Preamble

Corporate governance

Together with the Articles of Association, the Code of Conduct, the BoD and Committee Charters, and the Compensation Policy, the OGR defines the corporate governance guidelines of the Group. These form the basis for effective and efficient corporate governance of the Group.

Group

The Group consists of CSG and all its direct and indirect subsidiaries, which together form one economic unit.

CSG

CSG is a holding company domiciled in Zurich, Switzerland. Its statutory purpose is to hold direct or indirect interest in all types of businesses in Switzerland and abroad, in particular in the areas of banking, finance, asset management and insurance. CSG sets standards for the Group to allow for an efficient and harmonized steering of the Group.

Governance principles

The governance of the Group is based on the principles of an integrated oversight and management structure with global scope. Corporate bodies and officers are, subject to applicable local laws, regulations and best practice standards, bound to ensure transparency and collaboration throughout the Group, in particular through the appropriate flow of information and cooperation within and across all businesses and organizational structures. In addition, it is an important principle that conflicting interests shall, to the extent possible, be avoided, disclosed and aligned.

Business

The Group is engaged in the banking business, which is primarily performed through CS and its major subsidiaries (Credit Suisse (Schweiz) AG, Credit Suisse International/Credit Suisse Securities (Europe) Limited, Credit Suisse Holdings (USA), Inc.). CS is domiciled in Zurich, Switzerland. The statutory purpose is the operation of a bank, and its scope of operations extends to all types of banking, financial, advisory, service, and trading activities in Switzerland and abroad. CS and its subsidiaries are provided with infrastructure and other services through the service company Credit Suisse Services AG, Switzerland.

Divisions

The Group is structured into four Divisions – Swiss Universal Bank; APAC; International Wealth Management; and Investment Banking – and Corporate Functions, which provide products, infrastructure and services to the Divisions, as well as perform control activities independent from the Divisions. The Divisions coordinate their business activities in collaboration with the Corporate Functions where appropriate.

Swiss Universal Bank

The Swiss Universal Bank provides a full banking platform primarily to Swiss-domiciled high net worth, ultra high net worth, retail, corporate and institutional clients.

APAC

APAC provides private and investment banking capabilities to clients in Asia Pacific to serve wealth management, corporate and institutional clients.

International Wealth Management

International Wealth Management provides (1) private and wealth management capabilities to clients in Western and Eastern Europe, Latin America, the Middle East and Africa and (2) global asset management products and services to clients globally.

I. Introduction

1. Scope and content

- 1.1 The OGR establishes the duties and responsibilities of the BoD and its committees, the Chairman, the CEO, the ExB, and the ExB committees, as well as certain executive functions of the Group. It further establishes the duties and responsibilities of the Corporate Functions, the Divisional CEOs, the Divisional MCs, and Internal Audit.
- 1.2 The OGR and its regulations shall be applicable to CSG and CS. As long as the BoD and ExB of CSG and CS are mainly composed of the same persons, the meetings of the BoD respectively ExB shall be held for both companies simultaneously and with the same agenda, and the minutes of these meetings shall reflect the decisions taken for both companies, except for specific items which are different for each company (e.g. statutory financial statements, preparation of shareholder meetings). The same principle applies to the activities and meetings of the BoD committees.
- 1.3 To the extent permitted by local law and regulatory guidelines, the organizational regulations of the other direct and indirect subsidiaries and other enterprises owned or controlled by CSG shall reflect the same principles and rules as stated in this OGR.
- 1.4 CSG controls directly or indirectly all of its subsidiaries and sets standards for the Group to allow for an efficient and harmonized steering of the Group. Notwithstanding this, the legal independence of all subsidiaries and the provisions of applicable local laws, rules and regulations relating to them must be observed to the extent legally required. Each subsidiary may establish additional separate regulations to regulate business specific to such entity.
- 1.5 Governance bodies and officers are, subject to applicable local laws, rules and regulations, bound to ensure transparency and collaboration within the Group. Governance bodies and officers may have multiple responsibilities and reporting lines within the Group.
- 1.6 The responsibilities and authorities set out in these regulations including the annexes may only be delegated if expressly permitted herein or with the explicit approval or ratification by the BoD for a specific transaction or activity.
- 1.7 Notwithstanding any delegation of authority or approval process provided for in these regulations, no person shall participate in the approval, execution or implementation of any transaction (including the opening, closing or managing of a client's account) or otherwise have any responsibility for or role in the execution or implementation of any such transaction, if such participation, responsibility or role would cause such person or any entity within the Group to violate any law or regulation to which such person or entity is subject.
- 1.8 CSG may allocate full management responsibility over its directly held subsidiaries to CS. The ExB shall decide to which extent they shall be integrated in CS's management processes.

