II. SECTION “SUMMARY”

- (i) *Element B.4b (“Known trends affecting the issuer and the industries in which it operates”) on pages 7 and 8 is deleted and replaced as follows:*

B.4b	Known trends affecting the issuer and the industries in which it operates	<p><i>[If the Issuer is Societe Generale:</i></p> <p>Société Générale continues to be subject to the usual risks and the risks inherent to its business.</p> <p>Despite a welcome bounce back on the GDP figures of the first quarter of 2019 in many of the advanced economies, most signals still point to a slowdown of the global economy ahead, amidst heightened tariff tensions between the United States and China, on-going Brexit uncertainty and various country-specific headwinds.</p> <p>Financial markets have become more focused on the political risks amidst concerns that these are now biting into the growth outlook. Tensions on the markets related to the uncertainties mentioned cannot be excluded as well as a more pronounced</p>
-------------	--	--

	<p>slowdown in investment, which could in turn precipitate a more pronounced slowdown. In addition the oil market remains highly volatile.</p> <p>Against a backdrop of low inflation and signs of slowing growth, central banks have shifted to a more accommodative tone in their forward guidance.</p> <p>The fiscal stance is set to turn less favourable in the US heading into 2020 but should remain supportive in China. Within the euro area, the fiscal policy varies by member state.</p> <p>Regarding the evolution of the financial markets, the six-month extension announced in early April for the Brexit had provided an initial reprieve after a difficult start to 2019, but the escalation of trade tensions in May, fears of technological supply chain disruption and geopolitical tensions (for example, US sanctions against Iran) again undermined market confidence in the second quarter of the year.</p> <p>Concerning the specific trajectories of the world's major economies:</p> <ul style="list-style-type: none"> • US growth remains dynamic driven by private and public consumption, but we have doubts about the durability of such performance. The fading of fiscal stimulus as of mid-2019 and lower corporate earnings —as margins deteriorate with higher import tariffs and rising labour costs— will weaken the economy going forward. • Economic activity in the euro area is underpinned by firm domestic consumption and strong labour markets, but growth is set to decelerate in 2019 and 2020 amidst weakening exports and lower investment. • The UK economy has lost significant momentum on the back of Brexit uncertainty. • Japan's economic growth accelerated in the first quarter of 2019 but private consumption and capital expenditure are now contracting. • Faced with the risk of a sharp slowdown, China has engaged policy easing using a mix of fiscal and monetary measures. • Growth prospects are uneven among emerging markets. While financial conditions remain benign, especially following the pullback in US hike rates expectations, emerging markets face large corporate debt repayments in 2019-2021 and are still vulnerable to changing market sentiment. <p>From a regulatory perspective, H1 2019 was marked by the adoption of the CRR2/CRD5 banking package. This group of texts entered into force on 27 June 2019. Most provisions apply in 2 years, from June 2021, but some of them such as the TLAC (Total Loss Absorbing Capacity) apply as of the end of June 2019. The CRD5 directive will apply once it will be transposed into French law, expected by the end of 2020 at the latest. However, the transposition into European law of the agreement finalizing the Basel III reforms is not yet on the agenda as regards European legislative institutions].</p>

III. SECTION "RISK FACTORS"

- (i) Paragraph 2.1 "The Group is exposed to the risks inherent in its core businesses" on pages 42 and 43 is modified as follows, with provisions added in red and deleted in green:

"2.1 The Group is exposed to the risks inherent in its core businesses

Given the diversity and changes in the Group's activities, its risk management focuses on the following main categories of risks, any of which could adversely affect the Group's performance:

- Credit risks;
- Market risks;
- Operational risks
- Structural rate and exchange risks;
- Liquidity risks;
- Non-compliance risk, litigation; and
- other risks.

~~An investment in the Notes involves certain risks which should be assessed prior to any investment decision.~~

~~In particular, the Group is exposed to the risks inherent in its core businesses, including:~~

- **Risks related to the macroeconomic, market and regulatory environments**

The global economy and financial markets continue to display high levels of uncertainty, which may materially and adversely affect the Group's business, financial position and results of operations.

The Group's results may be adversely affected by regional market exposures.

