## Introduction

This report filed on Form 6-K contains certain information about Credit Suisse AG to be incorporated by reference in the Registration Statement on Form F-3 (file no. 333-158199). Credit Suisse Group AG's financial release for the first quarter of 2010 (Credit Suisse Financial Release 1Q10) is attached as an exhibit to this Form 6-K and was filed with the US Securities and Exchange Commission (SEC) on April 23, 2010. The Bank is incorporating by reference the Credit Suisse Financial Release 1Q10 (except for the sections entitled "Dear shareholders" and "Investor information"). On or about May 6, 2010, Credit Suisse will publish and file with the SEC the Financial Report 1Q10, which will include additional disclosures on fair value of financial instruments, derivatives and hedging activities, investment securities, assets pledged or assigned, and transfers of financial assets and variable interest entities.

Unless the context otherwise requires, reference herein to "Credit Suisse Group", "Credit Suisse", "the Group", "we", "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries and the term "the Bank" means Credit Suisse, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

The Bank, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. The Bank's registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to "CHF" are to Swiss francs.

The Credit Suisse Financial Release 1Q10 contains information for the three months ended March 31, 2010. The Group's independent registered public accounting firm has not completed its review of the condensed consolidated financial statements (unaudited) for the three months ended March 31, 2010 and the Group has not finalized its Financial Report for the period. Accordingly, such financial information is subject to completion of quarter-end procedures which may result in changes to that information.

## Forward-Looking Statements

This Form 6-K and the information incorporated by reference in this Form 6-K include statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Group's and the Bank's annual report on Form 20-F for the year ended December 31, 2009 (the Credit Suisse 2009 20-F), and subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC and the Group's and the Bank's reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

# Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Private Banking, Investment Banking and Asset Management segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the three segments, however, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Clariden Leu, Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking. Core Results also includes certain Group corporate center activities that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

## Differences between the Group and the Bank businesses

Entity	Principal business activity
Clariden Leu	Banking and securities
Neue Aargauer Bank	Banking (in the Swiss canton of Aargau)
BANK-now	Private credit and car leasing (in Switzerland)
Financing vehicles of the Group	Special purpose vehicles for various funding activities of the Group, including for purposes of raising consolidated capital

# Dear shareholders

Brady W. Dougan, Chief Executive Officer (left) and Hans-Ulrich Doerig, Chairman of the Board of Directors

In the first quarter of 2010 we provided further evidence that our client-focused, capital-efficient strategy and reduced-risk business model can generate stable, high-quality earnings. We are pleased that we were able to improve our operating performance compared to the strong first quarter of 2009. We achieved net income of CHF 2.1 billion and an industry-leading return on equity and capital position. Our return on equity was 22.3% and our tier 1 ratio was 16.4% at the end of the first quarter. We also generated strong client flows and maintained our track record of attracting strong net new assets, which totaled CHF 26.0 billion this quarter.

## Performance of our businesses

Private Banking delivered solid pre-tax income of CHF 0.9 billion and attracted net new assets of CHF 18.6 billion, with very strong inflows from Swiss and emerging markets clients in particular. We believe that we will further improve our profitability in Private Banking when markets and the demand for comprehensive solutions recover. We also expect to benefit from a higher interest rate environment. We are positioned to perform well in the changing regulatory environment in cross-border banking as we have been building a multi-shore business with a robust compliance framework for many years. We will continue to invest in strengthening and expanding our international presence.

Investment Banking is thriving as a result of the action we took to reposition the business in the changed financial services landscape. In the first quarter we recorded pre-tax income of CHF 1.8 billion, driven by well-diversified results across our businesses, as client-driven revenues rebounded to levels more consistent with the first three quarters of 2009. Our client-focused, capital-efficient strategy continued to deliver strong returns, with a pre-tax return on economic capital of 37.2%. We maintained market share momentum across our securities and banking businesses and our transaction pipelines remain strong. Our progress in Investment Banking is highlighted by our good performance in the league tables. We were ranked number one in announced M&A in the Americas and number three globally. We were also in the top five in global equity underwriting and number two in Europe, Middle East and Africa, as well as in the top five globally in investment grade and high yield underwriting, and number one in emerging markets underwriting and advisory share of wallet. We believe that we have a significant opportunity to extend our market share gains across our Investment Banking businesses as we build our distribution platform and expand our client base.

Asset Management reported pre-tax income of CHF 0.2 billion and strong net new assets of CHF 11.2 billion across most asset classes. We are focusing on core fee-generating

businesses in which we believe we can excel – asset allocation, the Swiss businesses and alternative investments. Asset Management is expected to benefit further from the strategic measures we undertook last year and to be a significant contributor of value to the bank and to our clients in 2010 and beyond.

The fact that Credit Suisse is in a strong position today is a reflection of the decisive action we have taken to prepare for the challenges of the new operating environment. At the same time, our position is a credit to the dedication of our people. We recognize that it is our people – and the reputation they earn for Credit Suisse – who will determine the value of our firm for our shareholders and clients in the long term. The continuity of our people in key positions, including in our control functions, has been extremely helpful throughout and since the crisis. Attracting, retaining and developing talented people will remain a key area of focus for Credit Suisse.

We entered the credit and financial market dislocation with a strong liquidity position, which we have maintained and strengthened through open market funding ever since, incurring significant additional costs as a result. This has positioned us well to meet the new rules for quantitative and qualitative liquidity management announced in April 2010 by the Swiss Financial Market Supervisory Authority, FINMA, when they become effective at the end of the second quarter of 2010.

## **Outlook**

Market conditions in the second quarter to date have remained similar to those in the first quarter and we are confident that our business model will enable us to continue to generate high-quality results in good as well as in more challenging market conditions. We are acting from a position of strength and can focus on the execution of our clearly-defined strategy and on serving our clients. Having carefully laid the foundations by building a robust franchise, we have an exceptional opportunity ahead of us to press our advantage home. We will redouble our efforts to drive our market share higher and set a benchmark for our industry in providing exceptional advice and service to our clients.

Yours sincerely

Hans-Ulrich Doerig  
April 2010

Brady W. Dougan

# Financial Release

# 1Q 10

On or about May 6, 2010, we will publish and file with the SEC our Financial Report 1Q10, which will include additional disclosures on:

- fair value of financial instruments;
- derivatives and hedging activities;
- investment securities;
- assets pledged or assigned; and
- transfers of financial assets and variable interest entities.

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

In various tables, use of "-" indicates not meaningful or not applicable.

# Credit Suisse at a glance

## Credit Suisse

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients and to high-net-worth individuals worldwide, as well as to private clients in Switzerland. Founded in 1856, we have a truly global reach today, with operations in over 50 countries and 48,300 employees from approximately 100 different nations. This worldwide reach enables us to generate a geographically balanced stream of revenues and net new assets and allows us to capture growth opportunities wherever they are. We serve our diverse clients through our three divisions, which cooperate closely to provide holistic financial solutions based on innovative products and specially tailored advice.

## Private Banking

Private Banking offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking division comprises the Wealth Management Clients and Corporate & Institutional Clients businesses. In Wealth Management Clients we serve ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland.

## Investment Banking

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client-driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with the Private Banking and Asset Management divisions to provide clients with customized financial solutions.

## Asset Management

Asset Management offers a wide range of investment products and solutions across asset classes, for all investment styles. The division manages global and regional portfolios, separate accounts, mutual funds and other investment vehicles for governments, institutions, corporations and individuals worldwide. Asset Management focuses on becoming a global leader in multi-asset class solutions as well as in alternative investments. To deliver the bank's best investment performance, Asset Management operates as a global integrated network in close collaboration with the Private Banking and Investment Banking divisions.

11 Core Results

18 Key performance indicators

# Operating environment

Global economic growth continued in 1Q10, but with large regional disparities. Expansionary monetary policies were maintained in most major countries as inflation remained under control. Equity markets ended the quarter slightly higher, with increased volatility in the banking sector.

## Economic environment

In 1Q10, the global economy continued to recover, but the speed and magnitude of improvement in economic activity continued to vary among countries and regions. Inflation picked up slightly due to higher energy prices, but given the early stage of the recovery, price pressures generally remained contained. Capacity utilization in most industrialized countries remained low, despite mild signs of improvement. Wage pressure did not generally impact inflation, reflecting continued high unemployment.

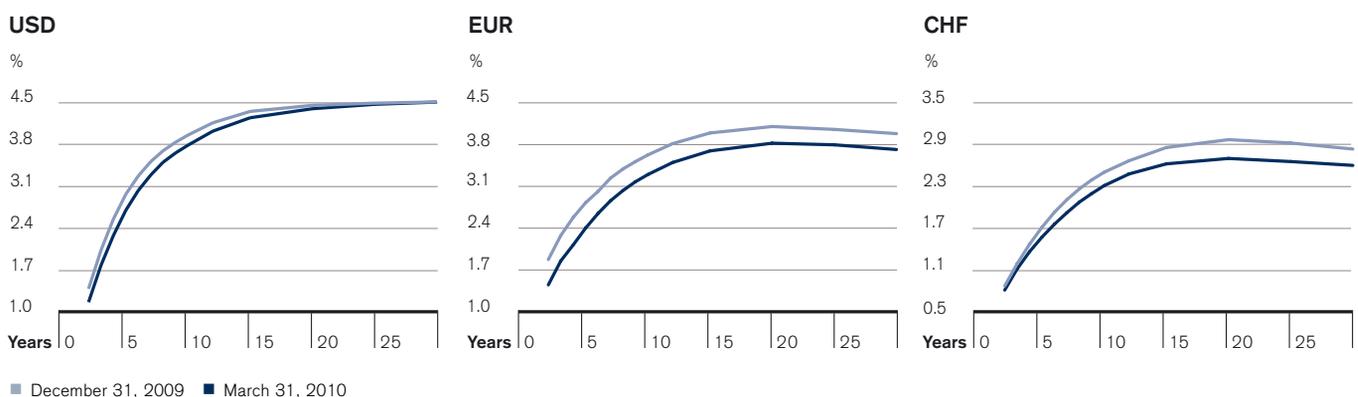

While signs of economic recovery became increasingly visible in larger EU countries (including Germany and France), some member states (including Greece, Italy, Ireland, Portugal and Spain) came under pressure from financial markets. The focus increasingly shifted to the sustainability of public finances, in particular concerns about Greece's ability to repay debt or to finance new loans, which led to higher risk premiums on the government bonds of affected countries. The economic recovery in the US continued, still assisted by fiscal stimulus and the re-building of inventories. US core inflation

showed the first monthly decline since the early 1980s, and given the absence of inflationary pressure, the US Federal Reserve (Fed) continued its expansionary monetary policy by keeping interest rates near zero and completing its substantial asset purchase program. More signs emerged that the recovery of the US economy had become broader, with business investment and private consumption starting to pick up. While the situation in the US labor market remained fragile in 1Q10, there were further indications of stabilization. Japan continued to experience deflation, despite the improved economic conditions and stronger export demand from China.

Emerging markets generally remained resilient. In particular, economies in non-Japan Asia experienced a robust economic recovery with a comparatively strong labor market and rising levels of capacity utilization, increasing the risk of inflation in these economies. The Chinese government began to take measures toward a less expansionary monetary policy with increased reserve requirements for major banks. In addition, China faced increased international pressure to subject its currency to market adjustments. The Reserve Bank of India raised the repurchase rate to counter rising inflationary pressure.

## Yield curves

Yields trended down in 1Q10 across most maturities.

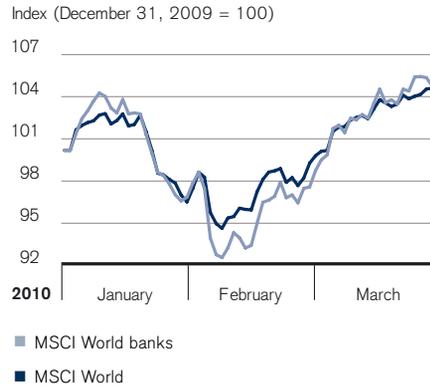

## Equity markets

Most equity markets ended 1Q10 slightly higher, despite rather large losses through mid-February.

### Performance region

### Performance world banks

### Volatility

Source: Bloomberg, MSCI Barra, Credit Suisse

Source: Datastream, MSCI Barra, Credit Suisse

Source: Datastream, Credit Suisse

Despite varying risk premiums for some European sovereign debt, swap yields declined in 1Q10 (refer to the charts "Yield curves"). The main driver for the lower swap yield levels was the improvement in the credit markets and strong ongoing new issuance activity. The narrowing of credit spreads in corporate, emerging and high yield markets caused the entire swap curve to move lower over the quarter compared to the prior quarter (refer to the charts "Credit spreads"). The market

for government bonds could not match this performance (with the exception of German and Swiss bonds) due to increased sovereign risks and fears of inflationary pressure. Equity markets declined until mid-February (refer to the charts "Equity markets"). Many investors saw this as a favorable buying opportunity, and stock prices rallied in the second half of 1Q10. Consumer discretionary, industrials and financial stocks outperformed during the second half of the quarter.

## Credit spreads

Credit spreads in the US and Europe peaked in mid-February mainly due to the refinancing concerns in some European countries.

Source: Bloomberg, Credit Suisse

The US dollar appreciated in the first quarter against the euro and British pound. While concerns over sovereign credit in some countries in the EU weighed on the euro, the British pound suffered due to weak growth in the UK and lower expectations for interest rate increases by the Bank of England (BoE). The broadening economic recovery and higher commodity prices led to a strong performance in Australian and Canadian dollars and emerging market currencies against the US dollar. The Swiss franc continued its upward trend against the euro and ended 1Q10 slightly weaker against the US dollar.

Commodity markets had a weak start in 1Q10, experiencing broad-based price declines in early in the quarter. Part of the decline was due to profit taking after a strong performance in late 2009 and the strengthening US dollar. Beginning in mid-February, commodity prices began to recover amid the first signs that commodity consumption had started to increase in developed countries. Cyclical commodities such as industrial metals and oil led the recovery. Gold prices traded in a narrow band during 1Q10, with investment demand slowing as the US dollar strengthened. Agricultural commodity prices initially followed the recovery of the cyclical markets, but prospects of increased production globally led to a price correction in March.

## Sector environment

1Q10 was a volatile quarter for the banking sector. European bank stocks fell by over 17% from their quarterly peak in January, followed by another sector recovery beginning in mid-February. Positive macroeconomic data and expectations of a more favorable earnings environment regarding trading and commission income supported bank stocks in the second half of 1Q10. Despite significant, longer-term funding needs, especially for European banks, long-term debt issuances by banks were low in 1Q10.

1Q10 had robust initial public offering (IPO) volumes and strong activity in debt issuance, with mergers and acquisitions (M&A) activity shifting towards emerging markets, in particular China. The global fee pool was down 23% compared to 4Q09, but up 38% compared to 1Q09. Debt capital markets contributed 37%, followed by equity capital markets, which was the leading contributor in 2009, with 31%. M&A share fell to 20%. Loans accounted for 12% of the global fee pool. Equity trading activity was sluggish in 1Q10 and remained below the pre-crisis level. Most exchanges recorded negative growth in March. Global fixed income trading volumes improved 5% compared to 4Q09, but decreased 13% compared to 1Q09. Global equity underwriting fees decreased 47% compared to 4Q09, but increased 133% compared to 1Q09. Global IPO volume recorded the highest first quarter volume since 2000, primarily driven by Asian issuers. Global debt underwriting fees were up 16% compared to 4Q09 and up 25% compared to 1Q09, with strong activity in the covered bond and high yield bond markets. Announced global M&A volumes were down 8% compared to 4Q09, but up 18% compared to 1Q09. Completed global M&A volumes were down 38% compared to 4Q09 and down 27% compared to 1Q09. Global syndicated lending volumes declined 1% compared to 4Q09 and 14% compared to 1Q09. Refinancing activity accelerated during the quarter.

In the first two months of 2010, the hedge fund industry attracted net inflows of USD 4.4 billion and grew to USD 1.5 trillion. Investors continued to prefer direct investments in hedge funds over investments in fund of fund products. Distressed debt was the best performing strategy in the first two months, mainly benefiting from the recovery in high yield markets and narrowing credit spreads. Investors continued to reinvest cash into asset management products with higher potential return. Bond funds continued to attract the majority of net new assets, but there were also inflows into balanced and equity products.

The wealth management sector benefited from better markets than a year ago, but investors remained risk-averse and continued to demand less complex financial products over tailor-made solutions. The regulatory scrutiny of offshore banking continued, creating uncertainty for the sector.

Interest rates in Switzerland remained at historical lows. Retail banking in Switzerland reflected strong competition in the mortgage business, resulting in continued margin pressure.

Regulators and governments continued their focus on regulatory reform, capital and liquidity requirements, compensation and systemic risk. The deadline for feedback from the banks on the Basel Committee on Banking Supervision (BCBS) proposals was April 2010. In preparation for the Toronto G-20 summit in June 2010, regulators continued to address the issues of “too big to fail,” qualifying capital instruments, bank levies and bonus and transaction taxes. In the EU, regulatory discussions focused on capital requirements and on the regulation of alternative investment managers. In the US, tax legislation was enacted to broaden reporting by foreign financial institutions regarding all accounts held by US persons or by foreign entities with substantial US ownership. For further information, refer to – Core Results – Regulatory proposals.

# Credit Suisse

In 1Q10, we recorded net income attributable to shareholders of CHF 2,055 million. Diluted earnings per share were CHF 1.63. Annualized return on equity attributable to shareholders was 22.3%. Our capital position remained strong with a BIS tier 1 ratio of 16.4%.

## Credit Suisse reporting structure

Credit Suisse results include revenues and expenses from the consolidation of certain private equity funds and other entities in which we have noncontrolling interests without significant economic interest (SEI) in such revenues and expenses. Core Results include the results of our three segments and the Corporate Center and discontinued operations, but do not include noncontrolling interests without SEI.

# Core Results

In 1Q10, we recorded net income attributable to shareholders of CHF 2,055 million. Private Banking reported very strong net new assets of CHF 18.6 billion from both our international and Swiss businesses, an annualized net new asset growth rate of 8.1%. Investment Banking reported well-diversified results across businesses and maintained market share momentum across most products and regions. Asset Management had a significant improvement in investment-related gains compared to 4Q09 and 1Q09 and strong net new assets of CHF 11.2 billion across most asset classes.

<sup>1</sup> Based on amounts attributable to shareholders.

Core Results include the results of our three segments, the Corporate Center and discontinued operations. Core Results exclude revenues and expenses in respect of noncontrolling interests in which we do not have SEI. The Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, the Corporate Center includes consolidation and elimination adjustments required to eliminate inter-company revenues and expenses.

Our Core Results are impacted by changes in credit spreads on Credit Suisse debt carried at fair value. The cumulative fair value gains of CHF 1.5 billion on Credit Suisse debt as of the opening 1Q10 balance sheet are reversed and charged to the segments on a straight-line amortization basis, and the difference between this amortization and the valuation adjustments on this Credit Suisse debt from changes in credit spreads is included in the Corporate Center. For further information, refer to – Accounting changes adopted in 1Q10, and II – Operating and financial review – Core Results in the Credit Suisse Annual Report 2009.

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

Certain reclassifications have been made to prior periods to conform to the current presentation.

## Results overview

In 1Q10, we recorded net income attributable to shareholders of CHF 2,055 million compared to CHF 2,006 million in 1Q09. Net revenues were CHF 8,961 million compared to CHF 9,557 million in 1Q09. Total operating expenses were CHF 6,077 million compared to CHF 6,320 million in 1Q09. Our 1Q10 results included fair value gains of CHF 106 million on Credit Suisse vanilla debt. CHF 63 million of fair value losses were charged to the segments (primarily Investment Banking), reflecting the straight-line amortization, offset by CHF 169 million of fair value gains included in the Corporate Center.

In **Private Banking**, net revenues of CHF 2,900 million were stable compared to 1Q09. Recurring revenues, representing 78% of net revenues, were stable, as a decline in net interest income was offset by higher recurring commissions and fees. Net interest income decreased 6%, as margin compression on loans and deposits reflected the ongoing low interest rate environment in the economic cycle. Recurring

commissions and fees increased 8%, mainly due to increased management fees, as fund management fees were positively impacted by a change in estimate for prior-year fee accruals, and overall higher asset-based commissions and fees on higher average assets under management. Average assets under management increased 15.9%, but recurring commissions and fees continued to reflect the shift into lower-margin investments, also within managed investment products, and the ongoing cautious investor behavior. Transaction-based revenues increased 3%, primarily because of higher brokerage and product issuing fees, reflecting increased volumes. Transaction-based revenues included fair value losses on the Clock Finance transaction compared to gains in 1Q09.

In **Investment Banking**, net revenues decreased 19% to CHF 5,216 million from 1Q09, but were 72% higher than 4Q09. 1Q09 results included approximately CHF 1.3 billion of revenues driven by the normalization of market conditions that had been severely dislocated in 4Q08. Revenues in 1Q10 were driven by solid fixed income and equity sales and trading revenues, as client-driven revenues recovered after a marked slowdown in 4Q09. The increase in sales and trading revenues was partially offset by weaker underwriting and advisory revenues, which were impacted by lower industry-wide issuance volumes and M&A activity than in 4Q09. Revenues included strong results across most fixed income sales and trading businesses in 1Q10 in the more normalized market conditions prevailing during the quarter compared to 1Q09. Approximately CHF 1.1 billion of fixed income sales and trading revenues in 1Q09 were driven by the narrowing of credit spreads that had widened dramatically in 4Q08 and the return to a more normalized relationship between the cash and synthetic markets following a period of substantial dislocation in 4Q08. Investment Banking had strong revenues in US residential mortgage-backed securities (RMBS) trading, global rates and foreign exchange, leveraged finance trading, emerging markets and high grade trading. Equity sales and trading revenues declined 27% against 1Q09, but significantly increased against 4Q09, and reflected strong revenues in cash equities and prime services and very strong revenues in equity derivatives. Approximately CHF 200 million of 1Q09 equity sales and trading revenues, primarily in equity derivatives and convertibles, were driven by a reduction in market volatility and the stabilization of the convertible bond market during the quarter. Results also reflected fair value losses on Credit Suisse debt of CHF 59 million compared to fair value gains of CHF 365 million in 1Q09 and net fair value losses of CHF 243 million in 4Q09.

