposit margins on higher average volumes. Recurring commissions and fees decreased 4% to CHF 67 million, primarily

reflecting lower other commissions and fees. Transaction-based revenues decreased slightly to CHF 120 million, mainly due to lower brokerage and product issuing fees.

Compared to 3Q15, net revenues increased 14%, mainly reflecting increases in net interest income and transaction-based revenues, partially offset by a decrease in other revenues as 3Q15 reflected gains on credit hedges that were offset by a corresponding provision for credit losses. Net interest income increased 39% reflecting higher loan and significantly higher deposit margins on higher average volumes. Transaction-based revenues increased 17%, primarily reflecting higher corporate advisory fees arising from integrated solutions and higher brokerage and product issuing fees. Recurring commissions and fees increased slightly, mainly due to higher investment product management and wealth structuring solution fees, partially offset by lower discretionary mandate management fees.

Provision for credit losses

The Private Banking loan portfolio primarily comprises lombard loans, mainly backed by listed securities.

In 3Q16, Private Banking recorded a provision for credit losses of CHF 38 million, compared to a net provision for credit losses of

CHF 2 million in 2Q16 and of CHF 24 million in 3Q15. The higher provision for credit losses in 3Q16 was in relation to a small number of share-based loans in Hong Kong which were impaired due to their collateral values abruptly falling below their loan amounts.

Total operating expenses

Total operating expenses of CHF 242 million were stable compared to 2Q16, mainly reflecting lower general and administrative expenses, partially offset by higher compensation and benefits. General and administrative expenses decreased 26% to CHF 57 million, mainly due to lower allocated corporate function costs. Compensation and benefits increased 7% to CHF 169 million, primarily driven by higher salary and discretionary compensation expenses.

Compared to 3Q15, total operating expenses increased 15%, mainly reflecting higher compensation and benefits, partially offset by lower general and administrative expenses. Compensation and benefits increased 28%, primarily driven by higher salary expenses reflecting growth-related higher headcount. General and administrative expenses decreased 11%, mainly due to lower allocated corporate function costs, partially offset by higher occupancy expenses.

MARGINS**Gross margin**

Our gross margin was 84 basis points in 3Q16, three basis points lower compared to 2Q16, mainly reflecting a 6.5% increase in

average assets under management, partially offset by higher net interest income. Compared to 3Q15, our gross margin was stable, mainly reflecting higher net interest income, offset by a 14.4% increase in average assets under management.

► Refer to "Assets under management" for further information.

Net margin

Our net margin was 16 basis points in 3Q16, seven basis points lower compared to 2Q16, mainly reflecting higher provision for credit losses, partially offset by higher net interest income. Compared to 3Q15, our net margin was three basis points lower, mainly reflecting higher operating expenses, partially offset by higher net interest income.

ASSETS UNDER MANAGEMENT

As of the end of 3Q16, assets under management of CHF 169.0 billion were CHF 10.7 billion higher compared to the end of 2Q16, mainly reflecting favorable market movements and net new assets of CHF 4.6 billion. Net new assets reflected inflows primarily from Greater China, South East Asia and Australia.

INVESTMENT BANKING

RESULTS

Income before taxes of CHF 86 million decreased 26% compared to 2Q16, mainly due to higher total operating expenses including restructuring expenses in 3Q16. Compared to 3Q15, income before taxes decreased 8%, reflecting slightly lower net revenues, partially offset by a release of provision for credit losses. Adjusted income before taxes of CHF 106 million decreased 16% compared to 2Q16 and increased 14% compared to 3Q15.

Net revenues

Net revenues of CHF 571 million were stable compared to 2Q16, mainly reflecting lower fixed income sales and trading revenues, offset by higher underwriting and advisory revenues. Fixed income sales and trading revenues decreased 11% to CHF 148 million, mainly due to lower revenues from rates products, partially offset by higher revenues from emerging markets rates and foreign exchange products. Rates products revenue for the quarter included a positive impact of CHF 33 million resulting from an increase in the funding value of certain structured deposits originated in Asia Pacific. Underwriting and advisory revenues increased 15% to CHF 115 million, due to fees from equity and debt underwriting reflecting higher client activity with regard to IPOs and debt issuances, partially offset by a decline in total

advisory and other fees. Equity sales and trading revenues in 3Q16 were stable at CHF 339 million, reflecting higher revenues from cash equities due to an increase in volumes and higher revenues from derivatives due to increased client activity. These increases were partially offset by the absence of the positive impact of CHF 65 million in 2Q16 in derivatives resulting from a recalibration of the valuation model for certain hybrid instruments to reflect increased observability of pricing data and a more standardized approach across products.

Compared to 3Q15, net revenues decreased slightly, mainly due to lower equity sales and trading revenues, partially offset by higher underwriting and advisory revenues and higher fixed income sales and trading revenues. Equity sales and trading revenues decreased 25%, reflecting the absence of the strong market conditions experienced in 3Q15, primarily in derivatives and systematic market making. Underwriting and advisory revenues increased 98% due to higher advisory fees from M&A transactions and debt and equity underwriting revenues reflecting higher client activity with regard to IPOs and debt issuances. Fixed income sales and trading revenues increased 51%, primarily driven by financing income from corporate and entrepreneur clients, foreign exchange products and the positive impact from the increase in the funding value of certain structured deposits originated in Asia Pacific.

Provision for credit losses

In 3Q16, Investment Banking recorded a net release of provision for credit losses of CHF 4 million, compared to a net provision of CHF 1 million in 2Q16. Investment Banking recorded no provision for credit losses in 3Q15.

Total operating expenses

Total operating expenses of CHF 489 million increased 7% compared to 2Q16, mainly due to higher general and administrative expenses and higher restructuring expenses, partially offset by lower compensation and benefits. General and administrative expenses increased 33% to CHF 167 million, mainly reflecting higher allocated corporate function costs, partially offset by lower advertising and marketing expenses and lower travel expenses. Compensation and benefits decreased 7% to CHF 244 million, mainly due to lower deferred compensation expenses from

prior-year awards and lower salary expenses, partially offset by higher discretionary compensation expenses. Adjusted total operating expenses increased 5% compared to 2Q16.

Compared to 3Q15, total operating expenses were stable, mainly reflecting lower compensation and benefits and lower commission expenses, offset by higher general and administrative expenses and restructuring expenses in 3Q16. Compensation and benefits decreased 10%, primarily driven by lower discretionary compensation and lower deferred compensation expenses from prior-year awards, partially offset by higher salary expenses reflecting growth-related hires. Commission expenses decreased 22% to CHF 58 million reflecting lower client trading volumes in equities. General and administrative expenses increased 17%, mainly due to higher allocated corporate function costs. Adjusted total operating expenses decreased 4% compared to 3Q15.

Global Markets

In 3Q16, Global Markets reported income before taxes of CHF 87 million and net revenues of CHF 1,357 million. Net revenues decreased 17% compared to 2Q16, reflecting a seasonal slowdown in client activity exacerbated by challenging market conditions, particularly in equities.

RESULTS SUMMARY

3Q16 results

In 3Q16, we reported income before taxes of CHF 87 million and net revenues of CHF 1,357 million. Compared to 2Q16, net revenues decreased 17%, reflecting a 40% decline in equities revenues, 15% decline in solutions revenues and 3% decline in credit revenues. Compared to 3Q15, net revenues declined 14%, primarily due to challenging equity trading conditions in EMEA, partially offset by improved results in global credit products, global macro products and emerging markets. Revenues from our equities businesses declined 38%, credit revenues increased 3% and solutions revenues decreased 13%.

Total operating expenses of CHF 1,275 million decreased 15% compared to 2Q16, reflecting lower compensation and benefits, lower costs related to our risk, regulatory and compliance infrastructure and lower costs in the UK. Compared to 3Q15, total operating expenses decreased 2%, reflecting lower litigation expenses, reduced costs related to our risk, regulatory and

compliance infrastructure, lower commission expenses and lower costs in the UK. These decreases were partially offset by higher compensation and benefits and restructuring costs of CHF 52 million incurred in 3Q16. We reported an adjusted income before taxes of CHF 146 million in 3Q16, compared to an adjusted income before taxes of CHF 204 million in 2Q16 and an adjusted income before taxes of CHF 390 million in 3Q15.

Capital and leverage metrics

As of the end of 3Q16, we reported risk-weighted assets of USD 52.7 billion, below our end-2016 target of USD 60 billion. Risk weighted assets were stable compared to 2Q16, primarily reflecting model and parameter updates and movements in risk levels, mostly offset by internal methodology and policy changes. Leverage exposure was USD 295.7 billion, reflecting an increase of USD 9.3 billion compared to the end of 2Q16. This compares to our end-2016 target of USD 290 billion.

RESULTS

Equities

In 3Q16, equities revenues of CHF 324 million declined 40% compared to 2Q16, reflecting lower volatility and volumes across regions and a seasonal slowdown in client activity. Systematic market making revenues decreased, reflecting challenging trading conditions, particularly in EMEA. Prime services declined compared to 2Q16, which benefited from the European dividend season. We also had lower revenues in cash equities driven by significantly lower trading volumes, particularly in EMEA, and reduced underwriting revenues given a slowdown in industry-wide issuance activity.

Compared to 3Q15, equities revenues declined 38%, primarily reflecting challenging operating conditions, specifically a low volume and volatility environment in EMEA following the UK referendum on EU membership, which negatively impacted client trading activity. Systematic market making revenues declined significantly, particularly in EMEA, due to more favorable market conditions in

3Q15. Prime services revenues decreased due to lower prime brokerage performance given our resized business model compared to 3Q15 and muted client risk appetite. Cash equities results were stable as higher underwriting revenues from increased follow-on activity and improved trading in Latin America offset a significant decline in EMEA trading volumes.

Credit

In 3Q16, credit revenues of CHF 719 million decreased 3% compared to 2Q16. Global credit products trading revenues decreased slightly, reflecting lower leveraged finance and investment grade trading revenues, partially offset by improved corporate lending. Underwriting revenues were stable. Securitized products revenues decreased, primarily due to a decline in asset finance revenues given a lower risk footprint, partially offset by a significant improvement in agency commercial mortgage-backed securities (CMBS) trading due to low volatility and an improved market environment.

Compared to 3Q15, credit revenues increased 3%, reflecting favorable market conditions, notably improved credit asset prices and lower volatility, which supported increased client activity. In 3Q15, results reflected reduced levels of client activity related to extreme credit market conditions, which adversely impacted our securitized products and global credit products franchises. Global credit products trading revenues increased significantly, albeit from subdued levels, primarily reflecting increased leveraged finance trading activity and improved corporate lending results. Underwriting revenues increased, reflecting higher leveraged finance and investment grade industry-wide issuance. These increases were partially offset by lower securitized products trading revenues, particularly in global asset finance as we resized the franchise.

Solutions

In 3Q16, solutions revenues of CHF 349 million decreased 15% compared to 2Q16, as lower equity derivatives and global macro products revenues more than offset higher revenues in emerging markets. Lower revenues in equity derivatives reflected a decline in client activity across corporate and flow derivatives due to lower volatility. Global macro products revenues declined, reflecting lower foreign exchange results. These declines were partially offset by improved emerging markets revenues that reflected higher trading activity in Brazil.

Compared to 3Q15, solutions revenues decreased 13%, as unfavorable derivatives market conditions more than offset increased client activity in global macro products and improved operating conditions in emerging markets. Equity derivatives revenues declined, reflecting low levels of volatility, which negatively impacted flow- and corporate derivatives. This decline was partially offset by improved global macro products revenues, compared to muted 3Q15 performance, as low interest rate volatility led to

increased client activity in our rates business. In addition, emerging markets revenues increased, reflecting higher trading activity in Brazil and improved financing revenues.

Provision for credit losses

Global markets recorded a release of provision for credit losses of CHF 5 million in 3Q16 and CHF 17 million in 2Q16, reflecting a continued stabilization in the energy sector. This compares to a provision for credit losses of CHF 14 million in 3Q15.

Total operating expenses

In 3Q16, total operating expenses of CHF 1,275 million decreased 15% compared to 2Q16, reflecting lower compensation and benefits, reduced general and administrative expenses and lower costs in the UK. The decrease in compensation and benefits was primarily driven by lower discretionary compensation and salary expenses. The decrease in general and administrative expenses was primarily driven by reduced costs related to our risk, regulatory and compliance infrastructure.

Compared to 3Q15, total operating expenses decreased 2%, reflecting reduced general and administrative expenses and lower costs in the UK. General and administrative expenses declined due to lower litigation expenses as 3Q15 included a CHF 127 million litigation expense relating to a credit default swap settlement and we had reduced costs in 3Q16 related to our risk, regulatory and compliance infrastructure. Commission expenses were also lower. These declines were partially offset by an increase in compensation and benefits primarily due to higher discretionary compensation expenses, reflecting a lower compensation accrual in 3Q15, and restructuring expenses of CHF 52 million incurred in 3Q16. Adjusted total operating expenses increased 3%.

Investment Banking & Capital Markets

In 3Q16, Investment Banking & Capital Markets reported income before taxes of CHF 39 million and net revenues of CHF 467 million. Net revenues increased 17% compared to 3Q15, outperforming the industry-wide fee pool which was down 3%.

RESULTS SUMMARY

3Q16 results

In 3Q16, we reported income before taxes of CHF 39 million, a decrease of 71% compared to 2Q16, primarily due to lower net revenues and higher total operating expenses. Net revenues of CHF 467 million decreased 14% compared to 2Q16, due to lower revenues from underwriting, advisory and other fees, partially offset by improved performance from our corporate lending portfolio. Compared to 2Q16, debt underwriting revenues decreased 18%, revenues from advisory and other fees decreased 16% and equity underwriting revenues decreased 22%. Total operating expenses of CHF 437 million increased 7% compared to 2Q16, driven by higher restructuring expenses and compensation and benefits.

Compared to 3Q15, income before taxes decreased 40%, reflecting higher total operating expenses. Net revenues increased 17%, primarily driven by higher debt and equity underwriting revenues. Debt underwriting revenues increased 13% and equity underwriting revenues increased 42%, while advisory revenues were stable.

Capital and leverage metrics

As of the end of 3Q16, risk-weighted assets were USD 18.6 billion, an increase of USD 1.6 billion compared to the end of 2Q16, mainly driven by an increase in underwriting activity. Leverage exposure was USD 45.6 billion, reflecting an increase of USD 0.7 billion compared to the end of 2Q16, driven by a significant increase in underwriting volume.

RESULTS

Advisory and other fees

In 3Q16, revenues from advisory and other fees of CHF 161 million decreased 16% compared to 2Q16, reflecting lower revenues from completed M&A transactions.

Revenues decreased 1% compared to 3Q15, less than the industry-wide decline in the overall M&A fee pool.

Debt underwriting

In 3Q16, debt underwriting revenues of CHF 239 million decreased 18% compared to 2Q16, driven by lower derivatives financing revenues and investment grade underwriting revenues.

Compared to 3Q15, revenues increased 13%, driven by higher leveraged finance and investment grade underwriting revenues, partially offset by lower derivatives financing revenues.

Equity underwriting

In 3Q16, revenues from equity underwriting of CHF 74 million decreased 22% compared to 2Q16, primarily driven by lower revenues from follow-on offerings.

Compared to 3Q15, revenues increased 42%, primarily driven by higher revenues from follow-on offerings.

