Form 6-K

**REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16
UNDER THE SECURITIES EXCHANGE ACT OF 1934**

February 12, 2010

Commission File Number 001-33434

CREDIT SUISSE AG

(Translation of registrant's name into English)

Paradeplatz 8, P.O. Box 1, CH-8070 Zurich, Switzerland
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F

Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes

No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

Introduction

This report filed on Form 6-K contains certain information about Credit Suisse AG to be incorporated by reference in the Registration Statement on Form F-3 (file no. 333-158199). Credit Suisse Group AG's financial report for the fourth quarter of 2009 (Credit Suisse Financial Report 4Q09) is attached as an exhibit to this Form 6-K and was filed with the US Securities and Exchange Commission (SEC) on February 12, 2010. The Bank is incorporating by reference the Credit Suisse Financial Report 4Q09 (except for the sections entitled "Dear shareholders" and "Investor Information").

Unless the context otherwise requires, reference herein to "Credit Suisse Group", "Credit Suisse", "the Group", "we", "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries and the term "the Bank" means Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

The Bank, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. The Bank's registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to "CHF" are to Swiss francs.

The Credit Suisse Financial Report 4Q09 contains financial information for the three months and the year ended December 31, 2009. The Group's and the Bank's independent registered public accounting firm has not completed its audit of the consolidated financial statements for the year ended December 31, 2009 and the Group and the Bank have not finalized their Annual Report on Form 20-F for the period. Accordingly, such financial information is subject to completion of year-end audit procedures which may result in changes to that information.

Management has not yet completed its assessment of the Group's the Bank's internal control over financial reporting for the year ended December 31, 2009, and the independent registered public accounting firm has not yet completed its attestation of management's assessment. In connection with the filing of the Group's and the Bank's Annual Report on Form 20-F for the year ended December 31, 2009, the Group and the Bank will provide management's annual report on internal control over financial reporting and the registered public accounting firm's attestation thereon, which have not yet been finalized.

Forward-Looking Statements

This Form 6-K and the information incorporated by reference in this Form 6-K include statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Group's and the Bank's annual report on Form 20-F for the year ended December 31, 2008 (the Credit Suisse 2008 20-F), and subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC and the Group's and the Bank's reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Private Banking, Investment Banking and Asset Management segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the three segments, however, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Clariden Leu, Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking. Core Results also includes certain Group corporate center activities that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

Differences between the Group and the Bank businesses

Entity	Principal business activity
Clariden Leu	Banking and securities
Neue Aargauer Bank	Banking (in the Swiss canton of Aargau)
BANK-now	Private credit and car leasing (in Switzerland)
Financing vehicles of the Group	Special purpose vehicles for various funding activities of the Group, including for purposes of raising consolidated capital

Dear shareholders

Hans-Ulrich Doerig, Chairman of the Board of Directors (left)
Brady W. Dougan, Chief Executive Officer (right)

Our environment and the way we do business have changed fundamentally over the past two years. Credit Suisse responded swiftly and responsibly to these changes with the implementation of a client-focused, capital-efficient strategy and a business model that enables us to generate less volatile earnings. As a result, we were able to achieve a strong performance in 2009, with net income of CHF 6.7 billion, a return on equity of 18.3% and net new assets of over CHF 44 billion. We also gained significant market share and maintained our industry-leading capital position: our tier 1 ratio was 16.3% as of the end of 2009.

Our business was resilient in the fourth quarter despite lower client trading activity in November and December. We recorded net income of CHF 0.8 billion, a return on equity of 8.3% and net new assets of CHF 12.5 billion.

Our fourth-quarter results include net fair value charges on Credit Suisse debt of CHF 0.3 billion (before tax) resulting from tightening credit spreads, and the additional CHF 0.5 billion (before tax) charge for the settlement with the US authorities relating to an investigation into US dollar payments and other practices involving parties that are subject to US economic sanctions. Excluding these items, after-tax net income would have been CHF 1.4 billion and the return on equity would have been 14.6%.

Performance of our businesses

In a market that is undergoing significant structural changes, our Private Banking business has outperformed. Net inflows were strong across most businesses and amounted to CHF 12.0 billion excluding net client outflows of CHF 5.6 bil-

lion relating to a tax amnesty in Italy. This resulted in net new assets of CHF 6.4 billion in Private Banking in the fourth quarter. In our Wealth Management Clients business we recorded a strong gross margin of 130 basis points in the fourth quarter. Wealth management remains a very attractive growth market. Having invested in our Private Banking business throughout the financial crisis, we now have the operating leverage to further improve our profitability when markets and the demand for comprehensive solutions recover. Furthermore, our international presence and our integrated business model put us in a very good position to grow our business and to gain further market share.

In Investment Banking, we continue to benefit from the action we took at the end of 2008 to reposition the business in a changed financial services sector. We achieved strong results in our underwriting and advisory businesses and solid results in cash equities and prime services in the fourth quarter of 2009. We also maintained or increased our market share across most products and regions. We are pleased with our record full-year pre-tax income and net revenues.

Our strategic measures in Asset Management have put us on the right track. We are particularly encouraged by our good net new assets of CHF 4.1 billion, improved operating performance and solid net revenues in the fourth quarter.

Our clients continue to benefit from our breadth of expertise and integrated approach to providing solutions. We generated CHF 5.2 billion in collaboration revenues from the integrated bank in 2009, including a record CHF 1.6 billion in the fourth quarter.

Our business in Switzerland continues to make a strong and stable contribution to our overall result. It accounted for CHF 11.8 billion of the CHF 41.6 billion in net new assets we generated in Private Banking in 2009. We will continue to invest in our home market as well as in our international expansion.

Our responsibilities – in the industry and towards society

As part of our commitment to play a responsible role in supporting an economic recovery, we have helped clients to invest in growth and to successfully manage difficult restructuring and liquidity situations. We are an important and committed lender to clients, demonstrated by the fact that we have maintained our lending in Switzerland at CHF 136.7 billion. We also remain actively engaged in discussions with regulators to foster a globally coordinated approach to regulation in an effort to build a more robust financial system, which is essential to economic growth.

As well as acting responsibly in the area of banking and maintaining a close dialog with our stakeholders, we have an important responsibility to our employees, to the environment and to society. For example, as one of Switzerland's largest

employers and providers of training, we have a duty to enhance the country's position as a center of expertise and to promote entrepreneurship. We are taking long-term initiatives with this in mind: we plan to create a further 150 apprenticeships in Switzerland and to invest CHF 30 million over the next five years in training programs run by non-profit organizations that help young people to find an apprenticeship and enter the job market. In addition, in conjunction with the Swiss Venture Club, we will provide up to CHF 100 million of risk capital to small and medium-sized enterprises and young entrepreneurs, primarily to promote the creation of jobs in Switzerland. And as part of a program launched by the Swiss IT and communication technology umbrella association, we plan to invest up to CHF 10 million in promoting professional education in the IT sector. The program aims to create over 1,000 new IT apprenticeships in Switzerland by 2015. We believe that this investment in jobs and growth is in the interest of our shareholders.

In addition, through our education initiative we have helped to improve access to schooling for children and young people worldwide, while through our Disaster Relief Fund we have provided assistance to those affected by major catastrophes, including the recent earthquake in Haiti. In view of the emergency situation in Haiti, Credit Suisse made a USD 1 million donation to relief efforts, which was divided between the American and Swiss Red Cross societies. We also launched a global fundraising campaign among our employees. So far, our employees have donated over USD 1 million and our Disaster Relief Fund has matched all employee donations on a 2:1 basis. In total, including our initial donation, we have provided over USD 4 million to our Red Cross partners. We continue to evaluate relief needs on an ongoing basis and to explore ways to provide further effective support.

We recognize the need for institutions in our industry to change the way people are rewarded and incentivized. We have been using deferred, share-based compensation instruments for many years and in 2009 we were the first institution to announce the adoption of the guidelines for best practice that followed the G-20 summit. We implemented a new compensation structure that reaffirms Credit Suisse's commitment to fair, balanced and performance-oriented compensation policies.

In line with this approach, members of the Executive Board at December 31, 2009 received no variable cash compensation for 2009 and all variable compensation they received for 2009 was in the form of deferred awards and subject to performance criteria, which may result in future negative adjustments. Total variable compensation for 2009 was down 21% compared to 2007 and average variable compensation was CHF 144,000, down from CHF 180,000 for 2007. Of the total variable compensation awarded across Credit Suisse for 2009, 40% was in the form of deferred awards and subject to

performance criteria, which may result in future negative adjustments. Furthermore, close to 60% of the variable compensation awarded to managing directors for 2009 was in the form of deferred awards and subject to performance criteria, which may result in future negative adjustments. In Investment Banking, our compensation to revenue ratio in the full year 2009 was at the historically low level of 41%. Overall, we have tried to strike the right balance between paying our employees competitively, doing what is right for our shareholders and responding appropriately to regulatory initiatives as well as political and public concerns. We will continue to take a responsible approach to compensation.

Credit Suisse is committed to the highest standards of integrity and regulatory compliance. As mentioned above, in the fourth quarter we reached a settlement with the US authorities relating to an investigation into US dollar payments and other practices involving parties that are subject to US economic sanctions. We take this issue extremely seriously. We have enhanced our procedures and are taking action internally to highlight that such incidents will not be tolerated. We are confident that our control framework remains sound and enables us to remain a trusted financial partner to our clients.

Outlook

We began at a very early stage to equip our business for the challenges of the new environment. During the last 18 months, in addition to successfully implementing a client-focused, capital-efficient strategy, we exited most of our proprietary trading businesses and took decisive action to meet regulatory requirements for capital and leverage. Thanks to our forward-looking approach, we entered this period of unprecedented industry change already in a robust position, having made considerable progress on our plans. We believe that Credit Suisse is well positioned to succeed in the face of the regulatory initiatives that are currently being discussed.

We have had a strong start to the quarter with strong client activity. Our transaction pipelines and net new asset inflows are the best we have seen since the crisis.

We are confident about our prospects for 2010 given the strength of our business model, our competitive position and our ability to generate capital. The Board of Directors will propose a cash dividend of CHF 2.00 per share for 2009.

Yours sincerely

Hans-Ulrich Doerig

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

In various tables, use of "-" indicates not meaningful or not applicable.

Credit Suisse at a glance

Credit Suisse

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients and high-net-worth individuals worldwide, as well as to retail clients in Switzerland. We serve our diverse clients through our three divisions, which cooperate closely to provide holistic financial solutions based on innovative products and specially tailored advice. Founded in 1856, we have a truly global reach today, with operations in over 50 countries and 47,600 employees from approximately 100 different nations.

Private Banking

In Private Banking, we offer comprehensive advice and a broad range of wealth management solutions, including pension planning, life insurance products, tax planning and wealth and inheritance advice, which are tailored to the needs of high-net-worth and ultra-high-net-worth individuals worldwide. We supply banking products and services to individual clients, including affluent, high-net-worth and ultra-high-net-worth clients, and corporates and institutions in Switzerland.

Investment Banking

In Investment Banking, we offer investment banking and securities products and services to corporate, institutional and government clients around the world. Our products and services include debt and equity underwriting, sales and trading, mergers and acquisitions advice, divestitures, corporate sales, restructuring and investment research.

Asset Management

In Asset Management, we offer integrated investment solutions and services to institutions, governments and private clients. We provide access to a wide range of investment classes, building on our global strengths in alternative investments and traditional investment strategies.

18 Key performance indicators

Operating environment

The economic recovery continued in 4Q09, but there were signs that economic growth began to moderate. Ratings downgrades of various sovereigns led to some concerns about the ability of governments to repay high levels of public debt. The financial sector was impacted by early year end profit-taking after strong gains from the 1Q09 low.

Economic environment

In 4Q09, the global economic recovery continued, but there were signs that economic growth began to moderate. Growth in industrial production eased to more sustainable levels, and leading indicators showed signs of stabilization. After companies reduced inventories sharply during the recession, they started to rebuild in 4Q09, providing a temporary boost to production. Divergences among countries and regions became more pronounced in reported 3Q09 gross domestic product (GDP) figures. While several countries emerged from recession (Switzerland, the US) and others continued their recovery (China, India, Brazil), output in some countries continued to contract (Spain). The repercussions of the global recession on public finances had major effects on the financial markets of some smaller countries, in particular those running significant

budget deficits. In late November, a government-owned investment company in Dubai asked creditors for a standstill agreement to extend the maturities of all debt repayments until May 2010, roiling financial markets globally.

Inflation increased modestly, mainly due to base effects from last year's sharp fall in energy prices, but core inflation remained contained in most countries. Differences in economic performance were reflected in monetary policy. Central banks in Australia and Norway, commodity-driven economies that only experienced mild recessions, began to raise interest rates. In some emerging markets that had maintained high interest rates, or even raised them during the crisis in order to prevent a sharp depreciation of their currencies, central banks lowered benchmark rates (Turkey, Hungary). While most major central banks continued to signal that interest rates will remain unchanged in the near term, they started to gradually reduce

Yield curves

Low central bank rates kept yields low especially for shorter maturities.

Equity markets

Emerging markets benefited most from the economic recovery. Volatility was lower.

some of their extraordinary intervention. In late September, the US Federal Reserve (Fed) announced it would slow down the pace of mortgage debt purchases, the Bank of England (BoE) reduced its volume of gilt purchases from GBP 50 billion to GBP 25 billion and the European Central Bank (ECB) announced the phase-out of its one-year and six-month repo operations.

Money markets

Ted spreads remained at very low levels in 4Q09.

Euro and Swiss franc bond yields moved in a narrow band in 4Q09. US dollar bond yields increased, in particular for long tenors, due to better than expected US economic data (refer to the charts "Yield curves"). Yields on Greek government bonds rose sharply after Fitch cut its rating on Greece in early December for the second time in two months, and the EU increased pressure on Greece to reduce its very high budget deficit.

Emerging markets showed much greater growth potential than developed markets, reflecting the robust finances of most regional emerging market economies. As a result, emerging markets equities produced average returns above 5% in 4Q09, outperforming equities in developed markets. Volatility normalized in 4Q09, with temporary spikes related to news such as Dubai's debt restructuring (refer to the charts "Equity markets").

The US dollar continued to depreciate in October and November, reaching new lows against the euro and the Swiss franc, but appreciated toward the end of 4Q09. The initial US dollar weakness was the result of a continued lack of interest rate support for the US dollar, reflecting high financing needs due to the budget and current account deficits. The euro also benefited from central bank reserves diversification from US dollars into euros. The drivers for the strengthening of the US dollar in December were stronger macroeconomic data, which led to market expectations that US interest rates would rise earlier, and the scaling back of short US dollar positions as the year end approached.

In 4Q09, commodity prices were somewhat higher, driven by strong gains in the agricultural and metal markets. In many commodity markets, supply and demand balances started to tighten along with the recovery in global economic growth, pushing prices higher. After the lackluster performance of agricultural commodities markets during 3Q09, prices picked up, driven by downward revisions in supply projections. Base metal prices continued their upward trend, despite declining import demand from China and rising exchange warehouse inventories, as expectations of improving demand outside China pushed industrial metal prices higher. Precious metals prices mainly benefited from strong investment demand along with declining real interest rates and a weakening US dollar. Central bank purchases also supported gold prices. Energy sector commodities underperformed during 4Q09.

Sector environment

Profit taking and year-end positioning in 4Q09 resulted in relative underperformance of the sector versus the market (refer to the charts “Equity markets”).

The global investment banking fee pool was up 24% compared to 3Q09 and 66% compared to 4Q08. Equity capital markets led the global fee pool in 4Q09, with a share of 46%, followed by debt capital markets with 25%, mergers and acquisitions (M&A) with 22% and loan activity 7%.

Global equity markets were up slightly from 3Q09, with most of the major European stock markets showing higher volumes, but the US reporting lower volumes. Market activity was much lower in November and December as investors took profits and repositioned their portfolios earlier. Global bond market volumes decreased 6% compared to 3Q09 and 19% compared to 4Q08, with the most significant drop in corporate debt volumes.

Equity underwriting increased, with record follow-on issuances and rebounding initial public offering (IPO) markets. Global equity underwriting fees increased 43% compared to 3Q09 and 228% compared to 4Q08.

Global debt underwriting fees were down 4% compared to 3Q09 and up 112% compared to 4Q08. European debt underwriting fees were down 5% compared to 3Q09 and up 97% compared to 4Q08.

Announced global M&A volumes were up 46% compared to 3Q09 and 22% compared to 4Q08. In Europe, announced M&A volumes were up 28% compared to 3Q09, and down 25% compared to 4Q08. Completed global M&A volumes were up 41% compared to 3Q09, and down 21% compared to 4Q08. In Europe, completed M&A volumes increased 19% compared to 3Q09, and decreased 43% compared to 4Q08.

Global syndicated lending recorded the lowest annual volume in 2009 since 2002, with volumes down 36% compared to 2008. Global volumes increased 37% in 4Q09 compared to 3Q09.

Regulators and governments continued their focus on regulatory reform, capital and liquidity requirements, compensation and systemic risk. The sector was impacted by intensifying discussions by governments regarding taxation of variable compensation. The UK announced a plan to apply a 50% levy on all 2009 variable compensation over GBP 25,000 paid by financial institutions to employees. France stated it would follow this model. Regulatory proposals, such as US capital and leverage proposals, were delayed and are expected in 2010. The Basel Committee on Banking Supervision (BCBS) published consultative proposals on capital and liquidity. For more information, refer to – Core Results – Regulatory proposals.

Credit Suisse

In 4Q09, we recorded net income attributable to shareholders of CHF 793 million. Diluted earnings per share were CHF 0.56. Annualized return on equity attributable to shareholders was 8.3%. We continued to reduce risk and our capital position remained strong with a BIS tier 1 ratio of 16.3%. For 2009, we recorded net income attributable to shareholders of CHF 6,724 million compared to a loss of CHF 8,218 million in 2008. Return on equity attributable to shareholders for 2009 was 18.3%.

¹ Based on tangible shareholders' equity attributable to shareholders, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

Credit Suisse reporting structure

Credit Suisse results include revenues and expenses from the consolidation of certain private equity funds and other entities in which we have noncontrolling interests without significant economic interest (SEI) in such revenues and expenses. Core Results include the results of our three segments and the Corporate Center and discontinued operations, but do not include noncontrolling interests without SEI.

Core Results

In 4Q09, we recorded net income attributable to shareholders of CHF 793 million. Private Banking reported sound revenues and net new assets of CHF 6.4 billion. Investment Banking reported strong results in underwriting and advisory businesses as well as solid results in cash equities and prime services, despite a decline in client trading activity during the quarter. Asset Management benefited from improved performance and asset management fees.

Core Results include the results of our three segments, the Corporate Center and discontinued operations. Core Results exclude revenues and expenses in respect of noncontrolling interests in which we do not have SEI. The Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, the Corporate Center includes consolidation and elimination adjustments required to eliminate inter-company revenues and expenses.

Our Core Results are impacted by changes in credit spreads for Credit Suisse debt carried at fair value. In 2Q09, we entered into a transaction designed to reduce the volatility of these changes. In the transaction (the FVOD transaction) we made loans, which we carry at fair value, to Alpine Securitization Corp. (Alpine), a multi-seller commercial paper (CP) conduit administered by Credit Suisse. The Group does not have any ownership interest in Alpine. The FVOD transaction was designed to offset a significant portion of the volatility in credit spread movements on Credit Suisse vanilla debt. Following the FVOD transaction, the aggregate gains on this Credit Suisse debt as of the end of 1Q09 are reversed and charged to the segments on a straight-line amortization basis, and the difference between this amortization and the net impact on valuation adjustments on this Credit Suisse debt from changes in credit spreads are included in the Corporate Center. For information on the impact of accounting changes on the FVOD transaction effective 1Q10, refer to – Accounting changes adopted in 1Q10.

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

Certain reclassifications have been made to prior periods to conform to the current presentation.

Results overview

In 4Q09, we recorded net income attributable to shareholders of CHF 793 million, compared to a net loss attributable to shareholders of CHF 6,024 million in 4Q08. Net revenues were CHF 6,533 million compared to negative CHF 1,830 million in 4Q08. Total operating expenses were CHF 5,228 million, down 18%. Our 4Q09 results included fair value losses of CHF 738 million on Credit Suisse vanilla debt, mostly offset by gains of CHF 466 million from the FVOD transaction. CHF 260 million of the net fair value losses was charged to the segments (primarily Investment Banking),

reflecting the straight-line amortization, and CHF 12 million was included in the Corporate Center.

