

# CREDIT SUISSE AG

(Incorporated in Switzerland)

## Registration Document

This Registration Document comprises:

- Information incorporated by reference into this Registration Document (pages 4 to 12);
- Table of Contents (page 13);
- Risk Factors (page 14); and
- General Information (pages 14 to 16)

### **What is this document?**

This Registration Document constitutes a registration document for the purposes of Article 5.3 of Directive 2003/71/EC, as amended. This Registration Document is valid for one year from the date of its approval.

The Issuer publishes Registration Documents frequently. Each Registration Document may disclose significant new factors (and, potentially, material mistakes or inaccuracies in past Registration Documents) that have come to light since the date of the previous Registration Document. It is therefore important that you read the most recent Registration Document available, in addition to certain other documents (see “*What other documents do I need to read?*”, below).

### **What type of securities does this Registration Document relate to?**

This Registration Document relates to the issuance of debt and/or derivative securities of Credit Suisse AG. The terms of the securities will be explained in detail in the relevant securities note.

### **Who is the issuer?**

The securities will be issued by Credit Suisse AG. The payment of any amount due under the securities is subject to Credit Suisse AG's financial position and its ability to meet its obligations. This Registration Document, the information incorporated herein by reference and any information on Credit Suisse AG provided in the securities note and summary, provide a description of Credit Suisse AG's business activities as well as certain financial information and material risks faced by Credit Suisse AG.

### **How to use this Registration Document?**

Credit Suisse AG prepares this Registration Document in accordance with Annex XI of Commission Regulation (EC) No. 809/2004 of 29 April 2004 (the “Prospectus Regulation”) following the publication of certain public disclosures made by Credit Suisse. Since Credit Suisse AG's annual report is available for the latest financial year, 2016, this Registration Document incorporates by reference the specified portions of that annual report, which serves to update as of its date the disclosure in this Registration Document about Credit Suisse Group AG, including Credit Suisse AG. This Registration Document replaces in its entirety the Credit Suisse AG Registration Document of 10 August 2017. This Registration Document also incorporates by reference all or part of certain other documents (listed below):

- a media release containing proposals for the Annual General Meeting of Credit Suisse Group AG and information regarding a subsequent event related to full year 2016 earnings and an update of full year 2016 results;
- a Form 6-K containing information relating to Credit Suisse offices in various locations being contacted by regulatory and law enforcement authorities seeking records and information concerning investigations into Credit Suisse's historical private banking services on a cross-border basis;
- the Credit Suisse Earnings Release 1Q17;
- a media release regarding the outcome of the Annual General Meeting of Credit Suisse Group AG;
- the Credit Suisse Financial Report 1Q17;
- the Credit Suisse Financial Report 2Q17, the Credit Suisse (Bank) Financial Statements 6M17 and additional 2017 six-month financial information for Credit Suisse Group AG and Credit Suisse AG;
- the Credit Suisse Financial Report 3Q17; and
- a media release regarding Credit Suisse's settlement with the New York State Department of Financial Services related to the conduct of Credit Suisse's Foreign Exchange Rates business.

The section "*Risk Factors*" in this Registration Document describes the principal risks and uncertainties relating to the Issuer which may affect Credit Suisse AG's ability to fulfill its obligations under the securities to investors issued pursuant to the prospectus of which this Registration Document will be a part.

The section "*Information incorporated by reference into this Registration Document*" in this Registration Document sets out the information that is deemed to be incorporated by reference in this Registration Document. The table in this section also gives a general description of what these documents contain, where it may not otherwise be clear from the title of the relevant release. The documents containing information incorporated by reference are all available as specified in that section. Prospective investors should read those documents.

The section "*General Information*" in this Registration Document provides certain information about Credit Suisse AG generally as well as the nature of Credit Suisse AG's business.

The section "*Change*" sets out certain material adverse changes (as specified) and certain significant changes (as specified) since the specified dates.

The section "*Legal and Arbitration Proceedings*" sets out certain governmental, legal and arbitration proceedings which may be significant as specified.

The above is not an exhaustive list of the sections in this Registration Document. Please see the table of contents on page 13 for a list of the other sections, all of which form part of this Registration Document and therefore part of the prospectus of which this Registration Document will be a part.

### **What other documents do I need to read?**

In addition to the entirety of this Registration Document, you should read the information incorporated into this Registration Document by reference, along with the relevant summary and securities note, which together form the prospectus under which the securities will be issued. The complete prospectus should be read by an investor contemplating an investment in Credit Suisse AG securities to which the prospectus relates.

This Registration Document has been prepared in accordance with Directive 2003/71/EC, as amended by Directive 2010/73/EU, as implemented in the United Kingdom. The information in this Registration Document has been prepared pursuant to Article 14 of the Prospectus Regulation. This Registration Document as approved by the United Kingdom Listing Authority replaces in its entirety the Registration Document approved by the United Kingdom Listing Authority dated 10 August 2017.

**Credit Suisse AG is the direct bank subsidiary of Credit Suisse Group AG. They are distinct entities. We use the term “the Bank” when we are referring to Credit Suisse AG and its consolidated subsidiaries. We use the terms “Credit Suisse”, “the Group”, “we”, “us” and “our” when we are referring to Credit Suisse Group AG and its consolidated subsidiaries, including Credit Suisse AG. However, because the business of the Bank and Credit Suisse is substantially similar, references to “Credit Suisse”, “the Group”, “we”, “us” and “our” can also be taken to be applicable to the Bank when the subject is the same or substantially similar.**

**Please see page 64 of the Annual Report 2016 for information on the differences between the Bank and the Group businesses.**

## **Information incorporated by reference into this Registration Document**

The information specified in the section below (*Source Documents*) has been filed with the United Kingdom Listing Authority and, to the extent specified in the section further below (*Information incorporated by reference from the Source Documents*) will form part of this Registration Document.

### Source Documents

#### Media Release on Form 6-K

1. The Form 6-K of Credit Suisse Group AG and Credit Suisse AG filed with the United States Securities and Exchange Commission (the “SEC”) on 13 November 2017 (the “Form 6-K Dated 13 November 2017”), which contains a media release regarding Credit Suisse's settlement with the New York State Department of Financial Services related to the conduct of Credit Suisse's Foreign Exchange Rates business.

#### Third Quarter 2017 Financial Report on Form 6-K

2. The Form 6-K of Credit Suisse Group AG and Credit Suisse AG filed with the SEC on 2 November 2017 (the “Form 6-K Dated 2 November 2017”), which contains the Credit Suisse Financial Report 3Q17 as an exhibit thereto.

#### Second Quarter 2017 Financial Report and Credit Suisse (Bank) Financial Statements 6M17 on Form 6-K

3. The Form 6-K of Credit Suisse Group AG and Credit Suisse AG filed with the SEC on 28 July 2017 (the “Form 6-K Dated 28 July 2017”), which contains as exhibits, among other things, (i) the Credit Suisse Financial Report 2Q17, (ii) the Credit Suisse (Bank) Financial Statements 6M17, within which there is unaudited information for Credit Suisse AG for the six months ended 30 June 2017 and (iii) additional 2017 six-month financial information for Credit Suisse Group AG and Credit Suisse AG.

#### First Quarter 2017 Financial Report on Form 6-K

4. The Form 6-K of Credit Suisse AG filed with the SEC on 4 May 2017 (the “Form 6-K Dated 4 May 2017”), which contains the Credit Suisse Financial Report 1Q17 as an exhibit thereto.

#### Media Release on Form 6-K

5. The Form 6-K of Credit Suisse Group AG and Credit Suisse AG filed with the SEC on 28 April 2017 (the “Form 6-K Dated 28 April 2017”), which contains a media release regarding the outcome of the Annual General Meeting of Credit Suisse Group AG on 28 April 2017.

#### First Quarter 2017 Earnings Release on Form 6-K

6. The Form 6-K of Credit Suisse AG filed with the SEC on 26 April 2017 (the “Form 6-K Dated 26 April 2017”), which contains the Credit Suisse Earnings Release 1Q17 as an exhibit thereto.

#### Form 6-K

7. The Form 6-K of Credit Suisse Group AG and Credit Suisse AG filed with the SEC on 5 April 2017 (the “Form 6-K Dated 5 April 2017”) containing information relating to Credit Suisse offices in various locations being contacted by regulatory and law enforcement authorities seeking records and information concerning investigations into Credit Suisse's historical private banking services on a cross-border basis.

