

# CSA Mixta-BVG Equity 75

(Equity component exceeded pursuant to BVV2)

## Investment policy

The investment group's objective is to generate an attractive return in Swiss francs by taking advantage of the possibilities for international diversification. Due to the high equity component, which can vary between 65% and 85% of the net assets depending on the market situation, the investment time horizon should be at least ten years. In addition, the group invests worldwide in fixed and variable-rate securities as well as in indirect real estate investments. The unhedged portion of investments with foreign currency exposure may not exceed 30% of the net assets.

The investment group has an average equity ratio of 75% and thus exceeds the limit for equities in accordance with Art. 55 BVV 2. Due to the enhanced equity ratio, this product contains a higher level of risk than pension solutions with a maximum equity exposure of 50%. All the other investment guidelines stipulated by the Ordinance on Occupational Retirement, Survivors' and Disability Pension Plans (BVV 2) and the Ordinance on Investment Foundations (OIF), insofar as these are applicable, are still met.

Tons CO<sub>2</sub>-equivalent emissions per \$m revenues  
 Portfolio: **111.8** / Benchmark: **123.3**

### Legend

5) ESG Rating which is provided by MSCI ESG, is measured on a scale from AAA (highest rating) to CCC (lowest rating). The rating is based on the underlying company's exposure to industry specific sustainability risks and their ability to mitigate those risks relative to their peers. The overall portfolio rating is calculated on an industry relative basis while the underlying individual E, S and G ratings are absolute. Hence, the overall rating cannot be seen as an average of the individual E, S and G ratings.

6) The exclusions of the Swiss association for responsible investments (SVVK-ASIR) apply only to in-house funds and products. External funds, ETFs, and futures are not included.

7) ESG Controversies Flag is designed to provide timely and consistent assessments of ESG controversies involving publicly traded companies and fixed income issuers. A controversy case is typically a one-off event such as an environmental oil spill, an accident, or allegations such as safety issues in a production facility. The colour indicator, which spans from red to green, indicates the most severe involvement (red) to the least involved (green) in any controversies. The grey colour indicates where data is unavailable.

8) ESG Ratings represents the ESG Rating breakdown in percentage in an absolute view or relative to a benchmark.

9) The Overall ESG Quality Score does not correspond directly to the presented underlying Environment, Social and Governance Pillar scores. The Pillar scores are derived on an absolute basis, while the Overall ESG Quality Score is adjusted to reflect the industry-specific level of sustainability risk exposure. Since Pillar scores are absolute, and Overall scores are relative, the first cannot be averaged to derive the latter. ESG Themes represent a break-down of individual E, S and G scores. All scores and its' components are rated on a scale of 0-10 (provided by MSCI), where 0 is very poor and 10 is very good.

10) The Portfolio Climate Score shows the warming trajectory of this portfolio compared to that of the benchmark (when available), and relates it to important target temperatures with the central objective of holding the global average temperature increase to "well below 2°C above preindustrial levels and pursuing efforts to limit the temperature increase to 1.5°C above pre-industrial levels". This portfolio's warming trajectory takes into account the weighted warming trajectory of all portfolio positions. Current and future carbon intensity (Scope 1 & 2) play a central role in this calculation, as well current revenues and forecasted green revenues.

11) Carbon Intensities compares the weighted average emissions intensity per million \$ sales (broken down by GICS sector) between the portfolio and the benchmark. It also displays active GICS sector weights.