In **Asset Management**, net revenues of CHF 631 million were up, primarily due to investment-related gains and gains from securities purchased from our money market funds compared to losses in 1Q09. Asset management fees were up 9%,

primarily reflecting higher fees from fund administration services and from alternative investments. Average assets under management increased 2.2% over the period. Placement, transaction and other fees were up 12%. Performance fees and carried interest were up, primarily due to 1Q09 provisions for claw-backs of carried interest. Equity participations revenues were down, mainly from the reduction of our ownership interest in Aberdeen Asset Management (Aberdeen) due to an issuance of shares by Aberdeen. Investment-related gains, primarily in private equity investments in the energy, technology and commodity sectors and in credit-related investments, were CHF 126 million, compared to losses of CHF 387 million in 1Q09. Other revenues were up, reflecting realized and

unrealized gains of CHF 107 million on securities purchased from our money market funds compared to losses of CHF 21 million in 1Q09 and the significant realized gains on securities acquired from client securities lending portfolios in 1Q09 and lower allocated funding costs.

For further information on Private Banking, Investment Banking and Asset Management, refer to II – Results by division.

**Corporate Center** income from continuing operations before taxes of CHF 82 million primarily reflected fair value gains of CHF 169 million on Credit Suisse debt.

**Provision for credit losses** was a net release of CHF 50 million in 1Q10, with net releases of CHF 69 million in Invest-

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Private Banking, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled. For Asset Management, results are allocated based on the location of the investment advisors and sales teams.

ment Banking and net provisions of CHF 19 million in Private Banking, reflecting the improving credit environment.

**Total operating expenses** decreased 4% compared to 1Q09, reflecting 10% lower compensation and benefits, offset in part by 9% higher general and administrative expenses. The decrease in compensation and benefits was mainly driven by lower performance-related compensation and deferred compensation from prior-year awards, offset in part by an increase in base salaries to ensure a more appropriate balance between fixed and variable compensation. General and administrative expenses increased, reflecting higher professional fees, information technology (IT) and travel and entertainment expenses, reflecting our investment in IT and distribution capabilities and increased client-related activity, offset in part by lower provisions.

The **Core Results effective tax rate** was 28.6% in 1Q10, compared to 34.3% in 4Q09, primarily reflecting the impact of the geographical mix of results. Net deferred tax assets increased CHF 1,213 million, or 13.8%, to CHF 10,032 million as of the end of 1Q10. The significant increase in net deferred tax assets primarily related to the consolidation of Alpine Securitization Corp (Alpine), which contributed net

deferred tax assets of CHF 1,508 million, and foreign exchange translation gains of CHF 176 million. The deferred tax asset on the consolidation of Alpine does not affect tier 1 capital as it is excluded from the determination of regulatory capital. Excluding the effects of the consolidation of Alpine and foreign exchange translation gains, net deferred tax assets decreased by CHF 471 million, primarily as a result of profits attributable to 1Q10.

**Assets under management** from continuing operations were CHF 1,270.9 billion as of the end of 1Q10, an increase of CHF 41.9 billion, or 3.4%, compared to the end of 4Q09. The increase reflected strong net new assets of CHF 18.6 billion in Private Banking and CHF 11.2 billion in Asset Management and favorable market performance.

As part of the ongoing review to improve risk management approaches and methodologies, we are implementing a revised value-at-risk (VaR) measure for risk management purposes. This revised VaR, which we call risk management VaR, adjusts VaR in cases where short-term market volatility over a six-month period is different than long-term volatility in a three-year dataset. For more information, refer to IV – Treasury and Risk management – Risk management.

## Regulatory proposals and developments

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk. G-20 leaders pledged to increase regulation and improve coordination of oversight of banks and financial institutions. In December 2009, the BCBS published consultative proposals, aimed at strengthening capital, liquidity and the resilience of the banking sector, which are expected to be finalized at the end of 2010 and implemented over time. The US Congress and regulators continued working to restructure the regulatory framework for financial services in the US. The US administration and other governments proposed the imposition of taxes and other levies on financial institutions, including on certain compensation and liabilities. The US administration also proposed prohibiting certain activities, including investing in private equity and hedge funds and proprietary trading unrelated to serving clients, and limiting the size, of certain depository financial institutions. Any final regulations or legislation could result in additional costs or limit or restrict the way we conduct our business, although uncertainty remains about the impact of regulatory reform. We believe the regulatory response must be closely coordinated on an international basis to provide a level playing field and must be carefully balanced to ensure a strong financial sector and global economy. We believe we are well positioned for regulatory reform, as we have reduced risk and maintained strong capital, funding and liquidity.

In April 2010, we agreed on liquidity principles with the FINMA, after its consultation with the Swiss National Bank, to ensure that the Group and the Bank have adequate holdings on a consolidated basis of liquid, unencumbered, high-quality securities available for designated periods of time in a crisis situation. The principles will be in effect as of the end of 2Q10. For further information, refer to IV – Treasury and Risk management – Treasury management.

The UK government enacted in April 2010 a levy on variable compensation exceeding GBP 25,000 for 2009 for certain employees of financial institutions operating in the UK. For further information, refer to – Compensation and benefits.

## Legal proceedings

Credit Suisse is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. Some of these actions have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

Credit Suisse believes, based on currently available information and advice of counsel, that the results of such proceedings, in the aggregate, will not have a material adverse effect on its financial condition, but might be material to operating results for any particular period, depending in part, upon the operating results for such period. For further information on Credit Suisse's legal proceedings, refer to Note 28 – Litigation in V – Condensed consolidated financial statements – unaudited.

### German data matter

The media has reported that German authorities have initiated an investigation into 1,100 Credit Suisse clients for possible tax evasion. The information about the clients is reported by the media to have come from a CD-rom acquired by the German authorities. Based on information the German authorities have provided to certain of our clients, we now have reason to believe Credit Suisse is one of the firms that has been the victim of a data theft or otherwise had certain client information acquired. We are conducting an internal review to determine how this information was obtained. We believe our data security and other similar controls are effective.

We take this matter very seriously and will deal with the issues in an appropriate manner reflecting our legal obligations and the interests of our clients, employees and the firm. We intend to cooperate with all relevant governmental authorities in any investigation. Credit Suisse has filed criminal charges against the individuals who committed the data theft, who are currently unknown. We have no reason to believe the German authorities are investigating Credit Suisse.

## Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a variable component. The variable component reflects the performance-based compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

Our compensation structure is substantially compliant with G-20 and FINMA guidelines for best compensation practices and is designed to ensure adequate consideration of risk in compensation decisions and further align the interests of our employees with the long-term success of the Group. Our compensation structure also reflects increased base salaries for managing directors and directors in 2010 to ensure a more

## Number of employees by division

		end of		% change	
	1Q10	4Q09	1Q09	QoQ	YoY
<b>Number of employees by division (full-time equivalents)</b>					
Private Banking	24,600	24,300	24,100	1	2
Investment Banking	20,000	19,400	18,800	3	6
Asset Management	2,900	3,100	3,100	(6)	(6)
Corporate Center	800	800	700	0	14
<b>Number of employees</b>	<b>48,300</b>	<b>47,600</b>	<b>46,700</b>	<b>1</b>	<b>3</b>

appropriate balance between fixed and variable compensation and an increase in the proportion of variable compensation that is deferred.

The UK levy on variable compensation exceeding GBP 25,000 for 2009 was enacted in April 2010 and will result in additional compensation expenses currently estimated at CHF 400 million in 2Q10, which will be included in Corporate Center. We reduced the aggregate amount of variable compensation for 2009 by 5%, and significantly reduced the amount of variable compensation for 2009 of managing directors in the UK, which absorbed the majority of the levy's expected costs. Expenses in 2009 did not include an accrual related to this UK levy as it was not yet enacted law.

## Funding

We centrally manage our funding activities. New securities for funding and capital purposes are issued primarily by the Bank. The Bank lends funds to our operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record net revenues and expense in each of the segments for this capital and funding. Our funds transfer pricing system is designed to allocate to our businesses funding costs in a way that incentivizes their efficient use of funding. Our funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet and the costs associated with funding liquidity and balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is

more challenging and expensive. Under this system, our businesses are also credited to the extent they provide long-term stable funding.

## Accounting changes adopted in 1Q10

The adoption of new accounting principles generally accepted in the US (US GAAP) on January 1, 2010 governing when an entity should be consolidated resulted in an increase in assets of CHF 15.0 billion to the opening 1Q10 consolidated balance sheet and a reduction of CHF 2.4 billion, net of tax, in retained earnings and a reduction in total shareholders' equity of CHF 2.2 billion. The reduction in total shareholders' equity was related to the consolidation of Alpine, a multi-seller commercial paper (CP) conduit administered by Credit Suisse, and primarily represents Alpine's cumulative losses from the FVOD transaction of CHF 3.7 billion before tax. The FVOD transaction was designed to offset a significant portion of the volatility in credit spread movements on Credit Suisse vanilla debt. The consolidation of entities under these new rules did not have an impact on tier 1 capital or risk-weighted assets because of the securitization framework used under Basel II, which differs from US GAAP.

## Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs. For further information, refer to Note 1 – Summary of significant accounting policies and Note 25 – Fair value of financial instruments in V – Condensed consolidated financial statements – unaudited. A

complete Financial Report 1Q10 including fair value disclosures will be published on our website and filed with the SEC on or about May 6, 2010.

For a description of our valuation techniques, refer to Note 32 – Financial instruments in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2009.

### **Personnel**

Headcount at the end of 1Q10 was 48,300, up 1,600 from 1Q09, and up 700 compared to 4Q09. The increase from 4Q09 was mainly driven by the expansion of the sales force in fixed income and additional headcount in prime services and cash equities in Investment Banking and an increase in IT professionals.

# Key performance indicators

To benchmark our achievements, we have defined a set of key performance indicators (KPI) for which we have targets to be achieved over a three to five year period across market cycles.

## Growth

We target integrated bank collaboration revenues in excess of CHF 10 billion annually by 2012. For 1Q10, integrated bank collaboration revenues were CHF 1.0 billion.

For net new assets, we target a growth rate above 6%. In 1Q10, we recorded an annualized net new asset growth rate of 8.5% and a rolling four-quarter average growth rate of 5.5%.

1Q10 total shareholder return was 6.2%. The 1Q10 average total shareholder return of our peer group was 12.4%.

For return on equity attributable to shareholders, we target an annual rate of return of above 18%. The annualized return on equity attributable to shareholders was 22.3% in 1Q10.

We target a Core Results cost/income ratio of 65%. Our Core Results cost/income ratio was 67.8% for 1Q10.

## Efficiency and performance

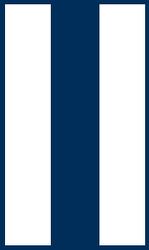

For total shareholder return, we target superior share price appreciation plus dividends compared to our peer group. Our

## Capital

For the BIS tier 1 ratio, we target a minimum ratio of 12.5%. The BIS tier 1 ratio was 16.4% as of the end of 1Q10.

in / end of	Target	1Q10	2009	2008	2007
<b>Growth</b>					
Collaboration revenues (CHF billion)	CHF 10 billion annually by 2012	1.0	5.2	5.2	5.9
Net new asset growth (%) (annualized)	Above 6%	8.5	4.0	(0.2)	3.1
<b>Efficiency and performance (%)</b>					
Total shareholder return (Credit Suisse) <sup>1</sup>	Superior return vs. peer group	6.2	80.1	(56.1)	(17.8)
Total shareholder return of peer group <sup>2</sup>	–	12.4	(35.0)	(55.0)	(18.0)
Return on equity attributable to shareholders (annualized)	Above 18%	22.3	18.3	(21.1)	18.0
Core Results cost/income ratio	Below 65%	67.8	73.0	195.7	73.1
<b>Capital (%)</b>					
BIS tier 1 ratio	Above 12.5%	16.4	16.3	13.3	10.0 <sup>3</sup>

<sup>1</sup> The total return of an investor is measured by the capital gain/(loss) plus dividends received. <sup>2</sup> Peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase and UBS. <sup>3</sup> Under Basel I we reported a tier 1 ratio of 11.1% as of the end of 2007.

## Business environment

In 1Q10, the global economy continued to recover with macro-economic data indicating the end of the recession. Monetary authorities started to gradually scale back some of the extraordinary measures undertaken in 2008 and 2009, but kept interest rates low. Financial markets were characterized by rising equity indices and overall low levels of volatility. The US dollar strengthened against the Swiss franc during 1Q10, while the euro weakened against both the Swiss franc and the US dollar, reflecting concerns about sovereign debt and finances, which also led to a widening of European government benchmark credit spreads.

Ongoing uncertainty regarding the sustainability of the economic recovery resulted in monetary authorities maintain-

ing and forecasting a continuing low interest rate environment. This continuing low interest rate environment resulted in further margin compression for the private banking sector.

The wealth management industry faced increased regulatory scrutiny, especially relating to the international exchange of information and client data, and continued to be the focus of tax authorities. In Western Europe, there were ongoing political discussions on cross-border wealth management and actions by governments, including tax amnesties, leading to increased uncertainty of wealth management clients.

Investor sentiment improved slightly, although investors continued to remain cautious with regard to managed investment products. Client activity remained subdued for most of the quarter.

In Switzerland, the economic recovery strengthened during 1Q10, primarily reflecting increases in exports and robust domestic demand. The Swiss labor market showed further signs of stabilization with a slight decrease in the unemployment rate. Swiss consumer confidence improved. Following the trend of the previous quarter, the number of start-up company formations was at a high level, however insolvencies remained high.

For further information, refer to I – Credit Suisse results – Operating environment.

## Results overview

Income before taxes of CHF 892 million decreased compared to CHF 992 million in 1Q09, which included significant recoveries on non-credit-related provisions. Net revenues of CHF 2,900 million were stable compared to 1Q09. Recurring revenues, representing 78% of net revenues, were stable, as a decline in net interest income was offset by higher recurring commissions and fees. Net interest income decreased 6%, as margin compression on loans and deposits reflected the ongoing low interest rate environment in the economic cycle. Recurring commissions and fees increased 8%, mainly due to increased management fees, as fund management fees were positively impacted by a change in estimate for prior-year fee accruals, and overall higher asset-based commissions and fees on higher average assets under management. Average assets under management increased 15.9%, but recurring commissions and fees continued to reflect the shift into lower-margin investments, also within managed investment products, and the ongoing cautious investor behavior. Transaction-based revenues increased 3%, primarily because of higher brokerage and product issuing fees, reflecting increased volumes. Transaction-based revenues included fair value losses on the Clock Finance transaction compared to gains in 1Q09.

We recorded a low level of provision for credit losses of CHF 19 million, with net provisions of CHF 32 million in Wealth Management Clients and net releases of CHF 13 million in Corporate & Institutional Clients.

Total operating expenses of CHF 1,989 million were 8% higher, reflecting higher general and administrative expenses, compensation and benefits and commission expenses. The 17% increase in general and administrative expenses was mainly due to significant recoveries on non-credit-related provisions in 1Q09. Excluding this impact, general and administrative expenses increased 5%. Compensation and benefits increased 3%, mainly reflecting base salary and headcount increases.

Compared to 4Q09, income before taxes increased 4%. Net revenues decreased 3%, reflecting lower transaction-based and stable recurring revenues. The decline in transaction-based revenues mainly reflected lower integrated solutions revenues and foreign exchange income from client transactions in 1Q10 and gains on auction rate securities (ARS) positions in 4Q09. Stable recurring revenues reflected lower net interest income and performance fees, compared to strong semi-annual performance fees in 4Q09, offset by the higher fund management fees. Total operating expenses decreased 6%, primarily reflecting lower general and administrative expenses.

Assets under management as of the end of 1Q10 were CHF 945.7 billion, up 3.4% compared to the end of 4Q09. The increase reflected positive market movements and strong net new assets of CHF 18.6 billion. Net new assets in 1Q10 benefited from strong inflows in our international and Swiss businesses, with CHF 12.9 billion from Wealth Management Clients and CHF 5.7 billion from Corporate & Institutional Clients. Net new assets were especially strong in emerging markets in Asia Pacific, Latin America and the Middle East. We had outflows in our Western Europe cross-border business, reflecting client uncertainty from regulatory scrutiny of cross-border wealth management.

Assets under management as of the end of 1Q10 were up 16.9% compared to the end of 1Q09. The increase reflected positive market movements and strong net new assets of CHF 48.8 billion. Average assets under management in 1Q10 increased 15.9% compared to 1Q09 and 3.3% compared to 4Q09.

## Performance indicators

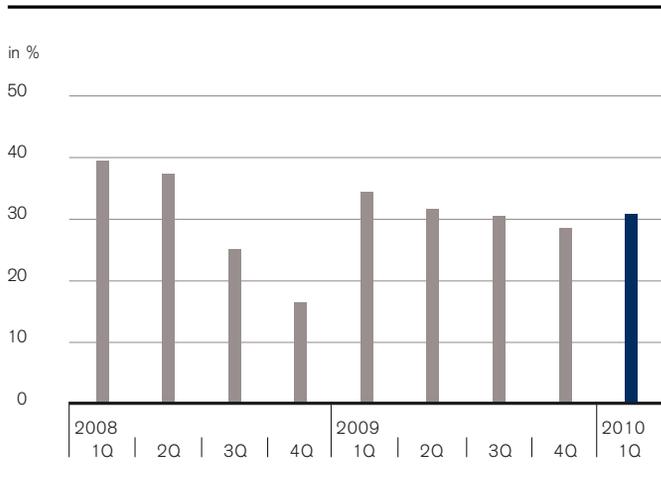

### Pre-tax income margin (KPI)

Our target over market cycles is a pre-tax income margin above 40%. In 1Q10, the pre-tax income margin was 30.8%, down 3.7 percentage points from 1Q09 and up 2.2 percentage points from 4Q09.

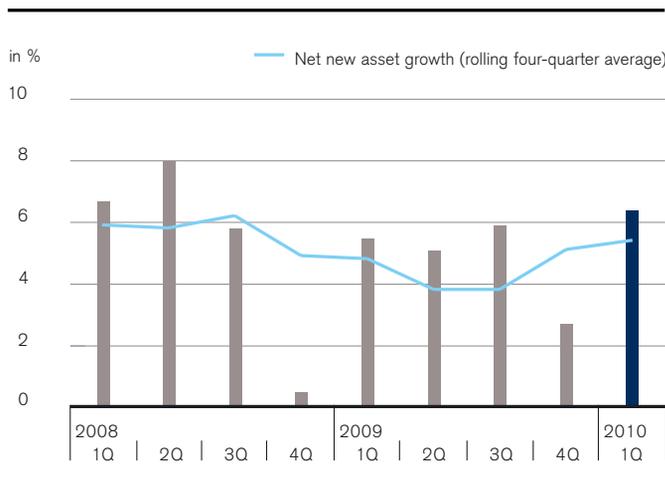

### Net new asset growth rate for Wealth Management Clients (KPI)

Our target over market cycles is a growth rate over 6%. In 1Q10, our annualized quarterly growth rate was 6.4%. The rolling four-quarter average growth rate was 5.4%.

### Pre-tax income margin

### Net new asset growth for Wealth Management Clients

## Initiatives and achievements

In 1Q10, we continued our long-term strategy of organic growth and strengthened our client focus:

- We announced the launch of our domestic wealth management business in Bahrain, another step in our international growth strategy in the EMEA region. The Bahrain office will focus on serving wealthy individuals and families that seek a sophisticated approach to asset allocation and access to a global platform for specialized financial services and products.
- We received in-principle approval to establish a bank branch in Mumbai, enabling us to substantially expand the range of services we offer in the Indian market and demonstrating both our commitment to our Indian clients and the Indian financial services industry and our strategy of developing onshore presence in key markets. Once established, the Mumbai bank branch will be able to accept deposits and provide financing to clients, complementing the capabilities of our non-banking franchise in India.
- Our Frontline Leadership Initiative clearly defines roles and responsibilities along defined career paths while fostering personal development by continuously enhancing professional skills, knowledge and confidence. It includes certification to ensure that our client-focused staff is fully prepared to meet both client needs and evolving regulatory requirements and uphold the strong reputation of Credit Suisse.
- Our client contact center in Switzerland was awarded two key quality management certifications, ISO 9001, the quality system commonly used in Switzerland, and EN 15838, an international standard specifically for client contact centers. Our contact center was the first in Switzerland and the second in Europe to receive the international standard. The two certifications help us to differentiate Credit Suisse qualitatively in the industry and demonstrate our efforts to provide a consistently high level of service to our clients.

## Results detail

The following provides a comparison of our 1Q10 results versus 1Q09 (YoY) and versus 4Q09 (QoQ).

### Net revenues

Recurring revenues arise from net interest income, recurring commissions and fees, including performance-based fees,

related to assets under management and custody assets, as well as fees for general banking products and services. Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Transaction-based revenues arise primarily from brokerage and product issuing fees, foreign exchange income from client transactions and other transaction-based income.

**YoY: Stable at CHF 2,900 million**

Recurring revenues were stable, as a 6% decline in net interest income was offset by an 8% increase in recurring commissions and fees. The decrease in net interest income mainly reflected lower margins on stable average loan volumes. Net interest income on deposits was stable, with lower margins on higher average volumes. The margin on loans and deposits reflected the ongoing low interest rate environment. The increase in recurring commissions and fees primarily reflected higher fund management fees positively impacted by a change in estimate for prior-year fee accruals and overall higher asset-based commissions and fees on higher average assets under management. Transaction-based revenues increased 3%, as the impact from higher brokerage and product issuing fees in 1Q10 was offset in part by fair value losses on the Clock Finance transaction in 1Q10 compared to fair value gains in 1Q09.

**QoQ: Down 3% from CHF 3,000 million to CHF 2,900 million**

The decline reflected lower transaction-based revenues. Transaction-based revenues declined 10%, mainly resulting from lower integrated solutions revenues and foreign exchange income from client transactions, offset in part by lower fair value losses from the Clock Finance transaction. 4Q09 transaction-based revenues included gains on ARS positions. Recurring revenues were stable, reflecting a 3% decline in net interest income and stable recurring commissions and fees. Net interest income declined, with lower margins on stable average deposit and loan volumes. Stable recurring commissions and fees mainly reflected the impact of the strong semi-annual performance fees from Hedging-Griffo in 4Q09 offset by the higher fund management fees in 1Q10.

