

GRI Content Index¹

Credit Suisse used the GRI G3 Guidelines and the Financial Services Sector Supplement in the development of its corporate responsibility reporting. The index was the basis for the table below, and refers to information in our Corporate Responsibility Report 2010, our Annual Report 2010, our Code of Conduct and our website (www.credit-suisse.com/responsibility).

Indicator	Link
1 Strategy and analysis	
1.1	Statement CEO and Chairman CRR 2-3
1.2	Key impacts, risks and opportunities Internet
2 Organizational profile	
2.1	Name of the reporting organization Internet
2.2	Brands, products and services Internet
2.3	Operational structure AR 33-34
2.4	Location of headquarters AR 14-15
2.5	Countries of operation AR 13-15
2.6	Nature of ownership AR 149-152
2.7	Markets served AR 14-15
2.8	Scale of the organization AR (front insight flap)
2.9	Significant changes AR 3-5
2.10	Awards received CRR 9-10,16, 31-37,40
3 Report parameters	
3.1	Reporting period CRR 6
3.2	Date of most recent previous report Internet
3.3	Reporting cycle Internet
3.4	Contact point on the report CRR 54
3.5	Defining report content CRR 4-7
3.6	Boundary of the report CRR 4-7 AR 6-9
3.7	Limitations on report scope or boundary CRR 4-7
3.8	Reporting on other entities CRR (front inside flap)
3.9	Data measurement techniques Internet
3.10	Explanation of re-statements CRR 2-7
3.11	Changes from previous report CRR 2-3
3.12	Table on standard disclosures Internet
3.13	External assurance *
4 Governance, commitments and engagement	
Governance	
4.1	Governance structure Internet
4.2	Chairperson and CEO AR 159, 170
4.3	Independency of board members AR 155-156
4.4	Shareholders and employee representation AR 149-152

n.r.	Performance indicator not relevant or not applicable for financial services providers
*	See explanations below

¹ GRI Content Index: list of Global Reporting Initiative (GRI) performance indicators. The indicators listed on page 1 are abbreviated versions of the disclosure texts; the full list of the disclosure texts is available in the GRI G3 Guidelines as well as in the Financial Services Sector Supplement. The GRI G3 Guidelines and the Financial Services Sector Supplement serve as an index for the standardization of sustainability reporting (see also: www.globalreporting.org).

Explanations of individual indicators

3.13	Internal processes relating to the Environmental Management System are examined by the external certification company SGS each year as part of the auditing of the Environmental Management System according to ISO 14001. The methodology for greenhouse gas calculations was critically reviewed by Pré Consultants, Amersfoort, NL, an external, independent expert in ecobalancing methodology and software.
4.15	Credit Suisse selects the stakeholder groups with which it should engage by analyzing the relevant economic, environmental and social factors.
EC 6	"We are committed to dealing fairly and in good faith with contractors, suppliers and joint venture partners." (Credit Suisse Group, Code of Conduct)
EC 7	Partially reported.
EN 2	The share of recycled paper in Switzerland is 2.2 %. In order to reduce its environmental footprint, Credit Suisse focuses on increasing the share of FSC-certified (Forest Stewardship Council) paper. In 2010, the FSC share was 48% globally, and 69% in Switzerland.
EN 8	The global water consumption in the 850 Credit Suisse office buildings was approximately 1.9 million cubic meters in 2010 and was drawn 99% from local municipal utility companies. In region Switzerland, we use rainwater for gardening purposes at our Zurich Uetlihof building (the largest Credit Suisse building worldwide). For cooling purposes, we use lakewater in Zug and river water from the Rhone River in Geneva.
EN 11	Credit Suisse's largest offices are located in cities such as Zurich, London, New York, Singapore, Hong Kong, Tokyo and São Paulo. Credit Suisse has limited direct impacts on local biodiversity through its own internal operations and those impacts do not affect any protected areas. Credit Suisse has areas close to its headquarters in Zurich (Uetlihof) and Horgen (Bocken) which have been awarded the quality label "Naturpark der Schweizer Wirtschaft" (see also Stiftung Natur und Wirtschaft, www.naturundwirtschaft.ch), as they have been designed and are maintained in harmony with nature.
EN 12	Credit Suisse only has limited direct impacts on local biodiversity through its own internal operations. Those impacts do not affect any protected areas. For the integration of environmental aspects into our risk management process, please see Corporate Responsibility Report 2010, p.12-15.
EN 19	As a global financial services provider, Credit Suisse reports on the emissions that are relevant and material to its operations: greenhouse gas equivalents and total energy consumption. However, Credit Suisse is currently testing in a simulation the potential amount of other air emissions; based on the findings, Credit Suisse will consider reporting on this data in the future.
EN 20	As a global financial services provider, Credit Suisse reports on the emissions that are relevant and material to its operations: greenhouse gas equivalents and total energy consumption. However, Credit Suisse is currently testing in a simulation the potential amount of other air emissions; based on the findings, Credit Suisse will consider reporting on this data in the future.
EN 21	The annual water consumption of Credit Suisse of 1.9 million cubic meters is considered as household wastewater and treated in municipal sewage purification plants. From our carbon footprint calculations, we estimate that the energy used in the purification plants results in greenhouse gas emissions (CO2 equivalents) of approximately 650 tons per annum.
EN 23	As a global financial services provider, Credit Suisse does not directly generate significant spills.
EN 27	Credit Suisse does not report on this indicator, since its disclosure is only material for companies with physical products.
EN 28	No sanctions for non-compliance with environmental laws and regulations were imposed.