In Private Banking, net revenues were CHF 3,000 million, a decline of 4% from 4Q08. Recurring revenues declined 5%, mainly reflecting a decline in net interest income. Net interest income decreased due to lower margins on slightly lower average loan volumes, partly offset by higher margins on deposits on slightly higher average volumes. Recurring commissions and fees were stable, reflecting strong performance fees from Hedging-Griffo offset by a decline in other asset-based commissions and fees. The decline in other asset-based commissions and fees reflected the shift into lower margin investments, also within managed investment products, and the ongoing cautious investor behavior. Average assets under management increased 6.6%. Transaction-based revenues were down 4%, reflecting fair value losses of CHF 30 million in 4Q09 from the Clock Finance transaction compared to fair value gains of CHF 57 million in 4Q08, and lower brokerage fees, mostly offset by higher integrated solutions revenues and product issuing fees.

In Investment Banking, net revenues increased to CHF 3,038 million from negative CHF 4,618 million in 4Q08. Key client businesses generated revenues of CHF 2.7 billion, reflecting solid contributions from cash equities, global rates and foreign exchange, prime services, advisory and other fees and US residential mortgage-backed securities (RMBS) secondary trading, although most trading businesses reflected a slowdown in client trading activity during the quarter. Our repositioned businesses had revenues of CHF 0.6 billion for the quarter, driven by US leveraged finance, emerging markets trading and corporate lending. We had minimal losses in our exit businesses. Debt underwriting revenues increased significantly, primarily due to strong results in leveraged finance and higher revenues from investment grade debt issuance, driven by higher industry-wide issuance volumes. Equity underwriting revenues increased, driven by higher levels of industry-wide equity issuance volumes. Advisory and other fees increased slightly, in line with an increase in completed M&A market share, partially offset by lower levels of global completed M&A activity. Fixed income trading revenues increased significantly, primarily driven by strong revenues from leveraged finance and emerging markets businesses. We had minimal net valuation reductions in commercial mortgage-backed securities (CMBS) and net valuation gains on RMBS and collateralized debt obligations (CDO) businesses, compared to significant losses in 4Q08, mostly in exit businesses. We also reported higher revenues, compared to losses in 4Q08, in our commodities and high grade businesses. We had lower revenues from our global rates, foreign exchange and corporate lending businesses. Equity trading revenues increased significantly, primarily driven

by revenues in our derivatives business compared to losses in structured derivatives positions in 4Q08, which we have significantly reduced in 2009, and losses in our corporate and flow derivatives business in 4Q08. We had modest revenues from trading strategies and convertibles compared to significant losses in 4Q08. Revenues from our prime services and cash equities businesses were solid. Net revenues included net fair value losses of CHF 243 million on Credit Suisse debt compared to significant gains in 4Q08.

In Asset Management, net revenues and net revenues before securities purchased from our money market funds and investment-related losses were CHF 637 million. Asset management fees of CHF 364 million were up 4%, reflecting

higher fees primarily from fund administration services, though asset management fees in alternative investment strategies decreased 4% across most products. Average assets under management in 4Q09 declined 6.3% compared to 4Q08. Placement fees decreased, reflecting the continued difficult fundraising environment. Performance fees and carried interest increased, mainly in liquid strategies relating to management of the Partner Asset Facility (PAF). Equity participations and joint venture revenues increased significantly, reflecting increased performance-based fees from Hedging-Griffo and gains from the sale of two joint ventures. Asset Management had investment-related losses, primarily in private equity

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Private Banking, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled. For Asset Management, results are allocated based on the location of the investment advisors and sales teams.

investments in the real estate, financial services and energy sectors, partially offset by gains in credit-related investments.

Corporate Center loss from continuing operations before taxes of CHF 701 million primarily reflected an additional charge of CHF 467 million for the settlement with US authorities relating to US dollar payments and other practices involving parties subject to US economic sanctions.

Provision for credit losses was a net release of CHF 40 million in 4Q09, with net releases of CHF 66 million in Investment Banking and net provisions of CHF 26 million in Private Banking.

Total operating expenses decreased 18% compared to 4Q08, reflecting decreased compensation and benefits and lower general and administrative expenses. The decrease in compensation and benefits reflected the CHF 596 million of severance and other compensation expenses associated with the accelerated implementation of our strategy in 4Q08. Excluding the CHF 596 million in 4Q08, compensation and benefits was flat, primarily due to the reversal of previously accrued performance-related compensation and the full-year view of risk-adjusted profitability in Investment Banking, offset by higher performance-related compensation in Asset Management and Private Banking. 4Q08 included the deferral of compensation under the Cash Retention Award (CRA) program. Compensation and benefits in 4Q09 included CHF 48 million of compensation expense, representing PAF gains, reflected in trading revenues, which were reclassified in Cor-

porate Center, as the PAF gains and offsetting compensation expense were included in Investment Banking trading revenues. General and administrative expenses decreased, reflecting the decline in goodwill and intangible assets impairments compared to charges in 4Q08, lower non-credit-related provisions and lower professional fees. IT expenses decreased, reflecting the CHF 120 million of IT impairments in 4Q08, partly offset by costs related to IT investment in 4Q09. 4Q09 non-credit-related provisions included the additional CHF 467 million charge for the sanctions settlement and 4Q08 non-credit-related provisions of CHF 640 million included CHF 456 million of net provisions related to auction rate securities (ARS) and CHF 190 million from the close-out of a client account in Private Banking, the Corporate Center charge of CHF 150 million from captive insurance proceeds in Private Banking related to ARS and the litigation release of CHF 333 million in Investment Banking.

The Core Results effective tax rate was 34.3% in 4Q09, compared to 16.3% in 3Q09. The effective tax rate primarily reflected the impact of the geographical mix of results. Excluding the 4Q09 pre-tax charge of CHF 467 million (CHF 378 million after tax) for the sanctions settlement, the tax rate was 30.4%. Net deferred tax assets decreased CHF 69 million to CHF 8,819 million as of the end of 4Q09.

Assets under management from continuing operations were CHF 1,229.0 billion as of the end of 4Q09, an increase of CHF 3.7 billion compared to the end of 3Q09. We had net

asset inflows of CHF 6.4 billion in Private Banking and CHF 4.1 billion in Asset Management.

For 2009, net income attributable to shareholders was CHF 6,724 million, compared to a net loss attributable to shareholders of CHF 8,218 million in 2008. Net revenues were CHF 33,617 million compared to CHF 11,862 million in 2008, primarily reflecting Investment Banking negative revenues of CHF 1,971 million in 2008. Total operating expenses were CHF 24,528 million, up 6%, mainly due to increased performance-related compensation, reflecting improved risk-adjusted profitability in Investment Banking and the deferral of compensation under the CRA program in 2008.

Dividend proposal

Our Board of Directors will propose a cash dividend of CHF 2.00 per share for 2009 at the annual general meeting (AGM) on April 30, 2010.

Management and Board of Directors changes

In January 2010, we announced that Pamela Thomas-Graham joined Credit Suisse in the newly created role of Chief Talent, Branding and Communications Officer. She is a member of the Executive Board and has global responsibility for human resources, corporate communications, corporate branding and advertising.

In December 2009, we announced that Hans-Ulrich Doerig will remain Chairman of the Board of Directors until the AGM in April 2011 when he will be succeeded by Vice Chairman Urs Rohner.

Regulatory proposals

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk. G-20 leaders pledged to increase regulation and improve coordination of oversight of banks and financial institutions. In December 2009, the BCBS published consultative proposals, aimed at strengthening capital, liquidity and the resilience of the banking sector, which are expected to be finalized at the end of 2010 and implemented over time. The US Congress and regulators continued working to restructure the regulatory framework for financial services in the US. The US administration and other governments proposed the imposition of taxes and other levies on financial

institutions, including on certain compensation and liabilities. The US administration also proposed prohibiting certain activities, including investing in private equity and hedge funds and proprietary trading unrelated to serving clients, and limiting the size, of certain depository financial institutions. Any final regulations or legislation could result in additional costs or limit or restrict the way we conduct our business, although uncertainty remains about the impact of regulatory reform. We believe the regulatory response must be closely coordinated on an international basis to provide a level playing field and must be carefully balanced to ensure a strong financial sector and global economy. We believe we are well positioned for regulatory reform, as we have reduced risk and maintained strong capital, funding and liquidity. We made changes to the structure of compensation for 2009 consistent with the G-20 guidelines for best compensation practices and took steps to address the proposed levy on variable compensation in the UK.

Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a variable component. The variable component reflects the performance-based compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

Changes to our compensation structure

Our 2009 compensation reflected changes to the structure of compensation for managing directors and directors. The new structure is consistent with G-20 and FINMA guidelines for best compensation practices. The changes are designed to ensure adequate consideration of risk in compensation decisions and further align the interests of our employees with the long-term success of the Group. The changes also link the delivery of compensation with the Group's future financial performance, both on the basis of share price and average return on equity (ROE), and ensure a continued focus on a strong control culture.

The new features of our compensation design for managing directors and directors are:

- increased fixed compensation (salary) beginning in 2010 to ensure a more appropriate balance between fixed and variable compensation;

Number of employees by division

		end of		% change	
	4Q09	3Q09	4Q08	QoQ	YoY
Number of employees by division (full-time equivalents)					
Private Banking	24,300	24,200	24,400	0	0
Investment Banking	19,400	19,300	19,600	1	(1)
Asset Management	3,100	3,100	3,100	0	0
Corporate Center	800	800	700	0	14
Number of employees	47,600	47,400	47,800	0	0

- an increase in the proportion of variable compensation that is deferred; and
- the introduction of two new instruments for deferred variable compensation, the Adjustable Performance Plan (APP) award and the Scaled Incentive Share Unit (SISU). The APP is a cash-based plan with three-year vesting and upside and downside adjustments linked to future business area profit or loss and the Group average ROE (in the case of employees in revenue generating divisions) and the Group average ROE (in the case of Shared Services and certain other employees). SISUs are share-based instruments with four-year vesting and are linked to the long-term development of the Group's share price and average ROE. Deferred variable compensation for 2009 for managing directors and directors was awarded 50% in APP awards and 50% in SISUs.

These new award structures will also be used for senior management, including all members of the Executive Board. We have introduced additional requirements for Group share ownership for members of the Executive Board and divisional and regional management committees.

Determination of the overall amount of variable compensation awarded for 2009 was made on the basis of our operating results after considering risk and the cost of capital, the assessment of performance by senior management and the overall economic and competitive environment. All variable compensation awarded for 2009 was approved by the Board of Directors. All variable compensation awarded for 2009 to members of the Executive Board at December 31, 2009 was deferred. In response to the UK levy on variable compensation exceeding GBP 25,000, we reduced the aggregate amount of variable compensation for 2009 by 5%, and significantly reduced the amount of variable compensation for 2009 of managing directors in the UK. These measures will absorb the majority of the levy's expected cost. Expenses in 4Q09 and 2009 do not include an accrual related to this UK levy on variable compensation as it is not yet enacted law.

Funding

We centrally manage our funding activities. New securities for funding and capital purposes are issued primarily by the Bank. The Bank lends funds to our operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record net revenues and expense in each of the segments for this capital and funding. Our funds transfer pricing system is designed to allocate to our businesses funding costs in a way that incentivizes their efficient use of funding. Our funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet and the costs associated with funding liquidity and balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this system, our businesses are also credited to the extent they provide long-term stable funding.

Accounting changes adopted in 1Q10

The adoption of new accounting principles generally accepted in the US (US GAAP) on January 1, 2010 governing when an entity should be consolidated resulted in an increase of CHF 15 billion to the opening 1Q10 consolidated balance sheet and a reduction in opening 1Q10 retained earnings of approximately CHF 2 billion. The reduction in retained earnings was related to the consolidation of Alpine. Alpine's losses in 2009 resulted from the FVOD transaction, but do not affect tier 1 capital as these fair value losses on Credit Suisse debt are

excluded from the determination of regulatory capital. The consolidation of Alpine and other entities under these new rules did not have an impact on tier 1 capital or risk-weighted assets.

After the consolidation of Alpine, the remaining net gains on Credit Suisse debt of CHF 1.5 billion will continue to be charged to the segments on a straight-line amortization basis. Any difference between this amortization and the valuation adjustments on this Credit Suisse debt from changes in credit spreads will continue to be included in Corporate Center.

We expect a majority of these additional assets and liabilities in our opening consolidated balance sheet in 1Q10 to be level 3 assets and liabilities, however we do not have additional economic risk in these increased assets and liabilities as any future reductions in assets would be offset by corresponding reductions in liabilities.

These changes do not affect our 4Q09 or 2009 financial statements.

Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs. For further information, refer to Note 1 – Summary of significant accounting policies and Note 24 – Fair value of financial instruments in V – Condensed consolidated financial statements – unaudited.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets (level 1) or observable inputs (level 2). These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain over-the-counter (OTC) derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs (level 3). For these instruments, the determination of fair value requires subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These instruments include certain high yield debt securities, distressed debt securities, certain OTC derivatives, certain CDO, certain asset-backed

and mortgage-backed securities, non-traded equity securities, private equity and other long-term investments.

As of the end of 4Q09, 57% and 42% of our total assets and total liabilities attributable to shareholders, respectively, were measured at fair value. As of the end of 4Q09, 5% of total assets attributable to shareholders were classified as level 3 assets attributable to shareholders, compared to 6% as of the end of 3Q09. As of the end of 4Q09, 9% of total assets attributable to shareholders measured at fair value were recorded as level 3 assets attributable to shareholders, compared to 10% as of the end of 3Q09.

As of the end of 4Q09, our net level 3 assets attributable to shareholders were CHF 52.7 billion and those attributable to noncontrolling interests arising from private equity activities were CHF 7.0 billion.

While the majority of our level 3 assets are recorded in Investment Banking, some are recorded in Asset Management, specifically certain private equity investments. Total assets recorded as level 3 declined during 4Q09, primarily in private equity, reflecting the deconsolidation of certain entities under US GAAP, and loans and credit products, reflecting transfers to level 2 and asset disposals. Transfers from level 3 to level 2 continued during 4Q09, as volatility in equity and credit markets decreased, however there were also transfers to level 3 of certain loan and credit products, where observability decreased.

Models were used to value these products. Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products, which were less volatile during 4Q09, particularly in credit and equity markets. Consideration of these indices has become more significant in our valuation techniques during periods of lower market activity.

For all transfers to level 3, we determine and disclose as level 3 events any gains or losses as measured from the first day of the reporting period, even if the transfer occurred subsequent to the first day of the reporting period. For all transfers out of level 3, we determine and disclose as level 3 events any gains or losses through the last day of the reporting period, even if the transfer occurred prior to the last day of the reporting period. We believe this provides greater transparency over the financial impact of our level 3 assets and liabilities. We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition.

Key performance indicators

To benchmark our achievements, we have defined a set of key performance indicators (KPI) for which we have targets to be achieved over a three to five year period across market cycles.

Growth

We target integrated bank collaboration revenues in excess of CHF 10 billion annually by 2012. For 4Q09, integrated bank collaboration revenues were CHF 1.6 billion, bringing the 2009 total to CHF 5.2 billion.

For net new assets, we target a growth rate above 6%. In 4Q09, we recorded an annualized net new asset growth rate of 4.1% and a rolling four-quarter average growth rate of 4.0%.

Risk and capital

For the BIS tier 1 ratio, we target a minimum ratio of 12.5%. The BIS tier 1 ratio was 16.3% as of the end of 4Q09.

Efficiency and performance

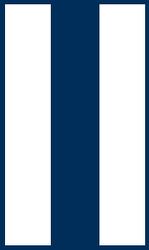

For total shareholder return, we target superior share price appreciation plus dividends compared to our peer group. Our 4Q09 and 2009 total shareholder return was (10.9)% and 80.1%, respectively. The 4Q09 and 2009 average total shareholder return of our peer group was (13.5)% and 35.2%, respectively.

For return on equity attributable to shareholders, we target an annual rate of return of above 18%. The annualized return on equity attributable to shareholders was 8.3% in 4Q09 and the return on equity was 18.3% in 2009.

We target a Core Results cost/income ratio of 65%. Our Core Results cost/income ratio was 80.0% for 4Q09 and 73.0% for 2009.

in / end of	4Q09	2009	2008	2007	2006

Operating environment

The recovery of the global economy continued during the fourth quarter, driven by economic stimulus and companies rebuilding inventories toward the end of 4Q09. The improvement in economic activity was also seen in most recent GDP estimates for the second half of 2009, mainly from increased public and private spending. Financial markets were characterized by rising equity indices, moderate levels of volatility and an ongoing weak US dollar against the Swiss franc.

Switzerland also benefited from the economic recovery, as exports and capital expenditures increased. In addition, the Swiss labor market showed signs of stabilization, as the service sector began generating new jobs in the third quarter. However, unemployment rates increased in Switzerland and most industrialized countries. Switzerland had a record level of

corporate insolvencies in 4Q09, however there was an ongoing high level of start-up company formation. There were further signs of improvement in business and consumer confidence indicators.

Clients continued to remain cautious with regard to more sophisticated investment products and remained risk averse. Client activity remained subdued and was impacted by the seasonal slowdown in 4Q09. The number of trades executed on most exchanges in 4Q09 was lower compared to 3Q09 and 4Q08.

Net new asset generation was impacted by a tax amnesty in Italy, a measure designed to encourage the repatriation of investments held abroad by Italian residents.

For further information, refer to I – Credit Suisse results – Operating environment.

Results overview

Income before taxes of CHF 857 million improved compared to CHF 517 million in 4Q08, mainly reflecting significantly lower non-credit-related provisions. Net revenues of CHF 3,000 million declined 4% from 4Q08. Recurring revenues, representing 77% of net revenues, declined 5%, mainly reflecting a decline in net interest income. Net interest income decreased due to lower margins on slightly lower average loan volumes, partly offset by higher margins on slightly higher average deposit volumes. Recurring commissions and fees were stable, reflecting strong performance fees from Hedging-Griffo offset by a decline in other asset-based commissions and fees. The decline in other asset-based commissions and fees reflected the shift into lower margin investments, also within managed investment products, and the ongoing cautious investor behavior. Average assets under management increased 6.6%. Transaction-based revenues were down 4%, reflecting fair value losses of CHF 30 million in 4Q09 from the Clock Finance transaction compared to fair value gains of CHF 57 million in 4Q08, and lower brokerage fees, mostly offset by higher integrated solutions revenues and higher product issuing fees.

We recorded a moderate provision for credit losses of CHF 26 million, with net provisions of CHF 17 million in Corporate & Institutional Clients and CHF 9 million in Wealth Management Clients.

Total operating expenses of CHF 2,117 million declined 15%, reflecting the significant decline in non-credit-related provisions from 4Q08, offset in part by increased compensation and benefits. The decline in general and administrative expenses primarily reflected net provisions of CHF 456 million related to ARS and a charge of CHF 190 million related to the close out of a client account in 4Q08. Compensation and benefits increased 48%, largely due to higher performance-related compensation reflecting the deferral of compensation under the CRA program in 4Q08 and higher amortization of deferred compensation from prior-year awards.

Compared to 3Q09, income before taxes was stable. Net revenues increased 6%, reflecting higher recurring and transaction-based revenues. The increase in recurring revenues reflected higher net interest income and asset-based commissions and fees. Transaction-based revenues improved, reflecting higher foreign exchange income from client transactions and lower fair value losses related to the Clock Finance trans-

action. Total operating expenses increased 10%, reflecting higher general and administrative expenses and compensation and benefits.

For 2009, income before taxes was CHF 3,651 million, down 5% from CHF 3,850 million in 2008. Net revenues of CHF 11,662 million were down 10% from 2008. The decline was mainly driven by a decrease in recurring commissions and fees, reflecting a 6.4% decrease in average assets under management, particularly in higher margin managed investment products. Excluding fair value losses of CHF 118 million and gains of CHF 110 million related to the Clock Finance transaction in 2009 and 2008, respectively, transaction-based revenues increased 2%, as significantly higher integrated solutions revenues were mostly offset by lower product issuing fees, foreign exchange income from client transactions and brokerage fees. Total operating expenses were CHF 7,831 million, down 12% compared to 2008. 2008 had significant non-credit-related provisions, including CHF 766 million of net provisions related to ARS. General and administrative expenses across other expense categories declined, reflecting our cost containment efforts. Compensation and benefits increased 9%, primarily due to higher amortization of deferred compensation from prior-year awards and performance-related compensation.