**Provision for credit losses**

**YoY: Down 60% from CHF 47 million to CHF 19 million**

New provisions of CHF 75 million and releases of CHF 56 million resulted in net new provision for credit losses of CHF 19 million, of which net new provisions of CHF 32 million, mainly related to an isolated case, were in Wealth Management Clients and net releases of CHF 13 million were in Corporate & Institutional Clients. A substantial part of the new provisions were in Wealth Management Clients and a substantial part of

the releases were in Corporate & Institutional Clients. While corporate insolvencies remained at a record level in Switzerland in 1Q10, there were indications of an improving economic and credit environment. Our corporate and institutional loan portfolio has sound quality, relatively low concentrations and is mainly collateralized by mortgages and securities. The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities.

**QoQ: Down 27% from CHF 26 million to CHF 19 million**

Provision for credit losses reflected slightly higher releases in 1Q10 compared to 4Q09.

**Operating expenses**

**Compensation and benefits**

**YoY: Up 3% from CHF 1,151 million to CHF 1,183 million**

The increase in compensation and benefits was driven by increases in base salaries and headcount.

**QoQ: Down 2% from CHF 1,213 million to CHF 1,183 million**

The decrease reflected lower performance-related compensation mostly offset by the increases in base salaries, headcount, related benefits and higher amortization of deferred compensation from prior-year share awards.

**General and administrative expenses**

**YoY: Up 17% from CHF 543 million to CHF 638 million**

The increase mainly reflected the net positive impact of CHF 65 million in non-credit-related provisions in 1Q09, which included captive insurance settlement proceeds of CHF 100 million and CHF 35 million of provisions to buy back certain clients' Lehman Brothers structured notes. Excluding this net impact, general and administrative expenses increased 5%, primarily from IT investment and higher professional fees.

**QoQ: Down 16% from CHF 761 million to CHF 638 million**

The decrease primarily reflected the seasonally higher sales and marketing expenses and higher IT investment in 4Q09.

**Personnel**

Headcount at the end of 1Q10 was 24,600, up by 300 against 4Q09 and by 500 against 1Q09. The increase during 1Q10 was mainly driven by a transfer of certain fund administration operations from Asset Management and an increase in IT professionals to support international growth. The number of relationship managers in Wealth Management Clients was stable against 4Q09 as well as 1Q09. The development during 1Q10 reflected a slight increase in EMEA, while the number of relationship managers in Americas decreased slightly.

## Wealth Management Clients

### Net revenues

#### Recurring

**YoY: Up 3% from CHF 1,825 million to CHF 1,877 million**

The increase mainly reflected an 8% increase in recurring commissions and fees, mainly driven by management fees, as funds management fees were positively impacted by a change in estimate for prior-year accruals. The increase in recurring commissions and fees also reflected overall higher asset-based commissions and fees on higher average assets under management. Net interest income decreased 2%, with lower margins on slightly higher average loan volumes and higher margins on slightly higher average deposit volumes. The margin on loans and deposits reflected the ongoing low interest rate environment.

**QoQ: Stable at CHF 1,877 million**

Recurring commissions and fees were stable, as the impact of strong semi-annual performance fees from Hedging-Griffo in 4Q09 was offset by the higher fund management fees and overall higher asset-based commissions and fees on higher

average assets under management. Net interest income decreased 3% due to lower margins on stable average deposit and loan volumes.

#### Transaction-based

**YoY: Up 8% from CHF 544 million to CHF 587 million**

The increase was mainly due to higher brokerage and product issuing fees, reflecting increased volumes.

**QoQ: Down 13% from CHF 674 million to CHF 587 million**

The decline mainly reflected lower integrated solutions revenues and foreign exchange income from client transactions in 1Q10 and gains on ARS positions in 4Q09.

### Gross margin on assets under management

Our gross margin was 121 basis points in 1Q10, 13 basis points lower than 1Q09. The recurring margin decreased 11 basis points, as the 14.8% increase in average assets under management exceeded the 3% increase in recurring revenues. The transaction-based margin decreased two basis points, reflecting the 8% increase in revenues and the 14.8% increase in average assets under management.

Compared to 4Q09, the gross margin declined nine basis points. The recurring margin decreased four basis points, as average assets under management increased 2.9% while recurring revenues were stable. The transaction-based margin decreased five basis points, reflecting the 13% decrease in revenues.

## Corporate & Institutional Clients

### Net revenues

#### Net interest income

**YoY: Down 15% from CHF 346 million to CHF 293 million**

The decrease was mainly due to lower net interest income on loans, reflecting lower margins on lower average volumes. In addition, net interest income on deposits decreased, reflecting lower margins on higher average volumes.

**QoQ: Down 3% from CHF 302 million to CHF 293 million**

The decrease mainly reflected lower margins on slightly higher average deposit volumes and stable average loan volumes.

<sup>1</sup> Net revenues divided by average business volume.

### Non-interest income

**YoY: Down 12% from CHF 163 million to CHF 143 million**

The decrease was mainly driven by fair value losses on the Clock Finance transaction of CHF 12 million in 1Q10 compared to fair value gains of CHF 5 million in 1Q09. Excluding the fair value gains and losses on the Clock Finance transaction, non-interest income decreased 2%, reflecting small declines in other transaction-based commissions and fees offset in part by small increases in asset-based commissions and fees.

**QoQ: Up 13% from CHF 126 million to CHF 143 million**

The increase was driven by fair value losses on the Clock Finance transaction of CHF 30 million in 4Q09 compared to losses of CHF 12 million in 1Q10. Excluding the fair value losses on the Clock Finance transaction, non-interest income was stable, reflecting small declines in other transaction-based commissions and fees offset by small increases in asset-based commissions and fees.

### Return on business volume

Return on business volume measures revenues over average business volume, which is comprised of client assets and net loans.

Return on business volume of 77 basis points was 24 basis points below 1Q09, mainly reflecting lower net interest income and higher client assets. Compared to 4Q09 the return on business volume decreased two basis points, resulting from the 2% increase in net revenues and higher average assets under management.

Excluding the fair value gains/(losses) on the Clock Finance transaction, return on business volume was 79 basis points in 1Q10, 84 basis points in 4Q09 and 100 basis points in 1Q09.

# Investment Banking

In 1Q10, we reported income before taxes of CHF 1,794 million and net revenues of CHF 5,216 million, driven by well-diversified results across our businesses. We continued to execute our client-focused, capital-efficient strategy, resulting in a strong pre-tax return on average utilized economic capital of 37.2%. We maintained market share momentum across most products and regions.

## Business environment

The global economy continued to recover in 1Q10, driven by manufacturing gains, the impact of various government stimulus packages, renewed activity in the credit and equity markets and an increase in US consumer spending. However, the sustainability of the recovery remained uncertain as high unemployment rates continued to weigh on economies around the world and the strength in certain European economies, such as France and Germany, was tempered by a deterioration of economic conditions and concerns over sovereign debt in Greece, Ireland, Italy, Portugal and Spain. Housing market activity also declined, with new home sales in the US dropping to their lowest level since the government began tracking the data in 1963.

Encouraged by continued improvements in market conditions, the Fed raised the discount rate it charges banks for short-term loans by 25 basis points, but reiterated its belief that economic conditions would warrant exceptionally low short-term interest rates for an extended period. In addition,

the Fed completed its purchase of mortgage-backed securities at the end of March, although it indicated that it would resume the purchases if necessary. The Fed also wound down various emergency lending programs that had been established in response to the credit crisis and indicated that the only remaining program, the Term Asset-Backed Securities Facility, would be withdrawn by June. In similar moves, the European Central Bank and BOE continued with their plans to phase out emergency support for financial markets, but kept interest rates unchanged as they remained cautious over economic growth prospects.

During the quarter, political support increased in Europe and the US for stricter oversight of financial institutions, and, in particular, derivatives trading. European leaders pushed for a ban on speculative transactions in government debt due to the recent difficulties in Greece and certain other European countries. In the US, proposed legislation would provide the Fed with the authority to examine any bank holding company with more than USD 50 billion of assets as well as large non-bank financial companies. This regulation would empower the

government to seize and dismantle failing financial companies, prohibit commercial banks from certain proprietary trading activities, scrutinize complex financial instruments, grant shareholders more influence over the operations of publicly traded companies and provide the government with more tools to force banks to reduce their risk. While the regulations proposed are extensive and far-reaching, the final outcome and timing is uncertain.

Equity markets improved in the US and Europe, driven by a rally in March, while most major Asian markets declined. European stocks rose toward the end of the quarter, driven by the EU efforts to support Greece. Market volatility as indicated by the VIX ended below 4Q09 levels and touched a two-year low, despite increasing in late January and early February. Credit spreads continued to narrow and the US dollar strengthened against the euro, British pound and Swiss franc and was unchanged against the Japanese yen and the Chinese yuan compared to 4Q09.

Equity trading volumes increased in the US and Europe, driven by strong trading activity in January compared to 4Q09. Fixed income trading volumes increased across all products compared to 4Q09, both in the US and Europe.

Global debt underwriting volumes increased from 4Q09, although concerns over Greece resulted in a temporary lull in issuance in February. The increase was driven by record sovereign bond issuance in emerging markets and higher investment grade debt issuance, partially offset by a decline in high yield issuance. Global equity underwriting volumes declined significantly from 4Q09 levels, with lower issuance volumes across IPOs, follow-on offerings and convertibles. The US dollar volume of announced and completed mergers and acquisitions decreased in the quarter.

For further information, refer to I – Credit Suisse results – Operating environment.

## Results overview

In 1Q10, income before taxes was CHF 1,794 million, compared to CHF 2,414 million in 1Q09 and CHF 1,030 million in 4Q09. Net revenues decreased to CHF 5,216 million from CHF 6,442 million in 1Q09, but were significantly higher than net revenues of CHF 3,038 million in 4Q09. Our 1Q09 results included approximately CHF 1.3 billion of revenues driven by the normalization of market conditions that had been severely dislocated in 4Q08. Pre-tax return on average utilized economic capital remained strong at 37.2% in 1Q10, compared to 45.3% in 1Q09 and 22.5% in 4Q09.

During the quarter, we continued to execute our client-focused, capital-efficient strategy and we maintained market

share momentum across most products and regions. We believe that we have a significant opportunity to extend market share gains across our businesses as we build our distribution platform and expand our client base. We are significantly expanding our distribution capabilities in our securities businesses by increasing our flow sales headcount across key businesses, including our rates and foreign exchange, emerging markets and credit products businesses.

Revenues in 1Q10 were driven by solid fixed income and equity sales and trading revenues, as client-driven revenues recovered after a marked slowdown in 4Q09. The increase in sales and trading revenues was partially offset by weaker underwriting and advisory revenues, which were impacted by lower industry-wide volumes and M&A activity than in 4Q09.

We had strong results across most of our fixed income sales and trading businesses in 1Q10 in the more normalized market conditions prevailing during the quarter compared to 1Q09. Approximately CHF 1.1 billion of fixed income sales and trading revenues in 1Q09 were driven by the narrowing of credit spreads that had widened dramatically in 4Q08 and the return to a more normalized relationship between the cash and synthetic markets following a period of substantial dislocation in 4Q08. In 1Q10, we had strong revenues in US RMBS trading, global rates and foreign exchange, leveraged finance trading, emerging markets and high grade trading.

Our equity sales and trading revenues were CHF 1,694 million, a decline of 27% against 1Q09, but a significant increase against 4Q09, and reflected strong revenues in cash equities and prime services and very strong revenues in equity derivatives. Approximately CHF 200 million of our 1Q09 equity sales and trading revenues, primarily in our equity derivatives and convertibles businesses, were driven by a reduction in market volatility and the stabilization of the convertible bond market during the quarter.

Our results also reflected fair value losses on Credit Suisse debt of CHF 59 million compared to fair value gains of CHF 365 million in 1Q09 and net fair value losses of CHF 243 million in 4Q09.

Compensation expenses of CHF 2,324 million in 1Q10 were lower than 1Q09, primarily due to lower performance-related compensation, reflecting lower risk-adjusted profitability, but increased against 4Q09, primarily due to a reversal of previously accrued performance-related compensation in 4Q09. Total other operating expenses increased 18% from 1Q09, reflecting higher IT investment costs, expense provisions, and expenses relating to travel and entertainment, advertising and recruitment driven by an increase in client-related business activity, and decreased 3% from 4Q09, reflecting a reduction in legal expenses, and other professional fees, partially offset by an increase in expense provisions.

Risk-weighted assets of USD 144 billion increased from 4Q09 as we grew our client-focused businesses. Average one-day, 99% VaR of CHF 104 million increased 9% compared to 4Q09.

Results were impacted by the weakening of the average rate of the US dollar against the Swiss franc compared to 1Q09, which adversely affected revenues and favorably impacted expenses. In US dollars, net revenues and total operating expenses were 11% and 2% lower, respectively, compared to 1Q09. For more information on foreign currency translation rates, refer to VI – Investor information.

## Performance indicators

### Pre-tax income margin

Our target over market cycles is a pre-tax income margin of 25% or greater. The pre-tax income margin was 34.4% in 1Q10, compared to 37.5% in 1Q09 and 33.9% in 4Q09.

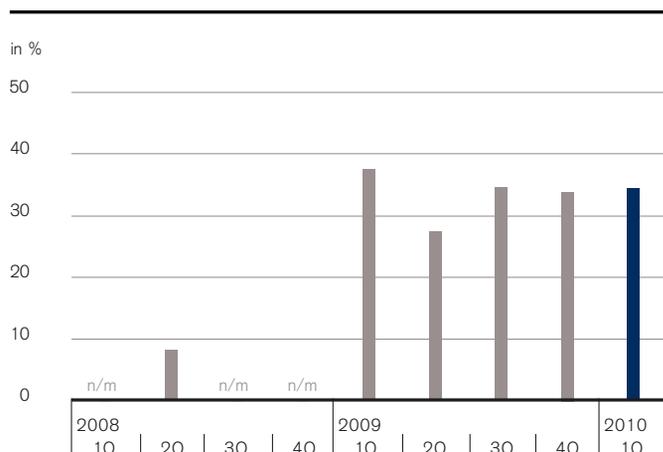

### Value-at-Risk

The average one-day, 99% VaR was CHF 104 million in 1Q10, compared to CHF 207 million in 1Q09 and CHF 95 million in 4Q09. For further information on VaR and changes in VaR methodology, refer to IV – Treasury and Risk management – Risk management – Market risk.

### Pre-tax return on average utilized economic capital

The pre-tax return on average utilized economic capital was 37.2% in 1Q10, compared to 45.3% in 1Q09 and 22.5% in 4Q09.

## Pre-tax income margin

n/m: not meaningful

## Risk-weighted assets

Risk-weighted assets increased slightly to USD 144 billion from the end of 4Q09, although there was a shift in business composition. Risk-weighted assets in ongoing businesses increased to USD 127 billion from USD 123 billion at the end of 4Q09, reflecting our efforts to support growth in client-focused businesses and reallocate capital from our exit businesses. Risk-weighted assets in businesses we are exiting were stable at USD 17 billion as of the end 1Q10.

## Significant transactions and achievements

We were active in executing or advising on a number of significant closed and pending transactions, reflecting the breadth and diversity of our investment banking franchise:

- Debt capital markets:** We arranged key financings for a diverse set of clients, including Kraft Foods Inc. (US food company), Frontier Communications Corp. (US communications provider), Alion Science & Technology, Corp. (US technology solutions company), Bolthouse Farms, Inc. (US agricultural company) and Anchor Glass Container Corp. (US glass container manufacturer).
- Equity capital markets:** We executed IPOs for United Company RUSAL Limited (Russian aluminum producer), Korea Life Insurance Company (Korean life insurance company), Horizon Acquisition Company plc (UK investment company) and OSX Brasil SA (Brazilian oil company), an equity offering for Associated Banc-Corp (US bank) and a rights offering for UniCredit Group S.p.A. (Italian bank).
- Mergers and acquisitions:** We advised on a number of key transactions that were announced in 1Q10, including the acquisition by Prudential plc (UK financial services company) of AIA Group Limited (Asian life insurance company), the acquisition by MetLife, Inc. (US insurance company) of American Life Insurance Company (US life insurance company), the acquisition of Terra Industries Inc. (US nitrogen products supplier) by CF Industries Holdings, Inc. (US agricultural chemical manufacturer), the acquisition by Heineken NV (Dutch brewing company) of Fomento Económico Mexicano, S.A.B. de C.V. (Mexican beverage company) and the acquisition by Coca-Cola Enterprises, Inc. (US beverage company) of Coca-Cola Company's (US beverage company) bottling operations in Norway, Sweden and Germany and the sale of Coca-Cola Enterprises' North American bottling operations to Coca-Cola Company.

### Geographic expansion

- Credit Suisse received in-principle approval from the Reserve Bank of India to establish a bank branch in Mumbai. This branch will allow us to significantly enhance our client service and product offering capabilities and marks an important milestone in the development of our India franchise.
- Credit Suisse is strengthening its investment banking services in Poland by re-establishing its local equity trading business in Warsaw and increasing research coverage for Polish companies. Poland represents a key market in our growth strategy for Central Europe. The investment will significantly strengthen our current position as an active member of the Warsaw Stock Exchange and a leading trader among international financial institutions.

### Industry awards

- “Best Brokerage House in Asia” by *The Asset*, for our momentum in cash equities in Asia Pacific.
- Special Achievement award from the Financial Services Commission and the Financial Supervisory Service for our contribution to the development of Korea’s financial industry. In addition, Credit Suisse was the top-ranked liquidity provider in 2009 for listed equity-linked warrants in Korea by the Korea Exchange.
- Ranked number one in *Institutional Investors’* All Europe Research Team Survey.
- Ranked in the top three by *Financial Times/Starmine* in the “Recommendations – S&P 500” and the “Recommendations – MSCI Emerging Markets Free Latin America” categories.
- “Best M&A Deal in the Middle East” by *EMEAFinance* for our work on the Advanced Technology Investment Company transaction. We were also awarded “Best Bond Deal in CEE” and “Best CHF bond deal in EMEA” for our work on financings for Intel and the Republic of Poland.
- “Middle East Deal of the Year” and “High-Yield Deal of the Year” by *Euromoney* for our work on financings for the government of Qatar and UnityMedia.
- Awards for “Deal of the Year” (Roche Holding financing), “Dollar High Grade Financial Deal of the Year” (Rabobank Nederland financing), “Dollar Securitization Deal of the Year” (American General Mortgage Loan Trust financing), “Asia-Pacific Deal of the Year” (PT Adaro Indonesia financing), “Middle East and Africa Deal of the Year” (Ras Laffan Liquefied Natural Gas financing) and “Supranational Deal of the Year” (Kreditanstalt für Wiederaufbau financing) from *Credit*.

- “African Oil and Gas Deal of the Year” by *Project Finance International* for our work on the Kosmos Energy financing.

### Market share momentum

- Credit Suisse’s foreign exchange market share ranked in the top ten and was recognized as one of the “most improved dealers” in *Greenwich Associates’* 2010 Global Foreign Exchange Report.
- Credit Suisse Prime Services ranked number one in *Global Custodian’s* OTC Derivatives Prime Brokerage Survey.
- Credit Suisse was ranked number three globally and number one in the Americas by *Thomson* for announced M&A.
- Credit Suisse was ranked in the top five globally for both high yield and investment grade underwriting by *Thomson*.
- Credit Suisse was ranked in the top five globally for equity and equity-linked underwriting by *Dealogic*.

### Results detail

The following provides a comparison of our 1Q10 results versus 1Q09 (YoY) and versus 4Q09 (QoQ).

### Net revenues

#### Debt underwriting

**YoY: Up 147% from CHF 183 million to CHF 452 million**

The increase was primarily due to stronger results in leveraged finance, reflecting record industry-wide high yield issuance volumes and an increase in high-yield market share. In addition, we had higher revenues from investment grade debt issuance, driven by higher industry-wide issuance volumes and an increase in investment grade market share.

**QoQ: Up 13% from CHF 401 million to CHF 452 million**

The increase was primarily due to higher revenues from investment grade debt issuance, driven by higher industry-wide issuance volumes and market share, and higher revenues from leveraged finance, reflecting an increase in industry-wide high yield issuance. These results were partially offset by lower revenues from asset-backed securities (ABS).

#### Equity underwriting

**YoY: Up 196% from CHF 74 million to CHF 219 million**

The increase was driven by significantly higher levels of industry-wide equity issuance volumes across IPOs, follow-on offerings and convertibles, compared to very low levels in 1Q09 and an increase in overall equities market share.

**QoQ: Down 53% from CHF 464 million to CHF 219 million**

The decrease was in line with the decline in industry-wide equity issuance volumes across IPOs, follow-on offerings and convertibles, compared to high levels of issuance in 4Q09.

### Advisory and other fees

**YoY: Up 13% from CHF 191 million to CHF 216 million**

The increase was due to slightly higher other advisory and private placement fees, offset in part by slightly lower M&A fees. In US dollar terms, M&A fees were up slightly, despite a decline in global completed M&A activity and market share.

**QoQ: Down 34% from CHF 329 million to CHF 216 million**

The decrease was due to lower levels of global completed M&A activity, partially offset by an increase in completed M&A market share. Our announced M&A market share was significantly higher. However, our results in 1Q10 did not reflect the impact of our increased market share, since recognition of advisory revenues relating to announced M&A transactions is customarily dependent on the completion of transactions.

### Fixed income sales and trading

**YoY: Down 34% from CHF 4,020 million to CHF 2,662 million**

The decrease was primarily due to lower revenues in 1Q10 across several fixed income businesses compared to an extremely strong 1Q09. Approximately CHF 1,100 million of our fixed income trading revenues in 1Q09 were driven by the narrowing of credit spreads that had widened dramatically in 4Q08 and the return to a more normalized relationship between the cash and synthetic markets following a period of substantial dislocation in 4Q08. Revenues in global rates and foreign exchange, corporate lending, high grade trading and US RMBS trading were strong, although lower compared to record revenues in 1Q09, in which corporate lending, US RMBS trading and high grade trading benefited from the normalization of market conditions. We had small losses in fixed income arbitrage trading and minimal losses in commodities, driven by losses in our commodities exit businesses, compared to revenues in 1Q09 and significantly lower revenues from our ongoing commodities business. 1Q09 included valuation gains from our exit collateralized debt obligations (CDO) business, substantially offset by valuation reductions in our exit RMBS business. The decrease was partially offset by minimal net valuation reductions in 1Q10 in commercial mortgage-backed securities (CMBS), a business we are exiting, compared to net valuation reductions of CHF 1,401 million in 1Q09. We also had higher revenues in leveraged finance trading, reflecting strong trading activity, and emerging markets trading. Our results also included fair value losses on Credit Suisse debt of CHF 53 million compared to fair value gains of CHF 329 million in 1Q09.

