Differences between Group and Bank

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Swiss Universal Bank, International Wealth Management, Asia Pacific, Global Markets, Investment Banking & Capital Markets and, until December 31, 2018, the Strategic Resolution Unit segments. Certain Corporate Center activities of the Group, such as hedging activities relating to share-based compensation awards, are not applicable to the Bank. Certain other assets, liabilities and results of operations, primarily relating to Credit Suisse Services AG (our Swiss service company) and its subsidiary, are managed as part of the activities of the six segments. However, they are legally owned by the Group and are not part of the Bank's consolidated financial statements.

¹ Represent revenues on a product basis which are not representative of business results within our business segments as segment results utilize financial instruments across various product types. In 4Q18, we were involved in a tender offer of an issuer with respect to its own common shares that resulted in negative trading revenues, offset by positive net interest income as a result of a related dividend distribution by the same issuer.

² Based on tangible shareholders' equity, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity as presented in our balance sheet. Management believes that the return on tangible equity is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

³ Disclosed on a look-through basis.

Credit Suisse reporting structure

Credit Suisse includes the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core Results do not include revenues and expenses from our Strategic Resolution Unit.

¹ Beginning in 2019, the Strategic Resolution Unit has ceased to exist as a separate division of the Group. The residual portfolio remaining as of December 31, 2018 is now managed in an Asset Resolution Unit and will be separately disclosed within the Corporate Center.

Net revenues

In 4Q18, we reported net revenues of CHF 4,801 million, which decreased 2% compared to 3Q18, primarily reflecting lower net revenues in Asia Pacific and Global Markets, partially offset by higher net revenues in International Wealth Management. The decrease in Asia Pacific was primarily driven by lower revenues in its Markets business across all revenue categories and lower revenues in its Wealth Management & Connected business, reflecting lower Private Banking revenues and lower advisory, underwriting and financing revenues. The decrease in Global Markets reflected weakness in credit markets and high levels of volatility coupled with a seasonal decline in client activity. The increase in International Wealth Management was primarily driven by higher transaction- and performance-based revenues, higher other revenues and higher net interest income.

Compared to 4Q17, net revenues decreased 7%, primarily reflecting lower net revenues in Global Markets and Asia Pacific. The decrease in Global Markets reflected less favorable market conditions which negatively impacted client activity across underwriting and fixed income products. The decrease in Asia Pacific was driven by lower revenues in its Wealth Management & Connected business, reflecting lower advisory, underwriting and financing revenues and lower Private Banking revenues, and lower revenues in its Markets business across all revenue categories.

Provision for credit losses

In 4Q18, provision for credit losses was CHF 59 million, primarily related to net provisions of CHF 26 million in Swiss Universal Bank, CHF 16 million in International Wealth Management and CHF 8 million in Asia Pacific.

Total operating expenses

Compared to 3Q18, total operating expenses of CHF 4,114 million were stable, primarily reflecting a 11% decrease in compensation and benefits, mainly relating to lower salaries and variable compensation expenses, offset by an 18% increase in general and administrative expenses, mainly relating to higher professional services fees, higher non-income taxes and higher IT equipment expenses. In 4Q18, we incurred CHF 136 million of restructuring expenses in connection with the implementation of our strategy.

Compared to 4Q17, total operating expenses decreased 18%, primarily reflecting a 17% decrease in compensation and benefits, mainly relating to lower salaries and variable compensation expenses and a 21% decrease in general and administrative expenses, mainly relating to lower professional services fees and lower non-income taxes.

Income tax expense

In 4Q18, income tax expense of CHF 340 million mainly reflected the impact of the geographical mix of results, non-deductible funding costs, tax on own credit gains and the impact of the US base erosion and anti-abuse tax (BEAT). Overall, net deferred tax assets decreased CHF 42 million to CHF 4,505 million during 4Q18, mainly driven by earnings and own credit movements, partially offset by pension liabilities and foreign exchange impacts. Deferred tax assets on net operating losses increased CHF 162 million to CHF 1,647 million during 4Q18. The Credit Suisse

effective tax rate was 54.1% in 4Q18 compared to 38.9% in 3Q18.