LA1	Partially reported; part-time work differs nationally and regionally, as does employment contract. These are governed by local legal requirements. Consequently it is difficult to aggregate on a global level.
LA2	Partially reported; the global voluntary turnover rate for 2010 was 8.6%.
LA 5	The representation of employee interests vis-à-vis management is the responsibility of the Staff Council in Switzerland and the European Works Council at a pan-European level. If restructuring and redundancies are unavoidable, Credit Suisse tries to implement these measures in a responsible, fair and consistent manner, taking the individual circumstances of the affected employees into consideration. We offer employees time, tools and professional support. In certain regions, focus is placed on providing individual support and personal advice to help the employees start a new career.
LA7	Partially reported; regarding fatalities and work-related injuries, due to the nature of Credit Suisse's business as a global financial services provider, the amount of data is insignificant. Regarding absenteeism, the definition of lost days and absenteeism differs nationally and is governed by local legal requirements. Consequently it cannot be aggregated on a global level.
LA8	Credit Suisse takes measures that are reasonably practicable, and in line with applicable legislation, to protect the health of employees and ensure their safety while they are at work. To promote the health and well-being of staff, Credit Suisse provides a wide array of attractive and comprehensive programs and activities related to exercise, nutrition and relaxation (see also Corporate Responsibility Report 2010, p. 34-35).
LA10	Partially reported; according to the Credit Suisse Business School Annual Report 2010, each employee received an average of 14.3 training hours. In addition to this, each employee participated in an average of 9 e-learning courses, including mandatory modules.
LA14	Not reported due to bank-specific regulatory limitations and internal guidelines.
SO3	Credit Suisse has a comprehensive training program on anti-corruption policies and procedures that incorporates new hire training, annual employee training, dedicated e-learning modules, as well as targeted in-person training for high-risk business areas and senior management within the bank. Credit Suisse plans on issuing an additional e-learning course on anti-corruption issues in 2011.
SO4	Partially reported.
PR 1	Credit Suisse does not report on this indicator, since its disclosure is only material for companies with physical products.
FS 9	Audits related to the implementation of policies in the area of sustainability and sustainability risk management are regularly carried out by Credit Suisse's internal audit function and the respective regulatory bodies.
FS 12	Credit Suisse seeks to act in the interest of the beneficial owners of shares in a fund; in the event of annual general meetings it therefore assesses the impact of the shareholder vote on the interests of the share owners and exercises its voting right on substantial matters, including potential environmental and social topics.

Statement GRI Application Level Check

GRI hereby states that **Credit Suisse** has presented its report "Credit Suisse GRI Content Index" (2010) to GRI's Report Services which have concluded that the report fulfills the requirement of Application Level B.

GRI Application Levels communicate the extent to which the content of the G3 Guidelines has been used in the submitted sustainability reporting. The Check confirms that the required set and number of disclosures for that Application Level have been addressed in the reporting and that the GRI Content Index demonstrates a valid representation of the required disclosures, as described in the GRI G3 Guidelines.

Application Levels do not provide an opinion on the sustainability performance of the reporter nor the quality of the information in the report.

Amsterdam, 27 May 2011

A handwritten signature in blue ink, appearing to be "N. Arbex", is written over a light blue circular watermark of the GRI logo.

Nelmara Arbex
Deputy Chief Executive
Global Reporting Initiative

The Global Reporting Initiative (GRI) is a network-based organization that has pioneered the development of the world's most widely used sustainability reporting framework and is committed to its continuous improvement and application worldwide. The GRI Guidelines set out the principles and indicators that organizations can use to measure and report their economic, environmental, and social performance. www.globalreporting.org

Disclaimer: Where the relevant sustainability reporting includes external links, including to audio visual material, this statement only concerns material submitted to GRI at the time of the Check on 17 November 2010. GRI explicitly excludes the statement being applied to any later changes to such material.