**QoQ: Up 227% from CHF 815 million to CHF 2,662 million**

The increase reflected strong revenues in US RMBS trading, especially in our non-agency RMBS business, which benefited

from strong market activity and client demand. We also had higher revenues in global rates and foreign exchange, leveraged finance trading, high grade trading, emerging markets trading and corporate lending. In 4Q09, revenues from these businesses were negatively impacted by a marked slowdown in client activity. The increase in revenues was partially offset by the minimal losses in commodities, compared to revenues in 4Q09. 4Q09 included significantly higher valuation gains related to those residential mortgage businesses that we are exiting. Results included fair value losses on Credit Suisse debt of CHF 53 million in 1Q10 compared to net fair value losses of CHF 219 million in 4Q09.

### Equity sales and trading

**YoY: Down 27% from CHF 2,323 million to CHF 1,694 million**

The decrease was primarily driven by lower revenues in equity arbitrage trading, convertibles and fund-linked products compared to very strong results in 1Q09. In 1Q09, approximately CHF 200 million of our equity sales and trading revenues, primarily in equity derivatives and convertibles, were driven by a reduction in market volatility and the stabilization of the convertible bond market from 4Q08. Revenues in cash equities were slightly higher than 1Q09, reflecting improved results in Europe, Latin America and non-Japan Asia. Our results also included fair value losses on Credit Suisse debt of CHF 6 million compared to fair value gains of CHF 36 million on Credit Suisse debt in 1Q09.

**QoQ: Up 54% from CHF 1,102 million to CHF 1,694 million**

The increase reflected higher revenues across most of our equities businesses compared to 4Q09, which reflected a slowdown in client activity and weaker market volumes, lower volatility and reduced trading opportunities. We had very strong revenues in equity derivatives and higher revenues in cash equities, particularly in Europe and the US. In addition, we had higher revenues in equity arbitrage trading, prime services and convertibles compared to 4Q09. Our results also included fair value losses on Credit Suisse debt of CHF 6 million in 1Q10 compared to net fair value losses of CHF 24 million on Credit Suisse debt in 4Q09.

### Provision for credit losses

**YoY: From CHF 136 million to CHF (69) million**

The change was due to significantly lower new provisions and higher releases and recoveries of provisions, reflecting the improved credit environment.

**QoQ: From CHF (66) million to CHF (69) million**

The change was due to lower new provisions and releases and recoveries of provisions.

## Operating expenses

### Compensation and benefits

**YoY: Down 20% from CHF 2,907 million to CHF 2,324 million**

The decrease was primarily due to lower performance-related compensation, reflecting lower risk-adjusted profitability, and lower deferred compensation from prior-year awards, partly offset by an increase in base salaries.

**QoQ: Up 167% from CHF 870 million to CHF 2,324 million**

The increase primarily reflected higher performance-related compensation due to the reversal of previously accrued performance-related compensation in 4Q09, higher deferred compensation from prior-year awards and the increase in base salaries in 1Q10.

### General and administrative expenses

**YoY: Up 21% from CHF 713 million to CHF 862 million**

The increase reflected higher IT investment costs, expense provisions and expenses relating to travel and entertainment,

advertising and recruitment, driven by an increase in client-related business activity. In addition, we had higher litigation provisions, including for expenses. The increase was partially offset by non-income tax refunds.

**QoQ: Down 6% from CHF 915 million to CHF 862 million**

The decrease reflected a reduction in legal expenses and other professional fees and small declines across most expense categories, partly offset by an increase in expense provisions and IT investment costs.

### Personnel

Headcount at the end of 1Q10 was 20,000, up 600 from 4Q09, driven by an increase in IT professionals, the expansion of our sales force in fixed income and additional headcount in prime services and cash equities. The headcount increases are mostly in support of targeted growth initiatives, including our focus on growing client flows and expanding our distribution coverage in capital-efficient businesses.

# Asset Management

In 1Q10, we recorded income before taxes of CHF 166 million. Investment-related gains were CHF 126 million, a significant improvement compared to 4Q09 and 1Q09. We had gains on securities purchased from our money markets funds of CHF 107 million. We achieved strong net new assets of CHF 11.2 billion across most asset classes.

## Business environment

The operating environment continued to improve in 1Q10 as confidence in the global economic recovery grew, and most asset classes had modest gains. Equity markets continued to be broadly positive, though European equities underperformed. Emerging market equities were volatile throughout the period, ending the quarter slightly positive. US equities and high yield debt were among the best-performing asset classes. Hedge fund performance was positive, with the Credit Suisse/Tremont Hedge Fund Index rising 3.1%. Overall, real estate markets began to show some signs of improvement. The MSCI World Real Estate Index gained 1.7%.

Investors continued to reinvest cash into asset management products with a higher return potential. Bond funds continued to attract the majority of net new assets, but there were also inflows into balanced and equity products. Hedge funds gathered small net inflows in 1Q10, with the majority of funds directed toward event-driven, global macro and certain arbitrage strategies. Private equity fundraising remained challenging during the quarter.

For further information, refer to I – Credit Suisse results – Operating environment.

## Results overview

In 1Q10, income before taxes was CHF 166 million, compared to a loss of CHF 490 million in 1Q09. Net revenues of CHF 631 million were up CHF 625 million, primarily due to investment-related gains and gains from securities purchased from our money market funds compared to losses in 1Q09. Net revenues before securities purchased from our money market funds and investment-related gains/(losses) were CHF 398 million, down 4%, as 1Q09 included CHF 77 million of realized gains on securities acquired from client portfolios. Excluding these realized gains, net revenues increased 18% compared to 1Q09. Fee revenues increased from 1Q09, reflecting higher asset management and performance fees. Investment-related gains, primarily in private equity investments in the energy, technology and commodity sectors and in credit-related investments, were CHF 126 million, compared

to losses of CHF 387 million in 1Q09. Asset management fees of CHF 361 million were up 9%, primarily reflecting higher fees from fund administration services and from alternative investments. Average assets under management increased 2.2% over the period. Placement, transaction and other fees were up 12%. Performance fees and carried interest were up CHF 27 million, primarily due to provisions in 1Q09 for claw-backs of carried interest. Equity participations revenues were down CHF 17 million, mainly from the reduction in our ownership interest in Aberdeen Asset Management due to an issuance of shares by Aberdeen. Other revenues were up CHF 68 million, primarily reflecting realized and unrealized gains of CHF 107 million on securities purchased from our money market funds compared to losses of CHF 21 million in 1Q09, the significant realized gains on securities acquired from client securities lending portfolios in 1Q09 and lower allocated funding costs.

Total operating expenses of CHF 465 million decreased 6%, as lower compensation and benefits and general and administrative expenses were partially offset by higher commission expenses. The 11% decrease in compensation and benefits was mainly due to lower deferred compensation from prior-year awards and performance-based compensation, partially offset by increased base salaries. The 6% decline in general and administrative expenses was mainly due to lower non-credit related provisions and small decreases across most expense categories, reflecting our focus on cost management, partially offset by higher IT investment.

Compared to 4Q09, income before taxes of CHF 166 million was up 4%. Net revenues were stable, primarily reflecting semi-annual performance-based fees in 4Q09 from Hedging-Griffo, gains of CHF 58 million in 4Q09 from the sale of two joint ventures, investment-related gains compared to losses in 4Q09, the gains of CHF 107 million from securities purchased from our money market funds compared to gains of CHF 47 million in 4Q09 and lower allocated funding costs. Total operating expenses decreased 3%, as lower general and administrative expenses were partially offset by higher compensation, reflecting the increase in base salaries.

Assets under management were CHF 434.2 billion, up 4.4% compared to 4Q09, due to net new assets and market performance. Net new assets of CHF 11.2 billion included inflows of CHF 4.4 billion in multi-asset class solutions, CHF 4.3 billion in alternative investments, mainly exchange-traded funds (ETF) and index strategies, and CHF 1.3 billion in Swiss advisory. Compared to 1Q09, assets under management were up 7.0%, primarily reflecting market performance and net new assets, partially offset by the transfer of the managed lending business to Investment Banking and the sale of the two joint ventures in 4Q09.

As of the end of 1Q10, the fair value of our balance sheet exposure to securities purchased from our money market funds was CHF 208 million, down CHF 52 million from 4Q09, mainly due to the partial sale of the remaining position and related fair valuation gains.

## Performance indicators

### Pre-tax income margin (KPI)

Our target over market cycles is a pre-tax income margin above 40%. The pre-tax income margin was 26.3% in 1Q10, compared to 25.0% in 4Q09. The pre-tax income margin was not meaningful in 1Q09 given our low net revenues.

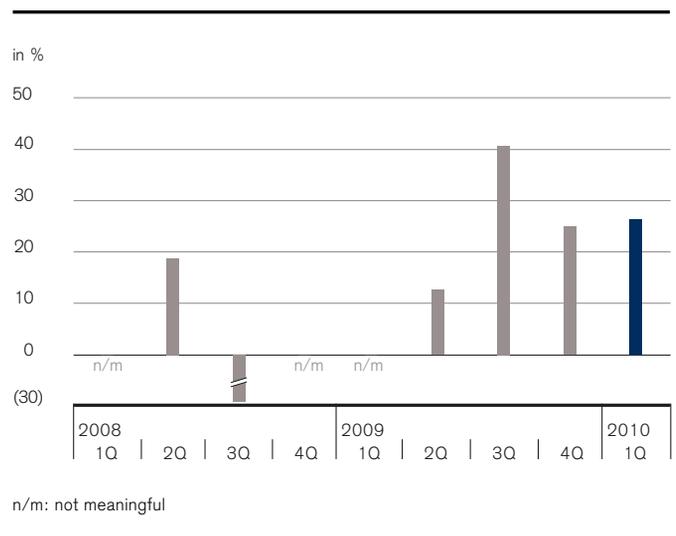

### Net new asset growth rate

In 1Q10, the rolling four-quarter average growth rate was 3.7%, compared to negative 8.8% in 1Q09 and 0.1% in 4Q09. The annualized quarterly growth rate was 10.8% in 1Q10, compared to negative 3.4% in 1Q09 and 3.8% in 4Q09.

### Fee-based margin

The fee-based margin, which is asset management fees, placement, transaction and other fees and performance fees and carried interest divided by average assets under management, was 39 basis points in 1Q10, compared to 34 basis points in 1Q09 and 56 basis points in 4Q09.

## Pre-tax income margin

## Initiatives and achievements

- We had the first closing of a new Brazilian corporate credit fund, raising almost CHF 800 million. The fund provides long-term financing to the Brazilian market, with a focus on corporate credit, taking advantage of the strong growth in this market.
- The Credit Suisse Long/Short Liquid Index, launched in February, offers a low cost, exchange-traded and liquid alternative to hedge funds. This index represents the first in a planned range of exchange-traded offerings.
- We were awarded “Best Large Fixed-Interest Fund House Switzerland”, runner-up in “Best Large Equity Fund House Switzerland” and runner-up in “Best Multi-asset Fund House Switzerland” by Morningstar.

## Results detail

The following provides a comparison of our 1Q10 results versus 1Q09 (YoY) and versus 4Q09 (QoQ).

### Net revenues

#### Asset management fees

**YoY: Up 9% from CHF 331 million to CHF 361 million**

The increase was mainly due to higher fees from diversified investments and alternative investments. Fees from diversified investments increased significantly, due to higher fees from fund administration services and management of the PAF. In alternative investments, higher fees from ETF, hedge funds, mainly from Hedging-Griffo as a result of higher average assets under management, and credit strategies were partially offset by decreases in private equity. Traditional investments reflected higher fees from fixed income & equities, lower fees for Swiss advisory and stable fees across multi-asset class solutions.

**QoQ: Stable at CHF 361 million**

Asset management fees were stable as lower fees from diversified investments were offset by slightly higher fees from alternative investments. Diversified investments fees decreased due to lower fees from fund administration services. Fees in alternative investments increased primarily in ETF, driven by higher average assets under management, partially offset by lower fees from credit strategies. Traditional investments fees were stable, as higher fees from multi-asset class solutions were partially offset by declines in Swiss advisory.

#### Placement, transaction and other fees

**YoY: Up 12% from CHF 33 million to CHF 37 million**

The increase was mainly due to higher transaction fees in diversified investments relating to Asset Management Finance LLC (AMF). Placement and transaction fees in alternative investments were flat, as increased placement fees from the private funds group were offset by lower transaction fees in real estate. Placement fees continued to reflect the difficult fundraising environment.

**QoQ: Down 44% from CHF 66 million to CHF 37 million**

The decrease was mainly due to alternative investments, as placement fees were substantially down from the seasonally higher 4Q09, and real estate transaction fees declined. This was partially offset by increased fees in diversified investments relating to AMF.

#### Performance fees and carried interest

**YoY: Up from CHF (11) million to CHF 16 million**

The increase was mainly due to higher revenues in alternative investments, primarily reflecting provisions for claw-backs of carried interest in 1Q09, and higher performance fees in single-manager hedge funds and credit strategies in 1Q10.

**QoQ: Down 90% from CHF 168 million to CHF 16 million**

The decrease was mainly due to fees from alternative investments relating to semi-annual performance fees from Hedging-Griffo in 4Q09, and lower performance fees from diversified investments relating to management of the PAF.

#### Equity participations

**YoY: Down from CHF 8 million to CHF (9) million**

The decrease was mainly due to losses from diversified investments, reflecting the reduction of our ownership percentage to 21.7% from 23.9% in Aberdeen due to an issuance of shares by Aberdeen, partially offset by income from our investment in Aberdeen.

**QoQ: Down from CHF 66 million to CHF (9) million**

The decrease was mainly due to lower revenues from diversified investments, reflecting the gains of CHF 58 million from the sale of our Polish and Korean joint ventures in 4Q09 and the net impact from our investment in Aberdeen.

#### Investment-related gains/(losses)

**YoY: Up from CHF (387) million to CHF 126 million**

In 1Q10, we had unrealized gains in private equity investments, mainly in the energy, technology and commodity sectors, and in credit-related investments. In 1Q09, we had significant unrealized losses in private equity investments, mainly in the financial services, real estate, aerospace, commodity and energy sectors, partially offset by unrealized gains in credit-related investments.

Principal investments <sup>2</sup>	3.9	3.8	3.9	2.6	0.0

<sup>1</sup> Includes assets under management of the managed lending business transferred to Investment Banking of CHF 13.2 billion and reductions relating to the sale of two joint ventures. <sup>2</sup> Includes primarily private equity investments.

**QoQ: Up from CHF (47) million to CHF 126 million**

In 1Q10, we had unrealized gains in private equity investments, mainly in the energy, technology and commodity sectors, and in credit-related investments. In 4Q09, we had unrealized losses in private equity investments, mainly in the real estate, financial services and energy sectors, partially offset by unrealized gains in credit-related investments.

**Operating expenses**

**Compensation and benefits**

**YoY: Down 11% from CHF 317 million to CHF 282 million**

The decrease was mainly due to lower deferred compensation from prior-year awards and performance-based compensation, partially offset by increased base salaries.

**QoQ: Up 7% from CHF 264 million to CHF 282 million**

The increase was mainly due to the increased base salaries and higher performance-based compensation, mainly due to the adjustment in 4Q09 reflecting increased deferred variable compensation for 2009, and higher performance-based compensation in 4Q09 relating to management of the PAF.

**General and administrative expenses**

**YoY: Down 6% from CHF 147 million to CHF 138 million**

The decrease was mainly due to lower non-credit-related provisions, compared to non-credit-related provisions of CHF 22 million in 1Q09, and small decreases across most expense categories, partially offset by higher IT investment.

**QoQ: Down 14% from CHF 160 million to CHF 138 million**

The decrease was mainly due to lower expenses across most categories, mainly professional fees.

**Personnel**

In 1Q10, headcount was 2,900, down 200 from 4Q09 and 1Q09. The decrease was mainly driven by a transfer of certain fund administration operations to Private Banking.

# Assets under management

## Assets under management

Assets under management comprise assets which are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the customer fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the segment in which the advice is provided as well as in the segment in which the investment decisions take

place. Assets managed by Asset Management for Private Banking clients are reported in both segments and eliminated at Group level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

As of the end of 1Q10, assets under management were CHF 1,270.9 billion, up CHF 41.9 billion, or 3.4%, compared to the end of 4Q09. The increase reflected net new assets in both Private Banking and Asset Management and favorable

<b>Growth in net new assets</b>	<b>5.5</b>	<b>4.0</b>	<b>0.8</b>

<sup>1</sup> Calculated based on continuing operations.

market performance. Compared to the end of 1Q09, assets under management from continuing operations were up CHF 149.2 billion, or 13.3%. The increase reflected favorable market performance and net new assets, partially offset by adverse foreign exchange-related movements and by other effects, primarily in Asset Management, reflecting the transfer of the managed lending business to Investment Banking and the sale of two joint ventures in 4Q09.

In Private Banking, assets under management were CHF 945.7 billion, up CHF 30.8 billion, or 3.4%, compared to the end of 4Q09, and up CHF 137.0 billion, or 16.9%, compared to the end of 1Q09. In Asset Management, assets under management were CHF 434.2 billion, up CHF 18.2 billion, or 4.4%, compared to the end of 4Q09, and up CHF 28.5 billion, or 7.0%, compared to the end of 1Q09. For further information, refer to II – Results by division – Private Banking and – Asset Management.

### Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients,

commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management. Furthermore, changes due to currency and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

Private Banking recorded net new assets of CHF 18.6 billion in 1Q10, including CHF 12.9 billion in Wealth Management Clients, with inflows in our international businesses, mainly Asia Pacific, and in Switzerland. Asset Management recorded net new assets of CHF 11.2 billion, including inflows of CHF 6.9 billion in traditional investments and CHF 4.3 billion in alternative investments.

### Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

# IV

## Treasury and Risk management

50 Treasury management

59 Risk management

# Treasury management

We continued to conservatively manage our liquidity and funding position, and our capital position remained strong with a BIS tier 1 ratio of 16.4% as of the end of 1Q10.

## Liquidity and funding management

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to support business initiatives. For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2009.

### Liquidity risk management

Our internal liquidity risk management framework has been subject to review and monitoring by regulators and rating agencies for many years. Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this due to a conservative asset/liability management strategy aimed at maintaining a funding structure with long-term wholesale and stable deposit funding and cash well in excess of illiquid assets. To address short-term liquidity stress we maintain a buffer of highly liquid securities and cash that covers unexpected needs of short-term liquidity. Our liquidity risk parameters reflect various liquidity stress assumptions, which we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event that we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time well in excess of our minimum target.

The impact of a one, two or three notch downgrade in the Bank's long-term debt ratings would result in additional collateral requirements of CHF 2.2 billion, CHF 4.2 billion and

CHF 4.7 billion, respectively, and would not be material to our liquidity and funding planning.

In April 2010, we established revised liquidity principles with FINMA, after its consultation with the Swiss National Bank, to ensure that the Group and the Bank have adequate holdings on a consolidated basis of liquid, unencumbered, high-quality securities available in a crisis situation for designated periods of time. The principles will be in effect as of the end of 2Q10. The crisis scenario assumptions include global market dislocation, large on- and off-balance sheet outflows, no access to unsecured wholesale funding markets, a significant withdrawal of deposits, varying access to secured market funding and the impacts from fears of insolvency. The principles aim to ensure we can meet our financial obligations in an extreme scenario for a minimum of 30 days. The principles take into consideration quantitative and qualitative factors and require us to address the possibility of emergency funding costs as we manage our capital and business. The principles call for additional reporting to FINMA. These principles may be modified to reflect the final BCBS liquidity requirements. We entered the credit and financial market dislocation with a strong liquidity position, which we have maintained and strengthened through open market funding ever since, incurring significant additional costs as a result. This has positioned us well to meet the revised liquidity principles when they become effective at the end of 2Q10.

### Funding sources and uses

We primarily fund our balance sheet through long-term debt, shareholders' equity and core customer deposits. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and value so that the liquidity and funding generated or

## Balance sheet funding structure

<sup>1</sup> Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral. <sup>2</sup> Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets. <sup>3</sup> Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts. <sup>4</sup> Excludes loans with banks. <sup>5</sup> Excludes due to banks and certificates of deposits.

required by the positions are substantially equivalent. Cash and due from banks is highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables, which fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities. These assets include our buffer of CHF 128 billion of cash, securities accepted under central bank facilities and other highly liquid unencumbered securities, which can be monetized in a time frame consistent with our short-term stress assumptions. Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess buffer of 21% as of the end of

1Q10. We fund other illiquid assets, including real estate, private equity and other long-term investments and a haircut for the illiquid portion of securities, with long-term debt and equity, where we try to maintain a substantial funding buffer. For more information, refer to the table "Balance sheet funding structure".

Our core customer deposits totaled CHF 267 billion as of the end of 1Q10, a decrease of 4% compared to 4Q09, mostly attributable to the foreign exchange translation impact. These deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits with banks and certificates of deposits. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. In 1Q10 our short-term liabilities increased to CHF 58 billion from CHF 52 billion in 4Q09, primarily due to the consolidation of Alpine. The percentage of unsecured funding from long-term debt, excluding non-recourse debt associated with the consolidation of variable interest entities, was 30% as of the end of 1Q10, unchanged versus 4Q09. The weighted average maturity of long-term debt was 6.5 years (including certificates of deposits with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity or in 2030 for instruments without a stated final maturity).

### Debt issuances and redemptions

Our capital markets debt issuance includes issues of senior and subordinated debt in US registered offerings and medium-term note programs, euro market medium-term note programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding operations include Zurich, New York, London and Tokyo. We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants that could trigger an increase of our cost of financing or accelerate the maturity of the debt, including adverse changes in our credit ratings, cash flows, results of operations or financial ratios.

In 1Q10, the Bank issued CHF 7.1 billion of senior debt with maturities ranging between four and 12 years and CHF 2.8 billion of subordinated debt with ten year maturities. The Bank also raised CHF 614 million in multiple tranches of covered bonds with maturities ranging between five and 20 years. Senior debt of CHF 1.6 billion, subordinated debt of CHF 418 million and covered bonds of CHF 907 million matured.

## Capital management

Our consolidated BIS tier 1 ratio was 16.4% as of the end of 1Q10, compared to 16.3% as of the end of 4Q09, reflecting a higher capital base partially offset by increased risk-weighted assets (RWAs). Our core tier 1 ratio was 11.3% as of the end of 1Q10 compared to 11.2% in 4Q09.

