

E-Commerce Basic

A simple, transparent way for your clients to make purchases in your online shop using a credit card.

In collaboration with our partner Worldline, we are offering you an affordable, simple, and transparent credit card acceptance solution for your online shop.

Your requirements

Cashless payments must be flexible, fast, secure, as well as easy for your customers to make. We have the optimal solution for your online shop – it enables you to keep both effort and costs to a minimum.

Our solution

E-Commerce Basic is the modern electronic system that allows clients to make credit card payments in your online shop. With this system, you can process both domestic and foreign payments via Worldline's secure interface. As an online shop owner, you will receive a confirmation of the amount immediately.

We will support you in the integration of this interface into your own accounting processes and ERP and CRM systems as required. All common programming languages and operating systems are supported.

To use E-Commerce Basic, you need to conclude a contract – without a minimum term – and can then benefit from being able to accept the most common credit cards (VISA, Mastercard). You only pay a one-off activation fee.

After that, there are no other costs: no monthly fees and no additional charges from credit card providers.

No matter whether your clients use a tablet or a smartphone, you will benefit from a payment window that is optimized for all common devices. Thanks to the web-based back-office application, you always have access to all payment orders in real time.