#### Form 20-F

8. The Form 20-F of Credit Suisse Group AG and Credit Suisse AG filed with the SEC on 24 March 2017 (the “Form 20-F 2016”) which contains the 2016 Annual Report (the “Annual Report 2016”) attached as an exhibit thereto. The Annual Report 2016 includes, among others, the financial statements of Credit Suisse Group AG and Credit Suisse AG as of and for the years ended 31 December 2016 and 2015.

Media Release on Form 6-K

9. The Form 6-K of Credit Suisse Group AG and Credit Suisse AG filed with the SEC on 24 March 2017 (the “Form 6-K Dated 24 March 2017”), which contains a media release containing proposals for the Annual General Meeting of Credit Suisse Group AG and information regarding a subsequent event related to full year 2016 earnings and an update of full year 2016 results.

## **Risk Factors**

See pages 42 to 50 of the Annual Report 2016 that disclose the principal risks to Credit Suisse Group AG and its consolidated subsidiaries, including Credit Suisse AG, which are incorporated herein by reference. Notwithstanding anything in the 'Operational Risk - we are exposed to a wide variety of operational risks, including information technology risk' risk factor, this risk factor should not imply that either the Bank or the Group will be unable to comply with its obligations as a company with securities admitted to the Official List or as a supervised firm regulated by the Financial Conduct Authority.

## **General Information**

### **1. Credit Suisse AG**

The Bank was established on 5 July 1856 and registered in the Commercial Register (registration no. CH-020.3.923.549-1) of the Canton of Zurich on 27 April 1883 for an unlimited duration under the name Schweizerische Kreditanstalt. Credit Suisse's name was changed to Credit Suisse First Boston on 11 December 1996. On 13 May 2005, the Swiss banks Credit Suisse First Boston and Credit Suisse were merged. Credit Suisse First Boston was the surviving legal entity, and its name was changed to Credit Suisse (by entry in the commercial register). On 9 November 2009, Credit Suisse was renamed "Credit Suisse AG".

Credit Suisse AG, a bank and joint stock corporation established under Swiss law and governed by the Swiss Federal Code of Obligations of 30 March 1911 (and subsequently amended), is a wholly owned subsidiary of Credit Suisse Group AG. Credit Suisse AG's registered head office is in Zurich, and it has additional executive offices and principal branches located in London, New York, Hong Kong, Singapore and Tokyo. For further information on Credit Suisse AG's relationship to Credit Suisse Group AG, see page 64 of the Annual Report 2016.

Credit Suisse AG's registered head office is located at Paradeplatz 8, CH-8001, Zurich, Switzerland, and its telephone number is 41-44-333-1111.

### **2. Auditors**

The Bank's statutory and bank law auditor is KPMG AG, Badenerstrasse 172, 8004 Zurich, Switzerland (KPMG). KPMG is a member of the Swiss Institute of Certified Accountants and Tax Consultants.

The Bank's special auditor for the purposes of issuing the legally required report for capital increases in accordance with Article 652f of the Swiss Code of Obligations is BDO AG, Fabrikstrasse 50, 8031 Zurich, Switzerland.

KPMG and BDO AG are both licensed by the Federal Audit Oversight Authority, which is responsible for the licensing and supervision of audit firms and individuals which provide audit services in Switzerland.

Further information on the Bank's auditor may be found on page 212 of the Annual Report 2016.

### **3. Documents on Display**

For the life of this Registration Document, the following documents (or copies thereof) may be physically inspected at the registered head office of Credit Suisse AG at Paradeplatz 8, CH-8001, Zurich, Switzerland:

- i. the Articles of Association of Credit Suisse AG; and
- ii. historical financial information of Credit Suisse AG and its subsidiary undertakings for the financial years ended 31 December 2016 and 2015.

This information is also available on the Credit Suisse website, [www.credit-suisse.com](http://www.credit-suisse.com).

#### **4. Change**

There has been no significant change in the financial position of Credit Suisse AG and its consolidated subsidiaries since 30 September 2017.

There has been no material adverse change in the prospects of Credit Suisse AG and its consolidated subsidiaries since 31 December 2016.

Please see “Risk Factors” on pages 42 to 50 of the Annual Report 2016 for the risk factors that may affect the future results of operations or financial condition of Credit Suisse Group AG and its consolidated subsidiaries, including Credit Suisse AG.

Please see “Operating environment” on pages 52 to 54 of the Annual Report 2016, “Operating environment” on pages 4 to 6 of the exhibit (Credit Suisse Financial Report 1Q17) to the Form 6-K Dated 4 May 2017, “Operating environment” on pages 4 to 6 of the fifth exhibit (Credit Suisse Financial Report 2Q17) to the Form 6-K Dated 28 July 2017 and “Operating environment” on pages 4 to 6 of the exhibit (Credit Suisse Financial Report 3Q17) to the Form 6-K Dated 2 November 2017 for information relating to trends, uncertainties, and the economic environment that may affect the future results of operations or financial condition of Credit Suisse Group AG and its consolidated subsidiaries, including Credit Suisse AG.

#### **5. Names and Addresses of Directors and Executives**

The business address of the members of the Board of Directors and the members of the Executive Board is Paradeplatz 8, CH-8001, Zurich, Switzerland.

The current members of the Board of Directors of the Bank are as follows:

- Urs Rohner, Chairman
- Iris Bohnet
- Andreas Gottschling
- Alexander Gut
- Andreas N. Koopmann
- Seraina (Maag) Macia
- Kai S. Nargolwala
- Joaquin J. Ribeiro
- Severin Schwan
- Richard E. Thornburgh
- John Tiner
- Alexandre Zeller

The current members of the Executive Board of the Bank are as follows:

- Tidjane Thiam, Chief Executive Officer
- James L. Amine
- Pierre-Olivier Bouée
- Romeo Cerutti
- Brian Chin
- Peter Goerke
- Iqbal Khan
- David R. Mathers
- Joachim Oechslin
- Helman Sitohang
- Lara Warner

Further information about the members of the Board of Directors and the Executive Board can be found on pages 186 to 210 of the Annual Report 2016 and in the Form 6-K Dated 28 April 2017.

## **6. Market Activity**

The Group may update its expectations on market activity, and any such update will be included in its quarterly or annual reports. For information on Credit Suisse AG's principal markets and activities, see pages 12 to 25 and 52 to 54 of the Annual Report 2016.

## **7. Conflicts**

There are no potential conflicts of interest of the members of the Board of Directors, and the members of the Executive Board between their duties to Credit Suisse AG and their private interests and/or other duties.

## **8. Responsibility Statements**

Credit Suisse AG takes responsibility for this Registration Document. Having taken all reasonable care to ensure that such is the case, the information contained in this Registration Document is, to the best knowledge of Credit Suisse AG, in accordance with the facts and contains no omission likely to affect its import.

## **9. Legal and Arbitration Proceedings**

Except as disclosed in the Annual Report 2016 under the heading "Litigation" (note 39 to the condensed consolidated financial statements of Credit Suisse Group AG on pages 374 to 382 of the Annual Report 2016), in the Form 6-K Dated 4 May 2017 under the heading "Litigation" (note 30 to the condensed consolidated financial statements of Credit Suisse Group AG on pages 155 to 156 of the exhibit (Credit Suisse Financial Report 1Q17) to the Form 6-K Dated 4 May 2017), in the Form 6-K Dated 28 July 2017 under the heading "Litigation" (note 30 to the condensed consolidated financial statements of Credit Suisse Group AG on pages 161 to 162 of the fifth exhibit (Credit Suisse Financial Report 2Q17) to the Form 6-K Dated 28 July 2017) and in the Form 6-K Dated 2 November 2017 under the heading "Litigation" (note 30 to the condensed consolidated financial statements of Credit Suisse Group AG on pages 163 to 165 of the exhibit (Credit Suisse Financial Report 3Q17) to the Form 6-K Dated 2 November 2017) there are no, and have not been during the period of 12 months ending on the date of this Registration Document, governmental, legal or arbitration proceedings which may have, or have had in the past, significant effects on the Bank or the Group's financial position or profitability, and Credit Suisse AG is not aware of any such proceedings being either pending or threatened.

In respect of each of the claims disclosed in the documents at the page references listed above in this paragraph 9. Legal and Arbitration Proceedings, the amount of damages claimed (if specified in the relevant proceeding) and certain other quantifiable information that is publicly available is disclosed. In addition, a roll forward of the Group's aggregate litigation provisions is disclosed in Note 39 to its consolidated financial statements on pages 374 to 382 of the Annual Report 2016.