~~Brexit and its impact on financial markets and the economic environment could have an adverse impact on the Group's activities and results of operations.~~

Increased competition, by both banking and non-banking actors, is likely to have an adverse effect on the Group's businesses and results, both in its domestic French market and internationally.

The Group is subject to an extensive supervisory and regulatory framework in each of the countries in which it operates and changes in this regulatory framework could have a significant effect on the Group's businesses, position, costs, as well as on the financial and economic environment in which it operates.

The Group may generate lower revenues from brokerage and other commission- and fee-based businesses during market downturns.

~~Brexit and its impact on financial markets and the economic environment could have an adverse impact on the Group's activities and results of operations.~~

~~Risks related to the implementation of the Group's strategic plan.~~

- **Credit and counterparty Risks**

The Group is exposed to counterparty and concentration risks, which may have a material adverse effect on the Group's business, results of operations and financial position.

The financial soundness and conduct of other financial institutions and market participants could adversely affect the Group.

The Group's results of operations and financial position could be adversely affected by a late or insufficient provisioning of credit exposures.

- **Market and Structural Risks**

The volatility of the financial markets may cause the Group to suffer significant losses on its trading and investment activities.

Changes in interest rates may adversely affect the ~~retail banking activities~~ ~~Group's Banking and Asset Management businesses~~.

Fluctuations in exchange rates could adversely affect the Group's results.

The protracted decline of financial markets or reduced liquidity in such markets may make it harder to sell assets or manoeuvre trade positions and could lead to material losses for certain activities of the Group.

The Group's hedging strategies may not prevent all risk of losses.

- **Operational Risks**

~~The Group is exposed to legal risks that could negatively affect its financial position or results of operations.~~

Operational failure, termination or capacity constraints affecting institutions the Group does business with, or failure or breach of the Group's information technology systems, could result in losses and damages to the reputation of the Group.

The Group may incur losses as a result of unforeseen or catastrophic events, including terrorist attacks or natural disasters.

~~The Group is exposed to legal risks that could negatively affect its financial position or results of operations.~~

The Group's risk management system, based notably on models, may not be effective and may expose the Group to unidentified or unanticipated risks, which could lead to significant losses.

Reputational damage could harm the Group's competitive position.

The Group's inability to attract and retain qualified employees, as well as significant changes in the regulatory framework related to human resources management processes and compensation, may adversely affect its performance.

● ~~Model Risks~~

~~The Group's risk management system, based notably on models, may not be effective and may expose the Group to unidentified or unanticipated risks, which could lead to significant losses.~~

● **Liquidity and Funding Risks**

A number of exceptional measures taken by governments, central banks and regulators could have a material adverse effect on the Group's business, results of operations and financial position.

The Group's dependence on its access to financing and its liquidity constraints may have a material adverse effect on the Group's business, financial position and results of operations.

● **Risks related to insurance activities**

A deterioration in the market situation, and in particular a significant increase or decrease in interest rates, could have a material adverse effect on the life insurance activities of the Group's Insurance business.

● ~~Strategic and business risks~~

~~Risks related to the implementation of the Group's strategic plan.~~

~~To prepare its consolidated financial statements in accordance with IFRS as adopted by the European Union, the Group relies on assumptions and estimates which, if incorrect, could have a significant adverse impact on its financial statements.~~

~~If the Group makes an acquisition, it may be unable to manage the integration process in a cost-effective manner or achieve the expected benefits.~~

~~The Group's inability to attract and retain qualified employees, as well as significant changes in the regulatory framework related to human resources management processes and compensation, may adversely affect its performance."~~

(ii) Paragraph 3.1.3 "Waiver of set-off" on page 46 is modified as follows, with provision added in red:

“3.1.3 Waiver of set-off

In the English Law Condition 18 and the French Law Condition 17, the Noteholders waive any right of or claims of set-off, netting, compensation, retention and counterclaim (and, for the avoidance of doubt, including all such rights, claims and liabilities arising under or in relation to any and all agreements or other instruments of any sort or any non-contractual obligations, in each case whether or not relating to the Notes) in relation to the Notes, to the extent permitted by applicable law. **As a result, the Noteholders will not at any time be entitled to set-off the Issuer’s obligations under the Notes against obligations owed by them to the Issuer.”**