Assets under management as of the end of 4Q09 were CHF 914.9 billion, up 1.5% compared to 3Q09. The increase primarily reflected the impact from positive market movements and net new assets, offset in part by adverse foreign exchange-related movements, mainly due to the weakening of the euro and the US dollar against the Swiss franc. Net new assets in 4Q09 benefited from strong inflows in Asia Pacific, the Middle East and Latin America. We generated CHF 7.5 billion of net new assets in the international businesses while the Swiss business had net outflows of CHF 1.1 billion. A tax amnesty in Italy caused net client outflows of CHF 5.6 billion, negatively impacting net new assets in EMEA and Switzerland.

Assets under management as of the end of 4Q09 were up 16.0% compared to 4Q08. The increase primarily reflected the impact from positive market movements and net new assets. During 2009, we acquired strong net new assets of CHF 41.6 billion, with CHF 29.8 billion from our international businesses and CHF 11.8 billion from our Swiss business. Average assets under management increased 6.6% in 4Q09 compared to 4Q08, and declined 6.4% in 2009 compared to 2008.

Performance indicators

Pre-tax income margin (KPI)

Our target over market cycles is a pre-tax income margin above 40%. In 4Q09, the pre-tax income margin was 28.6%, up 12.1 percentage points from 4Q08, but down 2.0 percentage points from 3Q09. In 2009, the pre-tax income margin was 31.3%, up 1.5 percentage points from 2008.

Net new asset growth rate for Wealth Management Clients (KPI)

Our target over market cycles is a growth rate over 6%. In 4Q09, which included net client outflows of CHF 5.6 billion related to a tax amnesty in Italy, our annualized quarterly growth rate was 2.7%. The rolling four-quarter average growth rate was 5.1%.

Pre-tax income margin

Net new asset growth for Wealth Management Clients

Initiatives and achievements

In 4Q09, we continued our long-term strategy of organic growth and strengthened our client focus:

- We announced the launch of our private banking activities in Poland. Our establishment of a local presence in Warsaw marks another step forward in the implementation of our international growth strategy and underscores our long-term commitment to Poland.
- We announced long-term initiatives to further expand our market position in Switzerland, while affirming our corporate responsibility as one of the country's largest employers. We plan to create a further 150 apprenticeships in Switzerland and invest CHF 30 million over the next five years in training programs run by non-profit organizations that help young people to find an apprenticeship and enter the job market. In addition, in conjunction with the Swiss Venture Club, we will provide up to CHF 100 million of risk capital to small and medium-sized enterprises and young entrepreneurs, primarily to promote the creation of jobs in Switzerland.
- We were awarded "Best Private Banking Services Overall" in *Euromoney's* Private Banking Survey 2010. In addition to this global award, we were recognized as "Best Private Banking Services Overall" in Western Europe, Guernsey, Indonesia, Russia, Singapore and Switzerland.
- We retained our first place ranking in the *Fuchsbriefe* "all-time best" list of wealth management companies in German-speaking countries.
- *Global Finance* magazine presented Credit Suisse with the "Best Trade Finance Bank in Switzerland" award for the ninth consecutive time.

Results detail

The following provides a comparison of our 4Q09 results versus 4Q08 (YoY) and versus 3Q09 (QoQ).

Net revenues

Recurring revenues arise from net interest income, recurring commissions and fees, including performance-based fees, related to assets under management and custody assets, as well as fees for general banking products and services. Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Transaction-based revenues arise primarily from brokerage and product issuing fees, foreign exchange income from client transactions and other transaction-based income.

YoY: Down 4% from CHF 3,139 million to CHF 3,000 million

The decrease reflected a 5% decline in recurring revenues and a 4% decrease in transaction-based revenues. Lower recurring revenues were mainly driven by an 8% decline in net interest income. The decrease in net interest income reflected lower margins on slightly lower average loan volumes, partly offset by higher margins on slightly higher average deposit volumes. Recurring commissions and fees were stable, reflecting strong performance fees from Hedging-Griffo, offset by a decline in other asset-based commissions and fees. The decline in other asset-based commissions and fees reflected the shift into lower margin investments, also within managed investment products, and the ongoing cautious investor behavior. The decrease in transaction-based revenues primarily reflected fair value losses of CHF 30 million in 4Q09 from the Clock Finance transaction, compared to fair value gains of CHF 57 million in 4Q08, and lower brokerage fees. These revenues were mostly offset by higher integrated solutions revenues from transactions originated and jointly executed with Investment Banking, higher product issuing fees and gains on ARS positions.

QoQ: Up 6% from CHF 2,833 million to CHF 3,000 million

Recurring revenues increased 5%, due to higher net interest income and asset-based commissions and fees. Net interest income increased due to higher margins on stable average deposit volumes, partly offset by slightly lower net interest income on loans, reflecting lower margins on stable average volumes. Asset-based commissions and fees increased, reflecting semi-annual performance fees. Transaction-based revenues increased 7%, mainly reflecting lower fair value losses on the Clock Finance transaction and higher foreign exchange income from client transactions, integrated solutions revenues and product issuing fees and gains on ARS positions, offset in part by slightly lower brokerage fees. 3Q09 included gains from the sale of real estate.

Provision for credit losses

YoY: Down 80% from CHF 130 million to CHF 26 million

Provision for credit losses reflected moderate net provisions of CHF 17 million in Corporate & Institutional Clients and net provisions of CHF 9 million in Wealth Management Clients. A substantial part of the new provisions of CHF 74 million and releases of CHF 48 million were related to the Corporate & Institutional Clients loan portfolio. While the credit environment showed some further deterioration and corporate insolvencies reached a record level in Switzerland in 4Q09, our corporate

and institutional loan portfolio has sound quality, relatively low concentrations and is mainly collateralized by mortgages and securities. The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities.

QoQ: Down 26% from CHF 35 million to CHF 26 million

Provision for credit losses was moderate.

Operating expenses

Compensation and benefits

YoY: Up 48% from CHF 817 million to CHF 1,213 million

The increase in compensation and benefits was driven by higher performance-related compensation, mainly from the deferral of compensation under the CRA program in 4Q08, and higher amortization of deferred compensation from prior-year awards. The increase in performance-related compensation also reflected an increased accrual based on full-year results.

QoQ: Up 7% from CHF 1,131 million to CHF 1,213 million

The increase primarily reflected higher performance-related compensation based on full-year results, higher amortization of deferred compensation from prior-year awards and higher social security costs.

General and administrative expenses

YoY: Down 49% from CHF 1,502 million to CHF 761 million

The decrease mainly reflected lower non-credit-related provisions, as 4Q08 included CHF 456 million of net provisions related to ARS, a charge of CHF 190 million from the close-out of a client's account and other non-credit-related provisions, including for the buy-back of certain clients' Lehman Brothers structured notes. Other general and administrative expenses were stable.

QoQ: Up 18% from CHF 643 million to CHF 761 million

The increase was primarily from higher IT investment costs and seasonally higher sales and marketing expenses. Other general and administrative expenses were stable.

Personnel

Headcount at the end of 4Q09 was 24,300, stable against 4Q08 and 3Q09. The net decrease of 100 relationship managers in Wealth Management Clients compared to 4Q08 reflected a talent upgrade of our relationship managers, mainly in EMEA and Asia Pacific, while the number of relationship managers was stable in Switzerland and slightly higher in the Americas.

Wealth Management Clients

Net revenues

Recurring

YoY: Down 2% from CHF 1,931 million to CHF 1,898 million

Recurring revenues reflected a 3% decrease in net interest income, with lower margins on slightly lower average loan volumes, mostly offset by higher margins on slightly higher average deposit volumes. Recurring commissions and fees were stable, reflecting strong performance fees from Hedging-Griffo, compared to a weak 4Q08, offset by a decline in other asset-based commissions and fees, reflecting the shift into lower margin investments, also within managed investment products, and the ongoing cautious investor behavior.

QoQ: Up 7% from CHF 1,782 million to CHF 1,898 million

The increase in revenues reflected a 7% increase in net interest income, driven by higher margins on stable average deposit volumes. Net interest income from loans reflected stable average volumes and margins. Recurring commissions and fees increased, reflecting the semi-annual performance fees.

Transaction-based

YoY: Up 15% from CHF 588 million to CHF 674 million

The increase was mainly due to higher integrated solutions revenues, higher product issuing fees and gains on ARS positions, partially offset by lower brokerage fees.

QoQ: Up 4% from CHF 647 million to CHF 674 million

The increase was mainly driven by higher foreign exchange income from client transactions and integrated solutions revenues, higher product issuing fees and gains on ARS positions, partially offset by lower brokerage fees. 3Q09 included gains from the sale of real estate.

Gross Margin

Our gross margin was 130 basis points in 4Q09, five basis points lower than 4Q08, but five basis points higher than 3Q09. Compared to 4Q08, the recurring margin in 4Q09 decreased seven basis points. Recurring revenues declined 2%, while average assets under management increased 5.6%. The decline in recurring revenues reflected 3% lower net interest income and stable asset-based commissions and

fees, including strong performance-based fees from Hedging-Griffo. The transaction-based margin increased two basis points, reflecting the 15% increase in revenues.

Compared to 3Q09, the recurring margin increased four basis points. Recurring revenues were 7% higher, reflecting increased net interest income and higher asset-based commissions and fees, mainly from the semi-annual performance-based fees, while transaction-based margin increased one basis point, reflecting the 4% increase in revenues. Average assets under management increased 1.4%.

Corporate & Institutional Clients

Net revenues

Net interest income

YoY: Down 19% from CHF 374 million to CHF 302 million

The decrease in net interest income was mainly due to lower net interest income on loans, reflecting lower margins on slightly lower average volumes. Net interest income on deposits decreased slightly, reflecting lower margins on slightly higher average volumes.

QoQ: Stable at CHF 302 million

Net interest income on deposits was stable on slightly lower margins and slightly higher average volumes, and net interest income on loans was stable on stable margins and average volumes.

¹ Net revenues divided by average business volume.

Non-interest income

YoY: Down 49% from CHF 246 million to CHF 126 million

The decrease was mainly driven by fair value losses of CHF 30 million on the Clock Finance transaction, compared to fair value gains of CHF 57 million in 4Q08. Excluding the fair value gains and losses on the Clock Finance transaction, non-interest income declined 17%, mainly driven by lower foreign exchange income from client transactions and small declines across asset-based and other transaction-based commissions and fees.

QoQ: Up 27% from CHF 99 million to CHF 126 million

The increase was driven by fair value losses of CHF 30 million on the Clock Finance transaction, compared to fair value losses of CHF 61 million in 3Q09. Excluding the fair value losses on the Clock Finance transaction, non-interest income decreased 3%, reflecting lower integrated solutions revenues and product issuing fees partially offset by slightly higher asset-based commissions and fees and foreign exchange income from client transactions.

Return on business volume

Return on business volume measures revenues over average business volume, which is comprised of client assets and net loans.

Return on business volume of 79 basis points was 41 basis points below 4Q08, mainly reflecting fair value losses on the Clock Finance transaction, compared to fair value gains in 4Q08, and lower net interest income. Compared to 3Q09, return on business volume was up two basis points. The increase in average business volume compared to 4Q08 and 3Q09 was mainly driven by higher client assets.

Excluding the fair value gains/(losses) on the Clock Finance transaction, return on business volume was 84 basis points in 4Q09, 88 basis points in 3Q09 and 109 basis points in 4Q08, reflecting the lower net interest income.

Investment Banking

In 4Q09, we reported income before taxes of CHF 1,030 million and net revenues of CHF 3,038 million, driven by strong results in our underwriting and advisory businesses as well as solid results in cash equities and prime services. Net revenues declined significantly from 3Q09, reflecting lower client trading activity. Despite the subdued 4Q09, income before taxes for 2009 was a record CHF 6,845 million.

Operating environment

The global economy continued to recover in 4Q09, driven by manufacturing gains, an improvement in US housing market activity and the impact of various government stimulus plans. However, prospects for a more broad-based recovery remained modest given continued tight credit markets and weak consumer spending and employment data.

During the quarter, the Fed completed its program of buying USD 300 billion of government debt, but continued to purchase mortgage-related debt and housing agency bonds, although at a slower pace, and the US Treasury announced its intention to extend the Troubled Asset Relief Program through October 2010. In addition, the Fed maintained its target for short-term interest rates near zero and continued to indicate that economic conditions would likely warrant exceptionally low interest rates for an extended period. The BoE also kept short-term interest rates near zero and continued its bond buying program by purchasing GBP 25 billion of gilts. The Japanese government announced a new JPY 7.2 trillion stimulus package in early December aimed at ensuring that Asia's largest economy continues its recovery after two straight quarters of growth.

Equity markets improved globally compared to third quarter levels, while market volatility, as indicated by the VIX, was below 3Q09 levels. Credit spreads continued to narrow and the US dollar declined against most currencies, but strengthened against the Japanese yen and the euro.

Equity trading volumes declined in the US from 3Q09, driven by weak trading activity in November and December. In Europe, equity trading volumes were strong in October but decelerated significantly as the quarter progressed, resulting in a modest increase for the quarter compared to 3Q09. US fixed income trading volumes increased across most products from 3Q09, but also decelerated during the quarter. Fixed income trading volumes in Europe declined.

Market conditions for underwriting and advisory improved in 4Q09 as equity market valuations increased and credit spreads continued to tighten. Global debt underwriting volumes declined from 3Q09, driven by lower investment grade issuance. However, this decrease in investment grade issuance was partially offset by a significant increase in high yield issuance, driving 2009 to become the second highest year on record for high yield issuance. Equity underwriting volumes increased, driven by strong IPO issuance, and the US

dollar volume of announced and completed M&A increased significantly in the quarter.

For further information, refer to I – Credit Suisse results – Operating environment.

Results overview

In 4Q09, income before taxes was CHF 1,030 million, compared to a loss before taxes of CHF 7,460 million in 4Q08 and income before taxes of CHF 1,746 million in 3Q09. Net revenues increased to CHF 3,038 million from negative CHF 4,618 million in 4Q08, but were lower than net revenues of CHF 5,046 million in 3Q09. The revenue decline from 3Q09 was driven by lower fixed income and equity trading revenues, impacted by weaker volumes, a marked slowdown in client activity in November and December and lower volatility. The trading revenue decline from 3Q09 was partially offset by strong underwriting and advisory revenues, driven by higher industry-wide issuance, an increase in M&A activity and continued gains in market share. We continued to execute our client-focused, capital-efficient strategy and maintained market share momentum across products and regions.

Our key client businesses generated revenues of CHF 2.7 billion, reflecting solid contributions from cash equities, global rates and foreign exchange, prime services, equity underwriting, advisory and other fees and US RMBS secondary trading, although most trading businesses reflected the slowdown in client trading activity during the quarter.

Our repositioned businesses had revenues of CHF 0.6 billion for the quarter, driven by US leveraged finance, emerging markets trading and corporate lending. We had minimal losses in our exit businesses. Our revenues included combined net valuation gains of CHF 131 million relating to selected risk exposures in leveraged finance, commercial mortgage, residential mortgage and subprime CDO businesses that we have repositioned or exited.

Our results also reflected net fair value losses on Credit Suisse debt of CHF 243 million compared to net fair value losses of CHF 251 million in 3Q09 and fair value gains of CHF 1,919 million in 4Q08. For more information, refer to I – Credit Suisse results – Core Results.

Compensation expenses of CHF 870 million in 4Q09 were significantly lower than 4Q08, primarily reflecting the reversal of previously accrued performance-related compensation resulting in a negative accrual for the quarter. Our perform-

Repositioning Investment Banking

	Key client businesses	Repositioned businesses	Exit businesses
Equities	<ul style="list-style-type: none"> ■ Cash equities ■ Electronic trading ■ Prime services ■ Equity derivatives – focus on flow and corporate trades 	<ul style="list-style-type: none"> ■ Equity trading – focus on quantitative and liquid strategies ■ Convertibles – focus on client flow 	<ul style="list-style-type: none"> ■ Highly structured derivatives ■ Illiquid principal trading

ance-related compensation accrual was based on our economic profit model, which reflected a full-year view of the risk-adjusted profitability of each business area, the risk-adjusted profitability of Investment Banking and the industry environment. 4Q08 included the deferral of performance-related compensation under the CRA program. We maintained our focus on expense discipline and efficiency improvement. Total other operating expenses declined 13% from 4Q08 (excluding litigation charges of CHF 31 million in 4Q09 and the litigation release of CHF 333 million in 4Q08), reflecting cost reduction measures, and increased 6% from 3Q09 (excluding litigation charges of CHF 31 million in 4Q09 and CHF 47 million in 3Q09) due to higher IT investment, travel and entertainment and events expenses.

Risk-weighted assets of USD 140 billion increased slightly from 3Q09 as we grew our client-focused businesses. Average one-day, 99% Value-at-Risk (VaR) of CHF 114 million increased 21% compared to 3Q09.

Results were impacted by the weakening of the average rate of the US dollar against the Swiss franc compared to both 4Q08 and 3Q09, which adversely affected revenues and favorably impacted expenses. For more information on foreign currency translation rates, refer to VI – Investor information.

For 2009, income before taxes was a record CHF 6,845 million, compared to a loss before taxes of CHF 13,792 million in 2008. Net revenues were a record CHF 20,537 million, compared to negative CHF 1,971 million in 2008, as we made substantial progress in the implementation of our client-focused, capital-efficient strategy. Revenues of CHF 23.6 billion from our ongoing businesses included strong results in global rates and foreign exchange, cash equities, US RMBS secondary trading, prime services, US leveraged finance and flow and corporate derivatives. We had lower losses of CHF 2.7 billion from our exit businesses, as we substantially reduced risk exposures in our leveraged finance, commercial mortgage, residential mortgage and subprime CDO businesses. Our results included net fair value losses on Credit Suisse debt of CHF 397 million in 2009, compared to fair value gains of CHF 4,654 million in 2008, and higher allocated funding costs. Total operating expenses were CHF 13,366 million, up CHF 2,224 million, or 20%, reflecting a 23% increase in compensation and benefits and a 14% increase in total other operating expenses. The increase in compensation and benefits was primarily due to higher performance-related compensation, reflecting improved risk-adjusted profitability, and higher voluntary deferred compensation, offset in part by lower deferred compensation from prior-year share awards, salaries and benefits and severance costs. Total other operating expenses declined 9% from 2008 (excluding litigation charges of CHF 461 million in 2009 and

net litigation releases of CHF 540 million in 2008), reflecting decreases across most expense categories, primarily legal fees, travel and entertainment expenses, occupancy costs and recruiting fees.

Key strategic initiatives for 2010

We believe that we have a significant opportunity to extend market share gains across our businesses as we build our distribution platform and enhance our electronic capabilities for clients. We are also further developing our emerging markets position and refining our strategy in the advisory and underwriting businesses in order to capitalize on market opportunities. Key initiatives to drive the franchise forward include:

- Significant IT investment to support capital-efficient businesses, including foreign exchange, Advanced Execution Services®, prime services and flow and derivatives trading;
- Consolidate and extend market share gains in our cash equities business by improving primary rankings and capitalizing on new issue activity;
- Pursue targeted growth plans in our prime services business, including in listed derivatives, fund administration, prime brokerage and a variety of financing products such as exchange traded funds (ETF), index/sector/single stock swaps and custom baskets;
- Focus on growing client flows and expanding distribution coverage across our fixed income businesses, including a significant expansion of our sales force;
- Broaden client footprint in our global foreign exchange business by building our electronic platform in foreign exchange (eFX) and infrastructure;
- Continue to pursue a capital-efficient approach to leveraged finance and investment grade capital market transactions;
- Capitalize on high-growth potential in targeted regions by building on our leading franchises in Brazil, Russia, Indonesia and the Middle East, our strong position in China and our growing business in India. We intend to expand flow sales business across credit, rates and foreign exchange and drive client connectivity across regions and in collaboration with Private Banking; and
- Capitalize on a global rebound in M&A activity, continued recovery in IPO issuance volumes and sizeable high yield refinancing opportunity.

Performance indicators

Pre-tax income margin (KPI)

Our target over market cycles is a pre-tax income margin of 25% or greater. The pre-tax income margin was 33.9% in 4Q09, not meaningful in 4Q08 and 34.6% in 3Q09. The pre-tax income margin was 33.3% in 2009 and not meaningful in 2008, reflecting the extremely challenging operating environment.

Value-at-Risk

The average one-day, 99% VaR was CHF 114 million in 4Q09, compared to CHF 161 million in 4Q08 and CHF 94 million in 3Q09. For further information on VaR, refer to IV – Treasury and Risk management – Risk management – Market risk.