US tax reform – Tax Cuts and Jobs Act

The US tax reform enacted on December 22, 2017 resulted in a reduction of the federal corporate income tax rate from 35% to 21%, effective as of January 1, 2018. The reform also introduced BEAT, effective as of January 1, 2018. It is broadly levied on tax deductions created by certain payments, e.g. for interest and services, to affiliated group companies outside the US, in the case where the calculated tax based on a modified taxable income exceeds the amount of ordinary federal corporate income taxes paid. The standard tax rates applicable under BEAT are 5% for 2018, 10% for 2019 until 2025 and 12.5% from 2026 onward. For certain banking entities, these rates are increased by 1% resulting in rates of 6% for 2018, 11% for 2019 until 2025 and 13.5% from 2026 onward. On the basis of the current analysis of the BEAT tax regime, following the draft regulations issued by the US Department of Treasury on December 13, 2018, Credit Suisse considers it as more likely than not that the Group will be subject to this regime in 2018. On this basis, CHF 65 million has been accrued in 4Q18 in relation to BEAT. The finalization of US BEAT regulations is expected to occur in 2019, at which point the above BEAT position for the tax year 2018 might need to be re-assessed. Prospectively, additional tax regulations of the US tax reform relating to interest deductibility may also impact Credit Suisse.

Regulatory capital

As of the end of 4Q18, our Bank for International Settlements (BIS) common equity tier 1 (CET1) ratio was 12.6% and our risk-weighted assets were CHF 284.6 billion.

As previously disclosed, the Swiss Financial Market Supervisory Authority FINMA (FINMA) imposed regulatory changes, primarily in respect of credit multipliers and banking book securitizations, which resulted in additional risk-weighted assets relating to credit risk of CHF 1.7 billion in 4Q18.

Other information

Financial goals

At the Investor Day on December 12, 2018, we communicated our return on tangible equity (RoTE) targets for the Group. We confirmed our RoTE target of 10–11% for 2019 and 11–12% for 2020 and announced a target of above 12% beyond 2020.

For 2019 and 2020, we plan to distribute at least 50% of net income to shareholders, primarily through share buybacks and the distribution of a sustainable ordinary dividend, which dividend amount we expect to increase by at least 5% per annum.

Our targets often include metrics that are non-GAAP financial measures and are unaudited. A reconciliation of these targets to the nearest GAAP measures is unavailable without unreasonable efforts. RoTE is based on tangible shareholders' equity, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity as presented in our balance sheet, both of which are unavailable on a prospective basis. Such targets are calculated in a manner that is consistent with the accounting policies applied by us in preparing our financial statements.

Share buyback

For 2019, the Board of Directors of the Group approved a share buyback program of Group ordinary shares of up to CHF 1.5 billion. We expect to buy back at least CHF 1.0 billion in 2019, subject to market and economic conditions. For 2020, we expect a similar share buyback program as in 2019, subject to approval by the Board of Directors. The level of the share buyback for 2020 will be set in light of our capital plans and will be subject to prevailing market conditions, but is expected to be in line with our intention to distribute at least 50% of net income.

We commenced the share buyback program on January 14, 2019. We are acquiring our own shares on a second trading line on SIX Swiss Exchange, subject to deduction of applicable Swiss federal withholding tax. The repurchased shares are expected to be cancelled by means of a capital reduction to be proposed at a future Annual General Meeting (AGM) of shareholders.

Capital distribution proposal

Our Board of Directors will propose to the shareholders at the AGM on April 26, 2019 a distribution of CHF 0.2625 per share out of capital contribution reserves for the financial year 2018. The distribution will be free of Swiss withholding tax and will not be subject to income tax for Swiss resident individuals holding the shares as a private investment. The distribution will be payable in cash.