The Group's aggregate litigation provisions include estimates of reasonably possible loss or range of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of the complexity of the proceedings, the novelty of some of the claims, the early stage of the proceedings and limited amount of discovery that has occurred and/or other factors. The Group estimates that the aggregate range of reasonably possible losses that are not covered by existing provisions is zero to CHF 1.3 billion. The Group believes that any potential losses arising from litigation that have not been provided for in the consolidated financial statements, or that have not been quantitatively estimated, are either not material or cannot be reasonably estimated.

Credit Suisse Group AG discloses information about material settlements in its quarterly and annual reports.

## Media Release

### Credit Suisse Reaches Settlement with New York State Department of Financial Services Relating to Foreign Exchange Rates

Zurich / New York, November 13, 2017 – Credit Suisse announced today that it has reached a settlement with the New York Department of Financial Services (DFS) related to the conduct of its Foreign Exchange (FX) Rates business.

The agreement with the DFS settles claims relating to Credit Suisse's voice and electronic FX trading business between 2008 and 2015. Credit Suisse does not admit to any findings of fact and the resolution does not involve any fraud-based violations. The consent order reflecting the agreement resolves all matters.

Credit Suisse is pleased to have reached a settlement with the DFS that allows the bank to put this matter behind it.

Credit Suisse will take a pre-tax charge of approximately USD 135 million. This charge will be taken in its 4Q 2017 financial results, which will be announced on February 14, 2018.

#### Credit Suisse AG

Credit Suisse AG is one of the world's leading financial services providers and is part of the Credit Suisse group of companies (referred to here as 'Credit Suisse'). As an integrated bank, Credit Suisse offers clients its combined expertise in the areas of private banking, investment banking and asset management. Credit Suisse provides advisory services, comprehensive solutions and innovative products to companies, institutional clients and high-net-worth private clients globally, as well as to retail clients in Switzerland. Credit Suisse is headquartered in Zurich and operates in over 50 countries worldwide. The group employs approximately 46'720 people. The registered shares (CSGN) of Credit Suisse's parent company, Credit Suisse Group AG, are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found at [www.credit-suisse.com](http://www.credit-suisse.com).

#### Cautionary statement regarding forward-looking information

This document contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

**Media Release**  
November 13, 2017  
Page 2/2

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries or in emerging markets in 2017 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including cost efficiency, net new asset, pre-tax income/(loss), capital ratios and return on regulatory capital, leverage exposure threshold, risk-weighted assets threshold and other targets and ambitions;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyberattacks on our business or operations;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- the potential effects of proposed changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies; and

- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2016.

## Explanatory note

On November 2, 2017, the Credit Suisse Financial Report 3Q17 was published. A copy of the Financial Report is attached as an exhibit to this report on Form 6-K. This report on Form 6-K (including the exhibits hereto) is hereby (i) incorporated by reference into the Registration Statement on Form F-3 (file no. 333-218604) and the Registration Statements on Form S-8 (file nos. 333-101259, 333-208152 and 333-217856), and (ii) shall be deemed to be “filed” for purposes of the Securities Exchange Act of 1934, as amended, except, in the case of both (i) and (ii), (a) the information under “Differences between Group and Bank” and “Selected financial data – Bank” shall not be incorporated by reference into, or be deemed “filed”, with respect to the Registration Statements on Form S-8 (file nos. 333-101259, 333-208152 and 333-217856) and (b) the sections of the attached Financial Report entitled “II – Treasury, risk, balance sheet and off-balance sheet – Capital management – Bank regulatory disclosures”, “Investor information” and “Financial calendar and contacts” shall not be incorporated by reference into, or be deemed “filed”, with respect to any such Registration Statements.

Credit Suisse Group AG and Credit Suisse AG file an annual report on Form 20-F and file quarterly reports, including unaudited interim financial information, and furnish or file other reports on Form 6-K with the US Securities and Exchange Commission (SEC) pursuant to the requirements of the Securities Exchange Act of 1934, as amended. The SEC reports of Credit Suisse Group AG and Credit Suisse AG are available to the public over the internet at the SEC’s website at [www.sec.gov](http://www.sec.gov) and from the SEC’s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549 (telephone 1-800-SEC-0330). The SEC reports of Credit Suisse Group AG and Credit Suisse AG are also available under “Investor Relations” on Credit Suisse Group AG’s website at [www.credit-suisse.com](http://www.credit-suisse.com) and at the offices of the New York Stock Exchange, 20 Broad Street, New York, NY 10005.

Unless the context otherwise requires, references herein to “Credit Suisse Group,” “Credit Suisse,” “the Group,” “we,” “us” and “our” mean Credit Suisse Group AG and its consolidated subsidiaries and the term “the Bank” means Credit Suisse AG, the direct bank subsidiary of the Group, and its consolidated subsidiaries.

SEC regulations require certain information to be included in registration statements relating to securities offerings. Such additional information for the Group and the Bank is included in this report on Form 6-K, which should be read together with the Group’s and the Bank’s annual report on Form 20-F for the year ended December 31, 2016 (Credit Suisse 2016 20-F) filed with the SEC on March 24, 2017, the Group’s financial report for the first quarter of 2017 (Credit Suisse Financial Report 1Q17), filed with the SEC on Form 6-K on May 4, 2017, the Group’s financial report for the second quarter of 2017 (Credit Suisse Financial Report 2Q17), filed with the SEC on Form 6-K on July 28, 2017 and the Group’s financial report for the third quarter of 2017 (Credit Suisse Financial Report 3Q17), filed with the SEC as Exhibit 99.1 hereto.

This report filed on Form 6-K also contains certain information about Credit Suisse AG (Bank) relating to its results as of and for the three and nine months ended September 30, 2017. The Bank, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. The Bank’s registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to “CHF” are to Swiss francs.

## Forward-looking statements

This Form 6-K and the information incorporated by reference in this Form 6-K include statements that constitute forward-looking statements. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Credit Suisse 2016 20-F, and subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC and the Group’s and the Bank’s reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

## Differences between Group and Bank

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Swiss Universal Bank, International Wealth Management, Asia Pacific, Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit segments. These segment results are included in Core Results, except for the Strategic Resolution Unit, which is part of the Credit Suisse results. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank. Certain other assets, liabilities and results of operations are managed as part of the activities of the six segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to (i) financing vehicles of the Group, which include special purpose vehicles for various funding activities of the Group, including for the purpose of raising capital; and (ii) hedging activities relating to share-based compensation awards.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

For further information on the differences between the Group and the Bank, refer to "Note 31 – Subsidiary guarantee information" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 3Q17.

# Financial Report 3Q17

I	Credit Suisse results	3
II	Treasury, risk, balance sheet and off-balance sheet	49
III	Condensed consolidated financial statements – unaudited	83
	List of abbreviations	172
	Investor information	173
	Financial calendar and contacts	174
	Cautionary statement regarding forward-looking information	175

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the direct bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of "–" indicates not meaningful or not applicable.

# Credit Suisse at a glance

## Credit Suisse

Our strategy builds on Credit Suisse's core strengths: its position as a leading global wealth manager, its specialist investment banking capabilities and its strong presence in our home market of Switzerland. We seek to follow a balanced approach to wealth management, aiming to capitalize on both the large pool of wealth within mature markets as well as the significant growth in wealth in Asia Pacific and other emerging markets. Founded in 1856, we today have a global reach with operations in about 50 countries and 46,720 employees from over 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture growth opportunities around the world. We serve our clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specializing in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios from the former non-strategic units plus additional businesses and positions that do not fit with our strategic direction. Our business divisions cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

## Swiss Universal Bank

The Swiss Universal Bank division offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients primarily domiciled in our home market Switzerland, which offers attractive growth opportunities and where we can build on a strong market position across our key businesses. Our Private Clients business has a leading franchise in our Swiss home market and serves ultra-high-net-worth individuals, high-net-worth individuals, affluent and retail clients. Our Corporate & Institutional Clients business serves large corporate clients, small and medium-sized enterprises, institutional clients, external asset managers and financial institutions.

## Asia Pacific

In the Asia Pacific division, our wealth management, financing and underwriting and advisory teams work closely together to deliver integrated advisory services and solutions to our target ultra-high-net-worth, entrepreneur and corporate clients. Our Wealth Management & Connected business combines our activities in wealth management with our financing, underwriting and advisory activities. Our Markets business represents our equities and fixed income trading business in Asia Pacific, which supports our wealth management activities, but also deals extensively with a broader range of institutional clients.