Provision for credit losses

In 3Q16, we recorded a release of provision for credit losses of CHF 9 million, reflecting a continued stabilization in the energy sector. There was no provision for credit losses recorded in either 2Q16 or 3Q15.

Total operating expenses

Total operating expenses of CHF 437 million increased 7% compared to 2Q16, driven by higher restructuring expenses and compensation and benefits. Restructuring expenses increased as a result of implementation of our plan to better align the EMEA business with Eurozone market conditions. Compensation and benefits of CHF 313 million increased 2%, reflecting a higher discretionary

compensation accrual. General and administrative expenses of CHF 109 million were stable.

Compared to 3Q15, total operating expenses increased 30%, driven by an increase in compensation and benefits primarily due to higher discretionary compensation expenses, reflecting a lower compensation accrual in 3Q15 and the restructuring expenses incurred in 3Q16.

Global advisory and underwriting revenues

The Group's global advisory and underwriting business operates across multiple business divisions that work in close collaboration with each other to generate these revenues. In order to reflect the global performance and capabilities of this business and for enhanced comparability versus its peers, the following table aggregates total advisory and underwriting revenues for the Group into a single metric in US dollar terms before cross-divisional revenue sharing agreements.

		in		% change	
	3Q16	2Q16	3Q15	QoQ	YoY

Strategic Resolution Unit

In 3Q16, the Strategic Resolution Unit reported a loss before taxes of CHF 852 million and decreased its risk-weighted assets by USD 3.0 billion and its leverage exposure by USD 29.0 billion.

RESULTS SUMMARY

3Q16 results

In 3Q16, we reported a loss before taxes of CHF 852 million compared to a loss before taxes of CHF 759 million in 2Q16 and a loss before taxes of CHF 775 million in 3Q15. In 3Q16, we reported an adjusted loss before taxes of CHF 513 million, compared to CHF 739 million in 2Q16 and CHF 749 million in 3Q15.

The Strategic Resolution Unit reported negative net revenues of CHF 165 million in 3Q16, which included negative valuation adjustments in the legacy investment banking portfolio and legacy funding costs, partially offset by revenues from the legacy cross-border business and small markets. Total operating expenses were CHF 682 million in 3Q16, including CHF 514 million of general and administrative expenses, of which CHF 334 million were litigation expenses, and CHF 134 million of compensation and benefits.

In 3Q16, we reported an adjusted total operating expenses of CHF 343 million, compared to CHF 413 million in 2Q16 and CHF 640 million in 3Q15.

Capital and leverage metrics

As of the end of 3Q16, we reported risk-weighted assets of USD 54.9 billion, a decrease of USD 3.0 billion and USD 20.3 billion compared to the end of 2Q16 and 3Q15, respectively. Leverage exposure was USD 118.6 billion as of the end of 3Q16, reflecting a decrease of USD 29.0 billion and USD 77.6 billion compared to the end of 2Q16 and 3Q15, respectively. In 3Q16, risk-weighted assets and leverage exposure reduction was achieved by various initiatives, including sales of certain loan facilities to third parties, the continued exit of derivatives and the sale of Credit Suisse Park View BDC, Inc.

RESULTS

Net revenues

The Strategic Resolution Unit reported negative net revenues of CHF 165 million in 3Q16 compared to negative net revenues of CHF 363 million in 2Q16 and negative net revenues of CHF 88 million in 3Q15. Compared to 2Q16, the movement was primarily driven by lower negative valuation adjustments in the legacy investment banking portfolio and lower overall funding costs for the division. These improvements were partially offset by higher losses on the life insurance portfolio. Compared to 3Q15, the movement was primarily driven by lower revenues from the restructuring of select onshore businesses, in particular the transfer of our US private banking business, which was announced in October 2015, and lower negative valuation adjustments in the legacy investment banking portfolio.

Provision for credit losses

In 3Q16, there was a provision for credit losses of CHF 5 million, reflecting an increase in provisions relating primarily to ship finance

transactions, partially offset by a release of provisions for corporate loans. This compares to a release of provision for credit losses of CHF 37 million in 2Q16, primarily related to corporate loans, and a provision for credit losses of CHF 21 million in 3Q15.

Total operating expenses

Total operating expenses of CHF 682 million increased CHF 249 million compared to 2Q16, reflecting higher general and administrative expenses, including litigation expenses of CHF 334 million mainly in connection with mortgage-related matters, partially offset by lower expenses as a result of various cost reduction initiatives. Compared to 3Q15, total operating expenses increased CHF 16 million, reflecting higher general and administrative expenses, primarily driven by higher litigation expenses, partially offset by lower compensation and benefits due to the transfer of our US private banking business. Total operating expenses in 3Q16 included costs of CHF 42 million to meet requirements related to the settlements with US authorities regarding US cross-border matters.

Corporate Center

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

RESULTS SUMMARY

In 3Q16, Corporate Center recorded a loss before taxes of CHF 207 million compared to a loss before taxes of CHF 235 million in 2Q16 and income before taxes of CHF 540 million in 3Q15. Compensation and benefits mainly reflect fair value adjustments on certain deferred compensation plans not allocated to the segments and, following their final allocation in 3Q16, certain deferred compensation retention awards relating to Global Markets

and Investment Banking & Capital Markets intended to support the restructuring of the Group predominantly through the end of 2017. General and administrative expenses primarily reflected costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements. Other revenues include required elimination adjustments associated with trading in own shares.

¹ We early adopted certain sections of ASU 2016-01 which require that changes in fair value relating to the instrument-specific credit risk of fair value option-elected financial liabilities be presented separately in accumulated other comprehensive income. Therefore, fair value gains or losses from movements in own credit spreads are no longer recorded in the Corporate Center beginning in 1Q16.

² Disclosed on a look-through basis.

Assets under management

As of the end of 3Q16, assets under management were CHF 1,255.2 billion, 3.0% higher compared to the end of 2Q16, primarily due to favorable market movements and net new assets of CHF 11.9 billion.

Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by the Asset Management business of International Wealth Management for other businesses are reported in each applicable business and eliminated at the Group level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

Net new assets

Net new assets include individual cash payments, delivery of securities and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management.

Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

3Q16 results

As of the end of 3Q16, assets under management of CHF 1,255.2 billion increased CHF 36.8 billion compared to the end of 2Q16, primarily due to favorable market movements and net new assets of CHF 11.9 billion.

Swiss Universal Bank – Private Banking reported assets under management of CHF 244.5 billion as of the end of 3Q16, an increase of CHF 3.1 billion compared to the end of 2Q16, mainly driven by favorable market movements. Net new assets of CHF 0.2 billion were negatively impacted by terminated relationships with certain external asset managers and the regularization of client assets.

Swiss Universal Bank – Corporate & Institutional Banking reported assets under management of CHF 284.6 billion as of the end of 3Q16, an increase of CHF 3.7 billion compared to the end of 2Q16, driven by favorable market movements, partially offset by net assets outflows of CHF 1.2 billion from a small number of individual cases.

International Wealth Management – Private Banking reported assets under management of CHF 311.4 billion as of the end of 3Q16, an increase of CHF 12.8 billion compared to the end of 2Q16, reflecting favorable market movements and net new assets

of CHF 4.4 billion. The net new assets reflected solid inflows from emerging markets and Europe.

International Wealth Management – Asset Management reported assets under management of CHF 324.3 billion as of the end of 3Q16, an increase of CHF 9.4 billion compared to the end of 2Q16, reflecting favorable market movements and net new assets of CHF 5.0 billion. Net new assets reflected inflows from an emerging market joint venture and fixed income products.

Asia Pacific – Private Banking reported assets under management of CHF 169.0 billion as of the end of 3Q16, an increase of CHF 10.7 billion compared to the end of 2Q16, mainly reflecting favorable market movements and net new assets of CHF 4.6 billion. Net new assets reflected inflows primarily from Greater China, South East Asia and Australia.

The Strategic Resolution Unit reported CHF 17.8 billion of assets under management as of the end of 3Q16, a decrease of CHF 2.0 billion compared to the end of 2Q16, primarily reflecting net asset outflows of CHF 1.9 billion due to the wind-down of operations.

Treasury, risk, balance sheet and off-balance sheet

Liquidity and funding management	50
Capital management	54
Risk management	70
Balance sheet and off-balance sheet	81

Liquidity and funding management

In 3Q16, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

OVERVIEW

Securities for funding and capital purposes have historically been issued primarily by the Bank, our principal operating subsidiary and a US registrant. In response to regulatory reform, we have started pursuing a dual track issuance strategy with securities offered at the Group level. Proceeds from issuances are lent to operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements and the former as desired by management to support business initiatives and liquidity needs.

Our internal liquidity risk management framework is subject to review and monitoring by FINMA, other regulators and rating agencies.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2015 for further information on liquidity and funding management.

REGULATORY FRAMEWORK

Basel III liquidity framework

In 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR). As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions and estimates. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown in this report.

The LCR, which is being phased in from January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have unencumbered high-quality liquid assets (HQLA) available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of HQLA in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% per year until January 1, 2019.

The NSFR establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's on- and off-balance sheet activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable

long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and, once in effect, should always be at least 100%. Following an observation period which began in 2012, the NSFR will become a minimum standard on January 1, 2018, at which time banks will be required to comply with disclosure requirements prescribed by the BCBS and implemented by national regulators.

Swiss liquidity requirements

In 2012, the Swiss Federal Council adopted a liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making, including the final Basel III LCR rules adopted in 2014. As a result, all Swiss banks became subject to an initial 60% LCR requirement, with incremental increases by 10% per year until January 1, 2019. Systemically relevant banks like Credit Suisse became subject to an initial minimum LCR requirement of 100% beginning on January 1, 2015. Further, beginning in May 2015, FINMA required us to maintain a minimum LCR of 110% at all times.

Our liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2015 for further information on the Basel III liquidity framework and Swiss liquidity requirements.

LIQUIDITY RISK MANAGEMENT FRAMEWORK

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we expect to have sufficient liquidity to sustain operations for a period of time in excess of our minimum limit. This includes potential currency mismatches, which are not deemed to be a major risk but are monitored and subject to limits, particularly in the significant currencies of euro, Japanese yen, pound sterling, Swiss franc and US dollar.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2015 for further information on our approach to liquidity risk management, governance and contingency planning.

LIQUIDITY METRICS

Liquidity pool

Treasury manages a sizeable portfolio of liquid assets comprised of cash held at central banks and securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top-rated counterparties. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash held at central banks, highly rated government bonds and short-term reverse repurchase agreements. These government bonds are eligible as collateral for liquidity facilities with various central banks including the SNB, the Fed, the ECB and the Bank of England. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities. The liquidity pool may be used to meet the liquidity requirements of our operating companies.

As of the end of 3Q16, our liquidity pool managed by Treasury had a market value of CHF 184.8 billion. The liquidity pool consisted of CHF 90.9 billion of cash held at major central banks, primarily the SNB, the Fed and the ECB, and CHF 93.9 billion

market value of securities issued by governments and government agencies, primarily from the US, UK and France.

In addition to the liquidity portfolio managed by Treasury, there is also a portfolio of unencumbered liquid assets managed by various businesses, primarily in the Global Markets and Investment Banking & Capital Markets divisions. These assets generally include high-grade bonds and highly liquid equity securities that form part of major indices. In coordination with the businesses, Treasury can access these assets to generate liquidity if required.

As of the end of 3Q16, the portfolio that is not managed by Treasury had a market value of CHF 28.3 billion, consisting of CHF 3.7 billion of high-grade bonds and CHF 24.6 billion of highly liquid equity securities. Under our internal model, an average stress-level haircut of 20% is applied to these assets. The haircuts applied to these portfolios reflect our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

Liquidity pool – Group

End of					3Q16	2Q16	4Q15
	Swiss franc	US dollar	Euro	Other currencies	Total	Total	Total

¹ Reflects a pre-cancellation view.

Liquidity Coverage Ratio

Our calculation methodology for the LCR is prescribed by FINMA. The FINMA calculation of HQLA takes into account a cancellation mechanism (post-cancellation view) and is therefore not directly comparable to the assets presented in the financial statements that could potentially be monetized under a severe stress scenario. The cancellation mechanism effectively excludes the impact of certain secured financing transactions from available HQLA and simultaneously adjusts the level of net cash outflows calculated. Application of the cancellation mechanism adjusts both the numerator and denominator of the LCR calculation, meaning that the impact is mostly neutral on the LCR itself.

For disclosure purposes our LCR is calculated using a three-month average. As of the end of 3Q16, our LCR average was 163%, representing HQLA of CHF 185.5 billion and net cash outflows of CHF 113.9 billion. The ratio continues to reflect our efforts to ensure that Group entities meet applicable local liquidity requirements.

The decrease in the LCR compared to 2Q16 was driven by the decrease in HQLA, primarily from lower deposits at central banks

and holdings of securities issued by governments. Net cash outflows remained stable.

Stable net cash outflows reflected reductions in both total cash outflows and total cash inflows. The reduction in total cash outflows reflected both lower levels of secured and unsecured wholesale funding. The reduction in total cash inflows reflected lower levels of secured lending and reductions in loan inflows from fully performing exposures. Cash outflows from other contractual funding obligations and other cash inflows both decreased significantly, primarily reflecting balances related to open and failed trades. Additionally, the reduction in weighted outflows from credit and liquidity facilities was greater than the unweighted amounts due to a change in the mix of counterparties.

In connection with the implementation of Basel III, certain regulatory LCR disclosures for the Group, the Bank, the Bank parent company and Credit Suisse International are required. Further details on our LCR can be found on our website.

► Refer to www.credit-suisse.com/regulatorydisclosures for additional information.

Calculated using a three-month average.

¹ Calculated as outstanding balances maturing or callable within 30 days.

² Calculated after the application of haircuts for high-quality liquid assets or inflow and outflow rates.

³ Consists of cash and eligible securities as prescribed by FINMA and reflects a post-cancellation view.

FUNDING SOURCES AND USES

We fund our balance sheet primarily through core customer deposits, long-term debt, including structured notes, and shareholders' equity. We monitor the funding sources, including their concentrations against certain limits, according to their counterparty, currency, tenor, geography and maturity, and whether they are secured or unsecured.

A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 11% as of the end of 3Q16, compared to 13% as of the end of 2Q16, primarily reflecting a small decrease in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as the haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 304 billion as of the end of 3Q16, compared to CHF 306 billion as of the end of 2Q16,

reflecting a small decrease in the customer deposit base in private banking and corporate & institutional banking businesses. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proven to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

► Refer to the chart "Balance sheet funding structure" and "Balance sheet" in Balance sheet, off-balance sheet and other contractual obligations for further information.

DEBT ISSUANCES AND REDEMPTIONS

Our long-term debt includes senior, senior bail-in and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds.

Balance sheet funding structure

as of September 30, 2016 (CHF billion)

Reverse repurchase agreements	22	Match funded	60	Repurchase agreements
Encumbered trading assets	63		25	Short positions
Funding-neutral assets ¹	85		85	Funding-neutral liabilities ¹

			63	Due to banks
			12	Short-term borrowings
Unencumbered liquid assets ³	142		304	Deposits ⁴
		111% coverage	75	time
			141	demand
			63	savings
			25	fiduciary
Loans ⁵	273		195	Long-term debt
Other illiquid assets	116		45	Total equity
Assets	807		807	Liabilities and Equity

¹ Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.

² Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.

³ Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.

⁴ Excludes loans with banks.

⁵ Excludes due to banks and certificates of deposit.