In 1Q10, the Bank issued USD 2.5 billion and CHF 200 million of lower tier 2 subordinated debt with a maturity of ten years.

Both the Group and the Bank are subject to BIS and FINMA regulatory capital requirements, including leverage ratios of tier 1 capital to total adjusted assets. Under these requirements we must maintain by 2013 a minimum leverage ratio of 3% at the Group and Bank consolidated level. The leverage ratios for the Group and Bank consolidated level as of the end of 1Q10 were 4.2% and 4.0%, respectively.

Under FINMA requirements that impose an increase in market risk capital for every regulatory VaR backtesting exception over ten in the prior rolling 12 month period, we had no

backtesting exceptions in 1Q10 and consequently the market risk capital multipliers remained at the FINMA and BIS minimum levels. For the purposes of this charge, backtesting exceptions are calculated using a subset of actual daily trading revenues that includes only the impact of daily movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions.

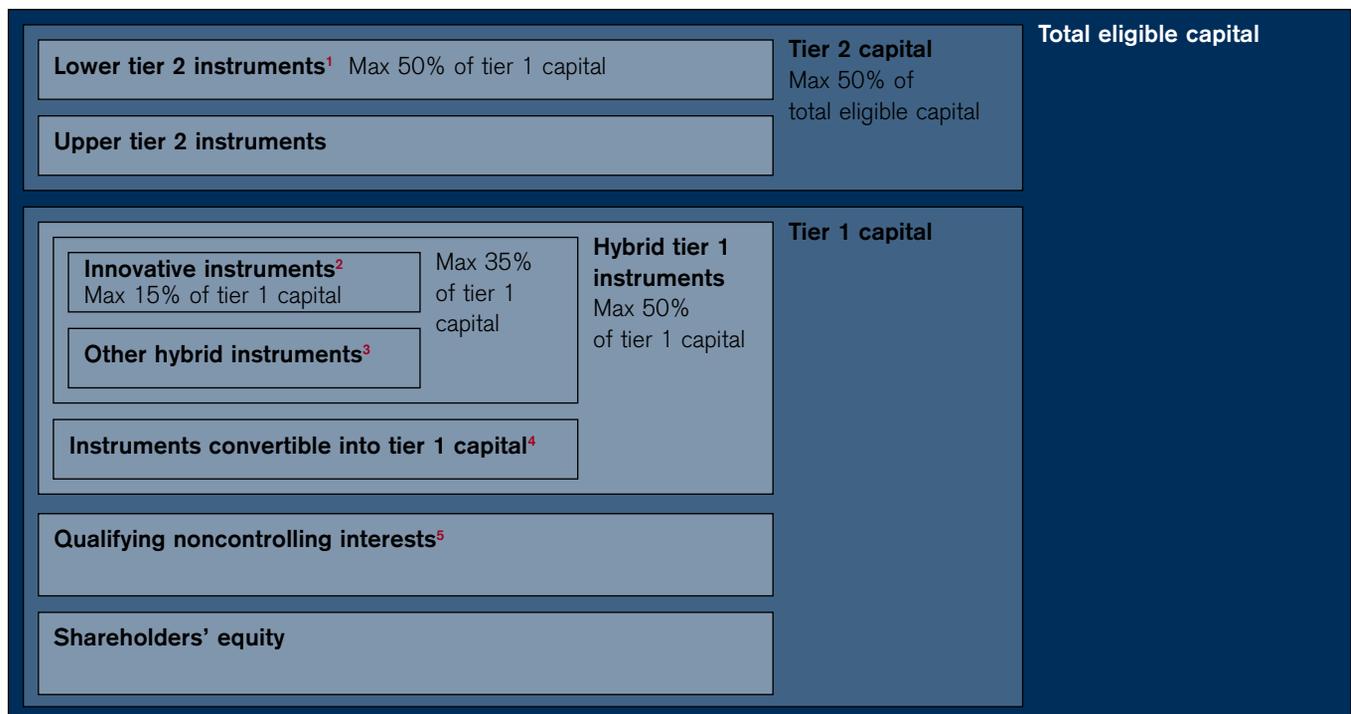

For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2009.

## Regulatory capital – Group

The minor improvement in the tier 1 ratio compared to 4Q09 reflected a 3% increase in tier 1 capital, which was mostly offset by higher RWAs.

Tier 1 capital increased CHF 1.3 billion to CHF 37.5 billion as of the end of 1Q10. The increase was substantially driven by net income (excluding the impact of fair value gains/(losses) on Credit Suisse debt, net of tax) and foreign exchange translation impacts, partially offset by a dividend

## Capital structure

Percentages refer to tier 1 and total eligible capital before capital deductions.

<sup>1</sup> Lower tier 2 capital will no longer qualify for regulatory capital after 2020 but can be issued through 2010. <sup>2</sup> Hybrid instruments in the form of non-cumulative perpetual preferred securities and capital notes that either have a fixed maturity or an incentive to repay, such as a step-up in the coupon if the instrument is not redeemed when callable. <sup>3</sup> Hybrid instruments in the form of non-cumulative perpetual preferred securities and capital notes that have no fixed maturity and no incentive for repayment. <sup>4</sup> Hybrid instruments with a pre-defined mechanism that converts them into tier 1 capital, such as mandatory convertible bonds convertible into common shares. <sup>5</sup> Qualifying noncontrolling interests including common shares in majority owned and consolidated banking and finance subsidiaries and tier 1 capital securities securing deeply subordinated notes issued by SPEs.

## Leverage ratio

<b>Tier 1 capital</b>	<b>37.5</b>	<b>36.2</b>	<b>36.5</b>	<b>34.7</b>
<b>Leverage ratio (%)</b>	<b>4.2</b>	<b>4.2</b>	<b>4.0</b>	<b>4.0</b>

<sup>1</sup> Total assets are calculated as the average of the month-end values for the previous three calendar months. <sup>2</sup> Excludes Swiss interbank lending.

accrual and the effect of share-based compensation. Total eligible capital increased CHF 3.8 billion to CHF 49.5 billion, primarily due to the issuance of two lower tier 2 capital instruments, partially offset by foreign exchange translation impacts.

RWAs increased 3% to CHF 229 billion as of the end of 1Q10, primarily reflecting increased credit and market risk. The increase in credit risk was mainly from higher counterparty credit exposures, and the increase in market risk was due to increased RMBS and leveraged finance positions and a reduction in portfolio diversification benefits. For further information regarding market risk refer to Risk management – Market risk.

Our total capital ratio was 21.6% as of the end of 1Q10, compared to 20.6% as of the end of 4Q09, primarily reflecting the 8% increase in eligible capital, offset in part by the higher RWAs. For further information refer to the table “BIS Statistics”.

Regulators continued to focus on minimum bank capital requirements, harmonization of capital requirements, the improved quality of tier 1 capital and the continued inclusion in regulatory capital of tier 2 instruments. For further information, refer to – Regulatory developments.

<sup>1</sup> Includes cumulative fair value adjustments on Credit Suisse debt, net of tax, anticipated but not yet declared dividends, the net long position in own treasury shares in the trading book and an adjustment for the accounting treatment of pension plans. <sup>2</sup> Non-cumulative perpetual preferred securities and capital notes. The FINMA has advised that Credit Suisse Group and the Bank may continue to include as tier 1 capital CHF 1.7 billion and CHF 4.4 billion, respectively, in 1Q10 (4Q09: CHF 1.7 billion and CHF 4.4 billion, respectively; 1Q09: CHF 1.8 billion and CHF 4.8 billion, respectively) of equity from special purpose entities that are deconsolidated under US GAAP. Hybrid tier 1 capital represented 32.3% and 31.7% of the Group's and the Bank's adjusted tier 1 capital, respectively, as of the end of 1Q10 (4Q09: 32.9% and 32.7%, respectively; 1Q09: 34.9% and 33.5%, respectively). Under the decree with the FINMA, a maximum of 35% of tier 1 capital can be in the form of these hybrid capital instruments.

<b>Tangible book value per share</b>	<b>23.40</b>	<b>23.88</b>	<b>22.26</b>	(2)	5

<sup>1</sup> Tangible shareholders' equity attributable to shareholders is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows for the consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

### Shareholders' equity

Our shareholders' equity decreased to CHF 36.8 billion as of the end of 1Q10 from CHF 37.5 billion as of the end of 4Q09. The decrease in shareholders' equity reflected the reduction in retained earnings as a result of the consolidation of Alpine on January 1, 2010 under new US GAAP rules and the effect of share-based compensation, partially offset by the net income in 1Q10 and the change in other comprehensive income, reflecting the positive impact of foreign exchange rate changes on cumulative translation adjustments. For further information on the consolidation of Alpine, refer to I – Credit Suisse results – Core Results – Accounting changes adopted in 1Q10.

### Regulatory developments

In December 2009, the BCBS published consultative proposals to strengthen the resilience of the banking sector. The proposals are aimed at strengthening capital and liquidity regulations. The BCBS proposals are not expected to be finalized until later in 2010 following an impact assessment by the BCBS and are expected to be implemented over a period of time. The impact of these proposals on us will be assessed as the details and timing of the implementation are clarified. Final BCBS requirements may be adjusted when implemented by FINMA and our other regulators. For further information, refer to I – Core Results – Regulatory proposals and developments.

Prior utilized economic capital and economic capital resources balances have been restated for methodology changes in order to show meaningful trends.

<sup>1</sup> Primarily includes anticipated dividends and unrealized gains on owned real estate. Economic adjustments are made to tier 1 capital to enable comparison between capital utilization and resources. <sup>2</sup> Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, diversification benefit and an estimate for the impacts of certain methodology changes planned for 2010. <sup>3</sup> Includes primarily expense risk diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital. <sup>4</sup> Includes a diversification benefit of CHF 27 million. <sup>5</sup> Includes a diversification benefit of CHF 21 million.

## Economic capital

### Overview

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating).

For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Treasury management in the Credit Suisse Annual Report 2009.

We regularly review the economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In 1Q10, we implemented changes to the position risk methodology for risk management purposes. In addition, we reduced the severity of the confidence level scaling factors for 99.97% position risk (for capital management purposes) for international lending & counterparty exposures and traded credit within fixed income trading following last year's increase in the severity of spread shocks for 99% position risk (for risk management purposes). We now also exclude fair value gains and losses on own debt from economic adjustments within economic capital resources. Prior period balances have been restated for methodology changes in order to show meaningful trends. The total impacts of methodology changes on 4Q09 economic capital and eco-

economic capital resources were decreases of CHF 339 million, or 1%, and CHF 1,074 million, or 3%, respectively, and a reduction in the economic capital ratio as of 4Q09 to 132% from 134%.

There are a number of planned revisions to Basel II market risk over the next two years, such as an incremental charge to capture default risk on trading book assets. These changes already form part of our economic capital framework, and we do not expect material future impacts to our economic capital from these changes. Any implications of the BCBS proposals on the economic capital framework will be assessed as the details and timing of the implementation are clarified.

#### **Utilized economic capital trends**

Over the course of 1Q10, our utilized economic capital increased 4% due to higher position risk in Investment Banking.

For Investment Banking, utilized economic capital increased 6% due to increases in position risks for emerging markets, fixed income trading and real estate and structured assets. Excluding the US dollar translation impact against the Swiss franc, utilized economic capital increased 5%.

For Private Banking, Asset Management and Corporate Center, utilized economic capital was stable over the quarter.

For further information on our position risk, refer to Risk management – Key position risk trends.

#### **Capital adequacy trends**

The economic capital coverage ratio increased from 132% in 4Q09 to 133% in 1Q10, primarily reflecting increased economic capital resources, due to higher tier 1 capital and higher economic adjustments, partially offset by an increase in utilized economic capital. Our coverage ratio is within our target band of 110% to 140%.

# Risk management

Our overall position risk increased 6% in 1Q10. Excluding the US dollar translation impact, position risk increased 4%. We received approval from FINMA to implement a revised VaR methodology that is more responsive to short-term market volatility. Under this revised methodology, average risk management VaR increased 8% to CHF 105 million, and period-end VaR increased 25% to CHF 130 million, compared to 4Q09.

## Economic capital – Position risk

Position risk, which is a component of the economic capital framework, is our core Group-wide risk management tool. It is used to assess, monitor and report risk exposures throughout the Group and represents good market practice. Position risk is the level of unexpected loss in economic value on our portfolio of positions over a one-year horizon, which is exceeded with a given small probability (1% for risk management purposes and 0.03% for capital management purposes).

For further information, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Economic capital and position risk in the Credit Suisse Annual Report 2009.

We regularly review the economic capital methodology to ensure that the model remains relevant as markets and business strategies evolve. In 1Q10, we implemented changes to the position risk methodology for risk management purposes, which increased 4Q09 position risk by CHF 12 million, or 0.1%. Prior period balances have been restated to show meaningful trends.

<sup>1</sup> This category comprises fixed income trading, foreign exchange and commodity exposures. <sup>2</sup> This category comprises commercial and residential real estate, ABS exposure, real estate acquired at auction and real estate fund investments.

## Key position risk trends

Position risk for risk management purposes at the end of 1Q10 increased 6% compared to the end of 4Q09. Position risks increased in emerging markets, due to higher risk in Asia, Latin America and Eastern Europe, and in fixed income trading, due to increased foreign exchange trading and traded credit exposures. Position risk also increased in real estate & structured assets, due to secondary trading in CMBS. The increases were partially offset by reductions in equity trading & investments, due to lower equity-backed financing in the equity derivatives business. Excluding the US dollar translation impact against the Swiss franc, position risk increased 4%.

Compared to the end of 1Q09, position risk for risk management purposes increased 4%. The increases were primarily due to higher fixed income trading, reflecting higher traded credit and foreign exchange trading exposures, and higher RMBS exposures in real estate & structured assets. The increases were partially offset by reduced position risks in international lending & counterparty exposures, reflecting lower derivatives exposures in Investment Banking, and in emerging markets, primarily Latin America. Excluding the US

dollar translation impact against the Swiss franc, position risk increased 11%.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolio they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not perfectly offset the losses or gains on the portfolio.

## Market risk

We primarily assume market risk through the trading activities in Investment Banking. The other divisions also engage in trading activities, but to a much lesser extent. Trading risks are measured using VaR along with a number of other risk measurement tools. VaR is the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon and for a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no

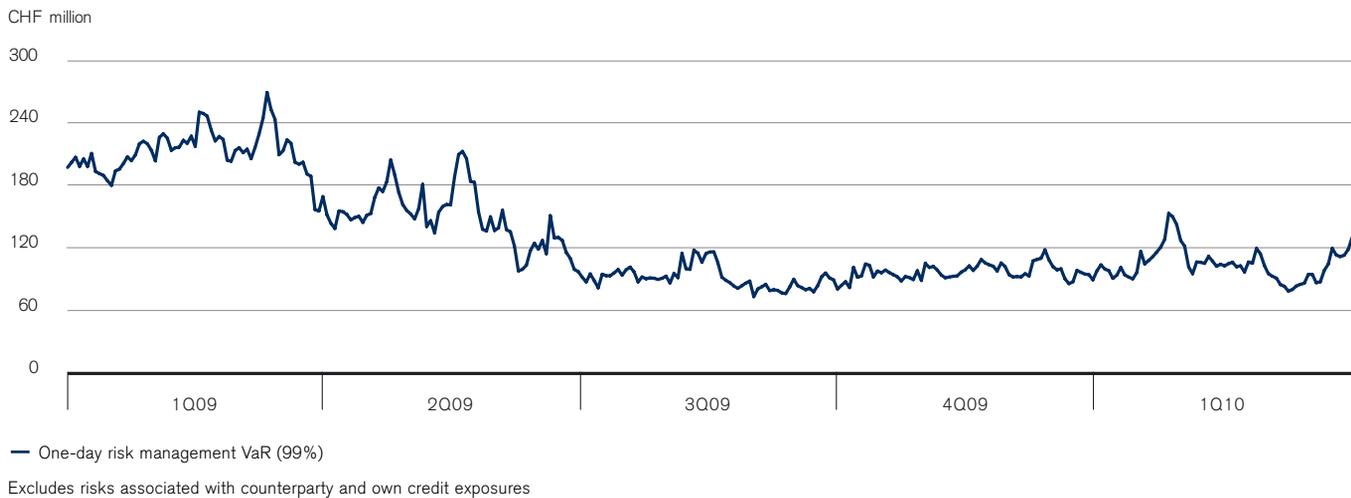

## One-day, 99% VaR

End of period	172	25	19	51	(110)	157 <sup>2</sup>	142

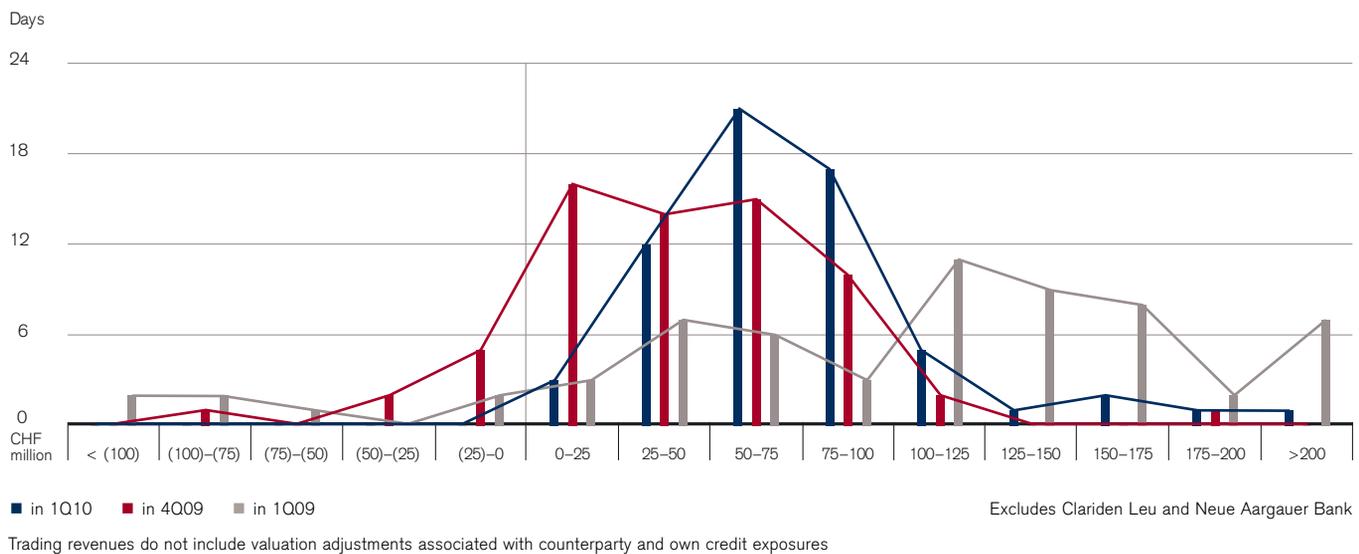

Excludes risks associated with counterparty and own credit exposures.

<sup>1</sup> As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit. <sup>2</sup> Excluding the impact of methodology changes, average risk management VaR would have been CHF 136 million, CHF 116 million and CHF 143 million and period-end VaR would have been CHF 184 million, CHF 131 million and CHF 110 million in 1Q10, 4Q09 and 1Q09, respectively.

### Daily risk management VaR

### Actual daily trading revenues

abrupt changes in market conditions. Other tools, including stress testing, are more appropriate for modeling the impact from severe market conditions. We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio.

As part of the ongoing review to improve risk management approaches and methodologies, we are implementing a revised VaR measure for risk management purposes. This revised VaR, which we call risk management VaR, adjusts VaR

in cases where short-term market volatility over a six-month period is different than long-term volatility in a three-year dataset. This change makes VaR a more useful risk management tool and one that better reflects short-term market volatility. We have approval from FINMA to use this VaR methodology for risk management purposes. We have restated risk management VaR for prior periods to show meaningful trends. For market risk regulatory capital, we will continue to use our scaled VaR methodology, which we call regulatory

VaR, which adjusts VaR in cases where short-term market volatility is higher than long-term volatility in a three-year dataset.

For both risk management VaR and regulatory VaR, we present one-day, 99% VaR, which is ten-day VaR adjusted to a one-day holding period based on a 99% confidence level. This means there is a 1-in-100 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. In order to show the aggregate market risk in our trading books, the chart entitled "Daily risk management VaR" shows the trading-related market risk on a consolidated basis.

Our average risk management VaR during 1Q10 increased 8% to CHF 105 million from 4Q09 and decreased 51% from 1Q09. The increase in average risk management VaR from 4Q09 was partially due to the increased risk usage in support of our client flow businesses across fixed income mainly due to increased credit and interest rate exposures. Equity risk management VaR decreased, reflecting lower IPO exposures, partially offset by increased equity derivatives exposures. Period-end risk management VaR as of the end of 1Q10 increased 25% to CHF 130 million from the end of 4Q09, and decreased 17% from the end of 1Q09. The increase in period-end risk management VaR from 4Q09 was partially due to the increased credit and foreign exchange exposures at the end of the quarter.

In 1Q10, our average regulatory VaR was CHF 136 million, an increase of 14% from 4Q09 and a decrease of 34% from 1Q09. Period-end regulatory VaR as of the end of 1Q10 increased 40% to CHF 184 million from the end of 4Q09, and increased 30% from the end of 1Q09. The regulatory VaR is still driven by the extreme market volatility of 4Q08 in the three-year dataset.

Various techniques are used to assess the accuracy of the VaR models, including backtesting. In line with industry practice, we present backtesting using actual daily trading revenues. Actual daily trading revenues are compared with regulatory VaR calculated using a one-day holding period. A backtesting exception occurs when the trading revenue loss exceeds the daily VaR estimate. We had no regulatory VaR backtesting exceptions during 1Q10. The histogram entitled "Actual daily trading revenues" reflects the distribution of actual daily trading revenues during 1Q10, 4Q09 and 1Q09. The width of this distribution provides another indication of the day-to-day risk in our trading activities. For further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements, refer to Treasury management – Capital management.

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and other desks running interest rate risk positions actively manage the positions within approved limits.

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have been an increase of CHF 8.2 million as of the end of 1Q10, compared to an increase of CHF 7.7 million as of the end of 4Q09.

## Credit risk

Credit risk is the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations. In the event of a default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries resulting from foreclosure, liquidation of collateral or the restructuring of the debtor company.

The majority of our credit risk is concentrated in Private Banking and Investment Banking. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions and may be on or off-balance sheet.