## Investment Banking & Capital Markets

The Investment Banking & Capital Markets division offers a broad range of investment banking services to corporations, financial institutions, financial sponsors and ultra-high-net-worth individuals and sovereign clients. Our range of products and services includes advisory services related to mergers and acquisitions, divestitures, takeover defense mandates, business restructurings and spin-offs. The division also engages in debt and equity underwriting of public securities offerings and private placements.

## International Wealth Management

The International Wealth Management division through its Private Banking business offers comprehensive advisory services and tailored investment and financing solutions to wealthy private clients and external asset managers in Europe, the Middle East, Africa and Latin America, utilizing comprehensive access to the broad spectrum of Credit Suisse's global resources and capabilities as well as a wide range of proprietary and third-party products and services. Our Asset Management business offers investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals.

## Global Markets

The Global Markets division offers a broad range of financial products and services to client-driven businesses and also supports Credit Suisse's global wealth management businesses and their clients. Our suite of products and services includes global securities sales, trading and execution, prime brokerage and comprehensive investment research. Our clients include financial institutions, corporations, governments, institutional investors, such as pension funds and hedge funds, and private individuals around the world.

## Strategic Resolution Unit

The Strategic Resolution Unit was created to facilitate the immediate right-sizing of our business divisions from a capital perspective and includes remaining portfolios from former non-strategic units plus transfers of additional exposures from the business divisions. The unit's primary focus is on facilitating the rapid wind-down of capital usage and costs to reduce the negative impact on the Group's performance. Repositioned as a separate division, this provides clearer accountability, governance and reporting.

# Operating environment

Global economic growth appeared to remain robust in 3Q17, while inflation was low. Global equity markets ended the quarter higher, with European bank stocks in particular performing well, and volatility was low. Major government bond yields were stable and the US dollar depreciated against most major currencies. Commodities performed strongly.

## ECONOMIC ENVIRONMENT

The US economy overall was robust during 3Q17, with consumer and business confidence measures continuing at the relatively high levels seen during the previous quarter. The devastating hurricane season caused some economic disruptions that may result in somewhat slower gross domestic product growth for 3Q17 compared to 2Q17. Core inflation showed some signs of stabilization during the quarter after the declines earlier in the year. In the Euro-zone, business sentiment improved, suggesting that the robust growth rates of past quarters are sustainable. Among emerging markets, Chinese data may point to a slowdown in growth activity, while both Brazil and Russia continued their recoveries.

The US Federal Reserve (Fed) announced at its September meeting that it will start allowing its balance sheet to slowly shrink beginning in October 2017. The European Central Bank (ECB) left policy rates unchanged and in October announced that with respect to its asset purchase program it intends to decrease monthly purchases to EUR 30 billion from the beginning of 2018 until the end of September 2018 and may continue such purchases beyond this period if necessary. The Swiss National Bank (SNB) softened its language on the valuation of the Swiss franc, while the Bank of England (BoE) hinted at a rate hike in the coming months. Among major emerging markets, policy rates were lowered in Russia, Brazil and India during the quarter.

During 3Q17, global equities showed further positive momentum (refer to the charts under "Equity markets"), due to positive revisions to earnings estimates. Among developed markets, US and European equities slightly outperformed global equity markets

while Australian and UK equity markets underperformed. Emerging market equities continued to outperform developed markets as they benefited from the US dollar weakening. Oil and commodity exporting emerging markets such as Russia and Brazil outperformed due to the recovery in commodity prices in general, and oil prices in particular. Among sectors, materials, energy and IT were the top performers while consumer staples was the worst underperformer and the only sector posting a negative performance in 3Q17. Equity market volatility, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), reached its highest year-to-date level in August, but ended the quarter at a low level. The Credit Suisse Hedge Fund Index increased 1.8% in 3Q17.

In fixed income, US dollar and euro long-dated government bond yields ended 3Q17 broadly unchanged compared to 2Q17. With credit spreads drifting lower, bond index returns were mostly positive with high yield bonds outperforming the general market. In US dollar rates, the yield curve marginally flattened (i.e., the 10-year vs. 2-year yield on US treasuries) on the expectation of a continued subdued inflation environment. In euro rates, the German Bund curve steepened slightly, reflecting higher inflation expectations and a potential ECB tapering of its quantitative easing program. In credit markets, corporate bond spreads tightened, supported by loose financing conditions and a general positive economic backdrop. Emerging market sovereign bond spreads also narrowed reflecting the continued improved economic environment.

## Yield curves

Major government bond yields remained broadly unchanged.

Source: Datastream, Credit Suisse

## Equity markets

Global equities ended the quarter higher. Once again European bank stocks outperformed global stocks in general. Volatility remained low.

### Performance region

### Volatility

%

Source: Datastream, Credit Suisse

Emerging market hard currency bonds outperformed global high-yield bonds. In US dollar terms, emerging market local currency bonds performed even better due to strong currency gains, despite lower returns towards the end of 3Q17 as the US dollar regained some strength in September.

The US dollar depreciated against most major currencies in 3Q17 as weaker-than-anticipated US inflation weighed on interest rate expectations. The euro as well as Norwegian and Swedish krona were among the strongest currencies, benefitting from strong European economic growth. The British pound also appreciated. The Swiss franc was among the weakest currencies, depreciating both against the euro and US dollar, partly due to the reversal of safe-haven flows of capital, reflecting reduced economic and political risks in the Eurozone. In emerging markets, the South African rand was among the weakest currencies while the Brazilian real was one of the strongest currencies.

The Credit Suisse Commodities Benchmark more than reversed the losses suffered in 2Q17, gaining 7.9% in 3Q17. Energy was the strongest sector followed by base metals, which benefited from improved Chinese industrial activity. Precious metals lost some of their initial gains later in the quarter, but ended the quarter 3.9% higher compared to 2Q17. Agricultural prices continued to underperform amid favorable crop conditions through the summer.

## Credit spreads

Cash credit spreads slightly tightened. Derivative credit spreads remained relatively stable in 3Q17.

<sup>2</sup> Dealogic.

<sup>3</sup> 9M17 vs 9M16.

**SECTOR ENVIRONMENT**

European bank stocks generally outperformed global stocks in 3Q17 and ended the quarter almost 5% higher. North American bank stocks also posted positive returns, slightly outperforming the global stock market (refer to the charts under “Equity markets”).

In private banking, market conditions remained challenging in light of political and economic uncertainty and the persistence of the low interest rate environment. The sector continues to face significant structural pressure as it adapts to industry-specific regulatory changes and tax regularization initiatives. In 3Q17, the industry experienced supportive equity markets, maintained a long-term fundamental growth trend and saw the continued pursuit of new opportunities and efficiencies arising from digital technology.

In investment banking, equity trading volumes decreased globally and in Europe compared to 2Q17. Compared to 3Q16, equity

trading volumes increased globally and in Europe. Announced mergers and acquisitions (M&A) increased globally compared to 2Q17 and compared to 3Q16. In Europe, announced M&A decreased compared to 2Q17 and increased compared to 3Q16. Completed M&A decreased globally and in Europe compared to 2Q17 and 3Q16. Global equity underwriting volumes were lower compared to 2Q17 and compared to 3Q16. European equity underwriting volumes were lower compared to 2Q17, but significantly higher compared to 3Q16. Global debt underwriting volumes increased compared to 2Q17 and decreased compared to 3Q16. European debt underwriting volumes were lower compared to 2Q17 and 3Q16. Compared to 2Q17 and 3Q16, total US fixed income trading volumes were lower, mainly driven by a decrease in treasury volumes.

# Credit Suisse

In 3Q17, we recorded net income attributable to shareholders of CHF 244 million. Diluted earnings per share were CHF 0.09 and return on equity attributable to shareholders was 2.2%. As of the end of 3Q17, our BIS CET1 ratio was 13.2% on a look-through basis.

<sup>1</sup> Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders as presented in our balance sheet. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

<sup>2</sup> Disclosed on a look-through basis.

## Credit Suisse reporting structure

Credit Suisse includes the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core Results do not include revenues and expenses from our Strategic Resolution Unit.

## RESULTS SUMMARY

In 3Q17, Credit Suisse reported net income attributable to shareholders of CHF 244 million compared to CHF 303 million in 2Q17 and CHF 41 million in 3Q16.

**Net revenues** of CHF 4,972 million decreased 4% compared to 2Q17, primarily reflecting lower net revenues in Global Markets and Swiss Universal Bank, partially offset by higher net revenues in the Corporate Center. The decrease in net revenues in Global Markets was primarily due to less favorable market conditions across its trading and underwriting businesses. The decrease in net revenues in Swiss Universal Bank was primarily driven by seasonally lower transaction-based revenues. The higher revenues in the Corporate Center reflected movements in treasury results, which also reflected the impact of a valuation methodology change.

