Item 8. Data and standards used (a) Description of data sources used to provide information on the ESG factors in the benchmark statement. Describe how the data used to provide information on the ESG factors in the benchmark statement are sourced and whether, and to what extent, data are estimated or reported. (b) Reference standards. List the supporting standards used for the reporting under item 6 and/or item 7.	As described in the methodology for the relevant Index component, it provides allocation to . The benchmark administrator understands that the MSCI ESG Rating Select Indices use company rating research provided by MSCI ESG Research LLC. In particular, these indices use the following four MSCI ESG Research products: MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI ESG Climate Change Metrics Data. For details please refer to: http://www.msci.com/products/esg/about_msci_esg_research.html The numbers in Item 7 are determined assuming a 100% participation into the equity components, not taking into account the allocation into other asset classes. Users and potential users of the Index should be aware that ESG factors are reflected in the selection of the initial Index components of the Index by the benchmark administrator. When selecting the initial Index components, the benchmark administrator relied upon publicly available information published by the sponsors of the initial Index components to determine whether each initial Index component took into account ESG factors in the selection, weighting or exclusion of underlying assets. The ability of the Index to pursue ESG objectives, and reflect ESG factors, is therefore dependent on the accuracy of such publicly available information, the continued application by the sponsors of the initial Index components of ESG factors in the selection, weighting or exclusion of underlying assets, and the Index rebalancing entity assigning positive weightings to Index components that pursue ESG objectives and reflect ESG factors.