Our regular review of the creditworthiness of clients and counterparties does not depend on the accounting treatment of the asset or commitment. Adverse changes in the creditworthiness of counterparties of loans held at fair value are reflected in valuation changes reported directly in revenues, and therefore are not part of the impaired loans balance. For further information on credit risk, refer to III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Credit risk in the Credit Suisse Annual Report 2009. For further information on counterparty credit risk, refer to Note 24 – Fair value of financial instruments in V – Condensed consolidated financial statements – unaudited.

The following table represents credit risk from loans, loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable securities or credit hedges. Loan commitments

include irrevocable credit facilities for Investment Banking and Private Banking and, additionally in Private Banking, unused credit limits which can be revoked at our sole discretion upon notice to the client.

<sup>1</sup> Positive replacement value after netting agreements.

## Loan exposure

Compared to the end of 4Q09, gross loans decreased 4% to CHF 230.0 billion. In Private Banking, gross loans were stable at CHF 178.7 billion. Gross loans in Investment Banking decreased 18% to CHF 51.3 billion, mainly due to declines in financial institutions reflecting the elimination of loans to Alpine upon consolidation of Alpine in 1Q10. Gross impaired loans were stable at CHF 2.3 billion. A decrease in impaired loans in Private Banking was largely offset by a slight increase in Investment Banking. The decrease in Private Banking was mainly due to decreased potential problem loans. In Investment Banking, the increase in restructured loans and non-performing loans was partially offset by a decrease in potential problem loans. A portion of the impaired loans in Investment Banking is economically hedged by insurance and other risk

mitigation, including credit default swaps (CDS). We recorded a net release of provision for credit losses of CHF 50 million in 1Q10, compared to a net release of provision of CHF 40 million in 4Q09, with a net release of CHF 69 million in Investment Banking, partially offset by a net provision of CHF 19 million in Private Banking.

Compared to the end of 1Q09, gross loans decreased 4%, mainly in Investment Banking. Gross loans in Private Banking was stable. In Investment Banking, strong decreases in commercial and industrial loans and decreases in loans to financial institutions were partially offset by a slight increase in real estate loans. Gross impaired loans decreased CHF 650 million, or 22%, mainly driven by lower non-performing loans and potential problem loans in Investment Banking, but also due to reduced non-performing loans in Private Banking.

The disclosure presents our lending exposure from a risk management perspective and, as such, differs from the loans presentation in Note 14 – Loans in V – Condensed consolidated financial statements – unaudited.

<sup>1</sup> Includes Asset Management and Corporate Center. <sup>2</sup> Of which CHF 47,940 million, CHF 47,597 million and CHF 48,622 million were secured by financial collateral and mortgages in 1Q10, 4Q09 and 1Q09, respectively. <sup>3</sup> Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value. <sup>4</sup> A large portion of loans in Investment Banking are carried at fair value. The loan metrics for loans in Investment Banking and Credit Suisse will be included in our Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

# Condensed consolidated financial statements – unaudited

On or about May 6, 2010, we will publish and file with the SEC our Financial Report 1Q10, which will include additional disclosures on:

- fair value of financial instruments;
- derivatives and hedging activities;
- investment securities;
- assets pledged or assigned; and
- transfers of financial assets and variable interest entities.

# Notes to the condensed consolidated financial statements – unaudited

## Note 1 Summary of significant accounting policies

---

### Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2009, included in the Credit Suisse Annual Report 2009. For a description of the Group's significant accounting policies, refer to Note 1 – Summary of significant accounting policies in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2009.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented, except with respect to the quantitative disclosures on fair value, derivatives and hedging activities, transfers of financial assets and variable interest entities (VIEs), investment securities and assets pledged or assigned. These disclosures will be included in the Financial Report 1Q10 to be published on our website and filed with the United States (US) Securities and Exchange Commission (SEC) on or about May 6, 2010. The presentation of period over period change, the 4Q09 consolidated statements of operations and the 1Q09 consolidated balance sheet have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as

of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### FASB establishes Accounting Standards Codification

In June 2009, the Financial Accounting Standards Board (FASB) established the FASB Accounting Standards Codification (Codification or ASC) as the single authoritative source of US GAAP. The Codification became effective July 1, 2009 and supersedes all existing non-SEC accounting and reporting standards. Under the Codification, the FASB will not issue new accounting standards in the form of Standards, FASB Staff Positions or Emerging Issues Task Force Abstracts. The FASB will instead issue Accounting Standards Updates (ASU), which will serve to update the Codification, provide background information about the guidance and provide the basis for conclusions on changes to the Codification. SEC rules and interpretive releases remain in force for SEC registrants.

The Codification is not intended to change US GAAP, but it will change the manner in which authoritative accounting guidance is organized, presented and referenced. These financial statements include references only to the Codification topics.

### Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards. For a complete description of recently adopted accounting standards, refer to Note 2 – Recently issued accounting standards in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2009.

### ASC Topic 260 – Earnings Per Share

In June 2008, the FASB provided guidance for when certain instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in computing earnings per share under the two class method.

The Group adopted the guidance as of January 1, 2009. All prior-period earnings per share data presented has been adjusted retrospectively to conform with the guidance.

### ASC Topic 320 – Investments – Debt and Equity Securities

In April 2009, the FASB updated accounting guidance regarding recognition and presentation of other-than-temporary impairments. The update amends the other-than-temporary impairment guidance in US GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements.

The guidance was effective for interim and annual reporting periods ending after June 15, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows. For further information, refer to Note 14 – Investment securities.

In April 2009, the SEC issued Staff Accounting Bulletin (SAB) No. 111, "Miscellaneous Accounting – Other Than Temporary Impairment of Certain Investments in Equity Securities" (SAB 111). SAB 111 addresses the guidance provided in the ASU regarding other-than-temporary impairments and retains the SEC staff's views as to whether an impairment of an equity security is other-than-temporary.

SAB 111 was effective for interim and annual reporting periods ending after June 15, 2009. The adoption of SAB 111 did not have a material impact on the Group's financial condition, results of operations or cash flows.

### ASC Topic 805 – Business Combinations

In April 2009, the FASB issued guidance to address application issues raised by preparers, auditors and members of the legal profession on initial recognition and measurement, subsequent measurement and accounting and disclosure of assets and liabilities arising from contingencies in a business combination.

The guidance was effective for assets and liabilities arising from contingencies in business combinations from January 1, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

In December 2007, the FASB updated accounting guidance regarding business combinations to require an acquiring entity to recognize all assets acquired, liabilities assumed and any noncontrolling interest in the acquiree at their fair values at the acquisition date.

The guidance also requires substantial new disclosures and will change the accounting treatment for the recognition of acquisition costs, restructuring costs and in-process research and development as well as the recognition and subsequent measurement of acquired contingent liabilities.

The Group has applied the guidance prospectively to business combinations that occurred after January 1, 2009 and

there was no impact arising from the exception for income taxes that was applicable to business combinations consummated prior to January 1, 2009.

### ASC Topic 810 – Consolidation

In February 2010, the FASB issued ASU 2010-10, "Amendments for Certain Investment Funds" (ASU 2010-10), an update to Topic 810 – Consolidation. The amendments to the consolidation requirements of Topic 810 resulting from the issuance of Statement of Financial Accounting Standards (SFAS) No. 167, "Amendments to FASB Interpretation No. 46(R)" (SFAS 167) are deferred for a reporting entity's interest in an entity (1) that has all the attributes of an investment company or (2) for which it is industry practice to apply investment company accounting. The deferral does not apply in situations in which a reporting entity has the explicit or implicit obligation to fund losses of an entity that could potentially be significant to the entity. The deferral also does not apply to interests in securitization entities, asset-backed financing entities, or entities formerly considered qualified special purpose entities. An entity that qualifies for deferral will continue to be assessed under the overall guidance on the consolidation of VIEs in Subtopic 810-10 (before the SFAS 167 amendments) or other applicable consolidation guidance, such as the guidance for consolidation of partnerships in Subtopic 810-20. The amendments in ASU 2010-10 do not defer the disclosure requirements in the SFAS 167 amendments to Topic 810.

ASU 2010-10 is effective for annual reporting periods that begin after November 15, 2009 (January 1, 2010 for the Group) and for interim and annual reporting periods thereafter. The impact of adopting ASU 2010-10 on January 1, 2010 is included in the impacts below regarding the adoption of ASU 2009-17.

In January 2010, the FASB issued ASU 2010-02, "Accounting and Reporting for Decreases in Ownership of a Subsidiary – a Scope Clarification", (ASU 2010-02). ASU 2010-02 provides amendments to Subtopic 810-10 to clarify the scope of the decrease in ownership provisions. The amendment also clarifies the transactions to which the decrease in ownership guidance in Subtopic 810-10 does not apply. ASU 2010-02 also expands the disclosure about the deconsolidation of a subsidiary or derecognition of a group of assets within Subtopic 810-10.

The Group adopted the provisions of ASU 2010-02 retrospectively to January 1, 2009. The adoption of the guidance did not have an impact on the Group's financial condition, results of operations or cash flows.

In December 2009, the FASB issued ASU 2009-17, "Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities" (ASU 2009-17). ASU 2009-17

was issued to update the Codification for the June 2009 issuance of SFAS 167. ASU 2009-17 changes how a reporting entity determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. Under this standard, the determination of whether a reporting entity is required to consolidate another entity is based on, among other things, the other entity's purpose and design and the reporting entity's ability to direct the activities of the other entity that most significantly impact the other entity's economic performance.

ASU 2009-17 is effective for annual reporting periods that begin after November 15, 2009 (January 1, 2010 for the Group) and for interim and annual reporting periods thereafter.

The adoption of ASU 2009-17 on January 1, 2010 resulted in an increase of CHF 15.0 billion to our consolidated balance sheet and a reduction in total shareholders' equity of CHF 2.2 billion, net of tax. The consolidation of these entities did not have an impact on tier 1 capital or risk-weighted assets. The disclosures required by ASU 2009-17 will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

Upon consolidation, transactions between the Group and the formerly unconsolidated entities became intercompany transactions and are eliminated.

In December 2007, the FASB issued guidance to establish accounting and reporting standards for a noncontrolling interest in a subsidiary and for deconsolidation of a subsidiary.

The guidance requires the recognition of a noncontrolling interest as equity in the consolidated financial statements separate from the parent's equity. In addition, net income attributable to the noncontrolling interest must be included in consolidated net income on the face of the income statement. The guidance clarifies that changes in a parent's ownership interest in a subsidiary that do not result in deconsolidation are equity transactions if the parent retains its controlling financial interest. The guidance has additional disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners.

The Group adopted the presentation and transaction guidance of the ASU as of January 1, 2009.

#### **ASC Topic 815 – Derivatives and Hedging**

In June 2008, the FASB issued guidance to require an entity to evaluate whether an equity-linked financial instrument is indexed to its own stock using a two step approach. The first step requires entities to evaluate the instrument's contingent exercise provisions, if any. The second step requires entities to evaluate the instrument's settlement provisions.

The Group adopted the guidance as of January 1, 2009. Adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

In March 2008, the FASB amended and expanded the disclosure requirements for derivative instruments and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: i) how and why an entity uses derivative instruments; ii) how derivative instruments and related hedge items are accounted for under the Codification; and iii) how derivative instruments and related hedge items affect an entity's financial position, financial performance and cash flows.

The ASU requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value gains and losses on derivative instruments and credit-risk-related contingent features in derivative agreements.

The ASU mandates additional disclosures and, as such, did not impact the Group's financial position, results of operations or cash flows when adopted as of January 1, 2009. The disclosures required by the guidance will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

#### **ASC Topic 820 – Fair Value Measurements and Disclosures**

In January 2010, the FASB issued ASU 2010-06, "Improving Disclosures about Fair Value Measurements" (ASU 2010-06), an update to Topic 820 – Fair Value Measurements and Disclosures. ASU 2010-06 requires both new and clarifies existing fair value measurement disclosures. The new requirements include disclosure of transfers in and out of level 1 and 2 and gross presentation of purchases, sales, issuances, and settlements in the reconciliation of beginning and ending balances of level 3 instruments. The clarifications required by ASU 2010-06 include the level of disaggregation in the fair value hierarchy and level 3 reconciliation of assets and liabilities by class of financial instrument. In addition the reporting entity should expand its disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements included in levels 2 and 3 of the fair value hierarchy.

The new disclosures and clarifications are effective for interim and annual periods beginning after December 15, 2009, except the disclosures about purchases, sales, issuances, and settlements in reconciliation of beginning and ending balances of level 3 instruments, which are effective for fiscal years beginning after December 15, 2010. ASU 2010-06 is an update only for disclosures and as such did not

impact the Group's financial position, results of operations or cash flows. The disclosures required by ASU 2010-06 will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

In September 2009, the FASB issued ASU 2009-12, "Investments in Certain Entities that Calculate Net Asset Value per Share (or its Equivalent)" (ASU 2009-12), an update to Topic 820 – Fair Value Measurements and Disclosures. ASU 2009-12 is applicable to an investment that has the attributes defined by ASC 946, Financial Services – Investment Companies, but does not have a readily determinable fair value. For those investments that are within its scope, ASU 2009-12 permits, as a practical expedient, an entity to measure the fair value of an investment using net asset value (NAV) per share of the investment and also requires additional disclosures. The ASU 2009-12 also provides guidance regarding the classification within the fair value hierarchy.

ASU 2009-12 was effective for periods ending after December 15, 2009. The adoption of ASU 2009-12 on December 31, 2009 did not have a material impact on the Group's financial condition, results of operations, cash flows or net classification within the fair value hierarchy. The disclosures required by ASU 2009-12 will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

In August 2009, the FASB issued ASU 2009-05, "Measuring Liabilities at Fair Value" (ASU 2009-05), an update to Topic 820 – Fair Value Measurements and Disclosures. ASU 2009-05 provides clarification on how a liability is to be measured when a quoted price in an active market for an identical liability is not available. In addition, ASU 2009-5 provides clarification that a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of a liability.

ASU 2009-05 is effective for the first reporting period beginning after issuance, however early application is permitted. The adoption of ASU 2009-05 on October 1, 2009 did not have a material impact on the Group's financial condition, results of operations or cash flows.

In April 2009, the FASB provided additional guidance regarding the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased and for identifying transactions that are not orderly. The ASU has additional disclosure requirements.

The guidance was effective prospectively for interim and annual reporting periods ending after June 15, 2009. The adoption of the guidance on June 30, 2009 did not have a material impact on the Group's financial condition, results of operations or cash flows.

#### ASC Topic 825 – Financial Instruments

In April 2009, the FASB issued guidance to require disclosures for publicly traded companies about fair value of financial instruments for interim reporting periods as well as in annual financial statements.

The guidance was effective for interim reporting periods ending after June 15, 2009. The guidance mandates additional disclosures and, as such, did not impact the Group's financial position, results of operations or cash flows.

#### ASC Topic 855 – Subsequent Events

In February 2010, the FASB issued ASU 2010-09, "Amendments to Certain Recognition and Disclosure Requirements" (ASU 2010-09), an update to Topic 855 – Subsequent Events. ASU 2010-09 provides amendments as follows:

- (i) an entity that either (a) is an SEC filer or (b) is a conduit bond obligor for conduit debt securities that are traded in a public market is required to evaluate subsequent events through the date that the financial statements are issued;
- (ii) an entity that is an SEC filer is not required to disclose the date through which subsequent events have been evaluated; and
- (iii) the scope of the reissuance disclosure requirements is refined to include revised financial statements only.

ASU 2010-09 was effective upon issuance. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

In May 2009, the FASB updated accounting guidance regarding subsequent events. The update provides additional guidance on:

- (i) the period after the balance sheet date during which management of a reporting entity shall evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements;
- (ii) the circumstances under which an entity shall recognize events or transactions occurring after the balance sheet date in its financial statements; and
- (iii) the disclosures that an entity shall make about events or transactions that occurred after the balance sheet date.

The guidance was effective prospectively for interim and annual reporting periods ending after June 15, 2009. The adoption of the guidance on June 30, 2009 did not have a material impact on the Group's financial condition, results of operations or cash flows.

#### ASC Topic 860 – Transfers and Servicing

In December 2009, the FASB issued ASU 2009-16, "Accounting for Transfer of Financial Assets" (ASU 2009-16).

ASU 2009-16 was issued to update the Codification for the June 2009 issued SFAS No. 166, "Accounting for Transfer of Financial Assets – an amendment of FASB Statement No. 140", which previously had not been incorporated into the Codification. ASU 2009-16 requires additional disclosures about the transfer of financial assets, including securitization transactions, and continuing exposure to the risks related to transferred financial assets. It eliminates the concept of a "qualifying special-purpose entity". ASU 2009-16 also changes the requirements for derecognizing financial assets.

ASU 2009-16 is effective for annual periods that begin after November 15, 2009 (January 1, 2010 for the Group) and for interim and annual reporting periods thereafter. As this standard applies to prospective transactions entered into after the effective date and generally relates to whether transactions will be recognized as sales or secured financings for accounting purposes but will not change the economics of the underlying transactions, the Group does not believe that its financial condition, results of operations and cash flows will be materially impacted by the adoption of ASU 2009-16.

In February 2008, the FASB issued guidance regarding a repurchasing financing, which is a repurchase agreement that relates to a previously transferred financial asset between the same counterparties that is entered into contemporaneously with, or in contemplation of, the initial transfer. The guidance mandates that a transferor and transferee shall not separately account for a transfer of a financial asset and a related repurchase financing unless the two transactions have a valid and distinct business or economic purpose for being entered into

separately and the repurchase financing does not result in the initial transferor regaining control over the financial asset. The guidance establishes a presumption that an initial transfer and a repurchase financing are linked unless certain criteria are met. If the criteria are not met, the initial transfer is not accounted for as a sale by the transferor and the repurchase financing is accounted for as a forward contract.

The Group applied the guidance to all prospective transactions as of January 1, 2009. The adoption of the guidance did not have a material impact on the Group's financial condition, results of operations or cash flows.

### **Standards to be adopted in future periods**

#### **ASC Topic 815 – Derivatives and Hedging**

In March 2010, the FASB issued ASU 2010-11, "Scope Exception Related to Embedded Credit Derivatives" (ASU 2010-11), an update to Topic 815 – Derivatives and Hedging. ASU 2010-11 provides clarification on the scope exception in Topic 815 to clarify the type of embedded credit derivatives that are exempt from embedded derivative bifurcation requirements. Only one form of embedded credit derivative qualifies for the exemption and it relates only to the subordination of one financial instrument to another.

ASU 2010-11 is effective for the first fiscal quarter beginning after June 15, 2010 with early adoption permitted. The adoption of ASU 2010-11 is not expected to have a material impact on the Group's financial condition, results of operations or cash flows.

## **Note 2 Business developments and subsequent events**

---

### **Acquisitions and divestitures**

For further information on divestitures, refer to Note 3 – Discontinued operations.

There were no significant acquisitions in 1Q10.

### **Subsequent events**

The UK levy on variable compensation exceeding GBP 25,000 for 2009 was enacted in April 2010 and will result in additional compensation expenses currently estimated at CHF 400 million in 2Q10.

### Note 3 Discontinued operations

On December 31, 2008 the Group signed an agreement to sell part of its traditional investments business in Asset Management to Aberdeen Asset Management (Aberdeen). The transaction was completed with the final closing on July 1, 2009. In return for the sale of these businesses, the Group acquired 240 million shares in Aberdeen, resulting in a total interest of 23.9%, with subsequent ownership changes reflected in continuing operations. Prior to this transaction, Aberdeen was an unrelated party to the Group. As part of the sale of the traditional investments business, we purchased certain assets in the amount of CHF 0.1 billion in 1Q10 in accordance with contractual obligations and recognized unre-

alized losses of CHF 19 million included in discontinued operations.

The results of operations of the business sold have been reflected in income from discontinued operations in the consolidated statements of operations for all periods presented. The assets and liabilities of the business sold have been presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, in the consolidated balance sheet beginning in 4Q08. Assets and liabilities are reclassified as held-for-sale in the period in which the disposal determination is made, and prior periods are not reclassified.

### Income from discontinued operations

 Note 4 **Segment reporting**

---

**Overview**

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of three segments: Private Banking, Investment Banking and Asset Management. The three segments are complemented by Shared Services, which provides support in the areas of finance, operations, including human resources, legal and compliance, risk management and information technology. The segment information reflects the Group's reportable segments as follows:

- Private Banking offers comprehensive advice and a broad range of wealth management solutions, including pension planning, life insurance products, tax planning and wealth and inheritance advice, which are tailored to the needs of high-net-worth and ultra-high-net-worth individuals worldwide. In Switzerland, it supplies banking products and services to individual clients, including affluent, high-net-worth and ultra-high-net-worth clients, and corporates and institutions.
- Investment Banking offers investment banking and securities products and services to corporate, institutional and government clients around the world. Its products and services include debt and equity underwriting, sales and trading, mergers and acquisitions advice, divestitures, corporate sales, restructuring and investment research.
- Asset Management offers integrated investment solutions and services to institutions, governments and private clients. It provides access to a wide range of investment classes, building on its global strengths in alternative investments and traditional investment strategies.

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Noncontrolling interest-related revenues and expenses resulting from the consolidation of certain private equity funds and other entities in which the Group does not have a significant economic interest in such revenues and expenses are reported as noncontrolling interests without significant economic interest. The consolidation of these entities does not affect net income attributable to shareholders as the amounts recorded in net revenues and total operating expenses are offset by corresponding amounts reported as noncontrolling interests. In addition, our tax expense is not affected by these revenues and expenses.

**Revenue sharing and cost allocation**

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements govern the compensation received by one segment for generating revenue or providing services on behalf of another. These agreements are negotiated periodically by the relevant segments on a product-by-product basis.

The aim of revenue-sharing and cost allocation agreements is to reflect the pricing structure of unrelated third-party transactions.

Corporate services and business support in finance, operations, including human resources, legal and compliance, risk management and information technology are provided by the Shared Services area. Shared Services costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

**Funding**

Credit Suisse centrally manages its funding activities. New securities for funding and capital purposes are issued primarily by Credit Suisse AG, the Swiss bank subsidiary of the Group (the Bank). The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record interest income and expense in each of the segments for this capital and funding. The Group's funds transfer pricing system is designed to allocate to its businesses funding costs in a way that incentivizes their efficient use of funding. The Group's funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet and the costs associated with funding liquidity and balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this system, the Group's businesses are also credited to the extent they provide long-term stable funding.