Net revenues decreased 8% compared to 3Q16, primarily reflecting lower net revenues in Swiss Universal Bank and Global Markets and increased negative net revenues in the Strategic Resolution Unit, partially offset by increased net revenues in International Wealth Management. The decrease in net revenues in Swiss Universal Bank was mainly due to gains on the sale of real estate of CHF 346 million in 3Q16, partially offset by higher transaction-based revenues. Net revenues in Global Markets decreased compared to 3Q16 results, which had benefited from more favorable market conditions. The increase in the Strategic Resolution Unit's negative net revenues was primarily driven by a reduction in fee-based revenues as a result of accelerated business exits and higher exit losses related to the sale of legacy asset management positions, partially offset by lower overall funding costs. The increase in net revenues in International Wealth Management reflected higher revenues across all revenue categories.

**Provision for credit losses** of CHF 32 million primarily related to a net provision for credit losses of CHF 14 million in Swiss Universal Bank, CHF 12 million in Investment Banking & Capital Markets, CHF 6 million in Global Markets and CHF 5 million in Asia Pacific, partially offset by a release of provision for credit losses of CHF 8 million in the Strategic Resolution Unit.

**Total operating expenses** of CHF 4,540 million were stable compared to 2Q17, reflecting a 3% increase in general and administrative expenses and a 62% increase in restructuring expenses, offset by a 4% decrease in compensation and benefits. In 3Q17, we incurred CHF 112 million of restructuring expenses in connection with the implementation of our strategy, of which CHF 99 million were compensation and benefits-related expenses.

Total operating expenses decreased 11% compared to 3Q16, primarily reflecting an 18% decrease in general and administrative expenses, mainly relating to lower litigation provisions and professional fees, an 8% decrease in compensation and benefits and a 23% decrease in restructuring expenses.

**Income tax expense** of CHF 153 million recorded in 3Q17 mainly reflected the impact of the geographical mix of results and the impact from recognizing tax contingency accruals, partially offset by the impact of a re-assessment of a previously taken tax position relating to the deductibility of funding costs. Overall, net deferred tax assets decreased CHF 79 million to CHF 7,232 million, mainly driven by earnings, partially offset by a foreign exchange impact. Deferred tax assets on net operating losses decreased CHF 121 million to CHF 2,666 million during 3Q17. The Credit Suisse effective tax rate was 38.3% in 3Q17, compared to 47.4% in 2Q17.

► Refer to "Note 22 – Tax" in III – Condensed consolidated financial statements – unaudited for further information.

## CORE RESULTS

In 3Q17, Core Results net revenues of CHF 5,227 million decreased 5% compared to 2Q17, primarily reflecting lower net revenues in Global Markets and Swiss Universal Bank, partially offset by higher net revenues in the Corporate Center. Provision for credit losses was CHF 40 million, primarily related to a net provision for credit losses of CHF 14 million in Swiss Universal Bank, CHF 12 million in Investment Banking & Capital Markets, CHF 6 million in Global Markets and CHF 5 million in Asia Pacific. Total operating expenses of CHF 4,209 million decreased slightly compared to 2Q17, mainly reflecting a 3% decrease in compensation and

benefits, partially offset by an increase in restructuring expenses. Compared to 2Q17, restructuring expenses of CHF 91 million increased 57%, primarily in Swiss Universal Bank and International Wealth Management.

Core Results net revenues decreased 6% compared to 3Q16, primarily reflecting lower net revenues in Swiss Universal Bank and Global Markets, partially offset by an increase in International Wealth Management. Total operating expenses decreased 5% compared to 3Q16, primarily reflecting a 7% decrease in compensation and benefits, a 3% decrease in general and administrative expenses and a 27% decrease in restructuring expenses.

## Reconciliation of adjusted results

Adjusted results referred to in this report are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

## EMPLOYEES AND OTHER HEADCOUNT

There were 46,720 Group employees as of the end of 3Q17, an increase of 490 compared to 2Q17, primarily reflecting seasonal graduate hiring as well a transfer of contractors to employees, primarily in International Wealth Management, Global Markets and Investment Banking & Capital Markets. The number of outsourced roles, contractors and consultants decreased by 80 compared to 2Q17.

## REGULATORY CAPITAL

As of the end of 3Q17, our Bank for International Settlements (BIS) common equity tier 1 (CET1) ratio was 13.2% and our risk-weighted assets (RWA) were CHF 265.0 billion, both on a look-through basis.

Effective July 1, 2017, the Swiss Financial Market Supervisory Authority FINMA (FINMA) has imposed an add-on to our risk-weighted assets relating to operational risk, primarily in respect of our residential mortgage-backed securities (RMBS) settlements. The add-on was CHF 5.2 billion in 3Q17, primarily in respect of the settlement with the US Department of Justice in January 2017 regarding our legacy RMBS business. Separately, Credit Suisse has approached FINMA with a request to review the appropriateness of the level of the operational risk RWA in the Strategic Resolution Unit given the progress in reducing the size of the division over the last seven quarters, with the aim of aligning reductions to the accelerated closure of the Strategic Resolution Unit by the end of 2018. This is still under discussion with FINMA.

As a consequence of the RMBS settlements with the National Credit Union Administration Board in May 2017 and with Massachusetts Mutual Life Insurance Company in September 2017, additional FINMA-imposed add-ons to our risk-weighted assets of CHF 3.2 billion and CHF 0.6 billion, respectively, are expected to be recognized in 4Q17.

► Refer to "Capital management" in II – Treasury, risk, balance sheet and off-balance sheet for further information.

## INFORMATION AND DEVELOPMENTS

### Format of presentation

In managing our business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, specific individual revenue categories in isolation may not be indicative of performance.

Certain reclassifications have been made to prior periods to conform to the current presentation.

### International Trading Solutions

Effective July 1, 2017, the Global Markets division entered into an agreement with Swiss Universal Bank and International Wealth Management whereby it provides centralized trading and sales services to private and institutional clients across the three divisions. These services are now managed as a single business within the Global Markets division, referred to as International Trading Solutions (ITS). ITS is expected to provide aligned market strategies, significant cost synergies and enhanced client focus.

### Return on regulatory capital

Credit Suisse measures firm-wide returns against total shareholders' equity and tangible shareholders' equity. In addition, it also measures the efficiency of the firm and its divisions with regard to the usage of capital as determined by the minimum requirements set by regulators. This regulatory capital is calculated as the worst of 10% of risk-weighted assets and 3.5% of the leverage exposure. Return on regulatory capital is calculated using income/ (loss) after tax and assumes a tax rate of 30% and capital allocated based on the worst of 10% of average risk-weighted assets and 3.5% of average leverage exposure. These percentages are used in the calculation in order to reflect the 2019 fully phased in Swiss regulatory minimum requirements for Basel III CET1 capital and leverage ratio. For Global Markets and Investment Banking & Capital Markets, return on regulatory capital is based on US dollar denominated numbers.

End of / in 3Q17 (CHF billion, except where indicated)

Shareholders' equity		43.9
Return on equity	2.2%	
Tangible shareholders' equity		38.9
Return on tangible shareholders' equity	2.5%	5.0
Regulatory capital		31.8
Return on regulatory capital	3.5%	7.1

**Fair valuations**

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

► Refer to "Note 1 – Summary of significant accounting policies" and "Note 28 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 3Q17, 39% and 25% of our total assets and total liabilities, respectively, were measured at fair value.

The majority of our level 3 assets are recorded in our investment banking businesses. As of the end of 3Q17, total assets at fair value recorded as level 3 of CHF 17.6 billion were stable compared to the end of 2Q17, primarily reflecting net settlements, mainly in loans and loans held-for-sale, offset by net purchases, mainly in trading assets, and a foreign exchange translation impact, mainly in trading assets, loans held-for-sale and loans.

As of the end of 3Q17, our level 3 assets comprised 2% of total assets and 6% of total assets measured at fair value, unchanged from 2Q17.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition; however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

**EVOLUTION OF LEGAL ENTITY STRUCTURE**

The global service company initiative has continued to make progress in 3Q17 in evolving the legal entity structure of the bank and ensuring continued provision of critical services for the Group in case of a resolution event. A branch of Credit Suisse Services AG has been registered in Singapore as Credit Suisse Services AG, Singapore Branch, which is expected to become operational in 2018.