Pre-tax return on average utilized economic capital

The pre-tax return on average utilized economic capital was 21.9% in 4Q09, compared to negative 110.9% in 4Q08 and 35.1% in 3Q09. The 2009 pre-tax return on average utilized economic capital was 33.5% compared to negative 46.6% in 2008.

Risk-weighted assets

Risk-weighted assets increased to USD 140 billion from the end of 3Q09, driven by a modest increase in risk-weighted assets in ongoing businesses to USD 123 billion from USD 119 billion as of the end of 3Q09, reflecting our plans to grow these client-focused businesses. Risk-weighted assets in exit businesses declined slightly from USD 18 billion as of the end of 3Q09 to USD 17 billion as of the end of 4Q09. Risk-weighted assets declined 14% from USD 163 billion as of the end of 4Q08.

Pre-tax income margin

n/m: not meaningful

Significant transactions and achievements

We executed a number of significant transactions, reflecting the breadth and diversity of our investment banking franchise:

- **Debt capital markets:** We arranged key financings for a diverse set of clients, including Reynolds Packaging Group (US consumer products manufacturer), Cisco Systems, Inc. (US internet protocol networking company), Liberty Global, Inc. (US cable operator), Warner Chilcott plc (US-based specialty pharmaceuticals company) and Datatel, Inc. (US technology and business services company).
- **Equity capital markets:** We executed a block trade of Barclays Plc (UK bank) stock for Qatar Holdings LLC (Qatar government investment holding company) and IPOs for Banco Santander Brasil (Brazilian bank), Maxis Berhad (Malaysian mobile communications provider), Cobalt International Energy, Inc. (US oil exploration and production company) and China Pacific Insurance (Group) Co., Ltd. (Chinese insurance company).
- **Mergers and acquisitions:** We advised on a number of key transactions that were announced in 4Q09, including the restructuring of a joint venture for UPM-Kymmene Group (Finnish pulp and paper company), the recapitalization, restructuring and asset sale for Prime Infrastructure Group, formerly Babcock & Brown Infrastructure Group (Australian specialty infrastructure company), the sale of the Northrop Grumman Corporation (US defense company) advisory service business, the acquisition by Global Infrastructure Partners (Asset Management joint venture US investment fund) of London Gatwick Airport and the joint venture between GCL-Poly Energy Holdings Limited (Chinese energy company) and China Investment Corporation (Chinese government investment company).

Industry awards and market share momentum

We received the following awards and rankings:

- “Bank of the Year” by *International Financing Review*. We were also named the “Structured Equity House of the Year”, “Best Structured Equity House for Asia Pacific” and “Equity Derivatives House of the Year” by *International Financing Review*.
- “Equity Derivatives House of the Year” and “Hedge Funds House of the Year” by *Structured Products*.
- *FX Week's* “Best Bank for Swiss Franc”. We also won *Global Finance's* “Best Foreign Exchange Bank and Provider” in Switzerland for the second consecutive year, in its annual “World’s Best Foreign Exchange Banks” awards.
- “Austria & Switzerland Financial Advisor of the Year” and “UK Financial Advisor of the Year” by *FT/Mergermarket* in its European M&A Awards 2009.

¹ Exposures shown gross. ² Excludes an aggregate of CHF 1.2 billion of fair valued non-recourse term financing for executed transactions. Fair value gains and losses on this term financing are reflected in net valuation adjustments in leveraged finance. Excludes the impact of the PAF transaction of CHF 2.1 billion, of which CHF 1.1 billion consisted primarily of leveraged finance loans and CHF 1.0 billion consisted of assets underlying non-recourse financing. ³ Excludes an aggregate of CHF 2.6 billion of term financing for executed transactions, of which CHF 2.2 billion is non-recourse, and the impact of the PAF transaction of CHF 1.1 billion. ⁴ Exposures shown net.

- “Best Secondary Offering” by *FinanceAsia* for our work on the rights issues for Rio Tinto Group due to its size, renounceable structure and cross-border complexity. In addition, we were awarded the “Most Innovative Deal” for our work on the recapitalization of Babcock & Brown Infrastructure.
- Ranked number one by *Tradeweb* in RMBS pass-through trading, with 19% market share for 2009.
- Ranked number two by *Dealogic* in investment banking revenues for Europe and Asia Pacific (excluding Japan) for 2009.
- “Best Equity Deal/Best IPO” by *The Asset* magazine in its “Triple A Regional Awards 2009” for our work on the Maxis Berhad IPO. In addition, we were awarded “Best ADR” for our work on the Changyou.com Ltd IPO, “Best Mid-Cap Equity Deal” for our work on the China Resources Cement Holdings Ltd IPO and “Best Sovereign Bond” for our work with the Republic of Philippines.
- “Best High Yield Bond” by *Asiamoney* in its “Asia’s Best Deals of 2009” for our work on the Adaro Indonesia transaction. In addition, we were awarded “Best Sovereign Bond” for our work with the Republic of Philippines and “Best M&A” for our work on the China Petrochemical Corp. transaction.

Results detail

The following provides a comparison of our 4Q09 results versus 4Q08 (YoY) and versus 3Q09 (QoQ).

Net revenues

Debt underwriting

YoY: From CHF (21) million to CHF 401 million

The increase was primarily due to strong results in leveraged finance, which reflected a significant increase in industry-wide high yield issuance, an increase in high yield market share and fee revenues in 4Q09 compared to fee losses of CHF 105 million in 4Q08. In addition, we had higher revenues from investment grade debt issuance, driven by higher industry-wide issuance volumes, and higher revenues from asset-backed securities (ABS).

QoQ: Up 25% from CHF 321 million to CHF 401 million

The increase was primarily due to higher revenues from leveraged finance, resulting from higher industry-wide high yield issuance and an increase in high yield market share, and higher revenues from ABS. These results were partially offset by a decline in revenues from investment grade debt issuance, driven by lower industry-wide issuance volumes, and lower fee revenues in leveraged finance.

Equity underwriting

YoY: Up 120% from CHF 211 million to CHF 464 million

The increase was driven by significantly higher levels of industry-wide equity issuance volumes, particularly IPO issuance, compared to very low levels in 4Q08.

QoQ: Up 32% from CHF 351 million to CHF 464 million

The increase was driven by higher levels of industry-wide equity issuance volumes, particularly IPO issuance, and significantly higher market share in IPOs.

Advisory and other fees

YoY: Up 3% from CHF 318 million to CHF 329 million

The increase was due to higher other advisory fees, partially offset by lower M&A fees. The decrease in M&A fees was due to the foreign exchange translation impact, as the average rate of the US dollar weakened against the Swiss franc compared to 4Q08. In US dollar terms, M&A fees increased slightly, in line with an increase in completed M&A market share, partially offset by lower levels of global completed M&A activity.

QoQ: Up 207% from CHF 107 million to CHF 329 million

The increase was due to a substantial increase in completed M&A market share and higher levels of global completed M&A activity.

Fixed income trading

YoY: From CHF (2,910) million to CHF 820 million

The increase was primarily due to revenues in our leveraged finance and emerging markets businesses compared to significant losses in 4Q08. In 4Q08, our leveraged finance results included net valuation reductions of CHF 1,195 million, leveraged finance trading losses of CHF 451 million relating to European trading and several trading strategies in the US, which we have since exited, and CHF 362 million of losses from the US loan trading businesses, which experienced unprecedented price declines in the quarter. In 4Q08, we had losses of CHF 1,197 million in our emerging markets business, resulting from price declines in several markets from widening credit spreads. Results included minimal net valuation reductions in CMBS compared to net valuation reductions of CHF 989 million in 4Q08 and net valuation gains in our RMBS and CDO businesses compared to net valuation reductions of CHF 1,771 million in 4Q08, mostly in exit businesses. We reported revenues in our commodities and high grade businesses compared to losses in 4Q08. Most of the commodities losses in 4Q08 were in exit businesses. The increase in revenues was partially offset by net fair value losses on Credit Suisse debt of CHF 219 million compared to fair value gains of CHF 1,727 million in 4Q08. We had lower revenues from our global rates and foreign exchange businesses, reflecting weaker market volumes, a decline in client trading

activity, lower volatility and reduced trading opportunities. 4Q08 included losses associated with structured foreign exchange derivatives in Asia. Our results reflected lower revenues from our corporate lending business, which, in 4Q08, included valuation increases of CHF 422 million primarily due to a change in estimate of the value of the loans.

QoQ: Down 67% from CHF 2,477 million to CHF 820 million

The decrease reflected lower revenues from our global rates and foreign exchange, leveraged finance trading and US RMBS trading businesses. Revenues from these businesses were impacted by the marked slowdown in client activity. Our results reflected lower revenues from our corporate lending business, as credit spreads narrowed to a lesser degree in 4Q09 compared to 3Q09, and lower trading strategies revenues. The decrease in revenues was partially offset by lower valuation reductions in CMBS, valuation gains related to residential mortgage businesses we are exiting and higher revenues from commodities. Results included net fair value losses on Credit Suisse debt of CHF 219 million in 4Q09 and CHF 226 million in 3Q09.

Equity trading

YoY: From CHF (2,231) million to CHF 1,102 million

The increase was primarily driven by modest revenues in our derivatives business compared to losses of CHF 886 million in structured derivatives positions in 4Q08, which we have significantly reduced in 2009, and losses of CHF 929 million in our corporate and flow derivatives business in 4Q08. In addition, we had modest revenues from trading strategies and convertibles compared with significant losses in 4Q08, when we incurred losses of CHF 1,019 million in convertibles arising from the dislocation and illiquidity in the convertibles market and losses of CHF 511 million in our long/short and event and risk arbitrage strategies. In 2009, we exited illiquid principal equity trading strategies and focused on quantitative and liquid trading strategies. Trading strategies were impacted by weaker market volumes, lower volatility and reduced trading opportunities. The increase in revenues was partially offset by net fair value losses of CHF 24 million on Credit Suisse debt compared to fair value gains of CHF 192 million in 4Q08. In addition, revenues from our prime services and cash equities businesses, although solid, were lower compared to 4Q08, as client activity, especially among hedge fund clients, was lower in the second half of the quarter.

QoQ: Down 40% from CHF 1,835 million to CHF 1,102 million

The decrease reflected lower revenues in our derivatives, cash equities and prime services businesses as client activity slowed during the quarter. We also had lower revenues in convertibles and trading strategies. Our results also reflected net fair value losses on Credit Suisse debt of CHF 24 million in 4Q09 compared to CHF 25 million in 3Q09.

Other

YoY: From CHF 15 million to CHF (78) million

The decrease primarily reflected net valuation gains of CHF 411 million on our leveraged finance bridge commitments in 4Q08, partially offset by gains from the impact of economic hedging of voluntary deferred compensation, compared to losses in 4Q08, and revenues from private equity investments not managed as part of Asset Management.

QoQ: Up 73% from CHF (45) million to CHF (78) million

The change reflected increased integrated solution payments and lower gains from the impact of economic hedging of voluntary deferred compensation.

Provision for credit losses

YoY: From CHF 355 million to CHF (66) million

The decrease was due to a net provision release in 4Q09, including a release relating to a guarantee provided in a prior year to a third-party bank, compared to 4Q08 provisions, mainly against loans made to various borrowers in Asia.

QoQ: From CHF 18 million to CHF (66) million

The decrease was due to the net provision release in 4Q09.

Operating expenses

Compensation and benefits

YoY: Down 41% from CHF 1,470 million to CHF 870 million

The decrease reflected the reversal of previously accrued performance-related compensation, resulting in a negative accrual in the quarter. Our performance-related compensation accrual was based on our economic profit model, which reflected a full-year view of the risk-adjusted profitability of each business line, the risk-adjusted profitability of Investment Banking and the industry environment. 4Q08 compensation and benefits reflected the deferral of compensation under the

CRA program. 4Q09 compensation and benefits also reflected higher voluntary deferred compensation expenses, offset in part by lower deferred compensation from prior-year awards and lower salaries.

QoQ: Down 59% from CHF 2,129 million to CHF 870 million

The decrease reflected the reversal of previously accrued performance-related compensation, reflecting the full-year view of risk-adjusted profitability.

General and administrative expenses

YoY: Up 37% from CHF 667 million to CHF 915 million

The increase primarily reflected a release in 4Q08 of CHF 333 million for certain private litigation matters, compared to litigation charges of CHF 31 million in 4Q09. Excluding these litigation releases and charges, expenses decreased CHF 116 million, driven by a reduction in legal fees and other litigation provisions, non-income taxes and occupancy expenses, resulting from our real estate optimization initiative, partially offset by an increase in IT investment and higher travel and entertainment expenses, reflecting increased client-related business activity, and higher events expenses.

QoQ: Up 7% from CHF 852 million to CHF 915 million

The increase primarily related to higher IT investment, travel and entertainment expenses, reflecting increased client-related business activity, and higher events expenses, offset in part by lower litigation charges. In addition, our 3Q09 results included higher legal, consulting and service fees resulting from the execution of asset sales.

Personnel

Headcount as of the end of 4Q09 was 19,400, up slightly from 19,300 as of the end of 3Q09.

Asset Management

In 4Q09, we recorded income before taxes of CHF 159 million. Performance, placement and asset management fees improved. Our results included strong performance fees from Hedging-Griffo and gains from the sale of two joint ventures. Investment-related losses were CHF 47 million. Net new assets were CHF 4.1 billion.

¹ Includes multi-manager hedge funds, single-manager hedge fund strategies and index strategies. ² Includes Asset Management Finance Corporation, Hedging-Griffo, Credit Suisse (Brazil) and Aberdeen Asset Management. ³ Includes gains on shares received from the Aberdeen transaction of CHF 207 million and CHF 228 million in 3Q09 and 2009, respectively, and gains from the sale of the PKO Bank Polski and Woori Credit Suisse Asset Management joint ventures of CHF 58 million in 4Q09 and 2009. ⁴ Includes a CHF 43 million impairment charge on our Korean joint venture Woori Credit Suisse Asset Management.

Operating environment

The operating environment continued to improve in 4Q09, and signs of economic recovery helped build momentum for rising financial market sentiment. Major equity market indices gained an average of 4%, with emerging markets outperforming developed markets. Commodities, equities and high yield credit were among the best performing asset classes. The S&P GSCI Total Return commodity index gained 8%, as demand strengthened and gold set a multi-year high in early December. Real estate markets improved, with the MSCI World Real Estate index rising 3%.

Investors continued to shift from cash into other asset management products, though the rate slowed from the third quarter. Bond funds continued to attract the majority of net new assets, while equity fund flows were flat to negative. Emerging market equity funds attracted significant net new assets, while developed market equity funds continued to have asset outflows. Hedge funds gathered net inflows in 4Q09, with positive net new assets for the second straight quarter. Liquidity and transparency remained important to investors, evidenced by the continued growth of ETFs, while fundraising for illiquid investments such as private equity remained far below peak levels. Regulatory scrutiny of investment advisers, managers and placement agents continued.

For further information, refer to I – Credit Suisse results – Operating environment.

Results overview

In 4Q09, income before taxes was CHF 159 million, compared to a loss of CHF 656 million in 4Q08. Net revenues of CHF 637 million were up CHF 993 million. Net revenues before securities purchased from our money market funds and investment-related losses were CHF 637 million, up 58%. Investment-related losses, primarily in private equity investments in the real estate, financial services and energy sectors, partially offset by gains in credit-related investments, were CHF 47 million, compared to losses of CHF 595 million in 4Q08. Asset management fees of CHF 364 million were up 4%, reflecting higher fees primarily from fund administration services. Average assets under management in 4Q09 decreased 6.3% compared to 4Q08. Asset management fees in alternative investment strategies decreased 4% across most products. Placement fees of CHF 36 million were down 12%, reflecting the continued difficult fundraising environment. Performance fees and carried interest of CHF 60 million were up CHF 42 million, mainly in liquid strategies relating to management of the PAF. Equity participations and joint venture rev-

enues of CHF 194 million were up CHF 213 million, reflecting increased performance-based fees from Hedging-Griffo and gains of CHF 58 million from the sales of two joint ventures.

Total operating expenses of CHF 478 million increased 59%, mainly due to higher performance-related compensation compared to 4Q08, which included the deferral of performance-related compensation under the CRA program. The decline in general and administrative expenses was mainly due to a 4Q08 impairment charge of CHF 41 million on acquired intangible assets.

Compared to 3Q09, income before taxes decreased CHF 152 million and net revenues decreased CHF 128 million, primarily reflecting the CHF 207 million gain on the Aberdeen transaction and investment-related gains in 3Q09, compared to investment-related losses in 4Q09. Excluding investment-related gains/(losses) and the gain on the Aberdeen transaction, revenues increased CHF 223 million, mainly from the semi-annual performance-based fees from Hedging-Griffo, the gains from the joint venture sales and improved placement fees. Total operating expenses increased 5%, reflecting higher general and administrative expenses, partially offset by lower performance-related compensation.

For 2009, income before taxes was CHF 35 million, compared to a loss before taxes of CHF 1,185 million in 2008. Net revenues almost tripled to CHF 1,842 million compared to 2008, primarily reflecting gains from securities purchased from our money market funds compared to losses in 2008, lower investment-related losses and higher revenues from equity participations and joint ventures, including gains from the Aberdeen transaction and the sale of two joint ventures. Net revenues before securities purchased from our money market funds and investment-related gains/(losses) were CHF 2,098 million, up 6% compared to 2008, primarily due to the higher revenues from equity participations and joint ventures, partially offset by lower asset management and placement fees. Total operating expenses were flat.

During the quarter, we sold our stake in our Polish and Korean joint ventures, PKO Bank Polski and Woori Credit Suisse Asset Management, resulting in gains of CHF 58 million in 4Q09. As of the end of 4Q09, the fair value of our balance sheet exposure to securities purchased from our money market funds was CHF 260 million, up CHF 8 million from 3Q09, and gains were CHF 47 million, compared to a loss of CHF 164 million in 4Q08.

Assets under management were CHF 416.0 billion, down 2.8% compared to 3Q09. The decrease in 4Q09 primarily reflected the transfer of the managed lending business to Investment Banking and the sale of the two joint ventures, partially offset by positive market performance and net new assets. Net new assets of CHF 4.1 billion included inflows of

CHF 6.6 billion in alternative investment strategies, mainly in real estate and ETFs, and CHF 0.8 billion in Swiss advisory, partially offset by outflows of CHF 3.6 billion in multi-asset class solutions, which included the impact of a tax amnesty in Italy. Compared to 4Q08, assets under management were up 1.1%, primarily reflecting positive market performance, mostly offset by the transfer of the managed lending business and the sale of the two joint ventures.

Performance indicators

Pre-tax income margin (KPI)

Our target over market cycles is a pre-tax income margin above 40%. The pre-tax income margin was 25.0% in 4Q09, compared to 40.7% in 3Q09. The pre-tax income margin was not meaningful in 4Q08 given our negative net revenues. The pre-tax income margin before securities purchased from our money market funds and investment-related gains/(losses) was 25.0% in 4Q09, compared to 25.6% in 4Q08 and 27.5% in 3Q09.

Net new asset growth rate

In 4Q09, the rolling four-quarter average growth rate was 0.1%, compared to negative 10.6% in 4Q08 and negative 5.0% in 3Q09. The annualized quarterly growth rate was 3.8% in 4Q09, compared to negative 17.2% in 4Q08 and 3.8% in 3Q09.

Pre-tax income margin

n/m: not meaningful

Gross margin

The gross margin on assets under management was 60 basis points in 4Q09, compared to negative 31 basis points in 4Q08 and 72 basis points in 3Q09. The gross margin on assets under management before securities purchased from our money market funds and investment-related gains/(losses) was 60 basis points in 4Q09, compared to 35 basis points in 4Q08 and 59 basis points in 3Q09.

Initiatives and achievements

- We had net new assets of CHF 3.8 billion in connection with the acquisition of Jelmoli AG by Swiss Prime Site AG, a Swiss real estate investment company for which we are the investment adviser and administrator.
- We won a CHF 500 million private equity fund of funds mandate from a large Asian pension plan and two credit strategies mandates totaling CHF 300 million from US pension funds.
- During 4Q09, our indexed commodities business surpassed CHF 4 billion in assets under management.
- We expanded our European ETF suite into Italy and Germany, with 17 ETF products listed on the Italian stock exchange and 15 ETF products listed on the German stock exchange.
- We launched our first ETF physically backed by gold. This fund invests in physical gold to replicate the return from gold on the spot market, without using derivative instruments.
- Global Infrastructure Partners, our asset management joint venture with General Electric, announced two major investments totaling CHF 3 billion, including the acquisition of Gatwick Airport and a stake in a leading renewable power generation company.
- Asset Management Finance Corporation made investments totaling CHF 200 million in four firms that specialize in wealth management and alternative asset management.