**Taxes**

The Group's segments are managed and reported on a pre-tax basis.

<b>Trading revenues</b>	<b>3,452</b>	<b>548</b>	<b>4,897</b>	<b>–</b>	<b>(30)</b>

Trading revenues includes revenues from trading financial assets and liabilities as follows:

- Equities;
- Commodities;
- Listed and over-the-counter (OTC) derivatives;
- Derivatives linked to funds of hedge funds and providing financing facilities to funds of hedge funds;
- Market making in the government bond and associated OTC derivative swap markets;
- Domestic, corporate and sovereign debt, convertible and non-convertible preferred stock and short-term securities such as floating rate notes and commercial paper (CP);
- Market making and positioning in foreign exchange products;
- Credit derivatives on investment grade and high yield credits;
- Trading and securitizing all forms of securities that are based on underlying pools of assets; and
- Life settlement contracts.

Trading revenues also includes changes in the fair value of financial assets and liabilities elected to fair value under US GAAP. The main components include certain instruments from the following categories:

- Central bank funds purchased/sold;
- Securities purchased/sold under resale/repurchase agreements;
- Securities borrowing/lending transactions;

- Loans and loan commitments; and
- Customer deposits, short-term borrowings and long-term debt.

**Managing the risks**

As a result of the Group's broad involvement in financial products and markets, its trading strategies are correspondingly diverse and exposures are generally spread across a diversified range of risk factors and locations. The Group uses an economic capital limit structure to limit overall risk taking. The level of risk incurred by its divisions is further restricted by a variety of specific limits, including consolidated controls over trading exposures. Also, as part of its overall risk management, the Group holds a portfolio of economic hedges. Hedges are impacted by market movements, similar to trading securities, and may result in gains or losses on the hedges which offset losses or gains on the portfolios they were designed to economically hedge. The Group manages its trading risk with regard to both market and credit risk. For market risk, it uses tools capable of calculating comparable exposures across its many activities, as well as focused tools that can specifically model unique characteristics of certain instruments or portfolios.

The principal measurement methodology for trading assets, as well as most instruments for which the fair value option was elected, is value-at-risk. The Group holds securities as collateral and enters into credit default swaps (CDS) to mitigate the credit risk on these products.

<sup>1</sup> Recorded as cash collateral on derivative instruments in Note 16 – Other assets and liabilities.

Note 14 **Investment securities**

The required disclosures for investment securities will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

Management determined that the unrealized losses on debt securities are primarily attributable to general market interest

rate, credit spread or exchange rate movements. No significant impairment charges were recorded as the Group does not intend to sell the investments, nor is it more likely than not that the Group will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

<b>Balance at end of period</b>	<b>(105)</b>	<b>(6,543)</b>	<b>(27)</b>	<b>(2,538)</b>	<b>(97)</b>	<b>(9,310)</b>

Note 19 **Tax**

---

The effective tax rate on income from continuing operations was 28.2% in 1Q10. The effective tax rate primarily reflected the impact of the geographical mix of results.

Net deferred tax assets were CHF 10,032 million as of the end of 1Q10, an overall net increase of CHF 1,213 million, including foreign exchange translation impacts. Foreign exchange translation impacts include foreign exchange gains of CHF 176 million, which are included within the currency translation adjustment recorded in accumulated other comprehensive income. The significant increase in net deferred tax assets primarily reflected the consolidation of Alpine Securitization Corp. (Alpine), which contributed net deferred tax assets of CHF 1,508 million and foreign exchange translation gains of CHF 176 million. The deferred tax asset on the consolidation of Alpine of CHF 1,508 million does not affect tier 1 capital as it is excluded from the determination of regulatory capital. Excluding the effects of the consolidation of Alpine and foreign exchange translation gains, net deferred tax

assets decreased CHF 471 million, primarily as a result of the profits attributable to 1Q10. Net deferred tax assets is comprised of CHF 6,214 million in net operating losses and CHF 3,818 million in other temporary differences.

The Group is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 282 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2007; Japan – 2005; the US – 1999; and the UK – 1999.

Note 20 **Employee share-based compensation and other compensation benefits**

Payment of share-based compensation and other compensation benefits is determined by the nature of the business, role, location and performance of the employee. Unless there is a contractual obligation, granting share-based compensation and other compensation benefits is solely at the discretion of senior management.

Total compensation expense for share-based compensation and other awards recognized in compensation and benefits in the consolidated statements of operations was CHF 863 million and CHF 1,009 million in 1Q10 and 1Q09, respectively. As of March 31, 2010, the total estimated unrecognized compensation expense of CHF 4,388 million related to non-vested share-based compensation and other compensation benefits will be recognized over the remaining weighted-average requisite service period of 1.7 years.

The Group generally repurchases its own shares in the open market to satisfy obligations in connection with share-based compensation, but it can also issue new shares out of available conditional capital. In 1Q10 and 1Q09, the Group

delivered approximately 8.2 million and 3.8 million Credit Suisse Group shares (Group shares), respectively, to employees.

### Share-based compensation

#### Incentive Share Unit

Incentive Share Units (ISUs) have been the main form of share-based deferred variable compensation for all employees since 2006. Starting in 2009, ISUs were used for the deferred variable compensation awards for employees up to and including vice presidents. An ISU is similar to a share, but offers additional upside depending on the development of the Group share price.

The compensation expense recognized in 1Q10 and 1Q09 related to ISUs was CHF 200 million and CHF 457 million, respectively. The estimated unrecognized compensation expense related to these awards as of March 31, 2010 was CHF 937 million and will be recognized over the term of the award, subject to early retirement rules.

### Incentive Share Unit activities

in	1Q10	1Q09
<b>Number of awards (million)</b>		
<b>Balance at beginning of period</b>	<b>41.5</b>	<b>59.8</b>
Granted	6.0	26.1
Settled	(8.1)	(2.7)
Forfeited	(0.1)	(0.1)
<b>Balance at end of period</b>	<b>39.3</b>	<b>83.1</b>
of which vested	3.0	21.8
of which unvested	36.3	61.3

### Scaled Incentive Share Unit

The Scaled Incentive Share Unit (SISU) plan is a new share-based long-term incentive plan for managing directors and directors. SISUs were granted for the first time in January 2010 as part of 2009 variable compensation and comprised 50% of the deferred variable compensation awarded to managing directors and directors for 2009. SISUs are similar to ISUs except with four-year vesting and the leverage compo-

nent contains an additional performance condition which could increase or decrease the number of any additional shares.

The compensation expense recognized in 1Q10 related to SISUs was CHF 160 million. The estimated unrecognized compensation expense related to these awards as of March 31, 2010 was CHF 1,232 million and will be recognized over the four-year vesting period, subject to early retirement rules.

<b>Number of awards (million)</b>	
<b>Balance at beginning of period</b>	<b>0.0</b>
Granted	21.1
Forfeited	(0.1)
<b>Balance at end of period</b>	<b>21.0</b>
of which vested	0.0
of which unvested	21.0

### Adjustable Performance Plan awards

The Adjustable Performance Plan (APP) is a new cash-based plan for managing directors and directors. APP awards were granted for the first time in January 2010 as part of 2009 variable compensation and comprised 50% of the deferred variable compensation awarded to managing directors and directors. These awards are subject to a three-year, pro-rata vesting schedule, and the final value of the APP awards paid out to individual employees may be adjusted positively or negatively from the initial amount awarded on the grant date, and the value paid out each year for vested awards will reflect these adjustments.

The compensation expense recognized in 1Q10 relating to APP awards was CHF 272 million. The estimated unrecognized compensation expense related to these awards as of March 31, 2010 was CHF 1,300 million and will be recognized over the three-year vesting period, subject to early retirement rules.

### Performance Incentive Plan

As part of its annual variable compensation process for 2004 and 2005, the Group granted performance incentive plan share units (PIP units) during 2005 (PIP I) and 2006 (PIP II), respectively. PIP units are long-term retention incentive

awards requiring continued employment with the Group, subject to restrictive covenants and cancellation provisions, and vest evenly over a five-year period. Each PIP unit will settle for a specified number of Group shares subsequent to the fifth anniversary of the grant date based on the achievement of: i) earnings performance as compared to predefined targets (performance conditions); and ii) Group share price performance compared to predefined targets and relative to peers (market conditions). On March 31, 2010, we announced the determination of the number of Group shares for holders of PIP I units that were granted in early 2005, which were a part of 2004 compensation. In accordance with the terms of the plan, each outstanding PIP I unit entitled the holder to approximately 4.8 Group shares.

The compensation (income)/expense recognized in 1Q10 and 1Q09 related to PIP I and PIP II was CHF 2 million and CHF (32) million, respectively. The reversal of the accrued expense recognized in 1Q09 reflected forfeitures. The estimated unrecognized compensation expense related to PIP II as of March 31, 2010 was CHF 5 million and will be recognized over a period of one year. None of the PIP units were due for settlement as of March 31, 2010. PIP I awards were settled on April 20, 2010.

## Performance Incentive Plan activities

in	1Q10		1Q09

<b>Balance at beginning of period</b>	<b>6.2</b>	<b>11.9</b>	<b>6.4</b>	<b>12.2</b>
Forfeited	0.0	(0.2)	(0.2)	(0.3)
<b>Balance at end of period</b>	<b>6.2</b>	<b>11.7</b>	<b>6.2</b>	<b>11.9</b>
of which vested	5.3	11.7	3.6	10.0
of which unvested	0.9	0.0	2.6	1.9

### Share awards

The Group's share-based compensation as part of the yearly discretionary variable compensation in prior years included four different types of share awards: phantom shares, blocked shares, longevity premium awards (LPA) and special awards. These share awards entitle the holder to receive one Group share subject to continued employment with the Group, restrictive covenants and cancellation provisions, and generally vest between zero and five years. In 2006, the Group introduced the ISU share-based plan to replace phantom shares, blocked shares and LPA awards granted in prior years.

Special awards are generally shares, which may be granted to new employees. These special awards may contain vesting conditions, depending on the terms of employment.

The compensation expense recognized in 1Q10 and 1Q09 related to shares awarded under phantom share, LPA and special awards was CHF 69 million and CHF 68 million, respectively. The estimated unrecognized compensation expense related to these awards as of March 31, 2010 was CHF 470 million, a majority of which will be recognized over a period of five years.

## Share award activities

in	1Q10		1Q09	
	Number of share awards in million	Weighted-average grant-date fair value in CHF	Number of share awards in million	Weighted-average grant-date fair value in CHF

of which vested	0.8	–	0.6	–
of which unvested	13.2	–	21.3	–

### Share options

Options were a substantial component of the Group's share-based program prior to 2004. The Group discontinued the practice of issuing options and the majority of the original grants have since vested. Share options were granted with an exercise price equal to the market price of Group's shares on the date of grant and expire after ten years.

### Other compensation benefits

#### Partner Asset Facility

As part of the 2008 annual compensation process, the Group granted employees in Investment Banking with a corporate title of managing director or director the majority of the deferred portion of their variable compensation in the form of Partner Asset Facility (PAF) awards, denominated in US dol-

lars. The PAF units are indexed to, and represent a first-loss interest in, a specified pool of illiquid assets that originated in Investment Banking.

On January 21, 2009, the Group granted PAF awards to employees with a total notional value of CHF 686 million. The contractual term of the PAF award is eight years. 66.7% of the PAF awards were fully vested upon grant and attributed to services performed in 2008 and 33.3% of the PAF awards vested over the first three months of 2009.

The compensation expense recognized in 1Q10 related to PAF was CHF 8 million, representing the change in the underlying fair value of the awards during the period. The compensation expense recognized in 1Q09 related to PAF was CHF 182 million, which included the vesting of the remaining 33.3% and the change in the underlying fair value of the awards during the period. There was no unrecognized compensation expense as of March 31, 2010. Compensation expense will be updated at each reporting period date to

reflect any change in the underlying fair value of the PAF awards until the awards are finally settled.

#### Cash Retention Awards

For 2008, managing directors across all divisions, all directors in Investment Banking and, to the extent the cash component of variable compensation exceeded CHF 300,000, directors in Private Banking, Asset Management and Shared Services received deferred variable compensation in the form of Cash Retention Awards (CRA). These CRA payments, which were made in 1Q09, are subject to vesting ratably over a two-year period and other conditions and any unvested CRA will have to be repaid if a claw-back event, such as voluntary termination of employment, occurs. The compensation expense recognized in 1Q10 and 1Q09 related to CRA was CHF 152 million and CHF 334 million, respectively. The estimated unrecognized compensation expense as of March 31, 2010 was CHF 444 million and will be recognized over the remainder of 2010.

#### Note 21 Pension and other post-retirement benefits

The Group previously disclosed that it expected to contribute CHF 488 million to the Swiss and international defined benefit pension plans and other post-retirement defined benefit

plans in 2010. As of March 31, 2010, CHF 184 million of contributions have been made.

## Note 22 **Derivatives and hedging activities**

---

The required disclosures for derivatives and hedging activities will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

Derivatives are generally either privately negotiated OTC contracts or standard contracts transacted through regulated exchanges. The Group's most frequently used freestanding derivative products, entered into for trading and risk management purposes, include interest rate, cross-currency and CDS, interest rate and foreign exchange options, foreign exchange forward contracts and foreign exchange and interest rate futures.

The Group also enters into contracts that are not considered derivatives in their entirety but include embedded derivative features. Such transactions primarily include issued and purchased structured debt instruments where the return may be calculated by reference to an equity security, index or third-party credit risk, or that have non-standard interest or foreign exchange terms.

On the date a derivative contract is entered into, the Group designates it as belonging to one of the following categories:

- trading activities;
- a risk management transaction that does not qualify as a hedge under accounting standards (referred to as an economic hedge);
- a hedge of the fair value of a recognized asset or liability;
- a hedge of the variability of cash flows to be received or paid relating to a recognized asset or liability or a forecasted transaction; or
- a hedge of a net investment in a foreign operation.

### **Trading activities**

The Group is active in most of the principal trading markets and transacts in many popular trading and hedging products. As noted above, this includes the use of swaps, futures, options and structured products, such as custom transactions using combinations of derivatives, in connection with its sales and trading activities. Trading activities include market making, positioning and arbitrage activities. The majority of the Group's derivatives held as of March 31, 2010 were used for trading activities.

### **Economic hedges**

Economic hedges arise when the Group enters into derivative contracts for its own risk management purposes, but the contracts entered into do not qualify for hedge accounting under

US GAAP. These economic hedges include the following types:

- interest rate derivatives to manage net interest rate risk on certain core banking business assets and liabilities;
- foreign exchange derivatives to manage foreign exchange risk on certain core banking business revenue and expense items, as well as on core banking business assets and liabilities;
- credit derivatives to manage credit risk on certain loan portfolios; and
- futures to manage risk on equity positions including convertible bonds.

Derivatives used in economic hedges are included as trading assets or trading liabilities in the consolidated balance sheets.

### **Hedge accounting**

#### **Fair value hedges**

The Group designates fair value hedges as part of an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize fluctuations in earnings that are caused by interest rate volatility. In addition to hedging changes in fair value due to interest rate risk associated with fixed rate loans, repurchase agreements and long-term debt instruments, the Group uses:

- cross-currency swaps to convert foreign-currency-denominated fixed rate assets or liabilities to floating rate functional currency assets or liabilities; and
- foreign exchange forward contracts to hedge the foreign exchange risk associated with available-for-sale securities.

#### **Cash flow hedges**

The Group designates cash flow hedges as part of its strategy to mitigate its risk to variability of cash flows on loans, deposits and other debt obligations by using interest rate swaps to convert variable rate assets or liabilities to fixed rates. The Group also uses cross-currency swaps to convert foreign-currency-denominated fixed and floating rate assets or liabilities to fixed rate assets or liabilities based on the currency profile that the Group elects to be exposed to. This includes, but is not limited to, Swiss francs and US dollars. Further, the Group uses derivatives to hedge its cash flows associated with forecasted transactions.

#### **Net investment hedges**

The Group designates net investment hedges as part of its strategy to hedge selected net investments in foreign opera-

tions against adverse movements in foreign exchange rates, typically using forward foreign exchange contracts.

#### Hedge effectiveness assessment

The Group assesses the effectiveness of hedging relationships both prospectively and retrospectively. The prospective assessment is made both at the inception of a hedging relationship and on an ongoing basis, and requires the Group to justify its expectation that the relationship will be highly effective over future periods. The retrospective assessment is also performed on an ongoing basis and requires the Group to determine whether or not the hedging relationship has actually been effective. If the Group concludes, through a retrospective evaluation, that hedge accounting is appropriate for the current period, then it measures the amount of hedge ineffectiveness to be recognized in earnings.

#### Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from

each of the major credit rating agencies. If the ratings fall below that specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to bilateral counterparties and special purpose entities (SPEs), the related collateral posted and the additional collateral required in a one-notch and in a two-notch downgrade event, respectively. The current net exposure for bilateral counterparties is the aggregate fair value of derivative instruments with credit-risk-related contingent features that were in a net liability position. For SPEs, the current net exposure by contract may include amounts other than or in addition to the negative replacement value of derivative instruments with credit-risk-related contingent features.

### Contingent credit risk

end of	Bilateral counterparties	Special purpose entities	Total
<b>1Q10 (CHF billion)</b>			
Current net exposure	13.1	2.2	15.3
Collateral posted	10.6	2.2	12.8
Additional collateral required in a one-notch downgrade event	0.2	2.0	2.2
Additional collateral required in a two-notch downgrade event	0.6	3.6	4.2
<b>4Q09 (CHF billion)</b>			
Current net exposure	10.5	3.3	13.8
Collateral posted	9.0	3.4	12.4
Additional collateral required in a one-notch downgrade event	0.2	2.4	2.6
Additional collateral required in a two-notch downgrade event	0.5	4.4	4.9

#### Credit derivatives

Credit derivatives are contractual agreements in which the buyer generally pays a fee in exchange for a contingent payment by the seller if there is a credit event on the underlying referenced entity or asset. Credit derivatives are generally privately negotiated OTC contracts. Most credit derivatives are structured so that they specify the occurrence of an identifiable credit event, which can include bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet obligations when due.

The credit derivatives most commonly transacted by the Group are CDS and credit swaptions. A CDS is a contractual

agreement in which the buyer of the swap pays an upfront and/or a periodic fee in return for a contingent payment by the seller of the swap following a credit event of the referenced entity or asset. Credit swaptions are options with a specified maturity to buy or sell protection under a CDS on a specific referenced credit event.

The Group enters into credit derivative contracts in the normal course of business, buying and selling protection to facilitate client transactions and as a market maker. This includes providing structured credit products for its clients to enable them to hedge their credit risk. The referenced instruments of these structured credit products are both investment grade

and high yield underlyings and could include corporate bonds, sovereign debt, asset-backed securities (ABS) and loans. These referenced instruments can form a single item or be combined on a portfolio basis. The Group purchases protection to economically hedge various forms of credit exposure, for example, the economic hedging of loan portfolios or other

cash positions. Finally, the Group also takes proprietary positions which can take the form of either purchased or sold protection.

## Note 23 Guarantees and commitments

### Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total

gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the Group's current best estimate of payments that will be required under existing guarantee arrangements.

### Guarantees

end of	Maturity less than 1 year	Maturity greater than 1 year	<b>Total gross amount</b>	Total net amount <sup>1</sup>	Carrying value	Collateral received

Derivatives	129,868	83,862	213,730	213,730	6,388	- <sup>2</sup>
Other guarantees	3,836	1,039	4,875	4,807	10	2,181
<b>Total guarantees</b>	<b>165,980</b>	<b>95,496</b>	<b>261,476</b>	<b>259,197</b>	<b>7,037</b>	<b>33,341</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations. <sup>2</sup> Collateral for derivatives accounted for as guarantees is not considered significant.

### Credit guarantees and similar instruments

Credit guarantees and similar instruments are contracts that require the Group to make payments should a third party fail to do so under a specified existing credit obligation. The position includes standby letters of credit, commercial and residential mortgage guarantees and other guarantees associated with VIEs.

Standby letters of credit are made in connection with the corporate lending business and other corporate activities,

where the Group provides guarantees to counterparties in the form of standby letters of credit, which represent obligations to make payments to third parties if the counterparties fail to fulfill their obligations under a borrowing arrangement or other contractual obligation.

Commercial and residential mortgage guarantees are made in connection with the Group's commercial mortgage activities in the US, where the Group sells certain commercial and residential mortgages to the Federal National Mortgage Associa-

tion (FNMA) and agrees to bear a percentage of the losses triggered by the borrowers failing to perform on the mortgage. The Group also issues guarantees that require it to reimburse the FNMA for losses on certain whole loans underlying mortgage-backed securities issued by the FNMA, which are triggered by borrowers failing to perform on the underlying mortgages.

The Group also provides guarantees to VIEs and other counterparties under which it may be required to buy assets from such entities upon the occurrence of certain triggering events such as rating downgrades and/or substantial decreases in fair value of those assets.

#### Performance guarantees and similar instruments

Performance guarantees and similar instruments are arrangements that require contingent payments to be made when certain performance-related targets or covenants are not met. Such covenants may include a customer's obligation to deliver certain products and services or to perform under a construction contract. Performance guarantees are frequently executed as part of project finance transactions. The position includes private equity fund guarantees and guarantees related to residential mortgage securitization activities.

For private equity fund guarantees, the Group has provided investors in private equity funds sponsored by a Group entity guarantees on potential obligations of certain general partners to return amounts previously paid as carried interest to those general partners if the performance of the remaining investments declines. To manage its exposure, the Group generally withholds a portion of carried interest distributions to cover any repayment obligations. In addition, pursuant to certain contractual arrangements, the Group is obligated to make cash payments to certain investors in certain private equity funds if specified performance thresholds are not met.

Further, as part of the Group's residential mortgage securitization activities in the US, the Group may guarantee the collection by the servicer and remittance to the securitization trust of prepayment penalties. The Group will have to perform under these guarantees in the event the servicer fails to remit the prepayment penalties.

#### Securities lending indemnifications

Securities lending indemnifications include arrangements in which the Group agreed to indemnify securities lending customers against losses incurred in the event that security borrowers do not return securities subject to the lending agreement and the collateral held is insufficient to cover the market value of the securities borrowed. As indicated in the Guarantees table, the Group was fully collateralized in respect of securities lending indemnifications.