**REGULATORY DEVELOPMENTS AND PROPOSALS**

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

In September 2017, the Fed and the Federal Deposit Insurance Corporation each issued final rules that substantially implement their respective proposed rules designed to improve the resolvability of US headquartered global systemically important banks (G-SIBs) and the US operations of non-US G-SIBs, such as our US operations. Covered "qualified financial contracts" must be conformed to the rules' requirements starting January 1, 2019, with full compliance by January 1, 2020. The Office of the Comptroller of the Currency is expected to issue parallel final rules as well.

► Refer to "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2016 for further information and "Regulatory framework" and "Regulatory developments and proposals" in II – Treasury, risk, balance sheet and off-balance sheet – Liquidity and funding management and Capital management, respectively, for further information.

# Swiss Universal Bank

In 3Q17, we reported income before taxes of CHF 426 million and net revenues of CHF 1,319 million. Income before taxes was 15% lower compared to 2Q17 and 44% lower compared to 3Q16, which included significant gains on the sale of real estate.

## RESULTS SUMMARY

### 3Q17 results

In 3Q17, we reported income before taxes of CHF 426 million and net revenues of CHF 1,319 million. Compared to 2Q17, net revenues were 6% lower, primarily driven by seasonally lower transaction-based revenues. Provision for credit losses was CHF 14 million compared to CHF 36 million in 2Q17. Total operating expenses were stable compared to 2Q17, primarily reflecting higher restructuring expenses and general and administrative expenses, offset by lower commission expenses.

Compared to 3Q16, net revenues were 21% lower, mainly due to gains on the sale of real estate of CHF 346 million in 3Q16, partially offset by higher transaction-based revenues. Provision for credit losses was CHF 14 million compared to CHF 30 million in 3Q16. Total operating expenses were stable compared to 3Q16,

reflecting higher general and administrative expenses, offset by slightly lower compensation and benefits and lower restructuring expenses.

Adjusted income before taxes of CHF 448 million was 11% lower and 4% higher compared to 2Q17 and 3Q16, respectively.

### Capital and leverage metrics

As of the end of 3Q17, we reported risk-weighted assets of CHF 64.5 billion, stable compared to the end of 2Q17. An increase from methodology and policy changes reflecting the phase-in of the Swiss mortgage multipliers was offset by favorable interest rate movements on our derivatives portfolio. Leverage exposure was CHF 256.2 billion, reflecting a slight decrease of CHF 4.3 billion compared to the end of 2Q17, driven by lower high-quality liquid assets (HQLA).

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction-based income. Other revenues include fair value gains/(losses) on synthetic securitized loan portfolios and other gains and losses.

## PRIVATE CLIENTS

## RESULTS

Income before taxes of CHF 206 million was 7% lower compared to 2Q17, primarily due to slightly higher total operating expenses with stable net revenues. Compared to 3Q16, income before taxes was significantly lower, primarily reflecting the gains on the sale of real estate of CHF 346 million in 3Q16. Adjusted income before taxes of CHF 217 million was slightly lower compared to 2Q17 and increased 11% compared to 3Q16.

## Net revenues

Compared to 2Q17, net revenues of CHF 727 million were stable with lower transaction-based revenues, offset by slightly higher net interest income. Transaction-based revenues of CHF 101 million were 18% lower, primarily due to a gain from the sale of an investment in 2Q17, lower revenues from trading services and lower equity participations income, which included a regular dividend from our ownership interest in SIX Group AG in 2Q17, partially offset by higher corporate advisory fees. Net interest income of CHF 421 million was slightly higher with higher deposit margins on slightly higher average deposit volumes and stable loan margins on

stable average loan volumes. Recurring commissions and fees of CHF 205 million were stable.

Compared to 3Q16, net revenues were 31% lower due to the gains on the sale of real estate of CHF 346 million in 3Q16 reflected in other revenues, partially offset by higher transaction-based revenues and slightly higher net interest income. Transaction-based revenues were 13% higher, mainly reflecting increased client activity. Net interest income was slightly higher with increased deposit margins on higher average deposit volumes and stable loan margins on slightly higher average loan volumes. Recurring commissions and fees were stable.

## Provision for credit losses

The Private Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities and, to a lesser extent, consumer finance loans.

In 3Q17, Private Clients recorded provision for credit losses of CHF 9 million compared to CHF 11 million in 2Q17 and CHF 12 million in 3Q16. The provisions were primarily related to our consumer finance business.

<sup>2</sup> Income before taxes divided by average assets under management.

### Total operating expenses

Compared to 2Q17, total operating expenses of CHF 512 million were slightly higher, primarily reflecting higher restructuring and general and administrative expenses, partially offset by lower commission expenses. General and administrative expenses of CHF 222 million increased 4%, primarily reflecting higher allocated corporate function costs and higher advertising and marketing expenses, partially offset by lower professional services fees. Compensation and benefits of CHF 252 million were stable. Adjusted total operating expenses of CHF 501 million were stable compared to 2Q17.

Compared to 3Q16, total operating expenses were stable, reflecting higher general and administrative expenses and increased commission expenses, offset by lower compensation and benefits and lower restructuring expenses. General and administrative expenses were 12% higher, primarily reflecting higher allocated corporate function costs. Compensation and benefits were 9% lower, primarily reflecting lower allocated corporate function costs and lower salary expenses. Adjusted total operating expenses were stable compared to 3Q16.

### MARGINS

#### Gross margin

Our gross margin was 142 basis points in 3Q17, four basis points lower compared to 2Q17, mainly driven by 1.4% higher average assets under management. Compared to 3Q16, our gross margin was 78 basis points lower, mainly reflecting the gains on the sale of real estate in 3Q16 on 6.7% higher average assets under management. On the basis of adjusted net revenues, our gross margin was 142 basis points in 3Q17, four basis points lower compared to 2Q17 and six basis points lower compared to 3Q16.

► Refer to "Assets under management" for further information.

#### Net margin

Our net margin was 40 basis points in 3Q17, four basis points lower compared to 2Q17, mainly reflecting higher restructuring and general and administrative expenses on 1.4% higher average assets under management. Compared to 3Q16, our net margin was 70 basis points lower, primarily due to the gains on the sale of real estate in 3Q16 on 6.7% higher average assets under management. On the basis of adjusted income before taxes, our net margin was 43 basis points in 3Q17, one basis point lower compared to 2Q17 and two basis points higher compared to 3Q16.

**ASSETS UNDER MANAGEMENT**

As of the end of 3Q17, assets under management of CHF 206.1 billion were CHF 4.6 billion higher compared to the end of 2Q17,

mainly driven by favorable market and foreign exchange-related movements and net new assets of CHF 1.0 billion.

**CORPORATE & INSTITUTIONAL CLIENTS****RESULTS**

Income before taxes of CHF 220 million decreased 21% compared to 2Q17 and 5% compared to 3Q16, primarily due to lower net revenues and stable total operating expenses, partially offset by lower provision for credit losses in 3Q17. Adjusted income before taxes of CHF 231 million decreased 18% compared to 2Q17 and was slightly lower compared to 3Q16.

**Net revenues**

Compared to 2Q17, net revenues of CHF 592 million were 12% lower with decreased revenues across all revenue categories. Transaction-based revenues of CHF 161 million were 22% lower,

mainly due to lower revenues from trading services, lower revenues from our Swiss investment banking business, our profit share on the sale of an investment and a regular dividend from SIX Group in 2Q17. Other revenues decreased CHF 16 million primarily due to gains from credit hedges in 2Q17. Recurring commissions and fees of CHF 149 million were 7% lower, reflecting lower discretionary mandate management fees, lower investment product management fees and lower security account and custody services fees, partially offset by higher wealth structuring solution fees. Net interest income of CHF 303 million was slightly lower with stable loan margins on stable average loan volumes and higher deposit margins on stable average deposit volumes.

Compared to 3Q16, net revenues were 4% lower, with slightly lower net interest income, decreased other revenues and lower recurring commissions and fees. Net interest income decreased slightly, driven by lower deposit margins on higher average deposit volumes and stable loan margins on stable average loan volumes. Other revenues decreased CHF 8 million primarily due to higher

fair value losses on synthetic securitized loan portfolios. Recurring commissions and fees decreased 4%, driven by lower discretionary mandate management fees, partially offset by higher investment product management fees. Transaction-based revenues were stable.

### Provision for credit losses

The Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by real estate, securities and other financial collateral.

In 3Q17, Corporate & Institutional Clients recorded provision for credit losses of CHF 5 million compared to CHF 25 million in 2Q17 and CHF 18 million in 3Q16. The decrease compared to 2Q17 and 3Q16 reflected both lower new provisions and higher releases of provision for credit losses relating to several individual cases.