Results detail

The following provides a comparison of our 4Q09 results versus 4Q08 (YoY) and versus 3Q09 (QoQ).

Net revenues

Net revenues before investment-related gains/(losses) include asset management fees (including fees from fund administration services), performance-based fees and carried interest, placement fees, revenues from joint ventures and strategic collaborations and realized and unrealized gains and losses on securities purchased from our money market funds. Investment-related gains/(losses) include realized and unrealized gains and losses and net interest and dividend income on investments.

Alternative investment strategies

YoY: Up 19% from CHF 229 million to CHF 273 million

The increase was mainly due to higher revenues in liquid strategies and real estate, partially offset by lower revenues in private equity. The increase in liquid strategies revenues reflected higher performance fees relating to management of the PAF. 4Q08 revenues in liquid strategies included losses associated with proprietary hedge fund positions, including seed capital investments. Real estate revenues increased 66%, due to higher placement fees. Private equity revenues declined 51%, primarily due to lower placement fees and higher allocated funding costs.

QoQ: Up 28% from CHF 213 million to CHF 273 million

The increase was mainly due to higher revenues in liquid strategies and private equity. The increase in liquid strategies was due to the performance fees relating to management of the PAF. The increase in private equity was due to higher placement fees, partially offset by higher allocated funding costs.

Traditional investment strategies

YoY: Down 12% from CHF 193 million to CHF 170 million

The decrease was mainly due to lower asset management fees from multi-asset class solutions reflecting a decline of average assets under management and realized gains in 4Q08 on securities acquired from client securities lending portfolios, partially offset by an increase in fees, primarily from fund administration services.

QoQ: Up 2% from CHF 166 million to CHF 170 million

The increase was mainly due to higher fees from fund administration. Fees from multi-asset class solutions were stable.

Equity participations and joint ventures

YoY: Up from CHF (19) million to CHF 194 million

The increase was mainly due to higher performance-based fees from Hedging-Griffo, the CHF 39 million net gain from the sale of PKO Bank Polski and the CHF 19 million gain from the sale of Woori Credit Suisse Asset Management. 4Q08 included an impairment charge of CHF 43 million on the Korean joint venture.

QoQ: Down 21% from CHF 247 million to CHF 194 million

The decrease was mainly due to the CHF 207 million gain from the Aberdeen transaction in 3Q09, partially offset by the semi-annual performance-based fees from Hedging-Griffo and the CHF 58 million of gains from the sale of the two joint ventures.

Investment-related gains/(losses)

YoY: Down 92% from CHF (595) million to CHF (47) million

In 4Q09, we had unrealized losses in private equity investments, mainly in the real estate, financial services and energy sectors, partially offset by unrealized gains in credit-related investments. 4Q08 included unrealized losses on private equity investments in the real estate, energy and commodity sectors and in credit-related investments.

QoQ: Down from CHF 97 million to CHF (47) million

In 4Q09, we had unrealized losses in private equity investments, mainly in the real estate, financial services and energy sectors, partially offset by unrealized gains in credit-related investments. 3Q09 included unrealized gains in credit-related investments and in private equity investments in the pharmaceutical sector, partially offset by unrealized losses in private equity investments in the energy sector.

Operating expenses

Compensation and benefits

YoY: Up 238% from CHF 78 to CHF 264 million

The increase was mainly from higher performance-related compensation, due to the deferral of compensation under the CRA program in 4Q08, and higher deferred compensation relating to prior-year awards, partially offset by lower salaries.

QoQ: Down 8% from CHF 286 million to CHF 264 million

The decrease was mainly due to lower performance-related compensation accruals reflecting the full-year results.

General and administrative expenses

YoY: Down 14% from CHF 185 million to CHF 160 million

The decrease was mainly due to an impairment charge of CHF 41 million on acquired intangible assets in 4Q08. Excluding the 4Q08 impairment charge, expenses increased 11%, mainly professional fees. Other general and administrative expenses were stable.

QoQ: Up 30% from CHF 123 million to CHF 160 million

The increase was across most expense categories, mainly professional fees and non-credit-related provisions.

Personnel

In 4Q09, headcount was stable at 3,100 from 4Q08 and 3Q09.

Assets under management

Assets under management

Assets under management comprise assets which are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the customer fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the segment in which the advice is provided as well as in the segment in which the investment decisions take

place. Assets managed by Asset Management for Private Banking clients are reported in both segments and eliminated at Group level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

As of the end of 4Q09, assets under management from continuing operations were CHF 1,229.0 billion, up CHF 3.7 billion, or 0.3%, compared to the end of 3Q09. The increase primarily reflected favorable market performance and positive

¹ Calculated based on continuing operations.

net new assets in Private Banking and Asset Management, mostly offset by other effects, primarily in Asset Management, reflecting the transfer of the managed lending business to Investment Banking and the sale of two joint ventures, and adverse foreign exchange-related movements. Compared to the end of 4Q08, assets under management from continuing operations were up CHF 122.9 billion, or 11.1%. The increase primarily reflected favorable market performance in Private Banking and Asset Management and net new assets in Private Banking.

In Private Banking, assets under management were CHF 914.9 billion, up CHF 13.1 billion, or 1.5%, compared to the end of 3Q09, and up CHF 126.0 billion, or 16.0%, compared to the end of 4Q08. In Asset Management, assets under management were CHF 416.0 billion, down CHF 11.9 billion, or 2.8%, compared to the end of 3Q09, and up CHF 4.5 billion, or 1.1%, compared to the end of 4Q08. For further information, refer to II – Results by division – Private Banking and – Asset Management.

Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients,

commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management. Furthermore, changes due to currency and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

Private Banking recorded net new assets of CHF 6.4 billion in 4Q09, including CHF 5.4 billion in Wealth Management Clients, with inflows mainly in Asia Pacific and the Americas. EMEA and Switzerland were impacted by outflows relating to a tax amnesty in Italy. Asset Management recorded net new assets of CHF 4.1 billion, including inflows of CHF 6.6 billion in alternative investment strategies and outflows of CHF 3.6 billion in multi-asset class solutions, which included the impact of a tax amnesty in Italy.

Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

IV

Treasury and Risk management

52 Treasury management

59 Risk management

Treasury management

We continued to conservatively manage our liquidity and funding position, and our capital position remained strong with a BIS tier 1 ratio of 16.3% as of the end of 4Q09.

Liquidity and funding management

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to support business initiatives. For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2008.

Funding sources and uses

The operating environment continued to improve during 4Q09, with a further tightening of funding spreads. The distribution of our unsecured funding remained consistent with the distribu-

tion as of the end of 3Q09, with the majority still from client deposits and long-term debt (refer to the chart “Unsecured funding distribution”). We continue to maintain lending facilities with various central banks and to monitor closely our exposure to liquidity risk. As of the end of 4Q09, our liquid assets included CHF 135 billion of cash and securities accepted under central bank facilities, an increase of CHF 17 billion from 3Q09. Deposits, a particularly stable source of funds, decreased CHF 1.3 billion from 3Q09, primarily due to the foreign exchange translation impact, and covered 122% of total loans outstanding as of the end of 4Q09 (refer to the chart “Funding by asset category”). In 4Q09 we further reduced our short-term liabilities to CHF 52 billion from CHF 56 billion in 3Q09, and extended our maturity profile. The percentage of unsecured funding from long-term debt was 32% as of the end of 4Q09, an increase of three percentage points

Unsecured funding distribution

as of December 31, 2009

Funding by asset category

as of December 31, 2009

from 4Q08. The percentage of unsecured funding from Private Banking client deposits was 47% as of the end of 4Q09, an increase of five percentage points from 4Q08. The weighted average maturity of long-term debt was 6.4 years (including certificates of deposits with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity or in 2030 for instruments without a stated final maturity).

Despite the low level of interest rates, the average funding spread over LIBOR and other indices relevant to the financial services industry, which is allocated to the divisions, increased, primarily reflecting the long-term debt and hybrid tier 1 capital issued in 4Q08 during the financial crisis.

Liquidity and funding policy

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. Our liquidity risk parameters reflect various liquidity stress assumptions, which we believe are conservative and which are described in III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2008. We manage our liquidity profile at a sufficient level such that, in the event that we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time well in excess of our minimum target of 160 days.

The impact of a one or two-notch downgrade in the Bank's long-term debt ratings would result in additional collateral requirements of CHF 2.6 billion and CHF 4.9 billion, respectively, and would not be material to our liquidity and funding planning.

Debt issuances and redemptions

Our primary sources of liquidity are through consolidated entities. Our capital markets debt issuance includes issues of senior and subordinated debt in US registered offerings and medium-term note programs, euro market medium-term note programs and a samurai shelf registration statement in Japan. Substantially all of our unsecured senior debt is issued without financial covenants that could trigger an increase of our cost of financing or accelerate the maturity of the debt, including adverse changes in our credit ratings, cash flows, results of operations or financial ratios.

We began pre-funding our forecasted 2010 needs in 4Q09. The Bank issued CHF 2.7 billion of senior debt with maturities ranging between three and four years. The Bank also raised CHF 593 million in multiple tranches of covered bonds with maturities ranging between three and 13 years. Covered bonds of CHF 638 million, senior debt of CHF 3.7 billion and subordinated debt of CHF 1.2 billion matured.

In January 2010, the Bank issued CHF 650 million and EUR 2.25 billion of senior debt with maturities ranging between five and seven years, and issued USD 2.5 billion of subordinated debt with a maturity of ten years. The Bank also raised CHF 281 million in covered bonds with multiple maturities.

Capital management

Our consolidated BIS tier 1 ratio was 16.3% as of the end of 4Q09, compared to 16.4% as of the end of 3Q09, reflecting a slightly lower capital base and stable risk-weighted assets. Our core tier 1 ratio was 11.2% as of the end of 4Q09 (excluding CHF 12.2 billion of hybrid tier 1 instruments and the capital deductions 50% from tier 1) compared to 11.3% in 3Q09. Our Board of Directors will propose a cash dividend of CHF 2.00 per share for 2009 at the AGM on April 30, 2010. The proposal is subject to approval by shareholders at the AGM.

Both the Group and the Bank are subject to BIS and FINMA regulatory capital requirements, including leverage ratios of tier 1 capital to total adjusted assets. Under these requirements we must maintain by 2013 a minimum leverage ratio of 3% at the Group and Bank consolidated level. The leverage ratios for the Group and Bank consolidated level as

of the end of 4Q09 were 4.2% and 4.0%, respectively. The adoption of new US GAAP rules on January 1, 2010 governing when an entity should be consolidated resulted in an increase of CHF 15 billion to our 1Q10 opening consolidated balance sheet. The increase in assets and liabilities did not have an impact on our risk-weighted assets, tier 1 capital or economic risk. For further information, refer to I – Core Results – Accounting changes in 1Q10.

Under FINMA requirements that impose an increase in market risk capital for every scaled VaR backtesting exception over ten in the prior rolling 12 month period, we had incurred additional incremental capital charges on trading book market risk-weighted assets in 2009 from backtesting exceptions in 3Q08 and 4Q08. In 2009, we had no backtesting exceptions and consequently the market risk capital multipliers decreased in 4Q09 to the FINMA and BIS minimum levels. For the purposes of this charge, backtesting exceptions are calculated using a subset of actual daily trading revenues that includes

Capital structure

Percentages refer to tier 1 and total eligible capital before capital deductions.

¹ Lower tier 2 capital will no longer qualify for regulatory capital after 2020 but can be issued through 2010.

² Hybrid instruments in the form of non-cumulative perpetual preferred securities and capital notes that either have a fixed maturity or an incentive to repay, such as a step-up in the coupon if the instrument is not redeemed when callable.

³ Hybrid instruments in the form of non-cumulative perpetual preferred securities and capital notes that have no fixed maturity and no incentive for repayment.

⁴ Hybrid instruments with a pre-defined mechanism that converts them into tier 1 capital, such as mandatory convertible bonds convertible into common shares.

⁵ Qualifying noncontrolling interests including common shares in majority owned and consolidated banking and finance subsidiaries and tier 1 capital securities securing deeply subordinated notes issued by SPEs.

only the impact of daily movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions.

For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2008.

Regulatory capital – Group

The minor decrease in the tier 1 ratio compared to 3Q09 reflected a 1% decline in tier 1 capital and stable risk-weighted assets.

Tier 1 capital decreased CHF 0.3 billion to CHF 36.2 billion as of the end of 4Q09. The decrease was driven by the effect of share-based compensation and a dividend accrual, mostly offset by net income (excluding the impact of fair value gains/(losses) on Credit Suisse debt, net of tax). Total eligible capital decreased to CHF 45.7 billion from CHF 46.5 billion in 3Q09, primarily due to a 5% decrease in tier 2 capital driven by the regulatory amortization of lower tier 2 instruments and

fair value movements (excluding the impact of fair value gains or losses on Credit Suisse debt).

Risk-weighted assets were stable at CHF 222 billion as of the end of 4Q09. An increase in credit risk, mainly resulting from a reduction in the hedging of our loan portfolio, was offset by a decline in market risk primarily caused by a decrease in incremental capital charges on trading book market risk-weighted assets. For further information regarding market risk refer to Risk management – Market risk.

Our total capital ratio was 20.6% as of the end of 4Q09, compared to 20.9% as of the end of 3Q09, primarily reflecting the decrease in eligible capital. For further information refer to the table "BIS Statistics".

Regulators continued to focus on minimum bank capital requirements, harmonization of capital requirements, the improved quality of tier 1 capital and the continued inclusion in regulatory capital of tier 2 instruments. For further information, refer to – Regulatory developments.

¹ Non-cumulative perpetual preferred securities and capital notes. The FINMA has advised that Credit Suisse Group and the Bank may continue to include as tier 1 capital CHF 1.7 billion and CHF 4.4 billion, respectively, in 4Q09 (3Q09: CHF 1.7 billion and CHF 4.4 billion, respectively; 4Q08: CHF 1.8 billion and CHF 4.6 billion, respectively) of equity from special purpose entities that are deconsolidated under US GAAP. Hybrid tier 1 capital represented 32.9% and 32.7% of the Group's and the Bank's adjusted tier 1 capital, respectively, as of the end of 4Q09 (3Q09: 32.9% and 32.3%, respectively; 4Q08: 35.0% and 34.3%, respectively). Under the decree with the FINMA, a maximum of 35% of tier 1 capital can be in the form of these hybrid capital instruments. ² Includes cumulative fair value adjustments on Credit Suisse debt, net of tax, anticipated but not yet declared dividends, the net long position in own treasury shares in the trading book and an adjustment for the accounting treatment of pension plans.

Tangible book value per share	23.88	24.36	19.37	(2)	23

¹ Tangible shareholders' equity attributable to shareholders is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows for the consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

Shareholders' equity

Our shareholders' equity decreased to CHF 37.5 billion as of the end of 4Q09 from CHF 38.2 billion as of the end of 3Q09. The decrease was driven by the effect of share-based compensation and the change in other comprehensive income, reflecting pension actuarial losses and the negative impact of foreign exchange rate changes on cumulative translation adjustments, partly offset by the net income in 4Q09.

Regulatory developments

In December 2009, the BCBS published consultative proposals to strengthen the resilience of the banking sector. The proposals are aimed at strengthening capital and liquidity regulations. The BCBS proposals are not expected to be finalized until later in 2010 following an impact assessment by the BCBS and are expected to be implemented over a period of time. The impact of these proposals on us will be assessed as the details and timing of the implementation are clarified. Final

BCBS requirements may be adjusted when implemented by FINMA and our other regulators.

Economic capital

Overview

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is called economic capital because it measures risks in terms of economic realities rather than regulatory or accounting rules. Economic capital is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given the institution's target financial strength (i.e., long-term credit rating).

For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2008.

Prior economic capital balances have been restated for methodology changes in order to show meaningful trends.

¹ Primarily includes anticipated dividends, unrealized gains and losses on fair valued assets and liabilities (excluding gains and losses from the FVOD transaction) and unrealized gains on owned real estate. Economic adjustments are made to tier 1 capital to enable comparison between capital utilization and resources. ² Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, diversification benefit and an estimate for the impacts of certain methodology changes planned for 2010. ³ Includes primarily expense risk diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital. ⁴ Includes a diversification benefit of CHF 15 million. ⁵ Includes a diversification benefit of CHF 17 million.

We regularly review the economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In 4Q09, we reviewed the economic capital coverage ratio target and, as a result of this review, we changed the target band to 110% to 140% from 100% to 140%.

There are a number of planned revisions to Basel II market risk over the next two years, such as an incremental charge to capture default risk on trading book assets. These changes already form part of our economic capital framework, and we do not expect material future impacts to our economic capital from these changes. Any implications of the BCBS proposals on the economic capital framework will be assessed as the details and timing of the implementation are clarified.

Utilized economic capital trends

Over the course of 4Q09, our utilized economic capital was stable, reflecting minor changes in position risk.

For further information on our position risk, refer to Risk management – Key position risk trends.

Capital adequacy trends

The economic capital coverage ratio was stable in 4Q09 at 134%, as economic capital resources and utilized economic capital were flat. Our coverage ratio is within our target band of 110% to 140%.

Risk management

Our overall position risk was stable in 4Q09. Average VaR for our trading books increased 21% to CHF 116 million, and period-end VaR increased 41% to CHF 131 million, compared to 3Q09. Excluding the effect of model enhancements, average VaR would have increased 14% and period-end VaR would have increased 18%.

Economic capital – Position risk

Position risk, which is a component of the economic capital framework, is our core Group-wide risk management tool. It is used to assess, monitor and report risk exposures throughout the Group and represents good market practice. Position risk is the level of unexpected loss in economic value on our portfolio of positions over a one-year horizon, which is exceeded with a given small probability (1% for risk management purposes; 0.03% for capital management purposes).

For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Economic capital and position risk in the Credit Suisse Annual Report 2008.

We regularly review the economic capital methodology to ensure that the model remains relevant as markets and business strategies evolve. There were no material changes to the economic capital methodology in 4Q09.

Prior period balances have been restated for methodology changes in order to show meaningful trends.

¹ This category comprises fixed income trading, foreign exchange and commodity exposures. ² This category comprises commercial and residential real estate, ABS exposure, real estate acquired at auction and real estate fund investments.

Key position risk trends

Position risk for risk management purposes at the end of 4Q09 was stable compared to 3Q09. International lending & counterparty position risk declined, primarily reflecting reductions in derivatives and loan exposures in Investment Banking, and emerging markets position risk declined primarily in Asia and Latin America. The decreases were offset by other increased position risk, primarily in fixed income trading due to higher non-investment grade traded credit exposures.

Compared to the end of 4Q08, position risk for risk management purposes decreased 5%. Excluding the US dollar translation impact, position risk decreased 3%. The decreases were primarily due to lower emerging markets exposures across Latin America, Eastern Europe and Asia and reduced real estate & structured assets exposures, primarily in the CMBS exit business. Position risk also decreased in international lending & counterparty exposures, reflecting lower derivatives exposures in Investment Banking. The decreases were mostly offset by increased position risks in fixed income trading, due to higher traded credit exposures, and in private banking corporate & retail lending, due to higher corporate loan risk.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements similar to other trading securities, and may result in gains or losses

which offset losses or gains on the portfolio they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not perfectly offset the losses or gains on the portfolio.

Market risk

We primarily assume market risk through the trading activities in Investment Banking. The other divisions also engage in trading activities, but to a much lesser extent. Trading risks are measured using VaR along with a number of other risk measurement tools. VaR is the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon and for a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no abrupt changes in market conditions. Other tools are more appropriate for modeling the impact from severe market conditions. We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio.

In 4Q08, we introduced a new scaling technique. The new technique (scaled VaR) adjusts VaR in cases where short-term market volatility is higher than longer-term volatility from a three year dataset. This more responsive VaR measure is an

One-day, 99% VaR

Excludes risks associated with counterparty and own credit exposures.

¹ As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

Daily VaR

Actual daily trading revenues

additional tool during times when market volatility rapidly increases. We monitor both VaR and scaled VaR for risk management purposes. We have approval from FINMA to use our scaled VaR model in the calculation of trading book market risk capital requirements.

We present one-day, 99% VaR, which is ten-day VaR adjusted to a one-day holding period based on a 99% confidence level. This means there is a 1-in-100 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. In order to show the aggregate market risk

in our trading books, the table entitled “Daily VaR” shows the trading-related market risk on a consolidated basis.

