

# Vested benefits – 2nd pillar

Invest your vested benefits in the best way for you.

## Useful facts about vested benefits – 2nd pillar

If you leave your current pension fund but do not join a new one, pension coverage has to be maintained by transferring the pension fund assets to a vested benefits institution. This is because the law stipulates that occupational benefits insurance has to be continued.

This may apply to you if:

- you are changing jobs and do not have to transfer your vested benefits to your new employer's pension fund immediately – or you only have to transfer part of those benefits;
- you are becoming self-employed and don't want to have your retirement assets paid out in cash;
- you lose your job;
- you are giving up your job to take care of your family;
- you are starting full-time education or training;
- you are getting divorced;
- you are going abroad for an extended period.

## Seize opportunities to earn good returns

- Preferential interest rate on the Vested benefits account – 2nd pillar
- Higher potential returns from Saving with securities – 2nd pillar

## Flexible withdrawals

- Normal payment of your vested benefits capital is possible no earlier than five years before you reach the regular AHV retirement age and no later than five years after that date.
- Early payment is possible:
  - if you become self-employed and are no longer subject to mandatory occupational benefits insurance;
  - if you are permanently leaving Switzerland, the Principality of Liechtenstein or the EU/EFTA;<sup>1</sup>

- if your annual pension fund contribution is higher than your current vested benefits capital;
- if you receive a full disability pension from the Federal Disability Insurance (IV).
- In the event of death, the vested benefits go to the persons designated as beneficiaries.

## Financing your own home

Vested benefits capital can also be paid out early or pledged in order to finance residential property for your own use.

Advance withdrawal	Pledging
Withdrawal possible every five years.	As a general rule, pledging is possible at any time.
Retirement assets can be used as a down payment for a home or for paying off an existing mortgage.	Retirement assets can be used as a guarantee for a higher mortgage.
On withdrawal, the retirement assets are taxed at a reduced rate, separately from your other income.	The retirement assets are not withdrawn, so no tax is payable, and the retirement assets remain invested so that they can continue to grow.

<sup>1</sup> As of June 1, 2007, cash payments can no longer be made in full to insured persons leaving Switzerland permanently if they are moving to an EU/EFTA country where they will be subject to mandatory insurance against old age, disability, or death. However, the portion of the vested benefits derived from extra-mandatory occupational benefits insurance can still be paid out in cash.

## Your needs

You would like to invest your vested benefits capital attractively, and you also want to

- take advantage of opportunities to earn good returns;
- realize your dream of owning your own home;
- save tax by selecting the best possible timing for the payment of your vested benefits capital.

## Your benefits

- Preferential interest rate on the Vested benefits account – 2nd pillar.
- Higher long-term potential for returns with Saving with securities – 2nd pillar.
- Attractive selection of actively managed or indexed securities solutions with broad diversification.
- No wealth, income or withholding tax is due until the vested benefits are paid out.
- Lower income tax rate when the vested benefits are paid out.
- Apart from the all-in fee, no additional safekeeping fees, issuing commissions or redemption commissions are levied.
- High level of investor protection with Saving with securities – 2nd pillar (separate assets, regulation).
- Vested benefits can be used to finance your own home.

## Potential risks

- Market risk
- Management risk
- Foreign exchange risk

Please note the detailed information and other risks listed on page 4.

## Comparison between the CSA Mixta-BVG Investment Group and a Vested benefits account – 2nd pillar (net performance)

If you use securities to save for your retirement, your long-term potential for return is better than with a Vested benefits account – 2nd pillar, but you also have to accept greater fluctuations in value. Investment period: January 1, 1995, to December 31, 2018. With initial capital of CHF 50,000, the additional income from the CSA Mixta-BVG investment group was CHF 56,031 more than from the Vested benefits account – 2nd pillar.

### Assets in CHF

Initial investment	Total	CHF	50,000
Vested benefits account – 2nd pillar	Average interest rate 1.61% p.a. Final net worth	CHF	75,539
Saving with securities – 2nd pillar (CSA Mixta-BVG investment group)	Average return 4.11% p.a. Final net worth	CHF	131,570
<b>Additional income from CSA Mixta-BVG compared with Vested benefits account – 2nd pillar</b>			<b>CHF 56,031</b>

## Vested benefits – 2nd pillar products

### Vested benefits account – 2nd pillar

If you are very security-conscious and wish to avoid risk with respect to your retirement savings, the Vested benefits account – 2nd pillar is a suitable option for you. You benefit from a preferential interest rate – free of withholding tax – which is higher than the interest you can earn on a Credit Suisse (Switzerland) Ltd. savings account.

### Saving with securities – 2nd pillar

Saving with securities – 2nd pillar offers you a long-term opportunity to generate returns that exceed the interest on a Pension account – 2nd pillar. Depending on your investor profile and investment period, you select one of several investment groups that differ mainly in terms of equity exposure and the investment horizon. You can choose between actively managed and indexed investment groups.