### Total operating expenses

Compared to 2Q17, total operating expenses of CHF 367 million were stable, with higher restructuring expenses and higher general and administrative expenses, offset by lower commission expenses. General and administrative expenses of CHF 118 million increased 4%, mainly reflecting higher litigation provisions. Compensation and benefits of CHF 210 million were stable. Adjusted total operating expenses of CHF 356 million decreased slightly compared to 2Q17.

Compared to 3Q16, total operating expenses were stable, with higher compensation and benefits, offset by decreased commission expenses and slightly lower general and administrative expenses. Compensation and benefits increased 7% mainly due to higher allocated corporate function costs. General and administrative expenses decreased slightly, primarily due to lower allocated corporate function costs and lower professional services fees. Adjusted total operating expenses were stable compared to 3Q16.

### ASSETS UNDER MANAGEMENT

As of the end of 3Q17, assets under management of CHF 346.7 billion were CHF 5.8 billion lower compared to the end of 2Q17, mainly driven by net asset outflows of CHF 13.7 billion primarily due to redemptions of CHF 13.3 billion from a single public sector mandate.

# International Wealth Management

In 3Q17, we reported income before taxes of CHF 355 million and net revenues of CHF 1,262 million. Income before taxes decreased slightly compared to 2Q17 and increased 45% compared to 3Q16.

## RESULTS SUMMARY

### 3Q17 results

In 3Q17, we reported income before taxes of CHF 355 million and net revenues of CHF 1,262 million. Compared to 2Q17, net revenues were stable, with lower transaction- and performance-based revenues that included the impact of seasonally lower client activity in Private Banking offset by higher revenues in Asset Management. Provision for credit losses was CHF 3 million compared to CHF 8 million in 2Q17. Total operating expenses were stable compared to 2Q17, mainly driven by higher general and administrative expenses, offset by slightly lower compensation and benefits.

Compared to 3Q16, net revenues increased 17% reflecting higher revenues across all revenue categories. Provision for credit

losses was CHF 3 million compared to zero in 3Q16. Total operating expenses were 8% higher, mainly driven by higher compensation and benefits and higher general and administrative expenses.

Adjusted income before taxes of CHF 382 million was stable compared to 2Q17 and increased 59% compared to 3Q16.

### Capital and leverage metrics

As of the end of 3Q17, we reported risk-weighted assets of CHF 37.2 billion, slightly higher compared to the end of 2Q17, primarily driven by foreign exchange movements and movements in risk levels. Leverage exposure of CHF 93.5 billion was stable compared to the end of 2Q17.

## PRIVATE BANKING

### RESULTS

Income before taxes of CHF 252 million decreased 15% compared to 2Q17 mainly reflecting lower net revenues. Compared to 3Q16, income before taxes increased 29%, reflecting higher net revenues, partially offset by higher total operating expenses. Adjusted income before taxes of CHF 272 million decreased 11% compared to 2Q17 and increased 43% compared to 3Q16.

#### Net revenues

Compared to 2Q17, net revenues of CHF 870 million were 6% lower, mainly driven by lower transaction- and performance-based revenues, partially offset by slightly higher net interest income. Transaction- and performance-based revenues of CHF 203 million decreased 23%, mainly driven by lower revenues from trading services, lower brokerage and product issuing fees and lower equity participations income as 2Q17 included a regular dividend from SIX Group. Net interest income of CHF 367 million increased

slightly with slightly higher loan margins on stable average loan volumes and slightly lower deposit margins on slightly higher average deposit volumes. Recurring commissions and fees of CHF 300 million were stable.

Compared to 3Q16, net revenues increased 10%, with higher net interest income, higher recurring commissions and fees and slightly higher transaction- and performance-based revenues. Net interest income increased 13%, with higher loan and deposit margins on higher average loan and deposit volumes. Recurring commissions and fees increased 12%, mainly driven by higher investment product management fees, including the impact of higher average assets under management. Transaction- and performance-based revenues increased slightly, mainly driven by higher brokerage and product issuing fees and higher corporate advisory fees related to integrated solutions, partially offset by lower revenues from trading services.

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction- and performance-based income.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

**Provision for credit losses**

In 3Q17, provision for credit losses was CHF 3 million, compared to CHF 8 million in 2Q17 and to zero in 3Q16.

**Total operating expenses**

Compared to 2Q17, total operating expenses of CHF 615 million were stable, reflecting slightly lower compensation and benefits and lower commission expenses, offset by higher restructuring expenses and slightly higher general and administrative expenses. Compensation and benefits of CHF 375 million decreased slightly, mainly driven by lower deferred compensation expenses from prior-year awards and lower allocated corporate function costs. General and administrative expenses of CHF 187 million increased slightly, driven by higher allocated corporate function costs and

higher litigation provisions, partially offset by lower contractor services fees and lower professional services fees. Adjusted total operating expenses of CHF 595 million were slightly lower compared to 2Q17.

Compared to 3Q16, total operating expenses increased 4%, driven by higher general and administrative expenses, slightly higher compensation and benefits and higher commission expenses, partially offset by lower restructuring expenses. General and administrative expenses were 8% higher, mainly driven by litigation provisions in 3Q17, compared to releases in 3Q16, partially offset by lower professional services fees. Compensation and benefits increased slightly, mainly due to higher allocated corporate function costs, partially offset by lower pension expenses. Adjusted total operating expenses were stable compared to 3Q16.

## MARGINS

### Gross margin

Our gross margin was 101 basis points in 3Q17, nine basis points lower compared to 2Q17, mainly reflecting lower transaction- and performance-based revenues and 2.5% higher average assets under management. Our gross margin was three basis points lower compared to 3Q16, reflecting a 13.8% increase in average assets under management, partially offset by higher net interest income and higher recurring commissions and fees.

► Refer to "Assets under management" for further information.

### Net margin

Our net margin was 29 basis points in 3Q17, six basis points lower compared to 2Q17, mainly reflecting lower net revenues and the

2.5% higher average assets under management. Our net margin was three basis points higher compared to 3Q16, reflecting higher net revenues, partially offset by the 13.8% increase in average assets under management and higher total operating expenses. On the basis of adjusted income before taxes, our net margin was 31 basis points in 3Q17, five basis points lower compared to 2Q17 and six basis points higher compared to 3Q16.

## ASSETS UNDER MANAGEMENT

As of the end of 3Q17, assets under management of CHF 355.3 billion were CHF 18.9 billion higher compared to the end of 2Q17, reflecting favorable foreign exchange-related and market movements and net new assets. Net new assets of CHF 3.6 billion reflected solid inflows from emerging markets and Europe.

Management fees include fees on assets under management, asset administration revenues and transaction fees related to the acquisition and disposal of investments in the funds being managed. Performance revenues relate to the performance or return of the funds being managed and includes investment-related gains and losses from proprietary funds. Placement revenues arise from our third-party private equity fundraising activities and secondary private equity market advisory services. Investment and partnership income includes equity participation income from seed capital returns and from minority investments in third-party asset managers, income from strategic partnerships and distribution agreements, and other revenues.

### RESULTS

Income before taxes of CHF 103 million increased 51% compared to 2Q17, mainly reflecting higher net revenues, partially offset by higher total operating expenses. Income before taxes increased 110% compared to 3Q16, driven by significantly higher net revenues, partially offset by higher total operating expenses. Adjusted income before taxes of CHF 110 million increased 55% and 116% compared to 2Q17 and 3Q16, respectively.

#### Net revenues

Compared to 2Q17, net revenues of CHF 392 million were 16% higher, reflecting higher performance and placement revenues, higher investment and partnership income and higher management fees. Performance and placement revenues increased CHF 31 million to CHF 63 million, mainly due to higher investment-related gains and higher performance fees. Investment and partnership income increased CHF 15 million to CHF 51 million mainly due to an investment gain from Asset Management Finance LLC in 3Q17. Management fees of CHF 278 million increased slightly, reflecting slightly higher average assets under management.

Compared to 3Q16, net revenues increased 34%, reflecting higher management fees, higher performance and placement revenues and higher investment and partnership income. Management fees increased 28%, reflecting higher average assets under management. Performance and placement revenues increased CHF 22 million, mainly driven by higher investment-related gains. Investment and partnership income increased CHF 18 million, mainly reflecting investment-related gains.

#### Total operating expenses

Compared to 2Q17, total operating expenses of CHF 289 million increased 7%, mainly driven by higher general and administrative expenses and higher restructuring expenses. General and administrative expenses of CHF 98 million increased 18%, primarily reflecting higher investments in trading systems and higher professional services fees. Compensation and benefits of CHF 168 million were stable. Adjusted total operating expenses of CHF 282 million increased 6% compared to 2Q17.

