## Gil Mizrahi

**VP Research,  
Meteo-Logic**

Gil is an experienced technology executive who has led several business, IT and large scale infrastructure operations for the past 20 years. He has a proven track record of leading R&D and business development in big data and low-latency technologies, specializing in the financial market.

Gil manages the algorithm research at Meteo-Logic leading a team of top notch mathematicians and programmers. Before joining Meteo-Logic he was managing Final Algo-trading's R&D and worldwide infrastructure, from the company's early days, playing a major

role in turning Final into one of the most profitable hedge funds in HFT (high frequency trading). Prior to that, Gil was working on leading telecom and satellite solutions in the Israeli market.

Gil holds a BSc degree in Computer Science. He is married and has 3 children.