Board of Directors

The Board of Directors is proposing Christian Gellerstad and Shan Li for election as new non-executive members of the Board of Directors at the AGM on April 26, 2019. Andreas Koopmann will not stand for re-election at the AGM and Alexandre Zeller will step down from the Board of Directors with effect as of February 28, 2019. All other members of the Board of Directors will stand for re-election for a further term of office of one year.

Presentation currency

Given the aggregate changes to our organizational structure, strategy and business activities in recent years and to improve comparability with peers, we are evaluating the appropriateness of a transition of the Group's presentation currency from Swiss francs to US dollars. We are currently analyzing the potential benefits and impacts of such a transition, which will be discussed with our Board of Directors in due course.

2018 results

In 2018, income before taxes of CHF 2,158 million increased 22% compared to 2017. Net revenues of CHF 5,564 million increased slightly compared to 2017, mainly due to higher recurring commissions and fees, the increase in other revenues, reflecting a gain on the sale of our investment in Euroclear of CHF 37 million and gains on the sale of real estate of CHF 21 million, and slightly higher net interest income. Higher recurring commissions and fees were mainly driven by higher wealth structuring solution fees, higher fees from lending activities and increased investment advisory fees. Slightly higher net interest income reflected higher deposit margins on slightly lower average deposit volumes and stable loan margins on stable average loan volumes. Transaction-based revenues were stable. Provision for credit losses was CHF 126 million in 2018 on a net loan portfolio of CHF 168.4 billion. Total operating expenses decreased 8%, primarily driven by lower professional and contractor services fees, decreased allocated corporate function costs, lower salary expenses and lower litigation provisions, partially offset by higher restructuring expenses, reflecting targeted headcount reductions and charges relating to reductions in office space. Adjusted income before taxes of CHF 2,205 million increased 18% compared to 2017.

Results details

In 1Q18, the US GAAP accounting standard pertaining to revenue recognition was adopted. As a result, both net revenues and operating expenses in Global Markets increased CHF 4 million and CHF 14 million in 4Q18 and 3Q18, respectively.

Fixed income sales and trading

In 4Q18, fixed income sales and trading revenues of CHF 473 million decreased 8% compared to 3Q18, reflecting challenging market conditions including significant widening in US high yield spreads and high levels of volatility, which negatively impacted global credit products and macro products revenues. The decline was partially offset by higher emerging markets and securitized products revenues. Global credit products revenues decreased significantly, primarily due to lower leveraged finance trading activity. In addition, macro products revenues decreased, due to lower results in our foreign exchange and rates businesses. This was partially offset by higher emerging markets revenues, reflecting improved trading results in Brazil and higher financing and structured credit revenues across Europe, Middle East and Africa (EMEA) and Latin America. In addition, securitized products revenues increased, reflecting a significant gain from the sale of an investment acquired in the normal course of business and continued momentum in our asset finance franchise partially offset by lower non-agency trading revenues.

Fixed income sales and trading revenues decreased 14% compared to 4Q17, reflecting less favorable market conditions which resulted in lower client activity in our credit franchise. Global credit products revenues decreased significantly, primarily due to lower leveraged finance trading activity. Macro products revenues decreased, reflecting lower rates revenues and the adverse impact of rationalizing the business. In addition, emerging markets revenues decreased slightly, primarily reflecting lower financing revenues across regions, partially offset by increased structured credit revenues in Latin America and higher trading results in Brazil. Securitized products revenues increased, primarily due to the significant gain from the sale of an investment and continued momentum in our asset finance business, partially offset by lower agency and non-agency revenues.

Equity sales and trading

In 4Q18, equity sales and trading revenues of CHF 356 million decreased 5% compared to 3Q18, reflecting a seasonal decline in client activity and increased market volatility. Cash equities revenues decreased, primarily due to a loss on a single block trade and challenging trading conditions. In addition, equity derivatives revenues declined reflecting a seasonal slowdown in client activity in structured and corporate equity derivatives, partially offset by increased flow derivatives revenues. These declines were partially offset by higher prime services revenues reflecting higher commissions in listed derivatives and client financing revenues.