As of the end of 3Q16, we had outstanding long-term debt of CHF 195.5 billion, which included senior and subordinated instruments. We had CHF 61.7 billion and CHF 19.2 billion of structured notes and covered bonds outstanding, respectively, as of the end of 3Q16 compared to CHF 60.4 billion and CHF 18.7 billion, respectively, as of the end of 2Q16.

► Refer to "Capital issuances and redemptions" in Capital management for information on capital issuances, including buffer and progressive capital notes.

As of the end of 3Q16, the weighted average maturity of long-term debt was 5.5 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Short-term borrowings increased to CHF 11.6 billion as of the end of 3Q16 compared to CHF 11.2 billion as of the end of 2Q16.

The following table provides information on long-term debt issuances, maturities and redemptions in 3Q16, excluding structured notes.

Debt issuances and redemptions

in 3Q16	Senior	Senior bail-in	Subordinated	Long-term debt

of which unsecured	5.0	0	2.1	7.1
of which secured ¹	0.4	0	0.0	0.4

Excludes structured notes.

¹ Includes covered bonds.

CREDIT RATINGS

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.7 billion, CHF 2.6 billion and CHF 3.1 billion, respectively, as of the end of 3Q16, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

Potential cash outflows on these derivative contracts associated with a downgrade of our long-term debt credit ratings, such as the requirement to post additional collateral to the counterparty, the loss of re-hypothecation rights on any collateral received and impacts arising from additional termination events are monitored and taken into account in the calculation of our liquidity requirements. There are additional derivative related risks that do not relate to the downgrade of our long term debt credit ratings and which may impact our liquidity position, including risks relating to holdings of derivatives collateral or potential movements in the valuation of derivatives positions. The potential outflows resulting across all derivative product types are monitored as part of the LCR scenario parameters and internal liquidity reporting.

► Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2015 for further information.

Capital management

As of the end of 3Q16, our BIS CET1 ratio was 14.1% and 12.0% on a look-through basis. Our BIS tier 1 leverage ratio was 5.2% and 4.6% on a look-through basis.

REGULATORY CAPITAL FRAMEWORK

Effective January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements). Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business.

References to phase-in and look-through included herein refer to Basel III capital requirements and Swiss Requirements. Phase-in reflects that, for the years 2014 – 2018, there will be a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

► Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2015 for further information.

BIS REQUIREMENTS

The BCBS, the standard setting committee within the BIS, issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

► Refer to the table "Basel III phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum CET1 requirement is 4.5% of risk-weighted assets (RWA). In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends and make discretionary bonus payments and other earnings distributions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified Credit Suisse as a G-SIB and currently requires Credit Suisse to maintain a 1.5% progressive buffer.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital.

Basel III capital frameworks for Credit Suisse

¹ Does not include any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

BIS phase-in requirements for Credit Suisse

For	2016	2017	2018	2019
Capital ratios

¹ Indicates phase-in period.

² Includes goodwill, other intangible assets and certain deferred tax assets.

To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125% as well as a trigger at the point of non-viability.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1. This requirement is imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

Capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, are phased out at their effective maturity date, generally the date of the first step-up coupon.

Banks are required to maintain a tier 1 leverage ratio of 3% beginning on January 1, 2018.

SWISS REQUIREMENTS

The legislation implementing the Basel III framework in Switzerland in respect of capital requirements for systemically relevant banks, including Credit Suisse, goes beyond the Basel III minimum standards for systemically relevant banks.

In May 2016, the Swiss Federal Council amended the Capital Adequacy Ordinance applicable to Swiss banks. The amendment recalibrates and expands the existing "Too Big to Fail" regime in Switzerland. Under the amended regime, systemically important banks operating internationally, such as Credit Suisse, will be subject to two different minimum requirements for loss-absorbing capacity: G-SIBs must hold sufficient capital that absorbs current operating losses to ensure continuity of service (going concern requirement) and they must issue sufficient debt instruments to fund restructuring without recourse to public resources (gone concern requirement). Going concern capital and gone concern capital together form our total loss-absorbing capacity (TLAC). The going concern and the gone concern requirements are generally aligned with the FSB's total loss-absorbing capacity standard. The amended Capital Adequacy Ordinance came into effect on July 1, 2016, subject

to phase-in and grandfathering provisions for certain outstanding instruments, and has to be fully applied by January 1, 2020.

Going concern requirement

The going concern requirement applicable in 2020 for a G-SIB consists of (i) a base requirement of 12.86% of RWA and 4.5% of leverage exposure; and (ii) a surcharge, which reflects the G-SIB's systemic importance. For Credit Suisse, this currently translates into a going concern requirement of 14.3% of RWA, of which the minimum CET1 component is 10%, with the remainder to be met with a maximum of 4.3% additional tier 1 capital, which includes high-trigger capital instruments that would be converted into common equity or written down if the CET1 ratio falls below 7%. Under the going concern requirement, the Swiss leverage ratio must be 5%, of which the minimum CET1 component is 3.5%, with the remainder to be met with a maximum of 1.5% additional tier 1 capital, which includes high-trigger capital instruments.

Gone concern requirement

The gone concern requirement of a G-SIB is equal to its total going concern requirement, that is in 2020, a base requirement of 12.86% of RWA and 4.5% of leverage exposure, plus any surcharges applicable to the relevant G-SIB, but not including any countercyclical buffers. Credit Suisse is currently subject to a gone concern requirement of 14.3% of RWA and a 5% Swiss leverage ratio and is subject to potential capital rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

The gone concern requirement should primarily be fulfilled with bail-in debt instruments that are designed to absorb losses after the write down or conversion into equity of regulatory capital of a G-SIB in a restructuring scenario, but before the write down or conversion into equity of other senior obligations of the G-SIB. Bail-in debt instruments do not feature capital triggers that may lead to a write-down and/or a conversion into equity outside of restructuring, but only begin to bear losses once the G-SIB is formally in restructuring proceedings and FINMA orders capital measures (i.e., a write-down and/or a conversion into equity) in the restructuring plan.

According to the amended Capital Adequacy Ordinance, bail-in debt instruments must fulfill certain criteria in order to qualify under the gone concern requirement, including FINMA approval. In addition to bail-in debt instruments, the gone concern requirement may further be fulfilled with other capital instruments, including CET1, additional tier 1 capital instruments or tier 2 capital instruments.

Grandfathering provisions

The Capital Adequacy Ordinance provides for a number of grandfathering provisions with regard to the qualification of previously issued additional tier 1 capital instruments and tier 2 capital instruments:

- Additional tier 1 capital instruments with a low trigger qualify as going concern capital until their first call date. Additional tier 1 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital;

Swiss capital and leverage phase-in requirements for Credit Suisse

For	2016	2017	2018	2019	2020	2016	2017	2018	2019	2020

Additional tier 1 – maximum	0.8	0.8	0.8	0.8	0.8	0.0	0.0	0.0	0.0	0.0
Buffer component	2.75	4.0	4.86	5.58	6.3	0.0	0.5	1.0	1.5	2.0
Going concern	10.75	12.0	12.86	13.58	14.3	3.0	3.5	4.0	4.5	5.0
of which base requirement	10.75	12.0	12.86	12.86	12.86	3.0	3.5	4.0	4.5	4.5
of which surcharge	0.0	0.0	0.0	0.72	1.44	0.0	0.0	0.0	0.0	0.5
Gone concern	3.5	6.2	8.9	11.6	14.3	1.0	2.0	3.0	4.0	5.0
of which base requirement	3.5	5.84	8.18	10.52	12.86	1.0	1.875	2.75	3.625	4.5
of which surcharge	0.0	0.36	0.72	1.08	1.44	0.0	0.125	0.25	0.375	0.5
Total loss-absorbing capacity	14.25	18.2	21.76	25.18	28.6	4.0	5.5	7.0	8.5	10.0

Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital. As of the end of 3Q16, the Swiss countercyclical buffer for the Group and the Bank was CHF 398 million and CHF 324 million, respectively, which is equivalent to 0.1% and 0.1% of CET1 capital. As of the end of 3Q16, the required extended countercyclical buffer for the Group and the Bank were insignificant.

- Tier 2 capital instruments with a high trigger qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity; and
- Tier 2 capital instruments with a low trigger also qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity.

Furthermore, to be eligible as gone concern capital, outstanding bail-in debt instruments issued before July 1, 2016 and bail-in debt instruments to be issued by a (Swiss or foreign) special purpose vehicle before January 1, 2017 must be approved by FINMA.

Both the going concern and the gone concern requirements are subject to a phase-in with gradually increasing requirements and have to be fully applied by January 1, 2020.

Other requirements

Effective July 1, 2016, Switzerland implemented an extended countercyclical buffer, which is based on the BIS countercyclical buffer that could require banks to hold up to 2.5% of RWA in the form of CET1 capital. The extended countercyclical buffer relates to a requirement that can be imposed by national regulators when credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

The Swiss Federal Council has not activated the BIS countercyclical buffer for Switzerland but instead requires banks to hold CET1 capital in the amount of 2% of their RWA pertaining to mortgage loans that finance residential property in Switzerland (Swiss countercyclical buffer).

In 2013, FINMA introduced increased capital charges for mortgages that finance owner occupied residential property in Switzerland (mortgage multiplier) to be phased in through January 1, 2019. The mortgage multiplier applies for purposes of both BIS and FINMA requirements.

In December 2013, FINMA issued a decree (FINMA Decree) specifying capital adequacy requirements for the Bank, on a stand-alone basis (Bank parent company), and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions.

▶ Refer to "Regulatory developments and proposals" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2015 for further information on the FINMA Decree.

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR), risks not in VaR (RNIV) and advanced credit valuation adjustment (CVA).

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period. In 3Q16, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

▶ Refer to "Market risk review" in Risk management for further information.

▶ Refer to "Risk measurement models" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Regulatory capital framework in the Credit Suisse Annual Report 2015 for further information.

REGULATORY DEVELOPMENTS AND PROPOSALS

In July 2016, the BCBS published an updated standard for the regulatory capital treatment of securitization exposures, which will become effective in January 2018. The new standard includes the regulatory capital treatment for "simple, transparent and comparable" (STC) securitizations. It sets forth additional criteria for differentiating the capital treatment of STC securitizations from that of other securitization transactions. Reduced minimum capital requirements will apply to securitizations that comply with the STC criteria.

In October 2016, the BCBS published an amendment to the Basel III standard on the definition of capital, which becomes effective January 1, 2019. The new standard requires internationally active banks to deduct from their tier 2 capital TLAC holdings issued by other G-SIBs that do not otherwise qualify as regulatory capital, subject to certain thresholds.

ISSUANCES AND REDEMPTIONS

In August 2016, Credit Suisse issued GBP 500 million of bail-in debt instruments. In August 2016, Credit Suisse redeemed USD 2.0 billion of 7.875% high-trigger tier 2 instruments.

Higher Trigger Capital Amount

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert into equity or be written down prior to the write down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion into equity or write down is referred to as the Higher Trigger Capital Amount.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5.125%, the Higher Trigger Capital Amount was CHF 6.5 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 2.4%, both as of the end of 3Q16.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5%, the Higher Trigger Capital Amount was CHF 11.6 billion and the Higher Trigger Capital Ratio was 4.2%, both as of the end of 3Q16.

► Refer to the table "BIS capital metrics – Group" for further information on the BIS statistics used to calculate such measures.

► Refer to "Higher Trigger Capital Amount" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Capital issuances and redemptions in the Credit Suisse Annual Report 2015 for further information on the Higher Trigger Capital Amount.

BIS CAPITAL METRICS

Our CET1 ratio was 14.1% as of the end of 3Q16 compared to 14.2% as of the end of 2Q16, reflecting slightly lower CET1 capital and stable RWA. Our tier 1 ratio was 18.3% as of the end of 3Q16 compared to 18.1% as of the end of 2Q16. Our total capital ratio was 20.8% as of the end of 3Q16 compared to 21.4% as of the end of 2Q16.

CET1 capital was CHF 38.6 billion as of the end of 3Q16 compared to CHF 38.9 billion as of the end of 2Q16, mainly reflecting the cash component of a dividend accrual and the negative foreign exchange impact, partially offset by the net effect of share-based compensation.

Additional tier 1 capital increased to CHF 11.4 billion as of the end of 3Q16 compared to CHF 10.8 billion as of the end of 2Q16,

mainly reflecting the regulatory reversal of net losses due to changes in own credit risk on fair-valued financial instruments.

Tier 2 capital was CHF 7.0 billion as of the end of 3Q16 compared to CHF 9.1 billion as of the end of 2Q16, mainly reflecting the redemption of the high-trigger tier 2 instruments.

Total eligible capital was CHF 57.0 billion as of the end of 3Q16 compared to CHF 58.9 billion as of the end of 2Q16, mainly reflecting the decrease in tier 2 capital.

As of the end of 3Q16, the look-through CET1 ratio was 12.0% compared to 11.8% as of the end of 2Q16. As of the end of 3Q16, the look-through total capital ratio was 17.8% compared to 18.4% as of the end of 2Q16.

¹ Includes regulatory adjustments not subject to phase-in, including a cumulative dividend accrual.

² Net of deferred tax liability.

³ Includes cash flow hedge reserve.

⁴ Reflects 60% phase-in deductions, including goodwill, other intangible assets and certain deferred tax assets, and 40% of an adjustment primarily for the accounting treatment of pension plans pursuant to phase-in requirements.

⁵ Includes hybrid capital instruments that are subject to phase-out.

⁶ Includes 40% of goodwill and other intangible assets (CHF 1.9 billion) and other capital deductions, including gains/(losses) due to changes in own credit risk on fair-valued financial liabilities, that will be deducted from CET1 once Basel III is fully implemented.

¹ Includes US GAAP cumulative translation adjustments and the foreign exchange impact on regulatory CET1 adjustments.

² Includes the impact of a dividend accrual, which includes the assumption that 60% of the proposed dividend is distributed in shares, the net effect of share-based compensation and pensions and a change in other regulatory adjustments (e.g., certain deferred tax assets).

³ Includes the regulatory reversal of net losses due to changes in own credit risk on fair-valued financial instruments.

RISK-WEIGHTED ASSETS

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as credit, market, operational and non-counterparty risk RWA. When assessing RWA, it is not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds).

The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in credit risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty risk RWA primarily reflect the capital requirements for our premises and equipment.

RWA remained stable at CHF 273.8 billion as of the end of 3Q16 compared to the end of 2Q16, primarily driven by a reduction in risk levels in credit risk and market risk and the foreign exchange impact. These movements were mostly offset by increases resulting from methodology and policy changes in credit risk and market risk.

Excluding the foreign exchange impact, the decrease in **credit risk** was primarily driven by movements in risk levels attributable to book size, partially offset by increases related to external methodology and policy changes. The decrease in risk levels attributable to book size was mainly due to reductions in commercial lending exposures in the Strategic Resolution Unit, Asia Pacific and Corporate Center, decreases in derivative exposures in the Strategic Resolution Unit, Asia Pacific and International Wealth Management, reductions in advanced CVA resulting from decreased exposures and an increased benefit from hedges in the Strategic Resolution Unit and decreases in secured financing exposures in Global Markets and Corporate Center. These decreases were partially offset by increases in commercial lending exposures in Global Markets, Investment Banking & Capital Markets and Swiss Universal Bank. External methodology and policy changes were related to a phase-in impact from a new FINMA requirement to treat share-backed lending without personal guarantees as corporate exposures. There was also the multiplier on income producing real estate in Swiss Universal Bank and an additional phase-in of the multiplier on certain investment banking corporate exposures across the Group.

