

# CSA Mixta-BVG investment groups

## 2nd pillar product sheet

**This document explains the characteristics, benefits, and potential risks of CSA Mixta-BVG investment groups. Before investing, assess whether an investment in a CSA Mixta-BVG investment group is suitable for you.**

**An investment in a CSA Mixta-BVG investment group is suitable for you if...**

- you have the relevant knowledge and experience.
- you are willing and able to accept fluctuations in value.
- you have a medium- to long-term investment time horizon.

### Characteristics of CSA Mixta-BVG investment groups

The CSA Mixta-BVG investment groups pool funds from numerous investors and use them for various collective investments. Units can be issued and redeemed daily.

In legal terms, investment groups are regarded as special assets that are not included in the bankruptcy estate, should the issuer of the investment group become insolvent.

CSA Mixta-BVG investment groups are regulated investment instruments and are subject to direct supervision by the Supervisory Commission on Occupational Pensions (OAK BV) in Bern.

The portfolio's management makes specific investment decisions within the regulatory provisions of BVV 2<sup>1</sup> and according to the investment strategy. The risk is spread over a range of collective investments (investment groups/investment funds) and the underlying assets (equities, bonds, real estate, mortgages, money market) in those target funds.

Collective equity investments invest in a diversified portfolio of equities in small, medium-sized, or large companies in a specific country or economic region.

Collective bond investments invest in a diversified portfolio of bonds with fixed and variable interest.

Collective real estate investments invest in a diversified portfolio of residential properties and commercial real estate, as well as land for building.

Mortgage investment groups invest in a diversified portfolio of mortgage-backed loans.

Collective money market investments invest in a diversified portfolio of money market securities or short-term, fixed-income investments.

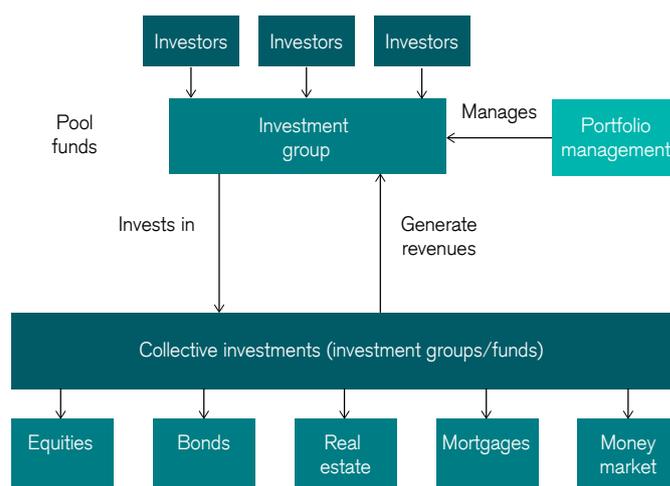

Illustration of CSA Mixta-BVG investment groups. The investment groups/funds and investment categories that are invested in differ depending on the CSA Mixta-BVG investment group.

### Your benefits

- Higher return potential versus account solution
- Possibility to participate in a broadly diversified securities solution even with only small amounts
- Professional portfolio management
- Protection of the account holder

### Potential risks

- Market risk
- Management risk
- Foreign exchange risk

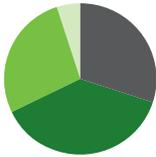

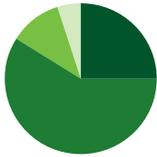

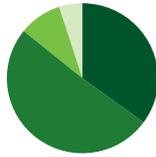

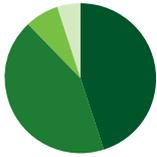

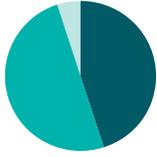

For details and other risks, please see page 3.

<sup>1</sup> Ordinance of April 18, 1984 on Occupational Retirement, Survivors' and Disability Pension Plans.

Find out more about the difference between actively managed and indexed investment groups and their investment policies. Then select your product **with the help of the fact sheet entitled "Vested Benefits – 2nd Pillar"**<sup>2</sup>.