Equity sales and trading revenues decreased 6% compared to 4Q17, primarily reflecting lower cash equities and prime services revenues, partially offset by significantly higher equity derivatives revenues. Cash equities revenues decreased, reflecting lower trading activity and the loss in the single block trade. In addition, prime services revenues decreased, reflecting lower prime brokerage revenues in line with market indices, partially offset by higher client financing revenues. These declines were partially offset by significantly increased equity derivatives revenues, reflecting higher flow and structured derivatives revenues.

Underwriting

In 4Q18, underwriting revenues of CHF 242 million decreased 10% compared to 3Q18, reflecting lower issuance activity. Debt underwriting revenues decreased, reflecting lower investment grade results. Equity underwriting revenues decreased, reflecting lower equity issuance activity.

Underwriting revenues decreased 23% compared to 4Q17, which benefited from low levels of volatility. Debt underwriting revenues decreased due to lower leveraged finance and investment grade issuance activity. In addition, equity underwriting revenues decreased significantly, reflecting lower equity issuance activity.

Provision for credit losses

In 4Q18, we recorded provision for credit losses of CHF 5 million, compared to CHF 3 million in 3Q18 and CHF 8 million in 4Q17.

Total operating expenses

In 4Q18, total operating expenses of CHF 1,153 million were stable compared to 3Q18, as lower compensation and benefits were offset by higher general and administrative expenses and increased restructuring expenses. Compensation and benefits decreased, primarily due to lower discretionary compensation expenses. General and administrative expenses increased, primarily due to higher allocated corporate function costs. During 4Q18, we incurred restructuring expenses of CHF 80 million.

Compared to 4Q17, total operating expenses decreased 15%, reflecting lower compensation and benefits, general and administrative expenses and commission expenses. Compensation and benefits decreased, reflecting lower deferred compensation from prior-year awards, discretionary compensation and salary expenses. General and administrative expenses decreased, reflecting lower professional services fees and reduced allocated corporate function costs.

Investment Banking & Capital Markets

In 4Q18, we reported income before taxes of CHF 105 million and net revenues of CHF 475 million. While the operating environment was challenging across capital markets, our advisory business remained strong. In 2018, we reported income before taxes of CHF 344 million and net revenues of CHF 2,177 million.

Capital and leverage metrics

As of the end of 4Q18, we reported risk-weighted assets of USD 18.2 billion, a decrease of USD 1.6 billion and USD 16.2 billion compared to the end of 3Q18 and 4Q17, respectively. the end of 3Q18 and 4Q17, respectively. In 4Q18, these reductions primarily reflected various initiatives across the derivatives portfolio, the exit of substantially all ship finance exposures, and the elimination of certain long-dated residual exposures that had required continued reliance on certain legacy IT systems.

Results details

Net revenues

We reported negative net revenues of CHF 175 million in 4Q18 compared to CHF 154 million in 3Q18 and CHF 151 million in 4Q17. Compared to 3Q18, the movement was primarily driven by higher negative valuation adjustments, partially offset by a reduction in overall funding costs.

Compared to 4Q17, the movement was primarily driven by lower exit-related gains, higher negative valuation adjustments and lower fee-based revenues as a result of accelerated business exits, partially offset by a reduction in overall funding costs.

Provision for credit losses

In 4Q18, there was a release of provision for credit losses of CHF 1 million compared to provision for credit losses of CHF 3 million in 3Q18 and CHF 3 million in 4Q17.

Total operating expenses

Total operating expenses of CHF 123 million decreased 18% compared to 3Q18, primarily reflecting lower restructuring expenses, partially offset by higher general and administrative expenses. The decrease in restructuring expenses primarily reflected a reclassification of certain restructuring expenses to litigation provisions relating to employment disputes. General and administrative expenses of CHF 94 million increased 62%, including an increase of CHF 26 million in litigation provisions.