Risk-weighted assets and capital ratios – Group

Excluding the foreign exchange impact, the increase in **market risk** was primarily driven by internal methodology and policy changes and model and parameter updates. The increase was partially offset by decreases in risk levels. The increase in internal methodology and policy changes was mainly due to a refinement in our RNIV model relating to bond reference spreads. Increases in model and parameter updates were primarily due to market data volatility in Global Markets and the Strategic Resolution Unit, partially offset by decreases in Asia Pacific. The movement in risk levels was primarily related to a reduction in market risk levels in Global Markets and International Wealth Management. This decrease was partially offset by an increase in market risk levels in Asia Pacific. Movements in risk levels was also impacted by an increase in trading book securitization exposures in Global Markets.

The decrease in **operational risk** was driven by internal methodology and policy changes in Global Markets relating to the removal of the FINMA imposed cap on the benefit from the insurance policy purchased in 2Q16. FINMA approved the policy as part of the AMA capital model. There was also a refinement in the allocation between Global Markets and Asia Pacific to reflect the new organizational structure.

¹ Represents changes in portfolio size.² Represents changes in average risk weighting across credit risk classes.³ Represents movements arising from updates to models and recalibrations of parameters.⁴ Represents internal changes impacting how exposures are treated.⁵ Represents externally prescribed regulatory changes impacting how exposures are treated.⁶ The look-through adjustment impacts only credit risk within the Corporate Center. The difference between phase-in and look-through risk-weighted assets relates to transitional arrangements such as the impact from pension assets and deferred tax assets not deducted from CET1 during the phase-in period and the transitional impact from threshold-related risk-weighted assets.

LEVERAGE METRICS

Beginning in 1Q15, Credit Suisse adopted the BIS leverage ratio framework, as issued by the BCBS and implemented in Switzerland by FINMA. Under the BIS framework, the leverage ratio measures tier 1 capital against the end of period exposure. BIS leverage amounts are calculated based on our interpretation of, and assumptions and estimates related to, the BIS requirements as implemented in Switzerland by FINMA. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown here.

As used herein, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments.

The look-through leverage exposure was CHF 948.7 billion as of the end of 3Q16 compared to CHF 966.5 billion as of the end of 2Q16. The movement was primarily due to a reduction in the Group's consolidated balance sheet, reflecting lower operating activities and the foreign exchange translation impact.

► Refer to "Balance sheet and off-balance sheet" for further information on the reduction in the Group's consolidated balance sheet.

BIS leverage ratios – Group

The tier 1 leverage ratio was 5.2% as of the end of 3Q16, with a CET1 component of 4.0%. On a look-through basis, the tier 1 leverage ratio was 4.6%, with a CET1 component of 3.4%.

The CET1 leverage ratio was stable compared to the end of 2Q16, reflecting the slight decrease in CET1 capital, partially offset by lower leverage exposure.

The tier 1 leverage ratio increased compared to the end of 2Q16, reflecting stable tier 1 capital and lower leverage exposure.

SWISS CAPITAL AND LEVERAGE METRICS**Swiss capital metrics**

► Refer to "Swiss Requirements" in Regulatory capital framework for further information on Swiss regulatory requirements.

As of the end of 3Q16, our Swiss CET1, going concern capital, gone concern capital and TLAC ratios were 14.0%, 19.8%, 9.7% and 29.5%, respectively, compared to the Swiss phase-in requirements of 8.125%, 10.75%, 3.5% and 14.25%, respectively.

On a look-through basis, as of the end of 3Q16, our Swiss CET1 capital was CHF 32.2 billion and our Swiss CET1 ratio was 11.9% compared to the requirement of 10.0%. Our going concern capital was CHF 43.8 billion and our going concern capital ratio was 16.2%, compared to the requirement of 14.3%. Our gone concern capital was CHF 26.9 billion and our gone concern capital ratio was 9.9%, compared to the requirement of 14.3%. Our total loss-absorbing capacity was CHF 70.7 billion and our TLAC ratio was 26.1%, compared to the requirement of 28.6%.

► Refer to "Capital management" in II – Treasury, risk, balance sheet and off-balance sheet in the Credit Suisse Financial Report 2016 for previously reported periods.

Swiss capital and leverage ratios for Credit Suisse

Rounding differences may occur. Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

Swiss leverage metrics

The leverage exposure used in the Swiss leverage ratio is measured on the same period-end basis as the leverage exposure for the BIS leverage ratio.

As of the end of 3Q16, our Swiss CET1 leverage, going concern leverage, gone concern leverage and TLAC leverage ratios were 4.0%, 5.7%, 2.8% and 8.5%, respectively, compared to the

Swiss phase-in requirements of 2.3%, 3.0%, 1.0% and 4.0%, respectively.

On a look-through basis, as of the end of 3Q16, our Swiss CET1 leverage ratio was 3.4% compared to the requirement of 3.5%, our going concern leverage ratio was 4.6%, compared to the requirement of 5.0%, our gone concern leverage ratio was 2.8%, compared to the requirement of 5.0% and our TLAC leverage ratio was 7.5% compared to the requirement of 10.0%.

BANK REGULATORY DISCLOSURES

The following capital, RWA and leverage disclosures apply to the Bank. The business of the Bank is substantially the same as that of the Group, including business drivers and trends relating to capital, RWA and leverage metrics.

OTHER REGULATORY DISCLOSURES

In connection with the implementation of Basel III, certain regulatory disclosures for the Group, the Bank, the Bank parent company and Credit Suisse International are required. Additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base of the Group, G-SIB financial indicators, subsidiary regulatory reporting, reconciliation requirements, Pillar 3 disclosures, leverage ratios and certain liquidity disclosures can be found on our website.

► Refer to www.credit-suisse.com/regulatorydisclosures for additional information.

SHAREHOLDERS' EQUITY AND SHARE METRICS**Total shareholders' equity**

Our total shareholders' equity decreased to CHF 44.3 billion as of the end of 3Q16 compared to CHF 45.0 billion as of the end of 2Q16. Total shareholders' equity was negatively impacted by losses on fair value elected liabilities relating to credit risk and foreign exchange-related movements on cumulative translation adjustments. These movements were partially offset by an increase in the share-based compensation obligation.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

¹ Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

Risk management

In 3Q16, our available economic capital decreased 4%, economic risk capital decreased 1%, overall position risk decreased 2% and average risk management VaR in US dollars decreased 18%. Gross impaired loans were stable at CHF 2.3 billion on a gross loan portfolio of CHF 275.6 billion.

OVERVIEW AND RISK-RELATED DEVELOPMENTS

Fundamental to our business is the prudent taking of risk in line with our strategic priorities. The primary objectives of risk management are to protect our financial strength and reputation, while ensuring that capital is well deployed to support business activities and grow shareholder value. Our risk management framework is based on transparency, management accountability and independent oversight.

► Refer to “Key risk developments”, “Risk management oversight”, “Risk appetite framework” and “Risk coverage and management” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2015 for further information and additional details of our current risk management framework and activities, including definitions of certain terms and relevant metrics.

US presidential election

The US will elect a new president on November 8, 2016, and the outcome of the election may result in increased market uncertainty relating to the policies that the president elect may implement in the future. We have developed a suite of stress scenarios to simulate the potential immediate market reaction to the election. That suite of stress scenarios has been run on a weekly basis in October with the outputs monitored with the aim of keeping exposures within our risk appetite.

Ship finance

Prices in all main shipping segments (bulker, tanker and container) remained under pressure during 2016 due to the combination of a slow-down in global trade and overcapacity in the world fleet, which had built up in the past during periods of high demand. This imbalance between supply and demand resulted in lower revenues for the shipping industry and declining market values for vessels. These market developments increased the risks for our ship finance portfolio. The majority of the positions continue to perform, and we strengthened our credit risk monitoring process in response to the current market situation.

ECONOMIC RISK CAPITAL REVIEW

Economic risk capital is used as a consistent and comprehensive tool for capital management, limit monitoring and performance management. Economic risk capital is our core Group-wide risk

management tool for measuring and reporting the combined impact from quantifiable risks such as market, credit, operational, pension, expense and model risks, each of which has an impact on our capital position.

Economic risk capital measures risks in terms of economic realities rather than regulatory or accounting rules and estimates the amount of capital needed to remain solvent and in business under extreme market, business and operating conditions over the period of one year, given our target financial strength (our long-term credit rating). Economic risk capital is set to a level needed to absorb unexpected losses at a confidence level of 99.97%. Our economic risk capital model is a set of methodologies used for measuring quantifiable risks associated with our business activities on a consistent basis. It is calculated separately for position risk (reflecting our exposure to market and credit risks), operational risk and other risks.

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of methodology changes and dataset and model parameter updates, prior-period balances are restated in order to show meaningful trends.

► Refer to “Economic risk capital” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk coverage and management in the Credit Suisse Annual Report 2015 for further information on economic risk capital and position risk.

In 3Q16, there were no changes to our position risk methodology for risk management purposes or our economic risk capital methodology used for capital management purposes.

Available economic capital trends

As of the end of 3Q16, our available economic capital for the Group was CHF 47.2 billion, a decrease of CHF 1.9 billion from the end of 2Q16. BIS look-through CET1 capital increased CHF 0.3 billion, mainly reflecting the net effect of share-based compensation, unrealized gains from fair value of own debt and net income attributable to shareholders, partially offset by the cash component of a dividend accrual and a negative foreign exchange impact. Economic adjustments decreased CHF 2.2 billion, mainly reflecting the redemption of high-trigger tier 2 instruments.

Prior-period balances are restated for methodology changes and dataset and model parameter updates in order to show meaningful trends. The calculation of divisional economic risk capital under the new organization required certain additional assumptions and allocation methods, which may not be required for future periods given the level of information then available.

¹ Includes primarily high- and low-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to BIS look-through CET1 capital to enable comparison between economic risk capital and available economic capital under the Basel III framework.

² Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between available economic capital and economic risk capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain planned methodology changes.

³ Ratio of available economic capital to economic risk capital.

⁴ Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between available economic capital and economic risk capital.

⁵ Includes a diversification benefit of CHF 0 million, CHF 95 million and CHF 128 million as of the end of 3Q16, 2Q16 and 4Q15, respectively.

⁶ Includes a diversification benefit of CHF 48 million, CHF 158 million and CHF 126 million as of the end of 3Q16, 2Q16 and 4Q15, respectively.

Economic risk capital trends

Compared to the end of 2Q16, our economic risk capital decreased 1% to CHF 34.1 billion mainly due to a 2% decrease in position risk, partially offset by 4% increase in other risks. The decrease in position risk was mainly due to reduced exposures in Brazil in emerging markets country event risk, lower loan commitments and counterparty risk in international lending & counterparty exposures and decreased residential mortgage-backed securities (RMBS) exposures in the US in real estate & structured assets. These reductions were partially offset by an increase in private banking corporate & retail lending exposures. The increase in other risks primarily reflects increased foreign exchange risk between available economic capital and economic risk capital and reduced

benefit from deferred share-based compensation awards, partially offset by lower pension risks reflecting the improved funding status of our US pension plan and risk reduction in the related plan assets.

For Swiss Universal Bank, economic risk capital increased 3% to CHF 5.7 billion from the end of 2Q16, mainly due to increased private banking corporate & retail lending exposures.

For International Wealth Management, economic risk capital increased 9% to CHF 4.1 billion from the end of 2Q16, mainly due to increased private banking corporate & retail lending and increased risk not in economic risk capital.

For Asia Pacific, economic risk capital increased 4% to CHF 4.4 billion from the end of 2Q16, mainly due to increased

Risk management

private banking corporate & retail lending exposures, increased emerging markets country event risk, higher traded equity risk and reduced benefit from deferred share-based compensation awards, partially offset by lower international lending & counterparty exposures.

For Global Markets, economic risk capital decreased 11% to CHF 8.8 billion from the end of 2Q16, primarily reflecting lower emerging market country event risk, reduced international lending & counterparty exposures, decreased RMBS exposures in the US in real estate & structured assets and lower pension risk the improved funding status of our US pension plan and risk reduction in the related plan assets, partially offset by reduced benefit from deferred share-based compensation awards.

For Investment Banking & Capital Markets, economic risk capital increased 8% to CHF 4.9 billion from the end of 2Q16, mainly due increased international lending & counterparty exposures and reduced benefit from deferred share-based compensation awards, partially offset by lower pension risk the improved funding status of our US pension plan and risk reduction in the related plan assets.

For the Strategic Resolution Unit, economic risk capital decreased 7% to CHF 4.9 billion from the end of 2Q16, mainly due to lower international lending & counterparty exposures and decreased RMBS exposures in the US in real estate & structured assets, partially offset by increased emerging market country event risk.

Position risk (99.97% confidence level for capital management purposes)	19,857	20,314	22,375	(2)	(11)

Prior-period balances are restated for methodology changes and dataset and model parameter updates in order to show meaningful trends.

¹ This category comprises fixed income trading, foreign exchange, commodity and insurance exposures.

² This category comprises commercial and residential real estate (including RMBS and CMBS), asset-backed securities exposure, real estate acquired at auction and real estate fund investments.

³ Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Key position risk trends

Compared to the end of 2Q16, position risk for risk management purposes decreased 2% to CHF 11.1 billion, mainly due to reduced exposures in Brazil in emerging markets country event risk, lower loan commitments and counterparty risk in international lending & counterparty risk, decreased RMBS exposures in the US in real estate & structured assets, and lower foreign exchange risk from derivatives in Brazil in fixed income trading. These reductions were partially offset by increased private banking corporate & retail lending exposures across markets and higher equity risk from derivatives in the US in equity trading & investments.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

MARKET RISK REVIEW

Market risk is the risk of financial loss arising from movements in market prices. Market risks arise from both our trading and non-trading business activities. The classification of assets into trading book and banking book portfolios determines the approach for analyzing our market risk exposure. Market risk in the trading book is measured using VaR and market risk in our banking book is measured using sensitivity analysis on related market factors.

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2015 for further information on market risk including our VaR methodology.

Trading book

Market risks from our trading book relate to our trading activities primarily in Global Markets, Asia Pacific and the Strategic Resolution Unit. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products. Some of the structured products are

customized transactions using combinations of derivatives and are executed to meet specific client or proprietary needs. As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations.

VaR is a risk measure which quantifies the potential loss on a given portfolio of financial instruments over a certain holding period that is expected to occur at a certain confidence level. VaR is an important tool in risk management and is used for measuring quantifiable risks from our activities exposed to market risk on a daily basis. In addition, VaR is one of the main risk measures for limit monitoring, financial reporting, calculation of regulatory capital and regulatory backtesting.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 3Q16, we enhanced the methodology we use to capture the credit spread risk in semi-sovereign positions in emerging markets countries by using more granular time series. Furthermore, we improved our VaR methodology in order to capture certain higher order risks in the price-yield-relationships for vanilla credit products. These higher order risks were previously included in risk not in VaR. The cumulative impact of these updates

on our VaR measures was immaterial and prior periods have not been restated.

We continue to receive regulatory approval for ongoing enhancements to our VaR methodology used for the calculation of regulatory capital, and the model is subject to regular reviews by regulators.

Information required under Pillar 3 of the Basel framework related to risk is available on our website at www.credit-suisse.com/pillar3.

