

Meteo-Logic

To harness most advanced machine-learning technologies to get ahead in the global energy trading markets.

The logo for Meteo-Logic, featuring the company name in a blue, sans-serif font. The letter 'i' in 'Logic' has a small graphic of three dots above it, resembling a weather icon.

Moshe Levin
Chairman

About the product

Enabling superior strategies for trading of future contracts for energy commodities with high correlation to weather, in all major commodities' stock markets. The product is utilizing the most advanced and field-proven machine-learning technologies to process relevant energy-related big data and accurately predict future pricing.

About the market

The huge global energy commodities market is shifting from physical to financial trading, and with the introduction of new markets and new asset classes, the opportunities to be ahead of the market by applying skilled and successful trading techniques are growing exponentially.