Compared to 4Q17, total operating expenses decreased 59%, primarily as a result of lower general and administrative expenses. General and administrative expenses decreased 55%, including a decrease of CHF 51 million in litigation provisions. Total operating expenses in 4Q17 included costs of CHF 38 million to meet requirements related to the settlements with US authorities regarding US cross-border matters, some of which related to the work performed by the New York Department of Financial Services (DFS) monitor. Adjusted total operating expenses decreased 44% compared to 4Q17.

Development of the Strategic Resolution Unit

As previously disclosed, on occasion the reduction of exposures in the Strategic Resolution Unit involved the maturation of lending facilities or other transactions that wholly or partially may have been renewed or extended by our strategic business divisions, such as Global Markets or International Wealth Management. Similarly, there may have been occasions where strategic business divisions would enter into new transactions with counterparties resulting in exposures that may have had similar characteristics to those recorded in the Strategic Resolution Unit. This was aligned with the Group's risk appetite and that of the relevant strategic divisions.

We previously amended and enhanced our risk appetite framework in an effort to provide additional governance and controls to ensure all new business activities are scrutinized to distinguish between those types of business exposures held in the Strategic Resolution Unit that will be allowed for execution in our strategic divisions and those that will be prohibited or for which we have limited risk appetite.

In 4Q18, a reassessment of certain assets under management and assets under custody recorded in the Strategic Resolution Unit resulted in a change in the estimate of the expected outflows in connection with the tax regularization of client assets. The estimate of the expected outflows declined by approximately CHF 1.9 billion for assets under management, and CHF 1.5 billion and CHF 0.4 billion of such assets under management were transferred to International Wealth Management and Swiss Universal Bank, respectively. The transfers were in line with the original transfer of such assets to the Strategic Resolution Unit and as such were reflected as a structural effect in our asset under management disclosures, with no impact to net new assets. Additionally, the impact of these transfers on leverage exposure for the Strategic Resolution Unit was a decline of approximately USD 0.1 billion, transferred to International Wealth Management. In addition, after a business reassessment, the Audit Committee approved a transfer of 11 third-party fund interests from the Strategic Resolution Unit to International Wealth Management.

Beginning in 2019, the Strategic Resolution Unit has ceased to exist as a separate division of the Group. The residual portfolio remaining as of December 31, 2018 is now managed in an Asset Resolution Unit and will be separately disclosed within the Corporate Center.

Corporate Center

In 4Q18, we reported income before taxes of CHF 35 million compared to a loss of CHF 61 million in 3Q18. In 2018, we reported a loss before taxes of CHF 239 million.

Corporate Center composition

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group, including costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements, and certain other expenses and revenues that have not been allocated to the segments. Corporate Center also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Treasury results include the impact of volatility in the valuations of certain central funding transactions such as structured notes issuances and swap transactions. Since 2Q17, treasury results also include additional interest charges from transfer pricing to align funding costs to assets held in the Corporate Center.

Other revenues include required elimination adjustments associated with trading in own shares, treasury commissions charged to divisions and, since 3Q17, the cost of certain hedging transactions executed in connection with the Group's risk-weighted assets.

Compensation and benefits include fair value adjustments on certain deferred compensation plans not allocated to the segments, certain deferred compensation retention awards intended to support the restructuring of the Group, mainly relating to Asia Pacific

predominantly through the end of 2018, and, since 3Q18, certain other long-dated legacy deferred compensation and retirement programs mainly relating to former employees.

Results summary

4Q18 results

In 4Q18, we reported income before taxes of CHF 35 million compared to a loss of CHF 61 million in 3Q18. The increase of CHF 96 million in 4Q18 reflected lower total operating expenses and higher net revenues.

Net revenues of CHF 84 million increased CHF 32 million compared to 3Q18. In 3Q18, negative treasury results of CHF 5 million mainly reflected negative revenues of CHF 106 million relating to funding activities, partially offset by gains of CHF 74 million with respect to structured notes volatility, primarily from valuation model enhancements, and gains of CHF 18 million relating to hedging volatility.