The tables entitled "Average one-day, 98% risk management VaR by division" and "One-day, 98% risk management VaR" show our trading-related market risk exposure, as measured by one-day, 98% risk management VaR in Swiss francs and US dollars. As we measure trading book VaR for internal risk management purposes using the US dollar as the base currency, the VaR figures were translated into Swiss francs using daily foreign exchange translation rates. VaR estimates are computed separately for each risk type and for the whole portfolio using the historical simulation methodology. The different risk types are grouped into five categories including interest rate, credit spread, foreign exchange, commodities and equity.

Excludes risks associated with counterparty and own credit exposures.

¹ As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

We measure VaR in US dollars, as a majority of our trading activities are conducted in US dollars.

Average risk management VaR decreased 18% to USD 28 million from 2Q16, mainly due to the impact of the 2Q16 risk reductions that were reflected for the entire period in the 3Q16 average VaR. These risk reductions were primarily driven by lower credit spread risk, reflecting reduced exposures in distressed credit products across credit markets, RMBS and CMBS in the US and in Europe, as well as reduced equity exposures across equity markets. For the Strategic Resolution Unit, average risk management VaR decreased mainly due to reduced exposures in distressed credit products across credit markets. For Global Markets, the decrease in average risk management VaR was mainly

driven by reduced exposures in distressed credit products across credit markets, RMBS and CMBS in the US and in Europe, as well as reduced equity exposures across equity markets. For Asia Pacific, the increase in average risk management VaR was primarily driven by increased interest rate exposures in Japan.

Period-end risk management VaR increased 14% to USD 32 million from 2Q16, mainly driven by increased equity exposure from derivatives in China and India, increased interest rate exposures from European derivatives, and increased credit spread exposures from agency CMBS in the US.

The chart entitled "Daily risk management VaR" shows the aggregated market risk in our trading book on a consolidated basis.

Daily risk management VaR (rolling four quarters)

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 3Q16 with those for 2Q16 and 4Q15. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. We had no trading loss days in 3Q16, compared to no trading loss days in 2Q16 and eight trading loss days in 4Q15.

Actual daily trading revenues

VaR backtesting

Various techniques are used to assess the accuracy of the VaR methodology used for risk management and regulatory capital purposes. Backtesting is used to assess the accuracy of the regulatory VaR model. The purpose of the VaR backtesting process is to assess the accuracy and performance of our regulatory VaR model, to assess if our regulatory capital is sufficient to absorb actual losses, and to encourage developments to our VaR model.

Backtesting involves comparing the results produced from the VaR model with the actual daily trading revenues and with a subset of the actual daily trading revenues for capital purposes. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period calculated using the subset of the actual daily trading revenues. In the rolling 12-month period through the end of 3Q16, we had two backtesting exceptions in our regulatory VaR model calculated using the subset of actual daily trading revenues. Since there were fewer than five backtesting exceptions in the rolling 12-month period through the end of 3Q16, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

► Refer to “Market risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2015 for further information on VaR backtesting.

► Refer to “Risk measurement models” in Capital management – Regulatory capital framework for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

Banking book

Market risks from our banking book primarily relate to asset and liability mismatch exposures, equity participations and investments in bonds and money market instruments. Our businesses and the Corporate Center have non-trading portfolios that carry market risks, mainly related to changes in interest rates but also to changes in foreign exchange rates, equity prices and, to a lesser extent, commodity prices.

Interest rate risk on banking book positions is measured by estimating the impact resulting from a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive banking book positions. The impact of a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive banking book positions would have been an increase of CHF 4.5 million as of the end of 3Q16, stable compared to the end of 2Q16.

CREDIT RISK REVIEW

All transactions that are exposed to potential losses due to a counterparty failing to meet an obligation are subject to credit risk exposure measurement and management. The majority of our credit risk is concentrated in the private banking, corporate and institutional businesses and in the investment banking businesses.

► Refer to “Credit risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2015 for further information on credit risk.

► Refer to “Note 17 – Loans, allowance for loan losses and credit quality” and “Note 29 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information on loans and impaired loans and counterparty credit risk, respectively.

² The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 11,410 million and CHF 33,678 million, respectively, as of the end of 3Q16, CHF 10,015 million and CHF 33,905 million, respectively, as of the end of 2Q16, and CHF 9,201 million and CHF 33,615 million, respectively, as of the end of 4Q15.

³ The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 16,969 million and CHF 863 million, respectively, as of the end of 3Q16, CHF 16,549 million and CHF 905 million, respectively, as of the end of 2Q16, and CHF 15,951 million and CHF 911 million, respectively, as of the end of 4Q15.

⁴ The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 17,890 million and CHF 192 million, respectively, as of the end of 3Q16, CHF 17,009 million and CHF 249 million, respectively, as of the end of 2Q16, and CHF 17,627 million and CHF 244 million, respectively, as of the end of 4Q15.

⁵ Allowance for loan losses are only based on loans which are not carried at fair value.

Loans

Compared to the end of 2Q16, gross loans increased CHF 0.8 billion to CHF 275.6 billion as of the end of 3Q16, mainly driven by higher loans collateralized by securities and higher commercial and industrial loans, partially offset by lower loans to financial institutions and lower loans to the real estate sector. The net increase of CHF 1.2 billion in loans collateralized by securities was mainly driven by Asia Pacific, Swiss Universal Bank and International Wealth Management. The net increase of CHF 0.4 billion in commercial and industrial loans was mainly driven by Swiss Universal Bank, partially offset by Global Markets and the Strategic

Resolution Unit. Loans to financial institutions decreased CHF 0.8 billion, primarily in the Strategic Resolution Unit, partially offset by increases in Global Markets, Swiss Universal Bank and Asia Pacific. Loans to the real estate sector decreased CHF 0.2 billion, primarily in Swiss Universal Bank.

On a divisional level, increases in gross loans of CHF 2.2 billion in Swiss Universal Bank, CHF 0.9 billion in Asia Pacific and CHF 0.1 billion in Investment Banking & Capital Markets were partially offset by decreases of CHF 1.4 billion in the Strategic Resolution Unit, CHF 0.9 billion in Global Markets and CHF 0.1 billion in International Wealth Management.

¹ Includes the Corporate Center, in addition to the divisions disclosed.

² Impaired loans are only based on loans which are not carried at fair value.

Impaired loans

Compared to the end of 2Q16, gross impaired loans were stable at CHF 2.3 billion as of the end of 3Q16, mainly reflecting lower potential problem loans in the Strategic Resolution Unit, partially offset by higher non-interest-earning loans and higher restructured loans in the Strategic Resolution Unit. Non-performing loans were stable, reflecting increases in International Wealth Management and Asia Pacific offset by decreases in the Strategic Resolution Unit and Swiss Universal Bank. Decreases in potential problem loans were primarily driven by the reclassification of a large single exposure to non-impaired status in the Strategic Resolution Unit.

In the Strategic Resolution Unit, gross impaired loans decreased CHF 142 million, primarily driven by the reclassification of an impaired CHF 97 million exposure to an oil and gas extraction counterparty to non-impaired status due to improved

collateral coverage levels and the sale of another CHF 55 million oil and gas exposure. In Swiss Universal Bank, gross impaired loans decreased CHF 19 million, primarily driven by write-offs in consumer finance and corporate & institutional loans as well as reclassifications to non-impaired status, partially offset by new impairments across corporate & institutional and consumer loans. In Asia Pacific, gross impaired loans increased CHF 84 million, primarily driven by a small number of individually impaired share-based loans in Hong Kong which were impaired due to their collateral values abruptly falling below their loan amounts, and the impairment of a single facility extended to an investment company. In International Wealth Management, gross impaired loans increased CHF 74 million, primarily driven by aviation finance and lombard loans, partially offset by reductions in ship finance.

² Prior period has been corrected.

SELECTED EUROPEAN CREDIT RISK EXPOSURES

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion.

► Refer to “Selected European credit risk exposures” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2015 for further information on selected European credit risk exposures.

Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our overall risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses of our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties’ exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our OTC derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G7 and non-G7 countries

are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Cyprus, Croatia, Greece, Ireland, Italy, Malta, Portugal and Spain as of the end of 3Q16 was EUR 3,546 million, stable compared to EUR 3,528 million as of the end of 2Q16. Our net exposure to these sovereigns was EUR 562 million, 5% higher compared to EUR 535 million as of the end of 2Q16. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 3Q16 included net exposure to financial institutions of EUR 2,402 million and to corporates and other counterparties of EUR 1,397 million, 14% lower compared to EUR 2,802 million and 17% higher compared to EUR 1,192 million, respectively, as of the end of 2Q16.

► Refer to “Selected European credit risk exposures” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2015 for further information on the presentation of selected European credit risk exposures.

Sovereign debt rating developments

In 3Q16, the long-term sovereign debt ratings of the countries listed in the table remained unchanged.

Balance sheet and off-balance sheet

Total assets were CHF 806.7 billion, total liabilities were CHF 762.0 billion and total equity was CHF 44.8 billion. Total assets decreased 2% and total liabilities decreased 2% for the quarter, reflecting lower operating activities and the foreign exchange translation impact. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

BALANCE SHEET

Total assets were CHF 806.7 billion as of the end of 3Q16, a decrease of CHF 14.5 billion, or 2%, from the end of 2Q16, reflecting lower operating activities and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total assets decreased CHF 12.0 billion.

Compared to the end of 2Q16, cash and due from banks decreased CHF 9.1 billion, or 8%, mainly driven by lower cash positions at the Fed. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions decreased CHF 7.3 billion, or 6%, mainly driven by a decrease in reverse repurchase transactions with customers and the foreign

exchange translation impact. Brokerage receivables decreased CHF 2.7 billion, or 6%, mainly driven by a decrease in foreign exchange activity, a decrease in failed settlements and the foreign exchange translation impact. Net loans were stable. Trading assets increased CHF 6.3 billion, or 4%, mainly due to higher equity and debt securities, partially offset by lower derivative instruments and the foreign exchange translation impact. All other assets decreased CHF 2.4 billion, or 3%, mainly reflecting a decrease in other assets related to cash collateral on derivative instruments and the foreign exchange translation impact, partially offset by an increase in securities received as collateral.

Noncontrolling interests	481	367	636	31	(24)
Total equity	44,757	45,329	45,018	(1)	(1)
Total liabilities and equity	806,711	821,164	820,805	(2)	(2)

Total liabilities were CHF 762.0 billion as of the end of 3Q16, a decrease of CHF 13.9 billion, or 2%, from the end of 2Q16, reflecting lower operating activities and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total liabilities decreased CHF 11.6 billion.

Compared to the end of 2Q16, long-term debt decreased CHF 4.8 billion, or 2%, primarily driven by maturities of senior and subordinated debt and the foreign exchange translation impact, partially offset by the issuance of senior debt. Trading liabilities decreased CHF 3.8 billion, or 7%, mainly reflecting a decrease in derivative instruments and the foreign exchange translation impact. Customer deposits decreased CHF 2.4 billion, or 1%, mainly driven by decreases in current accounts related to private clients, numbered accounts for private and institutional clients, a decrease in certificates of deposits and the foreign exchange translation impact, largely offset by an increase in demand deposits. Brokerage payables decreased by CHF 1.8 billion, or 4%, mainly reflecting a decrease in margin lending balances with customers, failed settlements and the foreign exchange translation impact. Due to banks decreased CHF 1.3 billion, or 5%, mainly driven by an decrease in demand, money market and time deposits with banks.

Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions were stable. All other liabilities were stable.

► Refer to "Funding sources and uses" in Liquidity and funding management and "Capital management" for further information, including our funding of the balance sheet and the leverage ratio.

OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

► Refer to "Liquidity and funding management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2015 and "Note 27 – Guarantees and commitments" and "Note 31 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information.

Report of Independent Registered Public Accounting Firm to the Board of Directors of

Credit Suisse Group AG, Zurich

We have reviewed the accompanying condensed consolidated balance sheets of Credit Suisse Group AG and subsidiaries (the “Group”) as of September 30, 2016, the related condensed consolidated statements of operations, changes in equity and comprehensive income, for the three and nine-month periods ended September 30, 2016 and 2015, and the related condensed consolidated statements of cash flows for the nine-month periods ended September 30, 2016 and 2015. These condensed consolidated financial statements are the responsibility of the Group’s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Group as of December 31, 2015, and the related consolidated statements of operations, changes in equity, comprehensive income, and cash flows for the year then ended (not presented herein); and in our report dated March 24, 2016, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2015, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Notes to the condensed consolidated financial statements – unaudited

1 Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with US GAAP and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2015 included in the Credit Suisse Annual Report 2015.

▶ Refer to “Note 1 – Summary of significant accounting policies” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for a description of the Group’s significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period’s consolidated financial statements to conform to the current period’s presentation. These condensed consolidated financial

statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 2Q16 consolidated statements of operations and comprehensive income, the 2Q16 consolidated balance sheet and the 3Q16, 2Q16 and 3Q15 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2 Recently issued accounting standards

Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

▶ Refer to “Note 2 – Recently issued accounting standards” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for a description of accounting standards adopted in 2015.

ASC Topic 718 – Compensation – Stock Compensation

In June 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-12, “Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period” (ASU 2014-12), an update to Accounting Standards Codification (ASC) Topic 718 – Compensation – Stock Compensation. The amendments in ASU 2014-12 require that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. The adoption of ASU 2014-12 on January 1, 2016 did not have a material impact on the Group’s financial position, results of operations and cash flows.

ASC Topic 810 – Consolidation

In February 2015, the FASB issued ASU 2015-02, “Amendments to the Consolidation Analysis” (ASU 2015-02), an update to ASC Topic 810 – Consolidation. The amendments in ASU 2015-02 rescind the indefinite deferral for certain investment funds, which is included in ASU 2010-10, Consolidation (ASC Topic 810), “Amendments for Certain Investment Funds”. The amendments in ASU 2015-02 also require a re-evaluation as to whether certain legal entities require consolidation under the revised consolidation model, specifically as it relates to whether limited partnerships and similar legal entities are VIEs or voting interest entities,

the elimination of the presumption that a general partner controls a partnership, and the consolidation analysis of VIEs, particularly those that have fee arrangements and related party relationships. The adoption of ASU 2015-02 on January 1, 2016 did not have a material impact on the Group’s financial position, results of operations and cash flows.

In August 2014, the FASB issued ASU 2014-13, “Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity” (ASU 2014-13), an update to ASC Topic 810 – Consolidation. ASU 2014-13 applies to reporting entities that are required to consolidate a collateralized financing entity (CFE) under the VIE guidance. These entities may elect to measure the financial assets and the financial liabilities of the CFE at fair value using either ASC Topic 820 – Fair Value Measurements or an alternative provided in ASU 2014-13. When using the measurement alternative provided in this update, the reporting entity should measure both the financial assets and the financial liabilities of the CFE, using the most observable of (i) the fair value of the financial assets and (ii) the fair value of the financial liabilities. The adoption of ASU 2014-13 on January 1, 2016 did not have a material impact on the Group’s financial position, results of operations and cash flows.

ASC Topic 815 – Derivatives and Hedging

In November 2014, the FASB issued ASU 2014-16, “Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity” (ASU 2014-16), an update to ASC Topic 815 – Derivatives and Hedging. The amendments in ASU 2014-16 clarify that for hybrid financial instruments issued in the form of a share, an entity (an issuer or an investor) should determine the nature of the host contract by

considering all stated and implied substantive terms and features of the hybrid financial instrument, weighing each term and feature on the basis of relevant facts and circumstances. The adoption of ASU 2014-16 on January 1, 2016 did not have a material impact on the Group's financial position, results of operations and cash flows.