Our average VaR during 4Q09 increased 21% to CHF 116 million from 3Q09 and decreased 28% from 4Q08. The increase in average VaR from 3Q09 was partially due to the introduction of an enhanced credit spread VaR methodology, which better reflects the behavior of credit spreads during stressed market conditions and improves the capturing of basis risks, and partially due to increased risk usage in support of our client flow businesses across fixed income and equities

in 4Q09. Period-end VaR as of the end of 4Q09 increased 41% to CHF 131 million from the end of 3Q09, and increased 7% from the end of 4Q08.

Excluding the effect of the changes to the credit spread VaR methodology, average VaR would have been CHF 109 million, an increase of 14%, and period-end VaR would have been CHF 110 million, an increase of 18%, compared to 3Q09.

In 4Q09, our average scaled VaR was CHF 119 million, an increase of 3% from 3Q09 and a decrease of 51% from 4Q08. Period-end scaled VaR as of the end of 4Q09 increased 22% to CHF 131 million from the end of 3Q09, and decreased 29% from the end of 4Q08.

Various techniques are used to assess the accuracy of the VaR models, including backtesting. In line with industry practice, we present backtesting using actual daily trading revenues. Actual daily trading revenues are compared with VaR calculated using a one-day holding period. A backtesting exception occurs when the trading revenue loss exceeds the daily VaR estimate. We had no scaled VaR backtesting exceptions during 4Q09. The histogram entitled "Actual daily trading revenues" reflects the distribution of actual daily trading revenues during 4Q09, 3Q09 and 4Q08. The width of this distribution provides another indication of the day-to-day risk in our trading activities. For further information on the use of our scaled VaR model in the calculation of trading book market risk capital requirements, refer to Treasury management – Capital management.

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market-making and trading activities involving banking book positions at the divisions. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product).

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have amounted to a valuation increase of CHF 7.7 million as of the end of 4Q09, compared to a valuation increase of CHF 8.0 million as of the end of 3Q09.

Credit risk

Credit risk is the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations. In the event of a default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries resulting from foreclosure, liquidation of collateral or the restructuring of the debtor company.

The majority of our credit risk is concentrated in Private Banking and Investment Banking. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions and may be on or off-balance sheet.

Our regular review of the creditworthiness of clients and counterparties does not depend on the accounting treatment of the asset or commitment. Adverse changes in the creditworthiness of counterparties of loans held at fair value are reflected in valuation changes reported directly in revenues, and therefore are not part of the impaired loans balance. For further information on credit risk, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Credit risk in the Credit Suisse Annual Report 2008. For further information on counterparty credit risk, refer to Note 24 – Fair value of financial instruments in V – Condensed consolidated financial statements – unaudited.

The following table represents credit risk from loans, loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable securities or credit hedges. Loan commitments

include irrevocable credit facilities for Investment Banking and Private Banking and, additionally in Private Banking, unused credit limits which can be revoked at our sole discretion upon notice to the client.

Before risk mitigation, for example, collateral, credit hedges.

¹ Positive replacement value after netting agreements.

Loan exposure

Compared to the end of 3Q09, gross loans decreased 2% to CHF 238.6 billion. In Private Banking, gross loans were stable at CHF 176.2 billion. Gross loans in Investment Banking decreased 6% to CHF 62.4 billion, due to declines in commercial & industrial loans and loans to financial institutions, partially offset by increased loans to governments and public institutions. Gross impaired loans were stable at CHF 2.3 billion. A decrease in impaired loans in Private Banking was largely offset by a slight increase in Investment Banking. The decrease in Private Banking was mainly due to decreased non-performing and non-interest earning loans, while potential problem loans were stable. In Investment Banking, the increase in potential problem loans was partially offset by a decrease in non-performing loans. A portion of the impaired

loans in Investment Banking is economically hedged by insurance and other risk mitigation, including credit default swaps (CDS). We recorded a net release of provision for credit losses of CHF 40 million in 4Q09 compared to a net provision of CHF 53 million in 3Q09, with a net release of CHF 66 million in Investment Banking, partially offset by a net provision of CHF 26 million in Private Banking.

Compared to the end of 4Q08, gross loans were stable. In Investment Banking, a decrease in commercial & industrial loans was offset mainly by an increase in loans to financial institutions. The loan portfolio in Private Banking was stable. Gross impaired loans decreased CHF 428 million, or 16%, mainly driven by lower potential problem loans and non-performing loans in Investment Banking.

¹ At par value CHF 0.04 each, fully paid, net of 20,743,620 treasury shares. In addition to the treasury shares, a maximum of 124,843,275 unissued shares (conditional and authorized capital) were available for issuance without further approval of the shareholders. ² Distributions to owners in funds include the return of original capital invested and any related dividends. ³ Transactions with and without ownership changes related to fund activity are all displayed under "not changing ownership". ⁴ The Group has purchased certain call options on its own shares to economically hedge all or a portion of the leverage element of the Incentive Share Units granted to the employees during 2009. In accordance with US GAAP, these call options are designated as equity instruments and, as such, are initially recognized in shareholders' equity at their fair values and not subsequently remeasured. ⁵ At par value CHF 0.04 each, fully paid, net of 16,159,287 treasury shares. In addition to the treasury shares, a maximum of 284,076,649 unissued shares (conditional and authorized capital) were available for issuance without further approval of the shareholders.

Notes to the condensed consolidated financial statements – unaudited

Note 1 Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2008, included in the Credit Suisse Annual Report 2008. For a description of the Group's significant accounting policies, refer to Note 1 – Summary of significant accounting policies in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The presentation of period over period change and the 3Q09 consolidated statements of operations and consolidated balance sheet have been added for convenience of the reader and are not a required presentation under US GAAP.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

FASB establishes Accounting Standards Codification

In June 2009, the Financial Accounting Standards Board (FASB) established the FASB Accounting Standards Codification (Codification or ASC) as the single authoritative source of

US GAAP. The Codification became effective July 1, 2009 and supersedes all existing non-SEC accounting and reporting standards. Under the Codification, the FASB will not issue new accounting standards in the form of Standards, FASB Staff Positions or Emerging Issues Task Force Abstracts. The FASB will instead issue Accounting Standards Updates (ASU), which will serve to update the Codification, provide background information about the guidance and provide the basis for conclusions on changes to the Codification. United States (US) Securities and Exchange Commission (SEC) rules and interpretive releases remain in force for SEC registrants.

The Codification is not intended to change US GAAP, but it will change the manner in which authoritative accounting guidance is organized, presented and referenced. These financial statements include references only to the Codification topics.

Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards. For a complete description of recently adopted accounting standards, refer to Note 2 – Recently issued accounting standards in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

ASC Topic 260 – Earnings Per Share

In June 2008, the FASB provided guidance for when certain instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in computing earnings per share under the two class method.

The Group adopted the guidance as of January 1, 2009. All prior-period earnings per share data presented has been adjusted retrospectively to conform with the guidance.

ASC Topic 320 – Investments – Debt and Equity Securities

In April 2009, the FASB updated accounting guidance regarding recognition and presentation of other-than-temporary impairments. The update amends the other-than-temporary impairment guidance in US GAAP for debt securities to make the guidance more operational and to improve the presentation

and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements.

The guidance was effective for interim and annual reporting periods ending after June 15, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows. For further information, refer to Note 13 – Investment securities.

In April 2009, the SEC issued Staff Accounting Bulletin (SAB) No. 111, "Miscellaneous Accounting – Other Than Temporary Impairment of Certain Investments in Equity Securities" (SAB 111). SAB 111 addresses the guidance provided in the ASU regarding other-than-temporary impairments and retains the SEC staff's views as to whether an impairment of an equity security is other-than-temporary.

SAB 111 was effective for interim and annual reporting periods ending after June 15, 2009. The adoption of SAB 111 did not have a material impact on the Group's financial condition, results of operations or cash flows.

ASC Topic 325 – Investments – Other

In January 2009, the FASB amended guidance regarding impairments to achieve a more consistent determination of whether an other-than-temporary impairment has occurred for beneficial interests purchased or held by a transferor in securitized financial assets. The update also retains and emphasizes the objective of an other-than-temporary impairment assessment and the related disclosure requirements in Topic 320 – Investments – Debt and Equity Securities and other related guidance.

The Group adopted the guidance on December 31, 2008. The adoption of the guidance did not have an impact on the Group's financial condition, results of operations or cash flows.

ASC Topic 715 – Compensation – Retirement Benefits

In December 2008, the FASB expanded the disclosure requirements regarding the plan assets of a defined benefit pension or other postretirement plan. The additional disclosures required by the update for each annual period include:

- (i) how investment allocation decisions are made, including the factors that are pertinent to an understanding of investment policies and strategies;
- (ii) the major categories of plan assets;
- (iii) the inputs and valuation techniques used to measure the fair value of plan assets;
- (iv) the effect of fair value measurements using significant unobservable inputs (level 3) on changes in plan assets for the period; and
- (v) significant concentrations of risk within plan assets.

The disclosure requirements of the guidance are required for fiscal years ending after December 15, 2009.

The guidance mandates additional disclosures and, as such, did not have an impact on the Group's financial position, results of operations or cash flows.

ASC Topic 805 – Business Combinations

In April 2009, the FASB issued guidance to address application issues raised by preparers, auditors and members of the legal profession on initial recognition and measurement, subsequent measurement and accounting and disclosure of assets and liabilities arising from contingencies in a business combination.

The guidance was effective for assets and liabilities arising from contingencies in business combinations from January 1, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

In December 2007, the FASB updated accounting guidance regarding business combinations to require an acquiring entity to recognize all assets acquired, liabilities assumed and any noncontrolling interest in the acquiree at their fair values at the acquisition date.

The guidance also requires substantial new disclosures and will change the accounting treatment for the recognition of acquisition costs, restructuring costs and in-process research and development as well as the recognition and subsequent measurement of acquired contingent liabilities.

The Group has applied the guidance prospectively to business combinations that occurred after January 1, 2009 and there was no impact arising from the exception for income taxes that was applicable to business combinations consummated prior to January 1, 2009.

ASC Topic 810 – Consolidation

In January 2010, the FASB issued ASU 2010-02, "Accounting and Reporting for Decreases in Ownership of a Subsidiary – a Scope Clarification", (ASU 2010-02). ASU 2010-02 provides amendments to Subtopic 810-10 to clarify the scope of the decrease in ownership provisions. The amendment also clarifies the transactions to which the decrease in ownership guidance in Subtopic 810-10 does not apply. ASU 2010-02 also expands the disclosure about the deconsolidation of a subsidiary or derecognition of a group of assets within Subtopic 810-10.

The Group adopted the provisions of ASU 2010-02 retrospectively to January 1, 2009. The adoption of the guidance did not have an impact on the Group's financial condition, results of operations or cash flows.

In December 2007, the FASB issued guidance to establish accounting and reporting standards for a noncontrolling interest in a subsidiary and for deconsolidation of a subsidiary.

The guidance requires the recognition of a noncontrolling interest as equity in the consolidated financial statements separate from the parent's equity. In addition, net income attributable to the noncontrolling interest must be included in consolidated net income on the face of the income statement. The guidance clarifies that changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest. The guidance has additional disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners.

The Group adopted the presentation and transaction guidance of the ASU as of January 1, 2009.

ASC Topic 815 – Derivatives and Hedging

In September 2008, the FASB issued guidance to require sellers of credit derivatives to disclose information about credit derivatives, hybrid instruments that have embedded credit derivatives and guarantees. These disclosures include the nature and term of the credit derivative, the maximum potential future payments the seller could be required to make under the credit derivative, the fair value of the credit derivative and the nature of any recourse provisions that would enable the seller to recover from third parties any amounts paid under the credit derivative. For a guarantee, the disclosure should include the status of the payment and performance risk of the instrument.

The Group adopted the disclosure requirements of the guidance on December 31, 2008. For further information, refer to Note 21 – Derivatives and hedging activities.

In June 2008, the FASB issued guidance to require an entity to evaluate whether an equity-linked financial instrument is indexed to its own stock using a two step approach. The first step requires entities to evaluate the instrument's contingent exercise provisions, if any. The second step requires entities to evaluate the instrument's settlement provisions.

The Group adopted the guidance as of January 1, 2009. Adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

In March 2008, the FASB amended and expanded the disclosure requirements for derivative instruments and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: i) how and why an entity uses derivative instruments; ii) how derivative instruments and related hedge items are accounted for under the Codification; and iii) how derivative instruments and related

hedge items affect an entity's financial position, financial performance and cash flows.

The ASU requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value gains and losses on derivative instruments and credit-risk-related contingent features in derivative agreements.

The ASU encourages but does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In years after initial adoption, the ASU requires comparative disclosures only for periods subsequent to initial adoption. The ASU mandates additional disclosures and, as such, will not impact the Group's financial position, results of operations or cash flows.

The Group adopted the ASU as of January 1, 2009. For further information, refer to Note 21 – Derivatives and hedging activities.

ASC Topic 820 – Fair Value Measurements and Disclosures

In September 2009, the FASB issued ASU 2009-12, "Investments in Certain Entities that Calculate Net Asset Value per Share (or its Equivalent)" (ASU 2009-12), an update to Topic 820 – Fair Value Measurements and Disclosures. ASU 2009-12 is applicable to an investment that has the attributes defined by ASC 946, Financial Services – Investment Companies, but does not have a readily determinable fair value. For those investments that are within its scope, ASU 2009-12 permits, as a practical expedient, an entity to measure the fair value of an investment using net asset value per share of the investment and also requires additional disclosures. The ASU 2009-12 also provides guidance regarding the classification within the fair value hierarchy.

ASU 2009-12 was effective for periods ending after December 15, 2009. The adoption of ASU 2009-12 did not have a material impact on the Group's financial condition, results of operations, cash flows or net classification within the fair value hierarchy. For further information related to the disclosure requirements of ASU 2009-12, refer to Note 24 – Fair value of financial Instruments.

In August 2009, the FASB issued ASU 2009-05, "Measuring Liabilities at Fair Value" (ASU 2009-05), an update to Topic 820 – Fair Value Measurements and Disclosures. ASU 2009-05 provides clarification on how a liability is to be measured when a quoted price in an active market for an identical liability is not available. In addition, ASU 2009-5 provides clarification that a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of a liability.

ASU 2009-05 is effective for the first reporting period beginning after issuance, however early application is permitted. The adoption of ASU 2009-05 on October 1, 2009 did not have a material impact on the Group's financial condition, results of operations or cash flows.

In April 2009, the FASB provided additional guidance regarding the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased and for identifying transactions that are not orderly. The ASU has additional disclosure requirements.

The guidance was effective prospectively for interim and annual reporting periods ending after June 15, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

In October 2008, the FASB issued guidance to clarify the application of Topic 820 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active.

The guidance was effective upon issuance, including prior periods for which financial statements had not been issued. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

ASC Topic 825 – Financial Instruments

In April 2009, the FASB issued guidance to require disclosures for publicly traded companies about fair value of financial instruments for interim reporting periods as well as in annual financial statements.

The guidance was effective for interim reporting periods ending after June 15, 2009. The guidance mandates additional disclosures and, as such, did not impact the Group's financial position, results of operations or cash flows.

ASC Topic 855 – Subsequent Events

In May 2009, the FASB updated accounting guidance regarding subsequent events. The update provides additional guidance on:

- (i) the period after the balance sheet date during which management of a reporting entity shall evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements;
- (ii) the circumstances under which an entity shall recognize events or transactions occurring after the balance sheet date in its financial statements; and
- (iii) the disclosures that an entity shall make about events or transactions that occurred after the balance sheet date.

The guidance was effective prospectively for interim and annual reporting periods ending after June 15, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

ASC Topic 860 – Transfers and Servicing

In December 2008, the FASB issued guidance to require public entities to provide additional disclosures about transfers of financial assets and their involvement with Variable Interest Entities (VIEs).

The Group adopted the disclosure requirements of the guidance on December 31, 2008. For further information, refer to Note 23 – Transfers of financial assets and variable interest entities.

In February 2008, the FASB issued guidance regarding a repurchasing financing, which is a repurchase agreement that relates to a previously transferred financial asset between the same counterparties that is entered into contemporaneously with, or in contemplation of, the initial transfer. The guidance mandates that a transferor and transferee shall not separately account for a transfer of a financial asset and a related repurchase financing unless the two transactions have a valid and distinct business or economic purpose for being entered into separately and the repurchase financing does not result in the initial transferor regaining control over the financial asset. The guidance establishes a presumption that an initial transfer and a repurchase financing are linked unless certain criteria are met. If the criteria are not met, the initial transfer is not accounted for as a sale by the transferor and the repurchase financing is accounted for as a forward contract.

The Group applied the guidance to all prospective transactions as of January 1, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

Standards to be adopted in future periods

ASC Topic 860 – Transfer and Servicing

In December 2009, the FASB issued ASU 2009-16, "Accounting for Transfer of Financial Assets" (ASU 2009-16). ASU 2009-16 was issued to update the Codification for the June 2009 issued Statement of Financial Accounting Standards (SFAS) No. 166, "Accounting for Transfer of Financial Assets – an amendment of FASB Statement No. 140", which previously had not been incorporated into the Codification. ASU 2009-16 requires additional disclosures about the transfer of financial assets, including securitization transactions, and continuing exposure to the risks related to transferred financial assets. It eliminates the concept of a "qualifying special-purpose entity". ASU 2009-16 also changes the requirements for derecognizing financial assets.

ASU 2009-16 is effective for annual periods that begin after November 15, 2009 (January 1, 2010 for the Group) and for interim and annual reporting periods thereafter. As this standard applies to prospective transactions entered into after the effective date and generally relates to whether transactions will be recognized as sales or secured financings for accounting purposes but will not change the economics of the underlying transactions, the Group does not believe that its financial condition, results of operations and cash flows will be materially impacted by the adoption of ASU 2009-16.

ASC Topic 810 – Consolidation

In December 2009, the FASB issued ASU 2009-17, "Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities" (ASU 2009-17). ASU 2009-17 was issued to update the Codification for the June 2009 issued standard SFAS 167, "Amendments to FASB Interpretation No. 46(R)". ASU 2009-17 changes how a reporting entity determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. Under this standard, the determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance.

ASU 2009-17 is effective for annual reporting periods that begin after November 15, 2009 (January 1, 2010 for the Group) and for interim and annual reporting periods thereafter.

The adoption of ASU 2009-17 on January 1, 2010 resulted in an increase of CHF 15 billion to our consolidated balance sheet and a reduction in retained earnings of approx-

imately CHF 2 billion. The consolidation of these entities did not have an impact on tier 1 capital or risk-weighted assets.

Upon consolidation, transactions between the Group and the formerly unconsolidated entities became intercompany transactions and are eliminated.

ASC Topic 820 – Fair Value Measurements and Disclosures

In January 2010, the FASB issued ASU 2010-06, "Improving Disclosures about Fair Value Measurements" (ASU 2010-06), an update to Topic 820 – Fair Value Measurements and Disclosures. ASU 2010-06 requires both new and clarifies existing fair value measurement disclosures. The new requirements include disclosure of transfers in and out of level 1 and 2 and gross presentation of purchases, sales, issuances, and settlements in the reconciliation of beginning and ending balances of level 3 instruments. The clarifications required by ASU 2010-06 include the level of disaggregation in the fair value hierarchy and level 3 reconciliation of assets and liabilities by class of financial instrument. In addition the reporting entity should expand its disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements included in levels 2 and 3 of the fair value hierarchy.

The new disclosures and clarifications are effective for interim and annual periods beginning after December 15, 2009, except the disclosures about purchases, sales, issuances, and settlements in reconciliation of beginning and ending balances of level 3 instruments, which are effective for fiscal years beginning after December 15, 2010. ASU 2010-06 is an update only for disclosures and as such will not impact the Group's financial position, results of operations or cash flows.

Note 2 **Business developments and subsequent events**

Acquisitions and divestitures

For further information on divestitures, refer to Note 3 – Discontinued operations.

There were no significant acquisitions in 2009.

Subsequent events

For the purpose of issuing these financial statements, management evaluated events and transactions through, to and including February 10, 2010. Based on these evaluations, no subsequent events were identified that require further recognition or disclosure.

Note 3 **Discontinued operations**

On December 31, 2008 the Group signed an agreement to sell part of its traditional investment strategies business in Asset Management to Aberdeen Asset Management. The transaction was completed with the final closing on July 1, 2009. The related gains on disposal of CHF 186 million and CHF 261 million in 3Q09 and 2009, respectively, represent gains from the deconsolidation of subsidiaries and include primarily valuation gains of CHF 207 million and CHF 228 million in 3Q09 and 2009, respectively, on Aberdeen shares received as part of the closings and the effect of a decrease in net assets transferred to Aberdeen. In return for the sale of these businesses, the Group acquired 240 million shares in

Aberdeen, resulting in a total interest of 23.9%. Prior to this transaction, Aberdeen was an unrelated party to the Group.