- (iii) *Paragraph 5.2.4 “Substitution or early redemption of the Notes in relation to Fundamental Review of the Trading Book regulation” on page 60 is added as follows:*

“5.2.4 Substitution or early redemption of the Notes in relation to Fundamental Review of the Trading Book regulation

For an Index in respect of which the Index Components comprise, without limitation, one or more Equity Instruments that is a Fund Unit or an Underlying Index composed of Funds, ETF Share or an Underlying Index composed of ETF, if from 1 January 2023, the related Fund, Fund Provider of the underlying Fund, ETF or ETF Service Provider of the underlying ETF does not make publicly available information or does not provide information (either spontaneously or as required pursuant to laws and regulations or contractual arrangements) enabling Société Générale or its affiliates to calculate its market risks as holder of Fund Units or ETF Share to hedge the obligations of the Issuer under the Notes, as if it were holding directly the assets of the underlying Fund or ETF (the **FRTB Information**), Société Générale or its affiliates may be subject to significantly higher capital requirements under the Fundamental Review of the Trading Book as implemented into French law. Consequently, from that date, the Calculation Agent may (i) substitute the affected Index by a similar Index and make corresponding adjustment to the conditions of the Notes which could have a material adverse effect on the value of the Notes, or (ii) redeem the Notes which may result in the partial or total loss of the invested amount.”

- (iv) *Paragraph 5.4.10 “Substitution or early redemption of the Notes in relation to Fundamental Review of the Trading Book regulation” on page 63 is modified as follows, with provisions added in red and deleted in green:*

“5.4.10 Substitution or early redemption of the Notes in relation to Fundamental Review of the Trading Book regulation

~~According to the Fundamental Review of the Trading Book regulation as implemented into French law,~~ **If from 1 January 2023,** if the related Fund or Fund Provider of the underlying Fund does not make publicly available information or does not provide information (either spontaneously or as required pursuant to laws and regulations or contractual arrangements) enabling Société Générale or its affiliates to calculate its market risks as holder of Fund Units to hedge the obligations of the Issuer under the Notes, as if it were holding directly the assets of the underlying Fund (the **FRTB Information**), Société Générale or its affiliates may be subject to significantly higher capital requirements **under the Fundamental Review of the Trading Book as implemented into French law.** Consequently, from that date, the Calculation Agent may (i) substitute the affected Fund by (a) a similar Fund **providing Société Générale with the FRTB information** or (b) a similar Index and make corresponding adjustment to the conditions of the Notes which could have a material adverse effect on the value of the Notes, or (ii) redeem the Notes which may result in the partial or total loss of the invested amount.”

- (v) *Paragraph 5.10.5.4 “Substitution or early redemption of the Notes in relation to Fundamental Review of the Trading Book regulation” on page 69 is modified as follows, with provisions added in red and deleted in green:*

“5.10.5.4 Substitution or early redemption of the Notes in relation to Fundamental Review of the Trading Book regulation

~~According to the Fundamental Review of the Trading Book regulation as implemented into French law, If~~ from 1 January 2023, the related ETF Service Provider or ETP Issuer of the underlying ETP or ETF does not make publicly available information or does not provide information (either spontaneously or as required pursuant to laws and regulations or contractual arrangements) enabling Société Générale or its affiliates to calculate its market risks as holder of ETP or ETF to hedge the obligations of the Issuer under the Notes, as if it were holding directly the assets of the underlying ETP or ETF (**the FRTB Information**), Société Générale or its affiliates may be subject to significantly higher capital requirements **under the Fundamental Review of the Trading Book as implemented into French law**. Consequently, from that date, the Calculation Agent may (i) substitute the Affected ETP or the Affected ETF by (a) a similar ETP or ETF **providing Société Générale with the FRTB information** or (b) a similar Index and make corresponding adjustment to the conditions of the Notes which could have a material adverse effect on the value of the Notes, or (ii) redeem the Notes which may result in the partial or total loss of the invested amount.”

where **FRTB Information** means sufficient information, including relevant risk sensitivities data, in a processable format to enable Société Générale, as a holder of the Fund Unit or ETF Share, as the case may be, to calculate its market risk in relation thereto as if it were holding directly the assets of the Fund or ETF, as the case may be; "processable format" means that the format of