ASC Topic 820 – Fair Value Measurement

In May 2015, the FASB issued ASU 2015-07, "Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)" (ASU 2015-07), an update to ASC Topic 820 – Fair Value Measurement. The amendments in ASU 2015-07 remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value (NAV) per share practical expedient and change the scope of certain disclosure requirements to those investments for which an entity has elected using that practical expedient. The adoption of ASU 2015-07 on January 1, 2016 resulted in modified disclosures but did not have a material impact on the Group's financial position, results of operations and cash flows.

ASC Topic 825 – Financial Instruments – Overall

In January 2016, the FASB issued ASU 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities" (ASU 2016-01), an update to ASC Topic 825 – Financial Instruments – Overall. The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The amendments primarily affect the accounting for equity investments, financial liabilities under the fair value option and the presentation and disclosure requirements for financial instruments. ASU 2016-01 is effective for annual reporting periods beginning after December 15, 2017, and for the interim and annual reporting periods thereafter. Early adoption of the full standard is not permitted, however, certain sections of ASU 2016-01 relating to fair value option-elected financial liabilities can be early adopted in isolation. These amendments to ASU 2016-01 require the changes in fair value relating to instrument-specific credit risk of fair value option elected financial liabilities to be presented separately in AOCI. The Group has early adopted these sections of the update on January 1, 2016. As a result of adoption, a reclassification of a gain from retained earnings to AOCI of CHF 475 million, net of tax, was recorded. The Group is currently evaluating the impact of the adoption of the remaining sections of ASU 2016-01 on the Group's financial position, results of operations and cash flows.

ASC Topic 835 – Interest

In April 2015, the FASB issued ASU 2015-03, "Simplifying the Presentation of Debt Issuance Costs" (ASU 2015-03), an update to ASC Subtopic 835-30, "Interest – Imputation of Interest". Under ASU 2015-03, an entity presents debt issuance costs in the balance sheet as a direct deduction from the related debt liability rather than an asset. The adoption of ASU 2015-03 on January 1, 2016 resulted in a reduction to both total assets and total liabilities of CHF 541 million, however, retrospective application was deemed immaterial and, as such, prior periods were not restated.

Standards to be adopted in future periods

ASC Topic 205 – Presentation of Financial Statements

In August 2014, the FASB issued ASU 2014-15, "Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern" (ASU 2014-15), an update to ASC Topic 205 – Presentation of Financial Statements. The amendments in ASU 2014-15 provide guidance in US GAAP about management's responsibility to evaluate whether there are conditions and events, considered in the aggregate, that raise substantial doubt about an entity's ability to continue as a going concern and to provide related disclosures in the notes to the financial statements. The amendments are expected to reduce diversity in the timing and content of such disclosures. ASU 2014-15 is effective for the annual reporting period ending after December 15, 2016, and for the interim and annual reporting periods thereafter. Early adoption is permitted. As these amendments relate only to disclosures, the adoption of ASU 2014-15 will have no impact on the Group's financial position, results of operations and cash flows.

ASC Topic 230 – Statement of Cash Flows

In August 2016, the FASB issued ASU 2016-15, "Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)" (ASU 2016-15), an update to ASC Topic 230 – Statement of Cash Flows. The amendments in ASU 2016-15 provide guidance regarding classification of certain cash receipts and payments where diversity in practice was observed. ASU 2016-15 is required to be applied retrospectively to all periods presented beginning in the year of adoption. ASU 2016-15 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted, including adoption in an interim period. The Group is currently evaluating the impact of the adoption of ASU 2016-15 on the Group's financial position, results of operations and cash flows.

ASC Topic 326 – Financial Instruments – Credit Losses

In June 2016, the FASB issued ASU 2016-13, "Measurement of Credit Losses on Financial Instruments" (ASU 2016-13), an update to ASC Topic 326 – Financial Instruments – Credit Losses. The ASU is intended to improve financial reporting by requiring timelier recording of credit losses on financial assets measured at amortized cost basis (including, but not limited to loans), net investments in leases recognized as lessor and off-balance sheet credit exposures. The ASU eliminates the probable initial recognition threshold under the current incurred loss methodology for recognizing credit losses. Instead, the ASU requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. The Group will now incorporate forward-looking information into its credit loss estimates. The ASU requires enhanced disclosures to help investors and other financial statement users to better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. As the Group is a US Securities and Exchange Commission (SEC) filer, ASU 2016-13 is

effective for annual reporting periods beginning after December 15, 2019, and for the interim and annual reporting periods thereafter. Early application will be permitted for annual reporting periods, and for the interim periods within those annual reporting periods, beginning after December 15, 2018, and for the interim and annual reporting periods thereafter. The Group is currently evaluating the impact of the adoption of ASU 2016-13 on the Group's financial position, results of operations and cash flows.

ASC Topic 606 – Revenue from Contracts with Customers

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), an update to ASC Topic 606 – Revenue from Contracts with Customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU outlines key steps that an entity should follow to achieve the core principle. ASU 2014-19, as amended by ASU 2015-14 "Deferral of the Effective Date", ASU 2016-08 "Principal versus Agent Considerations (Reporting Revenue Gross versus Net)", ASU 2016-10 "Identifying Performance Obligations and Licensing", ASU 2016-11 "Rescission of SEC Guidance Because of Accounting Standards Updates 2014-09 and 2014-16 Pursuant to Staff Announcements at the March 3, 2016 EITF Meeting" and ASU 2016-12 "Narrow-Scope Improvements and Practical Expedients", is effective for the annual reporting period beginning after December 15, 2017, and for the interim and annual reporting periods thereafter. The Group is currently evaluating the impact of the adoption of ASU 2014-09 and its amendments on the Group's financial position, results of operations and cash flows.

ASC Topic 718 – Compensation – Stock Compensation

In March 2016, the FASB issued ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting" (ASU 2016-09), an update to ASC Topic 718 – Compensation—Stock Compensation. The amendments in ASU 2016-09 provide simplification updates for several aspects of the accounting for share-based payment

transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. ASU 2016-09 is effective for annual reporting periods beginning after December 15, 2016, and for the interim and annual reporting periods thereafter. The Group is currently evaluating the impact of the adoption of ASU 2016-09 on the Group's financial position, results of operations and cash flows.

ASC Topic 740 – Income Taxes

In October 2016, the FASB issued ASU 2016-16, "Intra-Entity Transfers of Assets Other Than Inventory" (ASU 2016-16), an update to ASC Topic 740 – Income Taxes. The amendments in ASU 2016-16 eliminate the exception for an intra-entity transfer of an asset other than inventory. ASU 2016-16 is required to be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted as of the beginning of an annual reporting period for which financial statements (interim or annual) have not been issued or made available for issuance. The Group is currently evaluating the impact of the adoption of ASU 2016-16 on the Group's financial position, results of operations and cash flows.

ASC Topic 842 – Leases

In February 2016, the FASB issued ASU 2016-02, "Leases" (ASU 2016-02), creating ASC Topic 842 – Leases. ASU 2016-02 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. ASU 2016-02 requires lessees to present a right-of-use asset and a corresponding lease liability on the balance sheet. Lessor accounting is substantially unchanged compared to the current accounting guidance. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and for the interim and annual reporting periods thereafter. The Group is currently evaluating the impact of the adoption of ASU 2016-02 on the Group's financial position, results of operations and cash flows.

3 Business developments

Credit Suisse (Schweiz) AG

We registered a new Swiss legal entity under the name Credit Suisse (Schweiz) AG in 2015. This new legal entity is a wholly-owned subsidiary of Credit Suisse AG. It will assume and service Credit Suisse AG's clients of Swiss Universal Bank and will include the majority of that division's employees and those parts of the corporate functions that primarily serve Swiss Universal Bank within Credit Suisse AG and will not be outsourced to other Group entities.

Credit Suisse (Schweiz) AG was established to support the realization of the Group's strategic objectives, to further increase its resilience and to meet developing and future regulatory requirements. The entity received its banking license as of October 14,

2016, and is expected to start its business operations as an independent Swiss bank on November 20, 2016. As licensed Swiss banks, both Credit Suisse AG and Credit Suisse (Schweiz) AG will be subject to the same rules and standards regarding client protection, asset segregation and Swiss banking confidentiality.

In line with our strategy, we are also planning a partial IPO of Credit Suisse (Schweiz) AG by the end of 2017, market conditions permitting. Any such IPO would involve the sale of a minority stake and would be subject to, among other things, all necessary approvals and would be intended to generate/raise additional capital for Credit Suisse AG or Credit Suisse (Schweiz) AG.

4 Discontinued operations

There were no operations that were discontinued in 9M16 and 2015.

► Refer to “Note 4 – Discontinued operations” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information.

5 Segment information

Overview

The Group is a global financial services company domiciled in Switzerland and serves its clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specialized in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios

from the former non-strategic units plus additional businesses and positions that do not fit with the strategic direction. The segment information reflects the Group's six reportable segments and the Corporate Center, which are managed and reported on a pre-tax basis.

► Refer to “Note 5 – Segment information” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information on segment information, revenue sharing and cost allocation and funding.

13 Restructuring expenses

In connection with the strategic review of the Group, restructuring expenses of CHF 145 million and CHF 91 million and CHF 491 million were recognized in 3Q16, 2Q16 and 9M16, respectively.

Restructuring expenses primarily include termination costs, expenses in connection with the acceleration of certain deferred compensation awards and real estate contract termination costs.

Utilization				(152)	(57)	(209)
Balance at end of period				217	91	308

¹ The following items for which expense accretion was accelerated in 3Q16, 2Q16 and 9M16 due to the restructuring of the Group are not included in the restructuring provision: unsettled share-based compensation of CHF 42 million, CHF (27) million, CHF 48 million, respectively, and unsettled pension obligations of CHF 6 million, CHF 4 million and CHF 33 million, respectively, which remain classified as a component of total shareholders' equity; and unsettled cash-based deferred compensation of CHF 10 million, CHF 12 million and CHF 92 million, respectively, which remain classified as compensation liabilities. The settlement date for the unsettled share-based compensation remains unchanged at three years.

14 Earnings per share

in	3Q16	2Q16	3Q15	9M16	9M15
Basic net income/(loss) attributable to shareholders (CHF million)					
Net income/(loss) attributable to shareholders for basic earnings per share	41	170	779	(91)	2,884
Available for common shares	41	167	770	(94)	2,830
Available for unvested share-based payment awards	0	3	9	3	54
Diluted net income/(loss) attributable to shareholders (CHF million)					
Net income/(loss) attributable to shareholders for diluted earnings per share	41	170	779	(91)	2,884
Available for common shares	41	167	770	(94)	2,831
Available for unvested share-based payment awards	0	3	9	3	53
Weighted-average shares outstanding (million)					
Weighted-average shares outstanding for basic earnings per share available for common shares	2,092.6	2,018.4	1,688.0	2,030.6	1,682.7
Dilutive share options and warrants	2.8	3.7	1.0	0.0	0.9
Dilutive share awards	52.9	43.0	54.5	0.0	43.3
Weighted-average shares outstanding for diluted earnings per share available for common shares¹	2,148.3	2,065.1	1,743.5	2,030.6²	1,726.9
Weighted-average shares outstanding for basic/diluted earnings per share available for unvested share-based payment awards	0.2	1.2	20.4	3.9	27.8
Earnings/(loss) per share available for common shares (CHF)					
Basic earnings/(loss) per share available for common shares	0.02	0.08	0.46	(0.05)	1.68
Diluted earnings/(loss) per share available for common shares	0.02	0.08	0.44	(0.05)	1.64

Prior periods have been adjusted to reflect the increase in the number of shares outstanding as a result of the discount element in the 2015 rights issue, as required under US GAAP.

¹ Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 13.4 million, 12.0 million, 6.4 million, 11.0 million and 7.6 million for 3Q16, 2Q16, 3Q15, 9M16 and 9M15, respectively.

² Due to the net loss in 9M16, 2.9 million of weighted-average share options and warrants outstanding and 49.9 million of weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

15 Trading assets and liabilities

In accordance with US GAAP, the Group continually assesses whether or not there has been a triggering event requiring a review of goodwill. There was no triggering event in 3Q16. As of September 30, 2016, the Group's market capitalization was below book value.

On March 23, 2016, the Group announced a number of strategy measures affecting its Global Markets and Strategic Resolution Unit segments, including business exits and other business reductions in Global Markets. During 2Q16, these strategy measures were implemented together with additional actions that also impacted the Group's other business segments. The Group determined that these changes constituted triggering events. The Group's reporting units were not changed as a result of this announcement and remain defined as follows: Swiss Universal Bank – Private Banking, Swiss Universal Bank – Corporate & Institutional Banking, International Wealth Management – Private

Banking, International Wealth Management – Asset Management, Asia Pacific – Private Banking, Asia Pacific – Investment Banking, Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit.

The carrying value of each reporting unit for purposes of the goodwill impairment test is determined by considering the reporting units' risk-weighted assets usage, leverage ratio exposure, deferred tax assets, goodwill and intangible assets. Any residual equity, after considering the total of these elements, is allocated to the reporting units on a pro-rata basis.

In estimating the fair value of its reporting units, the Group applied a combination of the market approach and income approach. Under the market approach, consideration was given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries.

Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows, which are determined from the Group's financial plan.

In determining the estimated fair value, the Group relied upon its updated five-year strategic business plan which included significant management assumptions and estimates based on its view of current and future economic conditions and regulatory changes.

Goodwill is tested for impairment before and immediately after a reorganization or restructuring of reporting units. As a result, the goodwill impairment test was performed as of March 31, 2016 under the old business structure and then again under the modified structure according to the announcement on March 23, 2016. The goodwill impairment analysis performed as of June 30, 2016 considered the impact from the additional actions in 2Q16 and the

Group concluded that the estimated fair value for all of its reporting units with goodwill substantially exceeded their related carrying values and that no impairment was necessary.

The Group engaged the services of an independent valuation specialist to assist in the valuation of the Global Markets reporting unit as of March 31, 2016. The valuations were also performed using a combination of the market approach and income approach.

The results of the impairment evaluation of each reporting unit's goodwill would be significantly impacted by adverse changes in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a significant margin from its best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, the Group could potentially incur material impairment charges in the future.

22 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

Derivatives

The Group transacts bilateral OTC derivatives mainly under the International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC

derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values (PRV/NRV) and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Exchange-traded derivatives or OTC-cleared derivatives, that are fully margined and for which the daily margin payments constitute settlement of the outstanding exposure, are not included in the offsetting disclosures because they are not subject to offsetting due to the daily settlement. The daily margin payments, which are not settled until the next settlement cycle is conducted, are presented in brokerage receivables or brokerage payables. The notional amount for these daily settled derivatives is included in the fair value of derivative instruments table in "Note 26 – Derivatives and hedging activities".