Other revenues of negative CHF 48 million decreased CHF 105 million compared to 3Q18, mainly reflecting a fair value loss on a legacy convertible bond position compared to a gain on the same position in 3Q18, a negative valuation impact from long-dated legacy deferred compensation and retirement programs, increased costs relating to hedging transactions executed in connection with the Group's risk-weighted assets and a loss relating to the final liquidation of our subsidiary in Johannesburg, partially offset by the elimination of losses from trading in own shares.

Total operating expenses of CHF 49 million decreased 57% compared to 3Q18, mainly reflecting a decrease in compensation and benefits, partially offset by an increase in general and administrative expenses. Compensation and benefits decreased CHF 127 million, primarily reflecting lower deferred compensation expenses from prior-year awards, reduced expenses for long-dated legacy deferred compensation and retirement programs and lower variable compensation expenses. General and administrative expenses increased CHF 61 million, primarily reflecting higher non-income taxes.

2018 results

In 2018, we reported a loss before taxes of CHF 239 million compared to CHF 736 million in 2017. The decreased loss before taxes in 2018 was primarily driven by lower total operating expenses.

Net revenues of CHF 100 million increased CHF 15 million compared to 2017. Treasury results of CHF 13 million in 2018 mainly reflected gains of CHF 200 million with respect to structured notes volatility, of which CHF 165 million related to valuation model enhancements, gains of CHF 123 million relating to

hedging volatility and gains of CHF 61 million relating to fair value option volatility on own debt, partially offset by negative revenues of CHF 362 million relating to funding activities. Other revenues of CHF 87 million increased CHF 58 million compared to 2017, mainly reflecting reduced costs relating to hedging transactions executed in connection with the Group's risk-weighted assets and the elimination of losses from trading in own shares compared to gains in 2017, partially offset by a negative valuation impact from long-dated legacy deferred compensation and retirement programs and a loss relating to the final liquidation of our subsidiary in Johannesburg.

Total operating expenses of CHF 339 million decreased 59% compared to 2017, primarily reflecting decreases in compensation and benefits and general and administrative expenses. Compensation and benefits of CHF 128 million decreased 68%, primarily reflecting lower deferred compensation expenses from prior-year awards and lower retention award expenses. General and administrative expenses of CHF 160 million decreased 56%, mainly due to the absence of the impact from the settlement with the DFS in 2017 relating to certain areas of our foreign exchange trading business and reduced expenses relating to the continuing evolution of our legal entity structure. In 2018, we recorded expenses of CHF 159 million, compared to CHF 240 million in 2017, with respect to the evolution of our legal entity structure.

Additional financial metrics

Balance sheet

As of the end of 4Q18, total assets of CHF 768.9 billion were stable compared to 3Q18, reflecting a positive foreign exchange translation impact, offset by a decrease in operating activities. Excluding the foreign exchange translation impact, total assets decreased CHF 4.4 billion.

Range of reasonably possible losses related to certain legal proceedings

The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for certain proceedings for which the Group believes an estimate is possible was zero to CHF 1.5 billion as of the end of 4Q18.

Total shareholders' equity

Credit Suisse's total shareholders' equity increased to CHF 44.0 billion as of the end of 4Q18 from CHF 42.7 billion as of the end of 3Q18. The increase mainly reflected gains on fair value elected liabilities relating to credit risk, net income attributable to shareholders, an increase in the share-based compensation obligation and foreign exchange-related movements on cumulative translation adjustments, partially offset by an actuarial loss from the annual re-measurement of the Group's defined benefit plan assets and liabilities.

Liquidity coverage ratio

Our average liquidity coverage ratio was 184% as of the end of 4Q18 compared to 202% as of the end of 3Q18. The ratio reflects a conservative liquidity position, including ensuring that the Group's branches and subsidiaries meet applicable local liquidity requirements.

Capital metrics

The CET1 ratio was 12.6% as of the end of 4Q18 compared to 12.9% as of the end of 3Q18, primarily reflecting higher

risk-weighted assets. Credit Suisse's tier 1 ratio was 16.2% as of the end of 4Q18 compared to 17.1% as of the end of 3Q18. The total capital ratio was 17.7% as of the end of 4Q18 compared to 18.7% as of the end of 3Q18.