**Actively managed investment groups** feature active management by specialized portfolio managers. The objective is to maximize long-term performance in CHF. The investment groups are broadly diversified. The CSA Mixta-BVG Basic investment group invests in money market, bonds, mortgages, and real estate. The CSA Mixta-BVG Defensiv, CSA Mixta-BVG and CSA Mixta-BVG Maxi investment groups exploit the opportunities of international diversification and invest globally in the money market, bonds, equities, and real estate.

**Indexed investment groups** invest in investment funds that precisely replicate the indices and hence the performance of the respective markets. They are not actively managed, so low expenses are one of their most impressive features, which has a positive impact on their long-term returns. They are broadly diversified worldwide in bonds, equities, and real estate. A premium or discount is debited to the account holder in the event of purchase or sale (see CSA fact sheet<sup>3</sup>). The premium or discount remains in the assets.

<sup>4</sup> These values are examples that, depending on the market situation, may fluctuate within the bandwidths defined in the investment guidelines.

# Potential risks

## Potential loss

Under some circumstances, investments in CSA Mixta-BVG investment groups may fall in value. Thanks to risk diversification across a variety of collective investments and the underlying assets contained in them, the likelihood of a total loss is very low.

## Market risk

The investor bears the risk that the value of the CSA Mixta-BVG investment groups may fall during the specified term. This can be the result of fluctuations in the market prices of the underlying securities. Fluctuations result from a range of causes, including changes in fundamentals and unforeseeable, sometimes irrational, behavior on the part of market participants.

## Management risk

The CSA Mixta-BVG investment groups' portfolio management selects the collective investments and determines the weightings within the defined bandwidths. These decisions can also lead to losses.

## Foreign exchange risk

The CSA Mixta-BVG investment groups (with the exception of CSA Mixta-BVG Basic) invest some of their assets in currencies other than the Swiss franc. Exchange rate fluctuations can therefore have a negative impact on investment values.

## Liquidity risk

As a matter of principle, units in CSA Mixta-BVG investment groups can be subscribed and redeemed on a daily basis. In exceptional market situations, the management of CSA can temporarily limit or discontinue the redemption of units. If, in a particular investment group, the liquid assets for immediate payments are not adequate and if an immediate sale of inherent investments could lead to disproportionately low prices due to a lack of market liquidity, the redemption of units can be postponed for up to three weeks or staggered.

## Tracking risk

The return on a CSA Mixta-BVG investment group can be lower than the return on the underlying benchmark because the investment group is subject to management fees.

## Other risks

Investors may be exposed to other risks – for example, those related to the counterparty/issuer risk, the use of derivatives, or investments in emerging markets or real estate.

The information provided herein is not legally binding and it does not constitute an offer or invitation to enter into any type of financial transaction. The information provided herein was produced by Credit Suisse Group AG and/or its affiliates (hereafter "CS") with the greatest of care and to the best of its knowledge and belief. The information and views expressed herein are those of CS at the time of writing and are subject to change at any time without notice. They are derived from sources believed to be reliable. CS provides no guarantee with regard to the content and completeness of the information and does not accept any liability for losses that might arise from making use of the information. If nothing is indicated to the contrary, all figures are unaudited. The information provided herein is for the exclusive use of the recipient. Neither this information nor any copy thereof may be sent, taken into or distributed in the United States or to any U. S. person (within the meaning of Regulation S under the US Securities Act of 1933, as amended). It may not be reproduced, neither in part nor in full, without the written permission of CS. Investment principal on bonds can be eroded depending on sale price, market price or changes in redemption amounts. Care is required when investing in such instruments. Investments in foreign currencies involve the additional risk that the foreign currency might lose value against the investor's reference currency. Equities are subject to market forces and hence fluctuations in value, which are not entirely predictable. The key risks of real estate investments include limited liquidity in the real estate market, changing mortgage interest rates, subjective valuation of real estate, inherent risks with respect to the construction of buildings and environmental risks (e.g., land contamination). Credit Suisse Investment Foundation, Zurich, is the issuer and manager of CSA products. Credit Suisse (Switzerland) Ltd, Zurich, is the custodian bank. The articles of incorporation, regulations and investment guidelines, as well as the most up-to-date annual report and fact sheets, may be obtained free of charge from the Credit Suisse Investment Foundation. Only pension funds domiciled in Switzerland that are not subject to tax are permitted as direct investors.