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcated hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and trading liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

¹ Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at

inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, substantially all of the collateral received that may be sold or repledged was sold or repledged as of September 30, 2016 and December 31, 2015. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

Offsetting of securities purchased under resale agreements and securities borrowing transactions

end of	3Q16			4Q15		
	Gross	Offsetting	Net	Gross	Offsetting	Net

¹ Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

² CHF 19,861 million and CHF 32,398 million of the total net amount as of the end of 3Q16 and 4Q15, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and

borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

Amounts not offset in the consolidated balance sheets

end of	3Q16				4Q15			
	Net	Financial instruments ¹	Cash collateral received/pledged ¹	Net exposure	Net	Financial instruments ¹	Cash collateral received/pledged ¹	Net exposure
Financial assets subject to enforceable master netting agreements (CHF billion)								
Derivatives	22.0	6.8	0.0	15.2	22.9	6.2	0.8	15.9
Securities purchased under resale agreements	64.7	64.7	0.0	0.0	72.4	72.4	0.0	0.0
Securities borrowing transactions	16.3	15.5	0.0	0.8	17.5	17.1	0.0	0.4
Total financial assets subject to enforceable master netting agreements	103.0	87.0	0.0	16.0	112.8	95.7	0.8	16.3
Financial liabilities subject to enforceable master netting agreements (CHF billion)								
Derivatives	17.6	5.3	0.0	12.3	17.1	3.4	0.0	13.7
Securities sold under repurchase agreements	22.3	22.3	0.0	0.0	21.8	21.8	0.0	0.0
Securities lending transactions	5.0	5.0	0.0	0.0	7.7	7.4	0.0	0.3
Obligation to return securities received as collateral, at fair value	26.5	25.4	0.0	1.1	19.4	18.5	0.0	0.9
Total financial liabilities subject to enforceable master netting agreements	71.4	58.0	0.0	13.4	66.0	51.1	0.0	14.9

¹ The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of credit default swaps (CDS) and credit insurance contracts.

Therefore, the net exposure presented in the table above is not representative of the Group's counterparty exposure.

23 Tax

The income tax expense of CHF 185 million recorded in 3Q16 mainly reflected the impact of the geographical mix of results.

The quarterly income tax expense includes the impact of the continuous reassessment of the estimated annual effective tax rate as well as the impact of items that need to be recorded in the specific interim period in which they occur.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of September 30, 2016, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 5.4 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 7 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Japan – 2012; Switzerland – 2011; Brazil – 2010; the US – 2010; the UK – 2009; and the Netherlands – 2005.

Effective tax rate

Income tax expense	185

Foreign tax rate differential

3Q16 included a foreign tax expense of CHF 39 million in respect of earnings in higher tax jurisdictions, such as the US, as well as earnings in lower tax jurisdictions, such as Singapore.

Other non-deductible expenses

3Q16 included the impact of CHF 114 million relating to the non-deductible portion of the litigation provisions and settlement charges, partially offset by the reversal of the over-accrual of non-deductible interest expenses of CHF 33 million and non-deductible bank levy costs and other non-deductible expenses of CHF 9 million.

Changes in deferred tax valuation allowance

3Q16 included the impact of the decrease of valuation allowances of CHF 44 million mainly in respect of two of the Group's operating entities, both in the UK, and an increase of valuation allowances of CHF 20 million mainly in respect of two the Group's operating entities in the UK and Asia, related to estimated current year earnings.

Lower taxed income

3Q16 included the partial reversal of the previously reported impacts of a beneficial earnings mix in one of the Group's operating entities in Switzerland of CHF 43 million, CHF 9 million related to non-taxable life insurance income and CHF 1 million related to exempt income.

Change in recognition of outside basis difference

3Q16 included a CHF 82 million income tax expense related to a change in the outside basis difference relating to Swiss subsidiary investments.

Other

3Q16 included a tax benefit of CHF 169 million relating to the reassessment of deferred tax balances in one of the Group's operating entities in Switzerland and a tax benefit of CHF 17 million from the reduction in own-credit revaluation gains. It also included a tax charge of CHF 86 million relating to the increase of tax contingency accruals for income tax, associated interest and penalties relating to two Italian income tax matters which have been resolved as part of an agreement with the Italian tax authorities. The remaining balance included various smaller items.

► Refer to "Note 31 – Litigation" for further information on the Italian tax matters.

of which deductible temporary differences	3,529	3,725
Deferred tax liabilities	(50)	(48)
Net deferred tax assets	6,435	6,271

24 Employee deferred compensation

The Group's current and previous deferred compensation plans include share awards, performance share awards, Contingent Capital Awards, Capital Opportunity Facility awards, Plus Bond awards, Partner Asset Facilities awards, Restricted Cash Awards and other cash awards.

► Refer to "Note 29 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information.

The following tables show the compensation expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 3Q16 and prior periods and the remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized compensation expense was based on the fair value of each award on the grant date and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

Other cash awards	107	102	83	242	301
Total deferred compensation expense	451	374	553	1,191	1,779

¹ Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.

² Compensation expense mainly includes the change in underlying fair value of the indexed assets prior to the Contingent Capital Awards conversion.

³ Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

Estimated unrecognized deferred compensation

end of	3Q16
Estimated unrecognized compensation expense (CHF million)	
Share awards	592
Performance share awards	210
Contingent Capital Awards	155
Contingent Capital share awards	36
Other cash awards	247
Total	1,240
Weighted-average requisite service period (years)	
Aggregate remaining weighted-average requisite service period	1.2

In 3Q16, the Group granted deferred share and cash retention awards of a further CHF 66 million, completing the program initiated in 2Q16 relating to the reorganization of the Global Markets and Investment Banking & Capital Markets businesses. These will be expensed over a period of up to seven years from the grant date. Amortization of these awards totaled CHF 63 million year-to-date and was recognized in the Corporate Center.

25 Pension and other post-retirement benefits

The Group expects to contribute CHF 660 million to the Swiss and international defined benefit plans and other post-retirement

defined benefit plans in 2016. As of the end of 3Q16, CHF 565 million of contributions had been made.

26 Derivatives and hedging activities

► Refer to “Note 32 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information.

Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to “Note 29 – Financial instruments” for further information.

As of the end of 3Q16, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was five years.

The net gain associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months is CHF 12 million.

Net investment hedges

Represents gains/(losses) on effective portion.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch, two-notch and a three-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

Contingent credit risk

end of	3Q16								4Q15
	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total

Credit derivatives

► Refer to “Note 32 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information on credit derivatives.

Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of

entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other derivative instruments were excluded as they do not fall within the scope of US GAAP rules. Total return swaps (TRS) of CHF 7.0 billion and CHF 7.8 billion as of the end of 3Q16 and 4Q15, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

¹ Represents credit protection purchased with identical underlyings and recoveries.

² Based on internal ratings of BBB and above.

³ Includes the Clock Finance transaction.

Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

Credit derivatives

end of	3Q16	4Q15
Credit derivatives (CHF billion)		
Credit protection sold	280.2	378.3
Credit protection purchased	266.3	356.0
Other protection purchased	81.2	80.4
Other instruments ¹	13.7	17.2
Total credit derivatives	641.4	831.9

¹ Consists of certain cash collateralized debt obligations, total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

Maturity of credit protection sold

Total instruments	71.1	281.3	25.9	378.3

27 Guarantees and commitments**Guarantees**

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group's current

best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, derivatives and other guarantees. The Group no longer provides guarantees for securities lending indemnifications.

► Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2015 for a detailed description of guarantees.

Guarantees

end of	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount ¹	Carrying value	Collateral received
3Q16 (CHF million)						
Credit guarantees and similar instruments	1,766	1,210	2,976	2,744	12	1,864

4Q15 (CHF million)						
Credit guarantees and similar instruments	2,916	1,486	4,402	4,193	25	1,729
Performance guarantees and similar instruments	4,295	2,704	6,999	6,100	78	3,144
Derivatives ²	23,529	14,660	38,189	38,189	755	– ³
Other guarantees	3,958	1,521	5,479	5,474	52	3,533
Total guarantees	34,698	20,371	55,069	53,956	910	8,406

¹ Total net amount is computed as the gross amount less any participations.

² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

³ Collateral for derivatives accounted for as guarantees is not significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2016 to June 30, 2017 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees.

Representations and warranties on residential mortgage loans sold

In connection with the former Investment Banking division's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises, Fannie Mae and Freddie Mac; institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value

ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims made within the statute of limitations (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

During the first nine months of 2016, the Group received repurchase claims for residential mortgage loans that were not significant, and loans repurchased during this period and related losses were not significant. The balance of outstanding repurchase claims as of the end of 3Q16 was not significant.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in this Guarantees and commitments disclosure but are addressed in litigation and related loss contingencies and provisions. The Group is involved in litigation relating to representations and warranties on residential mortgages sold.

► Refer to "Note 31 – Litigation" for further information.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the “Guarantees” table.

► Refer to “Disposal-related contingencies and other indemnifications” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2015 for a description of these guarantees.

Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

► Refer to “Other commitments” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2015 for a description of these commitments.

¹ Total net amount is computed as the gross amount less any participations.

² Irrevocable loan commitments do not include a total gross amount of CHF 98,724 million and CHF 98,495 million of unused credit limits as of the end of 3Q16 and 4Q15, respectively, which were revocable at the Group's sole discretion upon notice to the client.

28 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

TRANSFERS OF FINANCIAL ASSETS

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue CMBS, RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the

SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include managed CLOs, CLOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CLOs are collateralized by loans transferred to the CLO vehicle and pay a return based on the returns on the loans. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed

financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and loans involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 9M16 and 9M15 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

Securitizations

in	9M16	9M15
Gains and cash flows (CHF million)		
CMBS		
Net gain ¹	0	1
Proceeds from transfer of assets	3,315	8,003
Cash received on interests that continue to be held	53	119
RMBS		
Net gain/(loss) ¹	(1)	11
Proceeds from transfer of assets	7,706	15,713
Servicing fees	2	2
Cash received on interests that continue to be held	394	325
Other asset-backed financings		
Net gain ¹	22	20
Proceeds from transfer of assets	1,963 ²	1,124
Fees ³	93	–
Cash received on interests that continue to be held	2	3

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

² Excludes a net impact of CHF 3,109 million from transfers of assets prior to January 1, 2016 related to certain variable interest entities deconsolidated as a result of the adoption of ASU 2015-02, Amendments to the Consolidation Analysis, on January 1, 2016.

³ Represents management fees and performance fees earned for investment management services provided to managed CLOs.

Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

► Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2015 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 3Q16 and 4Q15, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	3Q16	4Q15
CHF million		
CMBS		
Principal amount outstanding	33,659	40,625
Total assets of SPE	46,429	56,118
RMBS		
Principal amount outstanding	38,424	54,164
Total assets of SPE	38,424	55,833
Other asset-backed financings		
Principal amount outstanding	20,925 ¹	21,653
Total assets of SPE	34,976 ¹	22,787

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

¹ Includes a net impact of CHF 3,208 million in principal amount outstanding and of CHF 16,625 million in total assets of the SPE from transfers of assets prior to January 1, 2016 related to certain variable interest entities deconsolidated as a result of the adoption of ASU 2015-02, Amendments to the Consolidation Analysis, on January 1, 2016.

Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

► Refer to “Note 29 – Financial instruments” for information on fair value hierarchy levels.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in	9M16		9M15	
	CMBS	RMBS	CMBS	RMBS
CHF million, except where indicated				
Fair value of beneficial interests	42	1,499	1,336	1,613
of which level 2	42	1,396	1,265	1,264
of which level 3	0	103	70	349
Weighted-average life, in years	10.7	6.4	8.5	9.5
Prepayment speed assumption (rate per annum), in % ¹	- ²	8.0–33.0	- ²	1.1–27.7
Cash flow discount rate (rate per annum), in % ³	2.4–4.9	1.4–24.4	1.7–6.5	1.7–13.6
Expected credit losses (rate per annum), in %	0.0–0.0	11.2–11.2	0.7–5.9	0.5–12.5

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

³ The rate was based on the weighted-average yield on the beneficial interests.

Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 3Q16 and 4Q15.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

end of	3Q16			4Q15		
	CMBS ¹	RMBS	Other asset-backed financing activities ²	CMBS ¹	RMBS	Other asset-backed financing activities ²
CHF million, except where indicated

of which non-investment grade	79	601	42	73	581	55
Weighted-average life, in years	6.5	7.1	5.1	6.7	9.7	2.5
Prepayment speed assumption (rate per annum), in % ³	-	2.0–33.0	-	-	1.0–37.1	-
Impact on fair value from 10% adverse change	-	(28.4)	-	-	(30.5)	-
Impact on fair value from 20% adverse change	-	(55.2)	-	-	(57.6)	-
Cash flow discount rate (rate per annum), in % ⁴	1.5–23.9	1.0–43.6	1.0–21.2	2.1–13.3	1.5–35.5	5.7–21.2
Impact on fair value from 10% adverse change	(5.8)	(36.9)	(4.8)	(18.1)	(63.1)	(0.7)
Impact on fair value from 20% adverse change	(11.3)	(72.1)	(9.6)	(35.6)	(122.5)	(1.5)
Expected credit losses (rate per annum), in %	0.7–23.2	0.9–42.5	0.2–12.9	0.9–12.7	1.3–34.3	0.2–14.2
Impact on fair value from 10% adverse change	(3.6)	(26.6)	(3.5)	(8.0)	(32.3)	(0.7)
Impact on fair value from 20% adverse change	(7.1)	(51.8)	(6.9)	(15.9)	(63.2)	(1.5)

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

² CDOs and CLOs within this category are generally structured to be protected from prepayment risk.

³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

⁴ The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Transfers of financial assets where sale treatment was not achieved

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 3Q16 and 4Q15.

► Refer to "Note 30 – Assets pledged and collateral" for further information.

Transfers of financial assets accounted for as a sale

US GAAP requires the disclosure of a transaction accounted for as a sale that comprises both of the following: a transfer of financial assets to a transferee and an agreement entered into in contemplation of the initial transfer with the transferee that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. In the ordinary course of business, the Group transfers a financial asset accounted for as a sale and, in some instances, enters into an agreement in contemplation of that initial transfer with the same counterparty to retain substantially all of the economics of that transferred financial asset. As of the end of 3Q16 and 4Q15, the Group had agreements in the form of TRS on equity securities and longevity swaps on life insurance policies.

The following table presents information about the transfers of financial assets accounted for as sales with agreements that result in the Group retaining substantially all of the exposure to the economic return on the transferred assets at the date of sale and remain outstanding as of the end of 3Q16 and 4Q15, respectively, gross cash proceeds received for assets derecognized at the date of sale and the fair values of transferred assets and the aforementioned agreements as of the end of 3Q16 and 4Q15.

Transfer of financial assets accounted for as sales – by transaction type

	at date of derecognition				end of
	Carrying amount derecognized	Gross cash proceeds received for assets derecognized	Fair value of transferred assets	Gross derivative assets recorded ¹	Gross derivative liabilities recorded ¹
3Q16 (CHF million)					
Sales with longevity swaps	263	322	386	569	–
Total transactions outstanding	263	322	386	569²	0
4Q15 (CHF million)					
Sales with total return swaps	395	397	398	7	7
Sales with longevity swaps	308	378	375	546	–
Total transactions outstanding	703	775	773	553³	7³

¹ Balances presented on a gross basis, before application of counterparty and cash collateral netting.

² As of the end of 3Q16, gross derivative assets of CHF 569 million were included in other products, as disclosed in Note 26 – Derivatives and hedging activities.

³ As of the end of 4Q15, gross derivative assets of CHF 7 million and CHF 546 million were included in equity/index-related products and other products, respectively, and gross derivative liabilities of CHF 7 million were included in equity/index-related products, as disclosed in Note 26 – Derivatives and hedging activities.

Securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings

For securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings, US GAAP requires the disclosure of the collateral pledged and the associated risks to which a transferor continues to be exposed after the transfer. This provides an understanding of the nature and risks of short-term collateralized financing obtained through these types of transactions.