The results of operations of the business sold have been reflected in income from discontinued operations in the consolidated statements of operations for all periods presented. The assets and liabilities of the business sold have been presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, in the consolidated balance sheet beginning in 4Q08. Assets and liabilities are reclassified as held-for-sale in the period in which the disposal determination is made, and prior periods are not reclassified.

Income from discontinued operations

			in		% change		in		% change	
	4Q09	3Q09	4Q08	QoQ	YoY	2009	2008	YoY		
Income from discontinued operations (CHF million)										
Net revenues	0	0	80	–	(100)	56	346	(84)		
Total expenses	0	(7)	(136)	100	100	(167)	(393)	(58)		
Income/(loss) from discontinued operations before taxes	0	(7)	(56)	100	100	(111)	(47)	136		
Gain/(loss) on disposal	0	186 ¹	(463)	(100)	100	261 ¹	(463)	–		
Income tax expense/(benefit)	0	(9)	19	100	(100)	(19)	21	–		
Income/(loss) from discontinued operations, net of tax	0	188	(538)	(100)	100	169	(531)	–		

¹ Represents net gains from the deconsolidation of subsidiaries. The Group did not retain any investment in the former subsidiaries.

Note 4 **Segment reporting**

Overview

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of three segments: Private Banking, Investment Banking and Asset Management. The three segments are complemented by Shared Services, which provides support in the areas of finance, operations, including human resources, legal and compliance, risk management and information technology.

The segment information reflects the Group's reportable segments as follows:

- Private Banking offers comprehensive advice and a broad range of wealth management solutions, including pension planning, life insurance products, tax planning and wealth and inheritance advice, which are tailored to the needs of high-net-worth individuals worldwide. In Switzerland, it supplies banking products and services to individual clients, including affluent, high-net-worth and ultra-high-net-worth clients, and corporates and institutions.
- Investment Banking offers investment banking and securities products and services to corporate, institutional and government clients around the world. Its products and services include debt and equity underwriting, sales and trading, mergers and acquisitions advice, divestitures, corporate sales, restructuring and investment research.
- Asset Management offers integrated investment solutions and services to institutions, governments and private clients. It provides access to a wide range of investment classes, building on its global strengths in alternative investments and traditional investment strategies.

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Noncontrolling interest-related revenues and expenses resulting from the consolidation of certain private equity funds and other entities in which the Group does not have a significant economic interest in such revenues and expenses are reported as noncontrolling interests without significant economic interest. The consolidation of these entities does not affect net income attributable to shareholders as the amounts recorded in net revenues and total operating expenses are offset by corresponding amounts reported as noncontrolling interests. In addition, our tax expense is not affected by these revenues and expenses.

Revenue sharing and cost allocation

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements govern the compensation received by one segment for generating revenue or providing services on behalf of another. These agreements are negotiated periodically by the relevant segments on a product-by-product basis.

The aim of revenue-sharing and cost allocation agreements is to reflect the pricing structure of unrelated third-party transactions.

Corporate services and business support in finance, operations, including human resources, legal and compliance, risk management and information technology are provided by the Shared Services area. Shared Services costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

Funding

Credit Suisse centrally manages its funding activities. New securities for funding and capital purposes are issued primarily by the Bank. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record net revenues and expense in each of the segments for this capital and funding. The Group's funds transfer pricing system is designed to allocate to its businesses funding costs in a way that incentivizes their efficient use of funding. The Group's funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet and the costs associated with funding balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this system, the Group's businesses are also credited to the extent they provide long-term stable funding.

Taxes

The Group's segments are managed and reported on a pre-tax basis.

Net revenues and income/(loss) before taxes

	in			% change		in			% change	
	4Q09	3Q09	4Q08	QoQ	YoY	2009	2008	YoY

Management determined that the unrealized losses on debt securities are primarily attributable to general market interest rate, credit spread or exchange rate movements. No significant impairment charges were recorded as the Group does not

intend to sell the investments, nor is it more likely than not that the Group will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

Note 18 **Tax**

The effective tax rate on income from continuing operations was 31.6% in 4Q09. The effective tax rate primarily reflected the impact of the geographical mix of results.

Net deferred tax assets were CHF 8,819 million as of the end of 4Q09, an overall net reduction of CHF 69 million, including foreign exchange translation impacts. Net deferred tax assets comprise CHF 6,294 million on net operating losses and CHF 2,525 million on other temporary differences. Foreign exchange translation impacts include foreign exchange losses of CHF 73 million, which are included within the currency translation adjustment recorded in accumulated other comprehensive income.

The Group is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 240 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2007; Japan – 2005; the US – 1999; and the UK – 1999.

Note 19 **Employee share-based compensation and other compensation benefits**

Payment of share-based compensation and other compensation benefits is determined by the nature of the business, role, location and performance of the employee. Unless there is a contractual obligation, share-based compensation and other compensation benefits are solely at the discretion of the Group. For further information on share-based compensation plans and the related fair value assumptions, refer to Note 27 – Employee share-based compensation and other compensation benefits in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Total compensation expense for share-based compensation and other awards recognized in compensation and benefits in the consolidated statements of operations was CHF 3,356 million and CHF 3,539 million in 2009 and 2008, respectively. As of December 31, 2009, the total estimated unrecognized compensation expense of CHF 1,875 million related to non-vested share-based compensation and other compensation benefits will be recognized over the remaining weighted-average requisite service period of 1.4 years.

The Group generally repurchases its own shares in the open market to satisfy obligations in connection with share-

based compensation, but it can also issue new shares out of available conditional capital. In 2009 and 2008, the Group delivered approximately 39.1 million and 17.2 million Credit Suisse Group AG shares (Group shares), respectively, to employees.

Share-based compensation

Incentive Share Unit

Since 2006, the Group has issued Incentive Share Units (ISUs) as the main form of share-based deferred variable compensation. An ISU is a unit that is similar to shares, but offers additional upside depending on the development of the Group share price.

The compensation expense recognized in 2009 and 2008 related to ISUs was CHF 1,645 million and CHF 2,375 million, respectively. The estimated unrecognized compensation expense related to these awards as of December 31, 2009 was CHF 799 million and will be recognized over the term of the award, subject to early retirement rules.

Incentive Share Unit activities

in	2009	2008
Number of awards (million)		
Balance at beginning of period	59.8	25.4
Granted	26.4	47.1
Settled	(43.6)	(10.0)
Forfeited	(1.1)	(2.7)
Balance at end of period	41.5	59.8
of which vested	2.7	1.4
of which unvested	38.8	58.4

Performance Incentive Plan

As part of its annual variable compensation process for 2004 and 2005, the Group granted Performance Incentive Plan share units (PIP units) during 2005 (PIP I) and 2006 (PIP II), respectively. PIP units are long-term retention incentive awards requiring continued employment with the Group, subject to restrictive covenants and cancellation provisions, and vest evenly over a five-year period. Each PIP unit will settle for a specified number of registered Group shares subsequent to the fifth anniversary of the grant date based on the achievement of: i) earnings performance as compared to predefined

targets; and ii) Group share price performance compared to predefined targets and Group share price performance relative to peers.

The compensation (income)/expense recognized in 2009 and 2008 related to PIP I and PIP II was CHF (22) million and CHF 114 million, respectively. The income recognized in 2009 reflected claw-backs. PIP I was fully expensed as of December 31, 2009. The estimated unrecognized compensation expense related to PIP II as of December 31, 2009 was CHF 7 million and will be recognized over a period of one year. None of the PIP units were due for settlement as of December 31, 2009.

of which unvested	1.7	1.7	3.0	3.9

Share awards

The Group's share-based compensation as part of the yearly discretionary variable compensation in prior years included three different types of share awards: phantom shares, Longevity Premium Awards (LPA) and special awards. These share awards entitle the holder to receive one registered Group share subject to continued employment with the Group, restrictive covenants and cancellation provisions, and generally vest between zero and three years. Special awards are generally shares, which may be granted to new employees. These

special awards contain vesting conditions depending on the terms of employment.

The compensation expense recognized in 2009 and 2008 related to shares awarded under phantom share, LPA and special awards was CHF 282 million and CHF 593 million, respectively. The estimated unrecognized compensation expense related to these awards as of December 31, 2009 was CHF 481 million, a majority of which will be recognized over a period of five years.

Share award activities

in	2009		2008

Share award activities				
Balance at beginning of period	20.8	61.83	28.8	67.20
Granted	8.3	40.37	8.6	46.97
Settled	(12.8)	69.07	(15.1)	61.57
Forfeited	(0.8)	53.33	(1.5)	82.82
Balance at end of period	15.5	45.67	20.8	61.83
of which vested	1.2	–	0.2	–
of which unvested	14.3	–	20.6	–

Share options

Options were a substantial component of the Group's share-based program prior to 2004. The Group discontinued the practice of issuing options and the majority of the original grants have since vested. Share options were granted with an exercise price equal to the market price of Group's shares on the date of grant and expire after ten years.

Other compensation benefits

Partner Asset Facility

As part of the 2008 annual compensation process, the Group awarded employees in Investment Banking with a corporate title of managing director or director the majority of the deferred portion of their variable compensation in the form of PAF awards, denominated in US dollars. The PAF units are

indexed to, and represent a first-loss interest in, a specified pool of illiquid assets that originated in Investment Banking.

The contractual term of the PAF award is eight years. 66.7% of the PAF awards were fully vested upon grant and attributed to services performed in 2008 and 33.3% of the PAF awards vested in 1Q09.

On January 21, 2009, the Group granted PAF awards to employees with a total notional value of CHF 686 million. The compensation expense recognized in 2009 related to PAF was CHF 629 million, including the vesting of the remaining 33.3% and the change in the underlying fair value of the awards during 2009. The compensation expense recognized in 2008 relating to PAF was CHF 457 million. There is no unrecognized compensation expense as of December 31, 2009. In addition, compensation expense will be updated at each reporting period date to reflect any change in the underlying

fair value of the PAF awards until the awards are finally settled.

Cash Retention Awards

For 2008, managing directors across all divisions, all directors in Investment Banking and, to the extent the cash component of variable compensation exceeded CHF 300,000, directors in Private Banking, Asset Management and Shared Services received deferred variable compensation in the form of CRA. These CRA payments, which were made in 1Q09, are subject to vesting ratably over a two-year period and other conditions and any unvested CRA will have to be repaid if a claw-back event, such as voluntary termination of employment, occurs. The compensation expense recognized in 2009 related to CRA was CHF 822 million. The estimated unrecognized compensation expense as of December 31, 2009 was CHF 588 million and will be recognized over a period of one year.

Note 20 Pension and other post-retirement benefits

The Group previously disclosed that it expected to contribute CHF 468 million to the Swiss and international defined benefit pension plans and other post-retirement defined benefit plans in 2009. In 2009, contributions of CHF 615 million were made, including approximately CHF 130 million as a special contribution to the UK plan in 4Q09.

For further information on pension and other post-retirement benefits, refer to Note 29 – Pension and other post-retirement benefits in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Note 21 Derivatives and hedging activities

Derivatives are generally either privately negotiated OTC contracts or standard contracts transacted through regulated exchanges. The Group's most frequently used freestanding derivative products, entered into for trading and risk management purposes, include interest rate, cross-currency and credit default swaps (CDS), interest rate and foreign exchange options, foreign exchange forward contracts and foreign exchange and interest rate futures.

The Group also enters into contracts that are not considered derivatives in their entirety but include embedded derivative features. Such transactions primarily include issued and purchased structured debt instruments where the return may be calculated by reference to an equity security, index or third-party credit risk, or that have non-standard interest or foreign exchange terms.

On the date a derivative contract is entered into, the Group designates it as belonging to one of the following categories:

- trading activities;
- a risk management transaction that does not qualify as a hedge under accounting standards (referred to as an economic hedge);
- a hedge of the fair value of a recognized asset or liability;
- a hedge of the variability of cash flows to be received or paid relating to a recognized asset or liability or a forecasted transaction; or
- a hedge of a net investment in a foreign operation.

Trading activities

The Group is active in most of the principal trading markets and transacts in many popular trading and hedging products. As noted above, this includes the use of swaps, futures, options and structured products, such as custom transactions using combinations of derivatives, in connection with its sales and trading activities. Trading activities include market making, positioning and arbitrage activities. The majority of the Group's derivatives held as of December 31, 2009 were used for trading activities.

Economic hedges

Economic hedges arise when the Group enters into derivative contracts for its own risk management purposes, but the contracts entered into do not qualify for hedge accounting under US GAAP. These economic hedges include the following types:

- interest rate derivatives to manage net interest rate risk on certain core banking business assets and liabilities;

- foreign exchange derivatives to manage foreign exchange risk on certain core banking business revenue and expense items, as well as on core banking business assets and liabilities;
- credit derivatives to manage credit risk on certain loan portfolios; and
- futures to manage risk on equity positions including convertible bonds.

Derivatives used in economic hedges are included as trading assets or trading liabilities in the consolidated balance sheets.

Hedge accounting

Fair value hedges

The Group designates fair value hedges as part of an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize fluctuations in earnings that are caused by interest rate volatility. In addition to hedging changes in fair value due to interest rate risk associated with fixed rate loans, repurchase agreements and long-term debt instruments, the Group uses:

- cross-currency swaps to convert foreign-currency-denominated fixed rate assets or liabilities to floating rate functional currency assets or liabilities; and
- foreign exchange forward contracts to hedge the foreign exchange risk associated with available-for-sale securities.

Cash flow hedges

The Group designates cash flow hedges as part of its strategy to mitigate its risk to variability of cash flows on loans, deposits and other debt obligations by using interest rate swaps to convert variable rate assets or liabilities to fixed rates. The Group also uses cross-currency swaps to convert foreign-currency-denominated fixed and floating rate assets or liabilities to fixed rate assets or liabilities based on the currency profile that the Group elects to be exposed to. This includes, but is not limited to, Swiss francs and US dollars. Further, the Group uses derivatives to hedge its cash flows associated with forecasted transactions.

Net investment hedges

The Group designates net investment hedges as part of its strategy to hedge selected net investments in foreign operations against adverse movements in foreign exchange rates, typically using forward foreign exchange contracts.

Hedge effectiveness assessment

The Group assesses the effectiveness of hedging relationships both prospectively and retrospectively. The prospective assessment is made both at the inception of a hedging relationship and on an ongoing basis, and requires the Group to justify its expectation that the relationship will be highly effective over future periods. The retrospective assessment is also performed on an ongoing basis and requires the Group to determine whether or not the hedging relationship has actually been effective. If the Group concludes, through a retrospective evaluation, that hedge accounting is appropriate for the current period, then it measures the amount of hedge ineffectiveness to be recognized in earnings.

Fair value of derivative instruments

The table below presents gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in this table. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities. The information below relates to all trading activities and not just those related to derivative instruments.

Trading Revenues

Trading revenues includes revenues from trading financial assets and liabilities as follows:

- Equities;
- Commodities;
- Listed and OTC derivatives;
- Derivatives linked to funds of hedge funds and providing financing facilities to funds of hedge funds;
- Market making in the government bond and associated OTC derivative swap markets;
- Domestic, corporate and sovereign debt, convertible and non-convertible preferred stock and short-term securities such as floating rate notes and CP;

- Market making and positioning in foreign exchange products;
- Credit derivatives on investment grade and high yield credits;
- Trading and securitizing all forms of securities that are based on underlying pools of assets; and
- Life settlement contracts.

Trading revenues also includes changes in the fair value of financial assets and liabilities elected to fair value under US GAAP. The main components include certain instruments from the following categories:

- Central bank funds purchased/sold;
- Securities purchased/sold under resale/repurchase agreements;
- Securities borrowing/lending transactions;
- Loans and loan commitments; and
- Customer deposits, short-term borrowings and long-term debt.

Managing the risks

As a result of the Group's broad involvement in financial products and markets, its trading strategies are correspondingly diverse and exposures are generally spread across a diversified range of risk factors and locations. The Group uses an economic capital limit structure to limit overall risk taking. The level of risk incurred by its divisions is further restricted by a variety of specific limits, including consolidated controls over trading exposures. Also, as part of its overall risk management, the Group holds a portfolio of economic hedges. Hedges are impacted by market movements, similar to trading securities, and may result in gains or losses on the hedges which offset losses or gains on the portfolios they were designed to economically hedge. The Group manages its trading risk with regard to both market and credit risk. For market risk, it uses tools capable of calculating comparable exposures across its many activities, as well as focused tools that can specifically model unique characteristics of certain instruments or portfolios.

The principal measurement methodology for trading assets, as well as most instruments for which the fair value option was elected, is VaR. The Group holds securities as collateral and enters into CDS to mitigate the credit risk on these products.

Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below that specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market of the derivative contract.

Bilateral counterparties

The aggregate fair value of derivative instruments with credit-risk-related contingent features that were in a net liability position as of December 31, 2009 was CHF 10.5 billion, for which the Group posted collateral of CHF 9.0 billion. If the credit-risk-related contingent features underlying these agreements were triggered as of December 31, 2009, the Group would be required to post additional collateral of CHF 0.2 billion in the event of a one-notch downgrade. A two-notch downgrade would require additional aggregate collateral posting of CHF 0.5 billion.

Special purpose entities

The current exposure, which by contract may include amounts other than or in addition to the negative replacement value, of derivative instruments with credit-risk-related contingent features as of December 31, 2009 was CHF 3.3 billion, for which the Group posted collateral of CHF 3.4 billion. If the credit-risk-related contingent features underlying these agreements were triggered as of December 31, 2009, the Group would be required to post additional collateral of CHF 2.4 billion in the event of a one-notch downgrade. A two-notch downgrade would require additional aggregate collateral posting of CHF 4.4 billion.

Credit derivatives

Credit derivatives are contractual agreements in which the buyer generally pays a fee in exchange for a contingent payment by the seller if there is a credit event on the underlying referenced entity or asset. Credit derivatives are generally privately negotiated OTC contracts. Most credit derivatives are structured so that they specify the occurrence of an identifiable credit event, which can include bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet obligations when due.

The credit derivatives most commonly transacted by the Group are CDS and credit swaptions. A CDS is a contractual agreement in which the buyer of the swap pays an upfront and/or a periodic fee in return for a contingent payment by the seller of the swap following a credit event of the referenced entity or asset. Credit swaptions are options with a specified maturity to buy or sell protection under a CDS on a specific referenced credit event.

The Group enters into credit derivative contracts in the normal course of business, buying and selling protection to facilitate client transactions and as a market maker. This includes providing structured credit products for its clients to enable them to hedge their credit risk. The referenced instruments of these structured credit products are both investment grade and high yield underlyings and could include corporate bonds, sovereign debt, ABS and loans. These referenced instruments can form a single item or be combined on a portfolio basis. The Group purchases protection to economically hedge various forms of credit exposure, for example, the economic hedging of loan portfolios or other cash positions. Finally, the Group also takes proprietary positions which can take the form of either purchased or sold protection.

The following tables reflect the maximum potential amount of future payments that the Group would be required to make under the credit derivatives as a result of credit-risk-related events for which it has sold protection. The segregation of the future payments by maturity range and underlying risk gives

an indication of the current status of the potential for performance under the derivative contracts. The fair values of the derivatives also give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable. To reflect the quality of the payment risk on credit protection sold, the Group assigns an internally generated rating to those instruments referenced in the contracts. Internal ratings are assigned by experienced credit analysts based on expert judgment that incorporates analysis and evaluation of both quantitative and qualitative factors. The specific factors analyzed, and their relative importance, are dependent on the type of counterparty. The analysis emphasizes a forward-looking approach, concentrating on economic trends and financial fundamentals, and making use of peer analysis, industry comparisons and other quantitative tools. External ratings and market information are also used in the analysis process where available.

The tables also include the estimated recoveries that would be received if the specified credit event occurred, including the anticipated value of the underlying referenced asset that would, in most instances, be transferred to the Group and the impact of any purchased protection with an identical reference instrument and product type. In the normal course of business, the Group also purchases protection to offset the risk of sold protection that may have similar, but not identical, reference instruments, and may use similar, but not identical, products. The impacts of these transactions have not been included in the estimate of recoveries. In addition, to reduce its credit risk, the Group enters into legally enforceable netting agreements with its derivative counterparties. Collateral on these derivative contracts is usually posted on a net counterparty basis and cannot be allocated to a particular derivative contract, and, therefore, has not been included in the estimate of recoveries.