2. Approval procedures for urgent business matters

- 2.1 Should immediate action be required to ensure the conclusion of an urgent business matter, which lies in the authority of the BoD, provided that the BoD is not in a position to act in time (e.g. lack of a quorum) and there is no clear indication that the BoD would not approve the respective proposal, the matter may as an exception be approved by the Chairman. To the extent possible, available BoD members shall be consulted.
- 2.2 Should immediate action be required to ensure the conclusion of an urgent business matter which lies in the authority of a particular body or executive function, provided that the authorized body or executive function is not in a position to act in time and there is no clear indication that the business matter contains excessive risks or the authorized body or executive function would not approve the respective business matter, and there are no other instructions from the CEO or the responsible ExB member, the respective business matter may as an exception be approved by the body or executive function one level below the authorized body or executive function. In any event, the CEO or the responsible ExB member, to the extent possible, must be consulted.

Annex A – Approval authorities

I. Authority for credit transactions and credit limits

1. General provisions

- 1.1 The management of credit risk is a joint responsibility between the Divisions and CRM. The ultimate credit risk decision generally lies with the Division, with CRM intervention being necessary in cases of material impacts on global portfolio limits. After credit assessment and endorsement by the respective front management, all credit exposures require approval under the authorities designated by the CRCO, the Chief Credit Officer and Divisional CROs (subject to the provisions set out below). CRM can delegate authorities for the approval of credit transactions with fully standardized approval procedures to defined individuals from the front organization.
- 1.2 The CRCO establishes and approves the Global Credit Risk Policy. The Chief Credit Officer – in consultation with the CRCO – details the Global Credit Policy further by establishing divisional sub-policies.
- 1.3 All loans and other credit limits must be approved and documented and periodically reviewed in an independent credit review process in accordance with the policies set forth by the Chief Credit Officer.
- 1.4 The total credit limit for a client, or in the case of client groups, the aggregate of all total credit limits or transactions is relevant for the determination of the approval authority. This does not apply to credit transactions for which the CRM sets up fully standardized procedures for approval by representatives of the relevant front organization.

2. Approval authorities

- 2.1 The Chief Credit Officer has approval authority up to USD 3bn. Credit limits and underwritings exceeding this threshold are to be approved by the CRCO.
- 2.2 The Divisional CROs have approval authority up to USD 2bn for investment grade and USD 1.5bn for non-investment grade.
- 2.3 Upon consultation with the CRCO, the Chief Credit Officer shall establish a policy outlining the approval limits to be delegated to credit specialists, special managing bodies within CRM or defined representatives of the front organization. The maximum limit to be delegated may not exceed USD 2bn in aggregate. The policy shall also regulate the approval authorities establishing provision on credit positions, other actions in connection with credit recovery situation, temporary limit excesses and account overdrafts.
- 2.4 Upon consultation with the Chief Credit Officer, the Divisional CROs shall establish a policy outlining the approval limits to be delegated to credit specialists in their respective Divisions.
- 2.5 Any transaction which results in a counterparty exposure exceeding 25% of the available CET1 capital is subject to review by the CFO.

- 2.6 The anticipated hold level for underwritings is generally to be achieved within 90 days but may vary depending on the nature of the transaction. During a prescribed period, underwriting positions may be exempt from certain limits if approved by the CARMC or its delegates.
- 2.7 The RC may temporarily approve higher approval authorities.
- 2.8 Subject to the endorsement by the CRCO, the Divisional CROs shall establish, in accordance with OGR section 2.2, the authority for approving urgent credit transactions for their respective Divisions.

- 3.1.2 Approval of country limits by the BoD is to be given upon the recommendation of the RC.
- 3.1.3 An overall Group Reserve may be established and is governed by the PCR CARMC, which may further sub-delegate the authority.

- 4.3 The CRCO may approve temporary excesses of any trading risk and position limit up to a maximum of 10% until the next CARMC meeting, with immediate notice to the CEO, and with information to the CARMC and the BoD at its next meeting.
- 4.4 The CRCO signs off on the incremental risk associated with excesses of CARMC limits and approves the remediation plan with immediate notice to the CEO and subsequent information to the CARMC and the BoD at the next opportunity.
