Not Applicable By 31 December 2021, benchmark administrators shall, for each benchmark or, where applicable, each family of benchmarks, disclose the following information: Not Applicable (a) Does the benchmark align with the target of reducing carbon emissions or the attainment of the objectives of the Paris Agreement (b) the temperature scenario, in accordance with international standards, used for the alignment with the target of reducing GHG emissions or attaining of the objectives of the Paris Agreement; (c) the name of the provider of the temperature scenario used for the alignment with the target of reducing GHG emissions or the attainment of the objectives of the Paris Agreement;	are reflected in the selection of the initial Index components of the Index by the benchmark administrator. When selecting the initial Index components, the benchmark administrator relied upon publicly available information published by the sponsors of the initial Index components to determine whether each initial Index component took into account ESG factors in the selection, weighting or exclusion of underlying assets. The ability of the Index to pursue ESG objectives, and reflect ESG factors, is therefore dependent on the accuracy of such publicly available information, the continued application by the sponsors of the initial Index components of ESG factors in the selection, weighting or exclusion of underlying assets, and the Index rebalancing entity assigning positive weightings to Index components that pursue ESG objectives and reflect ESG factors.