#### Derivatives

Derivatives are issued in the ordinary course of business, generally in the form of written put options. Derivative contracts that may be cash settled, and for which the Group has no basis for concluding that it is probable that the counterparties held the underlying instruments at the inception of the contracts, are not considered guarantees under US GAAP. For derivative contracts executed with counterparties that generally act as financial intermediaries, such as investment banks, hedge funds and security dealers, the Group has concluded that there is no basis to assume that these counterparties hold the underlying instruments related to the derivative contracts and, therefore, does not report such contracts as guarantees.

The Group manages its exposure to these derivatives by engaging in various hedging strategies to reduce its exposure. For some contracts, such as written interest rate caps or foreign exchange options, the maximum payout is not determinable as interest rates or exchange rates could theoretically rise without limit. For these contracts, notional amounts were disclosed in the table above in order to provide an indication of the underlying exposure. In addition, the Group carries all derivatives at fair value in the consolidated balance sheets and has considered the performance triggers and probabilities of payment when determining those fair values. It is more likely than not that written put options that are in-the-money to the counterparty will be exercised, for which the Group's exposure was limited to the fair value reflected in the table.

#### Other guarantees

Other guarantees include bankers' acceptances, residual value guarantees, deposit insurance, contingent considerations in business combinations, the minimum value of an investment in mutual funds or private equity funds and all other guarantees that were not allocated to one of the categories above.

Deposit-taking banks in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. Upon occurrence of a payout event triggered by a specified restriction of business imposed by the Swiss Financial Markets Supervisory Authority (FINMA) or by compulsory liquidation of another deposit taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. These deposit insurance guarantees were reflected in other guarantees.

### Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees are not reflected in the table above and are discussed below.

#### Disposal-related contingencies

In connection with the sale of assets or businesses, the Group sometimes provides the acquirer with certain indemnification provisions. These indemnification provisions vary by counterparty in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. The Group closely monitors all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in the Group's consolidated financial statements.

#### Other indemnifications

The Group provides indemnifications to certain counterparties in connection with its normal operating activities, for which it is not possible to estimate the maximum amount that it could be

obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax-withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obligation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses and may, as a result of its membership arrangements, be required to perform if another member defaults. The Group has determined that it is not possible to estimate the maximum amount of these obligations and believes that any potential requirement to make payments under these arrangements is remote.

### Other commitments

end of	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Collateral received

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

#### Irrevocable commitments under documentary credits

Irrevocable commitments under documentary credits include exposures from trade finance related to commercial letters of

credit under which the Group guarantees payments to exporters against presentation of shipping and other documents.

**Loan commitments**

Loan commitments include unused credit facilities that can be revoked at our sole discretion upon notice to the client. A small portion of total loan commitments is related to the leveraged finance business. Commitments to originate mortgage loans that will be held for sale are considered derivatives for accounting purposes and are not included in this disclosure. Such commitments are reflected as derivatives in the consolidated balance sheets.

**Forward reverse repurchase agreements**

Forward reverse repurchase agreements represent transactions in which the initial cash exchange of the reverse repurchase transactions takes place on specified future dates.

**Other commitments**

Other commitments include private equity commitments, firm commitments in underwriting securities, commitments arising from deferred payment letters of credit and from acceptances in circulation and liabilities for calls on shares and other equity instruments.

Note 24 **Transfers of financial assets and variable interest entities**

---

The required disclosures for transfers of financial assets and VIEs will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and are generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

### **Transfers of financial assets**

#### **Securitizations**

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS) and ABS that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also purchases loans and other debt obligations from clients, which are then sold by the Group directly or indirectly to SPEs that issue collateralized debt obligations (CDOs). The Group structures, underwrites and makes a market in these CDOs. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Investors typically only have recourse to the collateral of the CDO and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

As a result of the issuance of new guidance effective January 1, 2010, the Group lost sale accounting treatment for certain asset transfers and for certain transfers of portions of assets that do not meet the definition of participating interests. The impact of this change in accounting guidance did not have a significant impact to Group.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

#### **Other asset-based financing arrangements**

The Group also uses SPEs for other client-driven activity and for Group tax or regulatory purposes. These activities include various leveraged finance, repack and other types of structures.

Leveraged finance structures are used to assist in the syndication of certain loans held by the Group. Typically, a third-party private equity sponsor will establish a SPE which in turn will purchase a loan from the Group. The debt (loan facility) provided by the Group has recourse only to the assets held within the SPE.

Repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk. Typically, the SPE structure will issue notes to the client, enter into a derivative through which the desired exposure is introduced and then collateral will be purchased from the Group.

Other types of structures in this category include life insurance structures, emerging market structures set up for financ-

ing, loan participation or loan origination purposes and other alternative structures created for the purpose of investing in venture capital-like investments.

#### **Continuing involvement in transferred financial assets**

The Group may have continuing involvement in the financial assets that are transferred to an SPE, regardless of whether the transfer was accounted for as a sale or a secured borrowing, which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets. Beneficial interests include rights to receive all or portions of specified cash inflows received by an SPE, including, but not limited to, senior and subordinated shares of interest, principal, or other cash inflows to be “passed through” or “paid through,” premiums due to guarantors, CP obligations, and residual interests, whether in the form of debt or equity.

The Group’s exposure resulting from continuing involvement in transferred financial assets is generally limited to beneficial interests typically held by the Group in the form of instruments issued by SPEs that are senior, subordinated or residual tranches. These instruments are held by the Group typically in connection with underwriting or market-making activities and are included in trading assets in the consolidated balance sheets. Any changes in the fair value of these beneficial interests are recognized in the consolidated statements of operations.

Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as collateral accounts, or from liquidity facilities, such as lines of credit or liquidity put option of asset purchase agreements. The SPE may also enter into a derivative contract in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors, or to limit or change the credit risk of the SPE. The Group may be the provider of certain credit enhancements as well as the counterparty to any related derivative contact.

#### **Variable interest entities**

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are broadly grouped into three primary categories: CDOs, CP conduits and financial intermediation. VIEs are SPEs that typically either lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. VIEs may be sponsored by the Group, unrelated third parties or

clients. Such entities are required to be assessed for consolidation, compelling the primary beneficiary to consolidate the VIE. As a result of the issuance of new guidance, the FASB changed the method of analyzing whether to consolidate the VIE. The model now requires an entity to determine whether it has the power to direct the activities that most significantly affect the economics of the VIE as well as whether the reporting entity has potentially significant benefits or losses in the VIE. This is in contrast to the previous consolidation model for VIEs, which only considered whether an entity absorbed the majority of the risk and/or rewards of the VIE. In addition, the primary beneficiary must be re-evaluated on an on-going basis, whereas previously reconsideration of the primary beneficiary was only required when specified reconsideration events occurred.

Consequently, the Group consolidated certain VIEs and former qualified SPEs with which it had involvement. The Group elected the fair value option upon transition for all of the financial assets and liabilities of the VIEs and former qualified SPEs.

Application of the requirements for consolidation of VIEs may require the exercise of significant management judgment. In the event consolidation of a VIE is required, the exposure to the Group is limited to that portion of the VIE’s assets attributable to any variable interest held by the Group prior to any risk management activities to hedge the Group’s net exposure. Any interests held in the VIE by third parties, even though consolidated by the Group, will not typically impact its results of operations.

Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investing opportunities, and, as part of these activities, the Group may hold interests in the VIEs. Securitization-related transactions with VIEs involve selling or purchasing assets as well as possibly entering into related derivatives with those VIEs, providing liquidity, credit or other support. Other transactions with VIEs include derivative transactions in the Group’s capacity as the prime broker. The Group also enters into lending arrangements with VIEs for the purpose of financing projects or the acquisition of assets. Typically, the VIE’s assets are restricted in nature in that they are held primarily to satisfy the obligations of the entity. Further, the Group is involved with VIEs which were formed for the purpose of offering alternative investment solutions to clients. Such VIEs relate primarily to private equity investments, fund-linked vehicles or funds of funds, where the Group acts as structurer, manager, distributor, broker, market maker or liquidity provider.

As a consequence of these activities, the Group holds variable interests in VIEs. Such variable interests consist of finan-

cial instruments issued by VIEs and which are held by the Group, certain derivatives with VIEs or loans to VIEs. Guarantees issued by the Group to or on behalf of VIEs may also qualify as variable interests. For such guarantees, including derivatives that act as guarantees, the notional amount of the respective guarantees are provided to represent the exposure. In general, investors in consolidated VIEs do not have recourse to the Group in the event of a default, except where a guarantee was provided to the investors or where the Group is the counterparty to a derivative transaction involving VIEs.

The amounts shown as total assets of consolidated and non-consolidated VIEs for which the Group has involvement represent the total assets of the VIEs even though the Group's involvement may be significantly less due to interests held by third-party investors. The asset balances for non-consolidated VIEs where the Group has significant involvement represent the most current information available to the Group regarding the remaining principal balance of assets owned. In most cases, the asset balances represent an amortized cost basis without regards to impairments in fair value, unless fair value information is readily available.

The Group's maximum exposure to loss is different from the carrying value of the assets of the VIE. This maximum exposure to loss consists of the carrying value of the Group variable interests held as trading assets, derivatives and loans and the notional amount of guarantees to VIEs, rather than the amount of total assets of the VIEs. The maximum exposure to loss does not reflect the Group's risk management activities, including effects from financial instruments that the Group may utilize to economically hedge the risks inherent in these VIEs. The economic risks associated with VIE exposures held by the Group, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

#### **Collateralized debt obligations**

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction. As part of its structured finance business, the Group purchases loans and other debt obligations from and on behalf of clients for the purpose of securitization. The loans and other debt obligations are sold to VIEs, which in turn issue CDOs to fund the purchase of assets such as investment-grade and high yield corporate debt instruments.

Typically, the collateral manager in a managed CDO is deemed to be the entity that has the power to direct the activities that most affect the economics of the entity. In a static CDO this "power" role is more difficult to analyze and may be

the sponsor of the entity or the credit default swap counterparty.

CDOs provide credit risk exposure to a portfolio of ABS (cash CDOs) or a reference portfolio of securities (synthetic CDOs). Cash CDO transactions hold actual securities where as synthetic CDO transactions use credit default swaps to exchange the underlying credit risk instead of using cash assets. The Group may also act as a derivative counterparty to the VIEs, which are typically not variable interests, and may invest in portions of the notes or equity issued by the VIEs. The CDO entities may have actively managed portfolios or static portfolios.

The securities issued by these VIEs are payable solely from the cash flows of the related collateral, and third-party creditors of these VIEs do not have recourse to the Group in the event of default.

The Group's exposure in CDO transactions is typically limited to interests retained in connection with its underwriting or market-making activities. Unless the Group has been deemed to have "power" over the entity and these interests are potentially significant, the Group is not the primary beneficiary of the vehicle and does not consolidate the entity. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

#### **Commercial paper conduit**

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. The Group does not have any ownership interest in Alpine. However, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure and control over the activities of Alpine. Effective as of January 1, 2010, the Group is deemed the primary beneficiary of Alpine and consolidates it in accordance with the new guidance. For

further information, refer to Note 1 – Summary of significant accounting policies.

### Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, including, but not limited to, economic hedging strategies and collateral arrangements. The Group's economic risks associated with consolidated and non-consolidated VIE exposures arising from financial intermediation, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

Financial intermediation consists of securitizations, funds, loans, and other vehicles.

#### Securitizations

Securitizations are primarily CMBS, RMBS and ABS vehicles. The Group acts as an underwriter, market maker, liquidity provider, derivative counterparty and/or provider of credit enhancements to VIEs related to certain securitization transactions. In addition, the Group has exposure to third-party securitization VIEs as a result of certain securities purchased from its money market funds.

The maximum exposure to loss is the carrying value of the loan securities and derivative positions that are variable interests, if any, plus the exposure arising from any credit enhancements the Group provided. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

Typically, the servicer of the assets in the VIE will be deemed to have the power that most significantly affects the economics of the entity. When a servicer or its related party also has an economic interest that has the potential to absorb a significant portion of the gains and/or losses, it will be deemed the primary beneficiary and consolidate the vehicle. The Group typically consolidates securitization vehicles when it is the servicer and has holdings stemming from its role as underwriter. Short-term market making holdings in vehicles are not typically considered to be potentially significant for the purposes of this assessment.

#### Funds

Funds include investment structures such as mutual funds, funds of funds, private equity funds and fund-linked products where the investors' interest is typically in the form of debt rather than equity, thereby making them VIEs. The Group may have various relationships with such VIEs in the form of structurer, investment advisor, investment manager, administrator,

custodian, underwriter, placement agent, market maker and/or as prime broker. These activities include the use of VIEs in structuring fund-linked products, hedge funds of funds or private equity investments to provide clients with investment opportunities in alternative investments. In such transactions, a VIE holds underlying investments and issues securities that provide the investors with a return based on the performance of those investments.

The maximum exposure to loss consists of the fair value of instruments issued by such structures that are held by the Group as a result of underwriting or market-making activities, financing provided to the vehicles and the Group's exposure resulting from principal protection and redemptions features. The investors typically retain the risk of loss on such transactions, but for certain fund types, the Group may provide principal protection on the securities to limit the investors' exposure to downside market risk. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risk of the VIEs.

Funds have been deferred from the application of the recent FASB guidance. Rather than the revised consolidation model which incorporated power and the potential to absorb significant risk and rewards, the previous consolidation model was used which resulted in the Group being the primary beneficiary and consolidating the funds if it held more than 50% of their outstanding issuances.

#### Loans

Loans are single-financing vehicles where the Group provides financing for specified assets or business ventures and the respective owner of the assets or manager of the businesses provides the equity in the vehicle. These tailored lending arrangements are established to purchase, lease or otherwise finance and manage clients' assets.

The maximum exposure to loss is the carrying value of the Group's loan exposure, which is subject to the same credit risk management procedures as loans issued directly to clients. The clients' creditworthiness is carefully reviewed, loan-to-value ratios are strictly set and, in addition, clients provide equity, additional collateral or guarantees, all of which significantly reduce the Group's exposure. The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts which includes over-collateralization and effective monitoring to ensure that a sufficient loan-to-value ratio is maintained.

The third-party sponsor of the VIE will typically have control over the assets during the life structure and have the potential to absorb significant gains and losses; The Group is typically not the primary beneficiary of these structures and will not have to consolidate them. However, a change in the structure,

such as a default of the sponsor, may result in the Group gaining control over the assets. If the Group's lending is significant, it may then be required to consolidate the entity.

#### Other

Other includes additional vehicles where the Group provides financing and trust preferred issuance vehicles. Trust preferred issuance vehicles are utilized to assist the Group in raising

capital efficient financing. The VIE issues preference shares which are guaranteed by the Group and uses the proceeds to purchase the debt of the Group. The Group's guarantee of its own debt is not considered a variable interest and, as it has no holdings in these vehicles, the Group has no maximum exposure to loss. In the non-consolidated table, only the total assets of trust preferred issuance vehicles are disclosed, as the Group has no variable interests with these entities.

### Note 25 **Fair value of financial instruments**

---

The required disclosures for the fair value of financial instruments will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. Further deterioration of financial markets could significantly impact the value of these financial instruments and the results of operations. For these instruments, the determination of fair value requires subjective assessment and varying degrees of judgment, depending on liquidity, concentration, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, most mortgage-related and CDO securities, certain equity derivatives and equity-linked securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high-grade bonds, and life insurance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a coun-

terparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as credit valuation adjustments or CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as debit valuation adjustments or DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current credit default swap prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in the Investment Banking and Asset Management segments. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which we are economically hedged, we have elected the fair value option. Likewise, where we manage an activity on a fair value basis but previously have been unable to achieve fair value accounting, we have utilized the fair value option to align our risk management reporting to our financial accounting.

In April 2009, the FASB amended and expanded the disclosure requirements for the Group's reporting of assets and liabilities measured at fair value on a recurring basis for level 3 for June 30, 2009, but did not require retrospective application.

### Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

### Qualitative disclosures of valuation techniques

#### Money market instruments

Traded money market instruments include instruments such as bankers' acceptances, certificates of deposit, CP, book claims, treasury bills and other rights, which are held for trading purposes. Valuations of money market instruments are generally based on observable inputs.

#### Securities purchased under resale agreements and securities sold under repurchase agreements

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale

and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivatives. If the value of the embedded derivative is determined using significant unobservable parameters, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

#### Debt securities

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. For those securities where the price or model inputs are observable in the market they are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable they are categorized as level 3.

#### Corporate bonds

Corporate bonds are priced to reflect current market levels either through recent market transactions or to broker or dealer quotes.

Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity) or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable credit default swap spreads.

#### CMBS, RMBS and ABS/CDO structures

Values of RMBS, CMBS and other ABS may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Values of RMBS, CMBS and other ABS for which there are no significant observable inputs are valued using benchmarks to similar transactions or indices and other valuation models.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on management's own assumptions about how market participants would price the asset.

Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

### Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 equities include fund-linked products, convertible bonds or equity securities with restrictions and therefore are not traded in active markets.

#### Fund-linked products

Fund-linked products consist of investments in third-party hedge funds and funds of funds. The method of measuring fair value for these investments is the same as those described for other investments below.

#### Convertible bonds

Convertible bonds are generally valued using observable pricing sources. For a small minority of convertible bonds, no observable prices are available, and valuation is determined using internal and external models, for which the key inputs include stock prices, dividend rates, credit spreads (corporate and sovereign), yield curves, foreign exchange rates, prepayment rates and borrowing costs, and single stock and equity market volatility.

### Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives.

The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. Some observable exchange prices may not be considered executable at the reporting date and may have been adjusted for liquidity concerns. For those instruments where liquidity adjustments have been made to the exchange price, such as long-dated option contracts, the instrument has been included in level 2 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally devel-

oped proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument.

The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Examples of such specific unobservable inputs include long-dated volatility assumptions on OTC option transactions and recovery rate assumptions for credit derivative transactions.

Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made.

OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of value is derived from unobservable inputs are categorized as level 3.

#### Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to basis swap spreads, constant maturity convexity adjustments, constant maturity treasury spreads, inflation-index correlations, inflation seasonality, single and quanto interest rate correlations, cross asset correlations, mean reversion, serial correlation and conditional prepayment rate assumptions.

#### Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to foreign exchange rate correlations, quanto cross asset correlations and volatility skew assumptions.

#### Equity derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include borrowing costs, dividend curves, equity to equity correlations, equity to foreign exchange rate correlations, single name and index volatility, fund gap risk, fund volatility, interest rate to equity correlation and yield curve.

#### Credit derivatives

Credit derivatives include index and single name credit default swaps in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spreads and recovery rates.

Complex structured credit derivatives are valued using proprietary models requiring inputs such as credit spreads, recovery rates, credit volatilities, default correlations, cash/synthetic basis spreads and prepayment rate. These input parameters are generally implied from available market observable data.

#### Commodity derivatives

Commodity derivatives include forwards, vanilla and exotic options, swaps, swaptions, and structured transactions. Vanilla products are generally valued using industry standard models, while more complex products may use proprietary models. Commodity derivative model inputs include cross commodity correlation, FX-commodity correlation, commodity forward rate curves, spot prices, commodity volatility and the yield curve. Inputs can be validated from executed trades, broker and consensus data. In other cases, historic relationships may be used to estimate model inputs.

#### Other trading assets

Other trading assets include cash and synthetic life finance instruments. Cash instruments include SPIA, premium finance, and life settlement contracts at fair value, whereas synthetic instruments include longevity swaps, options and notes.

These instruments are valued using proprietary models using several inputs however; central to the calculation of fair value for life finance instruments is the estimate of mortality rates. Individual mortality rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual specific multipliers are determined based on data from third-party life expectancy data providers, which examine insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate. In addition to mortality rates, discount rates and credit spreads are also inputs into the valuation of life finance instruments.

Due to the limited observability in the market of mortality rates the vast majority of life finance instruments are categorized as level 3 instruments.

#### Other investments

Other investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity and funds of funds are measured at fair value based on their published NAVs. Most of these investments are classified in level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAV in the near term. In some cases, NAVs may be adjusted where there exists sufficient evidence that the NAV published by the investment manager is not current with observed market movements or there exists other circumstances that would require an adjustment to the published NAV. Significant management judgment is involved in making any adjustments to the published NAVs.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in nonmarketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant management judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

#### Loans

The Group's loan portfolio measured at fair value includes commercial loans, residential loans, corporate loans, leveraged financed loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from credit default swaps for the specific borrower, and enterprise

valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines, on the corporate lending portfolio, are valued using a credit default swap pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP is determined based on the quoted prices for securitized bonds, where avail-

able, or on cash flow analyses for securitized bonds, when quoted prices are not available.

#### **Short-term borrowings and long-term debt**

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcatable and non-bifurcatable) and vanilla debt.

The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the firms' stand-alone derivatives as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns.

Vanilla debt is fair valued to the new issue market using risk-free yield curves for similar maturities and the Group's own credit spread.

#### Note 26 **Assets pledged or assigned**

---

The required disclosures for assets pledged or assigned will be included in the Financial Report 1Q10, which will be published on our website and filed with the SEC on or about May 6, 2010.

The Group received collateral in connection with resale agreements, securities lending and loans, derivative transac-

tions and margined broker loans. A substantial portion of the collateral received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Note 27 **Subsidiary guarantee information**

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding US SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities

may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

**Note 28 Litigation**

---

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. Some of these actions have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts. The Group believes, based on currently available information and advice of counsel, that the results of such proceedings, in the aggregate, will not have a material adverse effect on its financial condition but might be material to operating results for any particular period, depending, in part, upon the operating results for such period. The Group believes that the reasonably possible losses relating to such claims in excess of its provisions are either not material or not estimable.

The Group accrues for legal costs (including fees and expenses of external lawyers and other service providers) in connection with certain judicial, regulatory and arbitration proceedings when such costs are probable and reasonably estimable.

It is inherently difficult to predict the outcome of many of these matters. In presenting the condensed consolidated financial statements, management makes estimates regarding the outcome of these matters, records a reserve and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the litigation, claim or proceeding, the progress of the matter, the advice of legal counsel, the Group's defenses and its experience in similar cases or proceedings, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings.

Further charges or releases of litigation reserves may be necessary in the future as developments in such litigation, claims or proceedings warrant.

### Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of a continued US or global economic downturn in 2010 and beyond;
- the direct and indirect impacts of continuing deterioration of subprime and other real estate markets;
- further adverse rating actions by credit rating agencies in respect of structured credit products or other credit-related exposures or of monoline insurers;

- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and other cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the information set forth in our Annual Report 2009 under IX – Additional Information – Risk Factors.