Credit derivative maximum potential payout by maturity

of which sovereigns	347	(58)	111	299	(139)	89
of which non-sovereigns	350,112	(8,719)	341,716	640,072	(68,557)	628,742

¹ Based on internal ratings of BBB and above.

The above maximum potential payout relates only to sold protection. The Group also purchases protection, which reduces total credit derivative exposure. As of December 31, 2009, 93% of the notional amount of credit protection purchased by counterparty was comprised of banks and broker-dealers, 6% was comprised of other financial institutions, primarily hedge funds, and 1% was comprised of other counterparties.

The above tables do not include all credit derivatives and differ from the balance for credit derivatives in the fair value of derivative instruments table. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index

based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit-risk-related events specified in the contract. Total return swaps (TRS) are excluded because a TRS does not expose the seller to potential loss from credit-risk-related events specified in the contract. A TRS only provides protection against a loss in asset value, and not against additional amounts as a result of specific credit events. CDOs are also excluded because the derivative embedded in a CDO does not require bifurcation under US GAAP as it relates to the creditworthiness of the securitized financial assets and liabilities. As a result, they are not subject to this disclosure.

¹ Total net amount is computed as the gross amount less any participations. ² Collateral for derivatives accounted for as guarantees is not considered significant.

Guarantees provided by the Group are broadly classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, securities lending indemnifications, derivatives and other guarantees.

For a detailed description of guarantees, refer to Note 31 – Guarantees and commitments in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Deposit-taking banks in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. These deposit insurance guarantees are reflected in other guarantees.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees are not reflected in the table above and are discussed below.

Disposal-related contingencies

In connection with the sale of assets or businesses, the Group sometimes provides the acquirer with certain indemnification provisions. These indemnification provisions vary by counterparty in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. The Group closely monitors all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in the Group's consolidated financial statements.

Other indemnifications

The Group provides indemnifications to certain counterparties in connection with its normal operating activities, for which it is not possible to estimate the maximum amount that it could be obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax-withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obli-

gation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses and may, as a result of its membership arrangements, be required to perform if another member defaults. The Group has determined that it is not possible to estimate the maximum amount of these obligations and believes that any potential requirement to make payments under these arrangements is remote.

Other commitments

Total other commitments	223,618	53,662	277,280	270,455	190,302

¹ Total net amount is computed as the gross amount less any participations.

Other commitments of the Group are broadly classified as follows: irrevocable commitments under documentary credits, loan commitments, forward reverse repurchase agreements and other commitments.

For a detailed description of these commitments, refer to Note 31 – Guarantees and commitments in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Note 23 **Transfers of financial assets and variable interest entities**

In the normal course of business, the Group enters into transactions with, and makes use of, special purpose entities (SPEs). An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity and Group tax or regulatory purposes. SPEs typically qualify either as qualified special purpose entities (QSPEs) or VIEs. QSPEs have significant limitations on the types of assets and derivative instruments they may own and the types and extent of activities and decision-making in which they may engage. At each balance sheet date, QSPEs and VIEs are reviewed for events that may trigger reassessment of the entities' classification.

For further information on transfers of financial assets, refer to Note 32 – Transfers of financial assets and variable interest entities in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Transfers of financial assets

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using QSPEs. In order to qualify as a QSPE, the permitted activities of the entity must be limited to passively holding financial assets and distributing cash flows to investors based on pre-set terms. QSPEs may not actively manage their assets through discretionary sales and are generally limited to making decisions inherent in servicing activities and issuance of liabilities. Entities that qualify as QSPEs are not consolidated at inception and the risk of subsequent consolidation is minimal under current US GAAP.

The Group originates and/or purchases commercial and residential mortgages for the purpose of securitization and

sells these mortgage loans to QSPEs. These QSPEs issue CMBS, RMBS and ABS that are collateralized by the assets transferred to the QSPE and pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the QSPEs. The investors and the QSPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also purchases loans and other debt obligations from clients for the purpose of securitization that are sold by the Group directly or indirectly through affiliates to QSPEs that issue CDOs. The Group structures, underwrites and may make a market in these CDOs. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Investors typically only have recourse to the collateral of the CDO and do not have recourse to the Group's assets.

Securitization transactions are assessed for appropriate treatment of the assets transferred by the Group. The Group's and its clients' investing or financing needs determine the structure of each transaction, which in turn determines whether sales accounting and subsequent derecognition of the transferred assets applies. Certain transactions may be structured to include derivatives or other provisions that prevent sales accounting.

In 2009, the Group began transacting in resecuritizations of previously issued RMBS securities. Typically, certificates are reissued out of an existing securitization vehicle into a newly created and separate securitization vehicle. Often these resecuritizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The following table provides the gains or losses and proceeds from the transfer of assets relating to the 2009 and 2008 securitizations of financial assets treated as sales, along with cash flows between the Group and the QSPEs or SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization

occurred. Only those transactions that qualify for sales accounting and subsequent derecognition of the transferred assets and in which the Group has continuing involvement with the entity as of the end of 2009 and 2008 are included in the table.

Securizations

in	2009		2008	
	QSPE	SPE	QSPE	SPE
Gains/(losses) and cash flows (CHF million)				
CMBS				
Net gain/(loss) ¹	0	0	(4)	36
Proceeds from transfer of assets	144	0	674	463
Purchases of previously transferred financial assets or its underlying collateral	0	0	(173)	0
Servicing fees	1	0	2	0
Cash received on interests that continue to be held	239	5	273	0
RMBS				
Net gain ¹	194	0	56	0
Proceeds from transfer of assets	34,246	0	20,998	0
Purchases of previously transferred financial assets or its underlying collateral	(46)	0	(3)	0
Servicing fees	6	0	4	0
Cash received on interests that continue to be held	329	0	230	1
ABS ²				
Net gain	0	19	0	0
Proceeds from transfer of assets	0	104	0	0
Purchases of previously transferred financial assets or its underlying collateral	0	(18)	0	0
Cash received on interests that continue to be held	6	12	3	19
CDO				
Net gain ¹	73	34	7	56
Proceeds from transfer of assets	380	1,994	929	683
Purchases of previously transferred financial assets or its underlying collateral	(392)	(1,458)	0	0
Cash received on interests that continue to be held	0	13	0	44

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the QSPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans. ² Primarily home equity loans.

Other asset-backed financing activities

The Group also uses SPEs for other client-driven activity and for Group tax or regulatory purposes. These activities include energy structures (which include certain carbon securitization vehicles), life insurance structures, emerging market structures (set up for financing, loan participation or loan origination purposes) and other alternative investment structures (created for the purpose of investing in venture capital-like investments for capital appreciation).

Conduits are occasionally formed to act as an SPE to fund securitization transactions. The SPE is typically independently

owned by a third party and is not a subsidiary of the Group. Rather, the Group acts as the sponsor and provides liquidity and credit enhancement, along with other parties.

The Group may be involved in arranging leveraged synthetic leases. These structures are third-party SPEs established for the securitization of lease receivables. The Group typically receives an upfront fixed arrangement fee and its only other involvement is financing to and loan repayments from the SPE.

The Group also sets up structures that hold various collateralized commercial loans in the normal course of business.

The following table provides the gains or losses relating to 2009 and 2008 transfers of financial assets treated as sales that were not securitizations, along with cash flows between

the Group and the SPEs used in such transfers in which the Group had continuing involvement as of the end of 2009 and 2008, regardless of when the transfer of assets occurred.

Other asset-backed financing activities

	2009	2008
in	SPE	SPE
Gains/(losses) and cash flows (CHF million)		
Net gain ¹	12	22
Proceeds from transfer of assets	3,494	6,063
Purchases of previously transferred financial assets or its underlying collateral	(219)	0
Cash received on interests that continue to be held	1,422	1,315

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the OSPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the other asset-backed financing activity. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the other asset-backed financing activity pricing date and the sale price of the loans.

The Group does not retain material servicing responsibilities from securitizations or other asset-backed financing activities.

Continuing involvement in transferred financial assets

The following table provides the outstanding principal balance of assets to which the Group continues to be exposed after

the transfer of the financial assets to any QSPE or SPE and the total assets of the QSPE or SPE as of the end of 4Q09 and 4Q08, regardless of when the transfer of assets occurred.

Sensitivity analysis

The fair values of the assets or liabilities that result from any continuing involvement are determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing

involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

The following tables provide the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of 4Q09 and 4Q08.

Sensitivity analysis of key economic assumptions used in measuring fair value of beneficial interests held in SPEs

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances. ² CDOs are generally structured to be protected from prepayment risk. ³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR. ⁴ The rate was based on the weighted-average yield on the beneficial interests.

Impact on fair value from 10% adverse change	(25.3)	(15.5)	(4.0)	(2.2)	(17.1)
Impact on fair value from 20% adverse change	(50.0)	(30.9)	(4.2)	(4.2)	(26.9)

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances. ² CDOs are generally structured to be protected from prepayment risk. ³ PSA is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the CPR assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR. ⁴ The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair

value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of 4Q09 and 4Q08.

Variable interest entities

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are broadly grouped into three primary categories: CDOs, CP conduits and financial intermediation. VIEs are SPEs that typically either lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. Such entities are required to be assessed for consolidation, compelling the primary beneficiary to consolidate the VIE. The primary beneficiary is the party that will absorb the majority of expected losses, receive the majority of the expected residual returns, or both. The Group consolidates all VIEs for which it is the primary beneficiary. VIEs may be sponsored by the Group, unrelated third parties or clients. At each balance sheet date, VIEs are reviewed for events that may trigger reassessment of the entities' classification and/or consolidation.

Except as described below, the Group has not provided financial or other support to consolidated or non-consolidated

VIEs that it was not previously contractually required to provide.

In 2007, the Group repositioned its money market funds by purchasing securities from those funds with the intent to eliminate structured investment vehicle, ABS, CDO and US subprime exposure. The securities transactions were executed in order to address liquidity concerns caused by the US market's challenging conditions. The Group had no legal obligation to purchase these securities. The Group had no lift outs in 4Q09 and lift outs of corporate securities of CHF 145 million in 4Q08. As of the end of 4Q09 and 4Q08, the fair value of its balance sheet exposure from these purchased securities was CHF 260 million and CHF 567 million, respectively. Net gains/(losses) on securities purchased from the Group's money market funds were CHF 47 million and CHF (164) million in 4Q09 and 4Q08, respectively.

Collateralized debt obligations

As part of its structured finance business, the Group purchases loans and other debt obligations from, and on behalf

of, clients for the purpose of securitization. The loans and other debt obligations are sold to VIEs that issue CDOs. VIEs issue CDOs to fund the purchase of assets such as investment grade and high yield corporate debt instruments. The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets.

Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one CP conduit, Alpine Securitization Corp. (Alpine), a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily receivables, from clients and provides liquidity through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to related asset-specific credit enhancement primarily provided by the client transferor of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. The majority of expected losses reside with the first-loss investor and therefore the Group is not deemed the primary beneficiary of Alpine. The Group does not have any ownership interest in Alpine.

The overall average maturity of the conduit's outstanding CP was approximately 14 days and 11 days as of 4Q09 and 4Q08, respectively. As of 4Q09 and 4Q08, Alpine had the highest short-term ratings from Fitch, Moody's and DBRS and was rated A-1 by S&P. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including auto loans or leases, credit card receivables and student loans. As of 4Q09 and 4Q08, those assets had a weighted average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 3.6 years and 3.4 years as of 4Q09 and 4Q08, respectively.

The Group's commitment to this CP conduit consists of obligations under liquidity agreements and a program-wide credit enhancement agreement. The liquidity agreements are asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP

conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The Group may, at its discretion, purchase assets that fall below investment grade in order to support the CP conduit. In both circumstances, the asset-specific credit enhancements provided by the client seller of the assets and the first-loss investor's respective exposures to those assets remain unchanged. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit. The program-wide credit enhancement agreement with the CP conduit would absorb potential defaults of the assets, but is senior to the credit protection provided by the client seller of assets and the first-loss investor. In 2Q09, the Group funded its potential obligation under existing liquidity agreements by lending to Alpine USD 8 billion as part of a transaction designed to reduce the volatility of the changes in credit spreads for Credit Suisse debt carried at fair value (the FVOD transaction).

If Alpine's purchased assets were consolidated as of 4Q09, the Group estimated that the valuation reductions of these assets would not have been material to its results of operations. Under ASU 2009-17, Alpine was consolidated as of January 1, 2010. The Group believes that the likelihood of incurring a loss equal to the maximum exposure is remote because the purchased assets held by the CP conduit, after giving effect to related asset-specific credit enhancement primarily provided by the clients, are classified as investment grade. The Group's economic risks associated with the purchased assets of the CP conduit are included in the Group's risk management framework including counterparty, economic capital and scenario analysis.

Financial intermediation

Financial intermediation consists of securitizations, funds, loans, and other vehicles. Securitizations are primarily CMBS, RMBS and ABS vehicles. Funds include investment structures such as mutual funds, funds of funds, private equity funds and fund-linked products where the investor's interest is typically in the form of debt rather than equity, thereby making them VIEs. Loans include single-financing vehicles where the Group provides financing for specified assets or business ventures and the respective owner of the assets or manager of the business provides the equity in the vehicle. Other vehicles include additional vehicles where the Group provides financing as well as the total assets of the Group's trust preferred structures.

Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidated all VIEs related to financial intermediation for which it was the primary beneficiary.

Consolidated VIE assets and liabilities are shown net of intercompany eliminations.

Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Maximum exposure to loss represents the variable interests of non-consolidated VIEs that are recorded by the Group (for example, direct holdings in vehicles, loans and other receivables), as well as notional amounts of guarantees and off-balance sheet commitments that have been extended to non-consolidated VIEs. Such amounts, particularly notional amounts of derivatives and guarantees, do not represent the

anticipated losses in connection with these transactions as they do not take into consideration the effect of collateral, recoveries or the probability of loss. In addition, they exclude the effect of offsetting financial instruments that are held to mitigate these risks and have not been reduced by unrealized losses previously recorded by the Group in connection with guarantees or derivatives.

Total assets of the non-consolidated VIEs are related to the non-consolidated VIEs with whom the Group has variable interests. These amounts are typically unrelated to the exposures the Group has with the entity and are not amounts that are considered for risk management purposes.

Further provided in the footnotes to the following table is information about QSPEs, which are not included in the tabular amounts as they are not VIEs under current US GAAP, as well as other entities that the Group has sponsored but for which it has negligible continuing involvement or that continu-

ing involvement takes the form of derivative assets, guarantees and revocable lines of credit maintained for fund vehicles that do not meet the definition of a variable interest under US GAAP.

 Note 24 **Fair value of financial instruments**

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. Further deterioration of financial markets could significantly impact the value of these financial instruments and the results of operations. For these instruments, the determination of fair value requires subjective assessment and varying degrees of judgment, depending on liquidity, concentration, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, most mortgage-related and CDO securities, certain equity derivatives and equity-linked securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high-grade bonds, and life insurance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as credit valuation adjustments or CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as debit valuation adjustments or DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when

measuring their fair value, based on current funded debt spreads.

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in the Investment Banking and Asset Management segments. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which we are economically hedged, we have elected the fair value option. Likewise, where we manage an activity on a fair value basis but previously have been unable to achieve fair value accounting, we have utilized the fair value option to align our risk management reporting to our financial accounting.

In April 2009, the FASB amended and expanded the disclosure requirements for the Group's reporting of assets and liabilities measured at fair value on a recurring basis for level 3 for June 30, 2009, but did not require retrospective application. Comparable data was not presented in prior periods.

Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the

Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

For further information on the fair value of financial instruments and an overview of the Group's valuation techniques applied to financial instruments, refer to Note 33 – Financial instruments in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2008.

Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

in	2009			2008		
	Trading revenues	Other revenues	Total revenues	Trading revenues	Other revenues	Total revenues
Gains and losses on assets and liabilities (CHF million)						
Net realized/unrealized gains/(losses) included in net revenues	2,280	(2,495)	(215) ¹	(8,768)	(2,120)	(10,888) ¹
Whereof:						
Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date	(2,506)	(2,354)	(4,860)	(2,726)	(3,210)	(5,936)

¹ Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. As of December 31, 2009 and December 31, 2008, CHF 1.1 billion and CHF 3.0 billion, respectively, of loans have been recorded at fair value on a nonrecurring basis,

of which CHF 0.1 billion and CHF 0.3 billion, respectively, were classified as level 2 and CHF 1.0 billion and CHF 2.6 billion, respectively, were classified as level 3.

Fair value option

The following represents a change to the Group's fair value elections beginning in 1Q08.

Long-term debt

The Group's long-term debt includes debt issuances managed by its Global Treasury department that do not contain derivative features. The Group actively manages the interest rate risk on these instruments with derivatives; in particular, fixed-rate debt is hedged with receive-fixed, pay-floating interest rate swaps. Upon adoption of the fair value option, the Group availed itself of the simplification objective of the fair value option and elected fair value for this fixed-rate debt in order to achieve a similar financial reporting outcome as that achieved under hedge accounting per the guidance of US GAAP. Given the significant volatility due to changes in the Group's credit spreads, the Group did not elect to apply the fair value option to fixed-rate debt issued by the Group in 1Q08 or subsequently and instead applied hedge accounting.

Difference between the aggregate fair value and the aggregate unpaid principal balances of loans and financial instruments

Other liabilities	1,299 ²	(1,542) ²
of which related to credit risk	1,125	(631)

¹ Primarily recognized in net interest income. ² Primarily recognized in trading revenues. ³ Primarily recognized in other revenues. ⁴ Changes in fair value related to credit risk is due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt related to credit risk were CHF (4,458) million and CHF 4,989 million in 2009 and 2008, respectively.

Disclosures about fair value of financial instruments

US GAAP requires the disclosure of the fair values of financial instruments for which it is practicable to estimate those values, whether or not they are recognized in the consolidated financial statements, excluding all non-financial instruments

such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations.

¹ Primarily includes cash and due from banks, interest-bearing deposits with banks, brokerage receivables, loans held-for-sale, cash collateral on derivative instruments, interest and fee receivables and non-marketable equity securities. ² Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

Note 25 **Assets pledged or assigned****Assets pledged or assigned**

end of	4Q09	4Q08
Assets pledged or assigned (CHF million)		
Book value of assets pledged or assigned as collateral	222,050	165,406
of which assets provided with the right to sell or repledge	141,634	89,915
Fair value of collateral received with the right to sell or repledge	337,448	515,655
of which sold or repledged	300,665	452,875

The Group received collateral in connection with resale agreements, securities lending and loans, derivative transactions and margined broker loans. A substantial portion of the collateral received by the Group was sold or repledged in connec-

tion with repurchase agreements, securities sold but not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Note 26 **Subsidiary guarantee information**

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding US SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities

may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

Note 27 **Litigation**

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. Some of these actions have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts. The Group believes, based on currently available information and advice of counsel, that the results of such proceedings, in the aggregate, will not have a material adverse effect on its financial condition but might be material to operating results for any particular period, depending, in part, upon the operating results for such period. The Group believes that the reasonably possible losses relating to such claims in excess of its provisions are either not material or not estimable.

The Group accrues for legal costs (including fees and expenses of external lawyers and other service providers) in connection with certain judicial, regulatory and arbitration proceedings when such costs are probable and reasonably estimable.

It is inherently difficult to predict the outcome of many of these matters. In presenting the condensed consolidated financial statements, management makes estimates regarding the outcome of these matters, records a reserve and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the litigation, claim or proceeding, the progress of the matter, the advice of legal counsel, the Group's defenses and its experience in similar cases or proceedings, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings.

Further charges or releases of litigation reserves may be necessary in the future as developments in such litigation, claims or proceedings warrant.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of a continued US or global economic downturn in 2010 and beyond;
- the direct and indirect impacts of continuing deterioration of subprime and other real estate markets;
- further adverse rating actions by credit rating agencies in respect of structured credit products or other credit-related exposures or of monoline insurers;

- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and other cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the information set forth in our Annual Report 2008 – Additional Information – Risk Factors.

For a detailed presentation of Credit Suisse Group's financial statements 2008, its company structure, risk management, corporate governance and an in-depth review of its operating and financial results, refer to the **Annual Report 2008**. For a summary of our performance during the business year and a close look at innovation through examples from various areas of the bank, refer to our **Business Review 2008**. For information on how the Bank assumes its responsibilities when conducting its business activities, including its commitments toward the environment and various stakeholders within society, refer to the **Corporate Citizenship Report 2008**.