### Actively managed investment groups

These investment groups feature active management by specialist portfolio managers. The objective is to maximize long-term performance.

### Indexed investment groups

These groups invest in funds which precisely replicate the indices and hence the performance of various markets. Indexed investment groups are not actively managed and have low overheads, which has a positive impact on their long-term returns.

At any time you can switch within investment groups as well as between a Vested benefits account – 2nd pillar and Saving with securities – 2nd pillar.

## Finding the right solution for you

To help you find the right pension product for you, the various vested benefits solutions offered by the Credit Suisse Vested Benefits Foundation – 2nd Pillar are set out in detail below.

### An overview of pension solutions

<b>Your preferred asset categories for your retirement capital</b>	<ul style="list-style-type: none"> <li>■ Savings account</li> <li>■ No securities</li> </ul>	<ul style="list-style-type: none"> <li>■ Real estate/mortgages in CHF</li> <li>■ CHF bonds</li> </ul>	Securities in CHF and foreign currencies (mainly bonds and equities)	Securities in CHF and foreign currencies (mainly bonds and equities)	Securities in CHF and foreign currencies (mainly bonds and equities)
<b>Average equity component<sup>1</sup></b>	No equities	No equities	25%	35%	45%
<b>Your knowledge of this type of investment</b>	–	Adequate	Adequate	Adequate	Adequate
<b>Your experience with this type of investment</b>	–	Once	More than once	More than once	Frequent
<b>Potential returns</b>	Preferential interest rate	Low to moderate	Moderate	Moderate to high	High
<b>Risk (fluctuations in value)</b>	None	Low	Low to moderate	Moderate	Moderate to high
<b>Investment horizon</b>	Up to 5 years or more	3 years or more	5 years or more	5 years or more	8 years or more
<b>Potential needs</b>	You are very security-conscious and want to avoid risks of any kind when saving for your retirement. Security is more important to you than potentially higher returns.	You prefer an investment group with no exposure to equities or foreign currencies as your need for security is great and you want stable performance.	In order to take advantage of potential price rises on the equity markets, you are prepared to accept low-to-moderate fluctuations in value.	You prefer a larger equity component and expect moderate-to-high returns, for which you are prepared to accept a certain amount of fluctuation.	You prefer a high equity component and would like a high return, for which you are prepared to accept a medium to high level of fluctuation.

<sup>2</sup> These are indicative values which, depending on the market situation, may fluctuate within the bandwidths defined in the investment guidelines.

# Potential risks

## Potential loss

Under some circumstances investments in CSA Mixta-BVG investment groups may fall in value. Thanks to risk diversification across a variety of collective investments and the underlying assets contained in them, the likelihood of a total loss is very low.

## Market risk

The investor bears the risk that the value of the CSA Mixta-BVG investment groups may fall during the term. This can be the result of fluctuations in the market prices of the underlying securities. Fluctuations result from a range of causes including changes in fundamentals and unforeseeable, sometimes irrational, behavior on the part of market participants.

## Management risk

The portfolio managers of the CSA Mixta-BVG investment groups select the collective investments and determine the weightings within the defined bandwidths. These decisions can also lead to losses.

## Foreign exchange risk

The CSA Mixta-BVG investment groups (with the exception of CSA Mixta-BVG Basic) invest some of their assets in currencies other than the Swiss franc. Exchange-rate fluctuations can therefore have an impact on investment values.

## Liquidity risk

In general, units in CSA Mixta-BVG investment groups can be subscribed and redeemed on a daily basis. In exceptional market situations the management of CSA can temporarily limit or discontinue the redemption of units. If in a particular investment group the liquid assets for immediate payments are not adequate and if an immediate sale of inherent investments could lead to disproportionately low prices due to a lack of market liquidity, the redemption of units can be postponed for up to three weeks or staggered.

## Tracking risk

The return on a CSA Mixta-BVG investment group can be lower than the return on the underlying benchmark because the investment group is subject to management fees.

## Other risks

The investor may be exposed to other risks associated with the underlying securities in the collective investments. These can relate to counterparty/issuer risk, the use of derivatives, or investments in emerging economies or real estate.

[credit-suisse.com](https://credit-suisse.com)

Investment principal on bonds can be eroded depending on sale price, market price or changes in redemption amounts. Care is required when investing in such instruments. Investments in foreign currencies involve the additional risk that the foreign currency might lose value against the investor's reference currency. Equities are subject to market forces and hence fluctuations in value, which are not entirely predictable. The key risks of real estate investments include limited liquidity in the real estate market, changing mortgage interest rates, subjective valuation of real estate, inherent risks with respect to the construction of buildings and environmental risks (e.g., land contamination).