CET1 capital was CHF 35.9 billion as of the end of 4Q18, a slight increase compared to CHF 35.6 billion as of the end of 3Q18, mainly reflecting net income attributable to shareholders, a regulatory adjustment of deferred tax assets and a positive foreign exchange impact, partially offset by a dividend accrual.

Total eligible capital was CHF 50.3 billion as of the end of 4Q18, a decrease compared to CHF 51.7 billion as of the end of 3Q18, primarily reflecting the redemption of perpetual tier 1 capital notes.

Risk-weighted assets increased 3% to CHF 284.6 billion as of the end of 4Q18 compared to CHF 276.6 billion as of the end of 3Q18, mainly resulting from increases relating to movements in risk levels in credit risk, model and parameter updates in market risk and credit risk and methodology and policy changes in credit risk. These increases were partially offset by decreases relating to movements in risk levels in market risk and operational risk.

As of the end of 4Q18, the look-through CET1 ratio was 12.6% compared to 12.9% as of the end of 3Q18, primarily reflecting higher risk-weighted assets.

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements) (in each case, subject to certain phase-in periods). As of January 1, 2015, the BIS leverage ratio framework, as issued by BCBS, was implemented in Switzerland by FINMA. Our related disclosures are in accordance with Credit Suisse's interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of Credit Suisse's assumptions or estimates could result in different numbers from those shown herein.

References to phase-in and look-through included herein refer to Basel III requirements and Swiss Requirements. Phase-in reflects that for the years 2014 – 2018, there was a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

Unless otherwise noted, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments. The look-through tier 1 leverage ratio and CET1 leverage ratio are calculated as look-through BIS tier 1 capital and CET1 capital, respectively, divided by period-end leverage exposure. Swiss leverage ratios are measured on the same period-end basis as the leverage exposure for the BIS leverage ratio.

Return on regulatory capital is calculated using income/(loss) after tax and assumes a tax rate of 30% and capital allocated based on the worst of 10% of average risk-weighted assets and 3.5% of average leverage exposure. For Global Markets and Investment Banking & Capital

Markets, return on regulatory capital is based on US dollar denominated numbers. Adjusted return on regulatory capital is calculated using adjusted results, applying the same methodology used to calculate return on regulatory capital.

We may not achieve all of the expected benefits of our strategic initiatives. Factors beyond our control, including but not limited to the market and economic conditions, changes in laws, rules or regulations and other challenges discussed in our public filings, could limit our ability to achieve some or all of the expected benefits of these initiatives.

The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions which is discussed above relates only to those proceedings for which the Group believes an estimate is possible and which are discussed in the litigation note to the Consolidated Financial Statements in the Group's Annual Report on Form 20-F and updated in its quarterly reports and to be updated in the Group's Annual Report on Form 20-F that is scheduled to be released on March 22, 2019. It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. For additional details, see the litigation note to the Consolidated Financial Statements in the Group's Annual Report on Form 20-F and in each of its quarterly Financial Reports.

Return on regulatory capital

Credit Suisse measures firm-wide returns against total shareholders' equity and tangible shareholders' equity (a non-GAAP financial measure). In addition, it also measures the efficiency of the firm and its divisions with regard to the usage of capital as determined by the minimum requirements set by regulators. This regulatory capital is calculated as the worst of 10% of risk-weighted assets and 3.5% of leverage exposure. Return on regulatory capital is calculated using income/(loss) after tax and assumes a tax rate of 30% and capital allocated based on the worst of 10% of average risk-weighted assets and 3.5% of average leverage exposure. These percentages are used in the calculation in order to reflect the 2019 fully phased in Swiss regulatory minimum requirements for Basel III CET1 capital and leverage ratios. For

Global Markets and Investment Banking & Capital Markets, return on regulatory capital is based on US dollar denominated numbers. Adjusted return on regulatory capital is calculated using adjusted results, applying the same methodology used to calculate return on regulatory capital.