Securities sold under repurchase agreements and securities lending transactions represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activities. These transactions are collateralized principally by government debt securities, corporate debt securities, asset-backed securities, equity securities and other collateral and have terms ranging from on demand to a longer period of time.

In the event of the Group's default or a decline in fair value of collateral pledged, the repurchase agreement or security lending transaction provides the counterparty with the right to liquidate the collateral held or request additional collateral.

The following tables provide the gross obligation relating to securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral by the class of collateral pledged and by remaining contractual maturity as of the end of 3Q16 and 4Q15.

² Includes overnight transactions.

► Refer to "Note 22 – Offsetting of financial assets and financial liabilities" for further information on the gross amount of securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral and the net amounts disclosed in the consolidated balance sheets.

VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDO/CLOs, CP conduits and financial intermediation.

► Refer to “Variable interest entities” in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2015 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

Collateralized debt obligations

The Group engages in CDO/CLO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

Commercial paper conduit

In 4Q15, the Group decided to stop issuing CP from an existing asset-backed CP conduit, Alpine Securitization Corp. (old Alpine), and all outstanding CP was fully repaid as of the end of 4Q15. As of the end of 3Q16 and 2Q16, old Alpine did not have any third-party assets.

In 2Q16, the Group established Alpine Securitization Ltd (Alpine), a multi-seller asset-backed CP conduit used for client and Group financing purposes. The Group acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. The CP conduit can enter into liquidity facilities with third-party entities pursuant to which it may purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support to the CP conduit in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as

administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

As of the end of 3Q16, Alpine’s outstanding CP had an overall average maturity of approximately 41 days. Alpine was rated A-1(sf) by Standard & Poor’s and P-1(sf) by Moody’s and had exposures in a reverse repurchase agreement, car loans, credit card receivables and servicer advance receivables.

The Group’s commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Group’s economic risks associated with the CP conduit are included in the Group’s risk management framework including counterparty, economic risk capital and scenario analysis.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 3Q16 and 4Q15.

Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory,

certain repurchase financings to funds and single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2015 for further information on non-consolidated VIEs.

29 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes);
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

▶ Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information on the Group's concentrations of credit risk.

FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

▶ Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information on fair value measurement of financial instruments and the definition of the levels of the fair value hierarchy.

Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 9M16, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers from trading assets were primarily in exchange traded derivatives and debt as prices became observable. The transfers from trading liabilities were primarily in exchange traded derivatives as prices became observable.

In 9M16, transfers out of level 1 to level 2 were primarily from trading assets and investment securities. The transfers from trading assets were primarily in debt and equity for which suitable closing prices were unobtainable as of the end of 9M16. The transfers from investment securities were in debt for which suitable closing prices were unobtainable as of the end of 9M16.

¹ For all transfers to level 3 or out of level 3, the Group determines and discloses as level 3 events only gains or losses through the last day of the reporting period.

² Includes unrealized losses recorded in trading revenues of CHF (88) million primarily related to subprime exposures in securitized products business and market movements across the wider loans held-for-sale portfolio.

Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

in	9M16			9M15		
	Trading revenues	Other revenues	Total revenues	Trading revenues	Other revenues	Total revenues
Gains and losses on assets and liabilities (CHF million)						
Net realized/unrealized gains/(losses) included in net revenues	(575)	(41)	(616)¹	1,533	(330)	1,203¹
Whereof:						
Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date	(239)	3	(236)	484	(7)	477

¹ Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

Transfers in and out of level 3

Transfers into level 3 assets during 9M16 were CHF 3,808 million, primarily from trading assets and loans. The transfers were primarily in the corporate credit, emerging markets and Asia Pacific businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 9M16 were CHF 5,970 million, primarily in trading assets, loans and loans held-for-sale. The transfers out of level 3 assets were primarily in the corporate credit, emerging markets and prime services businesses due to increased availability of pricing information and in Asia Pacific due to a refinement and more granular assessment of the leveling process.

Transfers into level 3 assets during 3Q16 were CHF 934 million, primarily from trading assets. The transfers were primarily in the corporate credit, securitized products and emerging markets businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 3Q16 were CHF 2,823 million, primarily in loans and trading assets. The transfers out of level 3 loans were primarily in the Asia Pacific financing business due to the refinement and more granular assessment of the leveling process. The transfers out of level 3 trading assets were primarily in the corporate credit business and in the Asia Pacific fixed income business due to increased availability of pricing information.

Qualitative disclosures of valuation techniques

Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information on the Group's valuation control framework.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables "Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. The significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

Debt securities

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price and correlation. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity, discount rate and credit spread. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own

assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple.

Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

The valuation of derivatives includes an adjustment for the cost of funding uncollateralized OTC derivatives.

Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility skew, prepayment rate, basis spread, gap risk and funding spread.

Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

Equity and index-related derivatives

Equity derivatives include a variety of products ranging from vanilla options and swaps to exotic structures with bespoke payoff profiles. The main inputs in the valuation of equity derivatives may include volatility, buyback probability, gap risk and correlation.

Generally, the interrelationship between the volatility and correlation is positively correlated.

Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread and correlation. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which

examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

Other investments

Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published NAVs as permitted by ASC Topic 820 – Fair Value Measurement. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not in line with the fund's observable market data, it is probable that the investment will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs. The investments for which the fair value is measured using the NAV practical expedient are not categorized within the fair value hierarchy.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a loan pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available. The fair value of the consolidated financial assets of RMBS and CMBS securitization vehicles, which qualify as CFEs, are measured on the basis of the more observable fair value of the VIEs financial liabilities.

Accrual based loans in the Group's private, corporate and institutional banking businesses, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted

discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcated and non-bifurcated) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buy-back probability, gap risk, correlation, volatility, credit spread, mean reversion and price.

Generally, the interrelationships between volatility, correlation, gap risk and credit spread inputs are positively correlated.

Other liabilities

Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of EBITDA multiple, market implied life expectancy (for life finance instruments), buyback probability, correlation, price, volatility, volatility skew or funding spread, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of market implied life expectancy (for life settlement and premium finance instruments), capitalization rate, discount rate, prepayment rate, gap risk, recovery rate or credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, in general, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input mean reversion would increase the fair value. An increase in the

significant unobservable input basis spread would decrease the fair value.

Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above results in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates to collateral with a greater risk of default.

Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

Volatility and volatility skew

Volatility and its skew are both impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility may vary significantly between different underlying currencies and expiration dates on the options. Similarly, in the case of equity derivatives, the volatility attributed to a structure may vary depending upon the underlying reference name on the derivative.

Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of the insured.

Price

Bond equivalent price is a primary significant unobservable input for multiple products. Where market prices are not available for an instrument, benchmarking may be utilized to identify comparable issues (same industry and similar product mixes) while adjustments are considered for differences in deal terms and performance.

Buyback probability

Buyback probability is the probability assigned to structured notes being unwound prior to their legal maturity.

Gap risk

Gap risk is the primary significant unobservable input for fund-linked Constant Proportion Portfolio Insurance products and structures where the payoff may be sensitive to discontinuity in the hedging portfolio.

Mean reversion

Mean reversion is the primary significant unobservable input for callable constant maturity swap (CMS) spread exotics and represents the idea that prices and returns eventually move back towards the historical average.

Funding spread

Funding spread is the primary significant unobservable input for special purpose vehicle funding facilities. Synthetic funding curves which represent the assets pledged as collateral are used to value structured financing transactions. The curves provide an estimate of where secured funding can be sourced and are expressed as a basis point spread in relation to the referenced benchmark rate.

Capitalization rate

Capitalization rate is the primary significant unobservable input for CMBS loans and is used to estimate the potential return on investment. This is done by dividing the yearly income by the total value of the property.

Basis spread

Basis spread is the primary significant unobservable input for non-callable constant maturity treasury-CMS products and is used to determine interest rate risk as a result of differing lending and borrowing rates.

EBITDA multiple

EBITDA multiple is a primary significant unobservable input for some equity deals which are benchmarked using industry comparables. The EBITDA multiple may be preferred over other measures because it is normalized for differences between the accounting policies of similar companies.

Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In

addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which is generally up to 10 years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

Fair value, unfunded commitments and term of redemption conditions

⁵ Includes CHF 169 million and CHF 464 million attributable to noncontrolling interests in 2Q16 and 4Q15, respectively.

⁶ Includes CHF 6 million and CHF 9 million attributable to noncontrolling interests in 2Q16 and 4Q15, respectively.

⁷ Includes CHF 55 million and CHF 176 million attributable to noncontrolling interests in 2Q16 and 4Q15, respectively.

Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use. Nonrecurring measurements are completed as of period's end unless otherwise stated.

of which level 2	0.3	0.1

FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in the investment banking businesses and International Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015 for further information on the Group's election of the fair value option for certain of its financial statement captions.

³ Primarily recognized in other revenues.

⁴ Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF 189 million and CHF 671 million in 9M15, respectively.

The following table provides additional information regarding the gains and losses attributable to changes in instrument-specific credit risk on fair value option elected liabilities which are recorded through AOCI. The table includes both the amount of change during the period and cumulatively that is attributable to the changes

in instrument-specific credit risk. In addition it includes the gains and losses related to instrument-specific credit risk that was previously recorded in AOCI that have been transferred during the period to net income.

30 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

Assets pledged

end of	3Q16	4Q15
Assets pledged (CHF million)		
Total assets pledged or assigned as collateral	124,745	137,330
of which encumbered	86,457	91,278

Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Collateral

end of	3Q16	4Q15
Collateral (CHF million)		
Fair value of collateral received with the right to sell or repledge	374,688	422,269
of which sold or repledged	162,970	186,132

31 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 39 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2015* and updated in subsequent quarterly reports (including those discussed below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably

estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings.

Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 39 referenced above and updated in quarterly reports (including below) for which the Group believes an estimate is possible is zero to CHF 2.6 billion.

In 3Q16, the Group recorded net litigation provisions of CHF 357 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

Mortgage-related matters

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

Individual investor actions

On July 28, 2016, following a settlement, the Texas state court presiding in the action brought by the Texas County and District Retirement System dismissed with prejudice all claims against Credit Suisse Securities (USA) LLC (CSS LLC). These claims related to an unstated amount of RMBS at issue.

On August 9, 2016, a stipulation of voluntary dismissal with prejudice was filed with the Washington state court, which was entered by the court on August 10, 2016, dismissing the action brought by the Federal Home Loan Bank of Seattle (FHLB Seattle) against CSS LLC and its affiliates, relating to approximately

USD 104 million of the RMBS at issue against CSS LLC and its affiliates. On August 30, 2016, FHLB Seattle appealed the Washington state court's August 10, 2016 final judgment and order of dismissal, seeking reversal of the court's May 4, 2016 order granting CSS LLC and its affiliates' motion for partial summary judgment, which reduced the RMBS at issue against CSS LLC and its affiliates in the FHLB Seattle action from approximately USD 249 million to approximately USD 104 million.

In September 2016, the Federal Home Loan Bank of San Francisco and CSS LLC and its affiliates reached a settlement in principle with respect to the claims against CSS LLC and its affiliates relating to RMBS at issue amounting to approximately USD 1.6 billion (approximately 17% of the USD 9.5 billion at issue against all defendants in the operative pleadings, reduced to reflect dismissal of actions relating to certain certificates). On September 26, 2016, the California state court presiding over these actions removed the trial scheduled to begin on October 11, 2016 from the calendar.

Bank loan litigation

On July 27, 2016, the US District Court for the District of Idaho granted the defendants' motions for summary judgment in the case brought by certain current or former homeowners in four real estate developments, dismissing the case with prejudice. The plaintiffs have filed notices of appeal.

On September 29, 2016, the Bank affiliates and the entity related to Highland Capital Management LP both filed appellate opening briefs in the Texas Fifth Court of Appeals in Dallas.

Rates-related matters

On August 16, 2016, Credit Suisse Group AG and Credit Suisse AG, along with other financial institutions, were named in a putative class action brought in the US District Court for the Southern District of New York (SDNY), alleging manipulation of the Bank Bill Swap Reference Rate.

On August 23, 2016, the SDNY dismissed a putative class action brought against Credit Suisse AG and CSS LLC, along with other financial institutions, alleging that the defendants conspired to manipulate certain foreign exchange rates in violation of the US Employee Retirement Income Security Act of 1974. On September 22, 2016, plaintiffs filed an appeal of that decision.

On September 20, 2016, the SDNY granted in part and denied in part a motion to dismiss filed by defendants, including Credit Suisse Group AG, Credit Suisse AG, and CSS LLC, in the consolidated action relating to the alleged manipulation of foreign exchange rates. The decision reduced the size of the putative class, but allowed the primary antitrust and Commodity Exchange Act claims to survive.

On September 26, 2016, Credit Suisse Group AG and affiliates, as well as other financial institutions, were named in a putative class action filed in the SDNY alleging manipulation of the foreign exchange market on behalf of indirect purchasers of foreign exchange instruments.

CDS-related matters

As previously disclosed, a Credit Suisse entity has received civil investigative demands from the United States Department of Justice relating to competition in credit derivatives trading, processing, clearing and information services. By a letter dated September 15, 2016, the United States Department of Justice notified Credit Suisse that it has closed its investigation.

Net new assets-related matters

On October 5, 2016, the SEC announced a settlement pursuant to which Credit Suisse agreed to pay USD 90 million and admitted that it did not adequately disclose certain practices related to the recognition of net new assets during the period from 4Q11 until 4Q12.

ATA litigation

A number of banks, including Credit Suisse AG, have been named in a lawsuit alleging claims under the United States Anti-Terrorism Act (ATA). On September 14, 2016, Credit Suisse AG and the other defendants filed motions to dismiss the plaintiffs' second amended complaint in the US District Court for the Eastern District of New York.

Italian Investigation

Credit Suisse AG has resolved a previously-disclosed Italian investigation into alleged tax and money laundering issues through agreements to pay an administrative tax penalty and an administrative sanction. The premise of the alleged tax liability was failure to make required disclosures regarding the activities of Italian clients, and Credit Suisse AG agreed to pay a EUR 18 million administrative tax penalty to resolve these claims. As discussed in "Note 23 – Tax", Credit Suisse AG is also making a tax payment of EUR 83 million comprising EUR 70 million of income tax, associated penalties and interest, on revenue associated with this matter, and EUR 13 million relating to tax and interest on an unrelated Italian tax matter. The premise of the alleged administrative liability was the inadequacy of historical internal controls, and Credit Suisse AG has entered an agreement under Article 63 of Italian Administrative Law 231 to pay EUR 8 million in disgorgement of profits and a EUR 1 million administrative sanction. This agreement under Law 231 is subject to judicial ratification, which is expected in early 2017. No admission of wrongdoing was required in connection with either agreement.

32 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group Funding (Guernsey) Limited, which is a Guernsey incorporated non-cellular company limited by shares, have issued securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law for the Guernsey subsidiary, applicable to some of the Group's subsidiaries that may limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make

any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

As part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and US Federal Reserve regulation on establishing Intermediate Holding Companies in the US for non-US banks, legal entities are re-parented as subsidiaries of Credit Suisse (USA), Inc. Prior periods are restated to conform to the current presentation to reflect the impact of such transactions.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2016 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;

- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2015.

CREDIT SUISSE ANNUAL REPORTING SUITE

Our 2015 annual publication suite consisting of Annual Report and Corporate Responsibility Report, which also contains the Company Profile, is available on our website www.credit-suisse.com/investors.