Compared to 3Q16, total operating expenses were 19% higher, primarily reflecting higher compensation and benefits and higher general and administrative expenses. Compensation and benefits were 17% higher, mainly driven by higher salary expenses, higher discretionary compensation expenses and higher deferred compensation expenses from prior-year awards. General and administrative expenses were 18% higher, mainly reflecting higher professional services fees and higher allocated corporate function costs. Adjusted total operating expenses were 17% higher compared to 3Q16.

## ASSETS UNDER MANAGEMENT

As of the end of 3Q17, assets under management of CHF 376.3 billion were CHF 10.3 billion higher compared to the end of 2Q17, reflecting favorable foreign exchange-related and market movements and net new assets of CHF 1.1 billion, primarily reflecting inflows in alternative investments, partially offset by outflows from emerging market joint ventures.

# Asia Pacific

In 3Q17, we reported income before taxes of CHF 218 million and net revenues of CHF 890 million. Income before taxes increased 16% compared to 2Q17 and 43% compared to 3Q16.

## RESULTS SUMMARY

### 3Q17 results

In 3Q17, we reported income before taxes of CHF 218 million and net revenues of CHF 890 million. Compared to 2Q17, net revenues increased 5%, driven by our Markets business reflecting higher equity sales and trading revenues, partially offset by lower fixed income sales and trading revenues. We recorded a provision for credit losses of CHF 5 million in 3Q17, compared to a release of provision for credit losses of CHF 1 million in 2Q17. Total operating expenses of CHF 667 million were stable, primarily due to higher compensation and benefits, offset by lower general and administrative expenses.

Compared to 3Q16, net revenues decreased slightly, driven by lower revenues in our Markets business across fixed income and equity sales and trading revenues, partially offset by higher revenues in our Wealth Management & Connected business, reflecting higher Private Banking revenues and higher advisory, underwriting

and financing revenues. Total operating expenses decreased 9%, primarily from lower general and administrative expenses, lower compensation and benefits and a decrease in restructuring expenses in our Markets business.

Adjusted income before taxes of CHF 228 million increased 15% compared to 2Q17 and 30% compared to 3Q16.

### Capital and leverage metrics

As of the end of 3Q17, we reported risk-weighted assets of CHF 31.2 billion, a decrease of CHF 1.1 billion compared to the end of 2Q17, mainly reflecting the securitization of certain lending exposures in our Wealth Management & Connected business, partially offset by a foreign exchange impact. Leverage exposure was CHF 106.1 billion, reflecting an increase of CHF 4.5 billion compared to the end of 2Q17, mainly due to an increase in HQLA, higher lending in the Wealth Management & Connected business and the foreign exchange impact, partially offset by a decrease in inventory from the Markets business.

## WEALTH MANAGEMENT &amp; CONNECTED

## RESULTS

Income before taxes of CHF 173 million decreased 12% compared to 2Q17, reflecting lower net revenues, higher total operating expenses and higher provision for credit losses. Compared to 3Q16, income before taxes increased 82%, primarily from higher net revenues and lower provision for credit losses, partially offset by higher total operating expenses. Adjusted income before taxes of CHF 178 million decreased 10% compared to 2Q17 and increased 75% compared to 3Q16.

## Net revenues

Net revenues of CHF 548 million decreased slightly compared to 2Q17, mainly reflecting lower net interest income and lower advisory, underwriting and financing revenues, mostly offset by

increased transaction-based revenues and higher recurring commissions and fees. Net interest income decreased 11% to CHF 144 million, driven by lower treasury revenues and a negative impact from an accounting reclassification related to treasury revenues. Advisory, underwriting and financing revenues decreased 4% to CHF 148 million, primarily due to lower financing revenues, partially offset by higher fees from M&A transactions. Transaction-based revenues increased 7% to CHF 159 million, due to a positive impact from the accounting reclassification related to treasury revenues, partially offset mainly by lower fees from foreign exchange client business. Recurring commissions and fees increased slightly to CHF 97 million, primarily due to higher investment product management fees, partially offset by lower wealth structuring solutions fees.

<sup>1</sup> Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans.

<sup>2</sup> Net revenues divided by average assets under management.

<sup>3</sup> Income before taxes divided by average assets under management.

Compared to 3Q16, net revenues increased 14%, mainly driven by increased transaction-based revenues, higher advisory, underwriting and financing revenues and higher recurring commission and fees, partially offset by lower net interest income. Transaction-based revenues increased 54%, primarily reflecting higher brokerage and product issuing fees and a positive impact from the accounting reclassification. Advisory, underwriting and financing revenues increased 10%, mainly due to higher financing and debt underwriting revenues and higher fees from M&A transactions, partially offset by lower equity underwriting revenues. Recurring commissions and fees increased 15%, mainly due to higher investment product management fees. Net interest income decreased 9%, mainly due to lower treasury revenues and a negative impact from the accounting reclassification.

#### Provision for credit losses

The Wealth Management & Connected loan portfolio primarily comprises Private Banking lombard loans, mainly backed by listed securities, and secured and unsecured loans to corporates.

In 3Q17, Wealth Management & Connected recorded a provision for credit losses of CHF 5 million, compared to a release of provision for credit losses of CHF 1 million in 2Q17. In 3Q16, we recorded a provision for credit losses of CHF 34 million in relation to a small number of share-based loans in Hong Kong which were impaired due to their collateral values abruptly falling below their loan amounts.

#### Total operating expenses

Total operating expenses of CHF 370 million increased slightly compared to 2Q17, mainly reflecting higher compensation and benefits, partially offset by lower general and administrative expenses. Compensation and benefits increased slightly to CHF 250 million, primarily driven by higher discretionary compensation expenses. General and administrative expenses decreased 5% to CHF 98 million, mainly due to lower IT infrastructure expenses. Adjusted total operating expenses of CHF 365 million were stable compared to 2Q17.

Compared to 3Q16, total operating expenses increased 5%, mainly reflecting higher compensation and benefits, higher general and administrative expenses and higher commission expenses. Compensation and benefits increased 4%, primarily driven by higher discretionary compensation expenses, partially offset by lower salary expenses. General and administrative expenses increased 7%, mainly due to higher compliance support and risk management expenses. Adjusted total operating expenses increased 6% compared to 3Q16.

#### MARGINS

Margin calculations are aligned with the performance metrics of our Private Banking business and its related assets under management within the Wealth Management & Connected business.

#### Gross margin

Our Private Banking gross margin was 87 basis points in 3Q17, four basis points lower compared to 2Q17, mainly reflecting lower net interest income and a 3.4% increase in average assets under management. Compared to 3Q16, our gross margin was three basis points higher, mainly reflecting higher transaction-based revenues and higher recurring commissions and fees, partially offset by an 11.9% increase in average assets under management and lower net interest income.

► Refer to "Assets under management" for further information.

#### Net margin

Our Private Banking net margin was 30 basis points in 3Q17, three basis points lower compared to 2Q17, reflecting lower net revenues, higher provision for credit losses and a 3.4% increase in average assets under management. Compared to 3Q16, our net margin was sixteen basis points higher, mainly reflecting higher net revenues and lower provision for credit losses, partially offset by an 11.9% increase in average assets under management and higher total operating expenses.

#### ASSETS UNDER MANAGEMENT

Assets under management and net new assets relate to our Private Banking business within the Wealth Management & Connected business. As of the end of 3Q17, assets under management of CHF 190.0 billion were CHF 12.2 billion higher compared to the end of 2Q17, mainly reflecting net new assets of CHF 5.8 billion and favorable market and foreign exchange-related movements. Net new assets reflected inflows primarily from Greater China.

## MARKETS

## RESULTS

Income before taxes of CHF 45 million in 3Q17 compared to a loss before taxes of CHF 8 million in 2Q17. The related increase of CHF 53 million primarily reflected higher net revenues. Compared to 3Q16, income before taxes decreased 21%, primarily from lower net revenues, partially offset by lower total operating expenses. Adjusted income before taxes of CHF 50 million in 3Q17 compared to adjusted income before taxes of CHF 1 million and CHF 73 million in 2Q17 and 3Q16, respectively.

## Net revenues

Net revenues of CHF 342 million increased 18% compared to 2Q17, reflecting higher equity sales and trading revenues, offset by lower fixed income sales and trading revenues. Equity sales and trading revenues increased 39% to CHF 262 million, mainly due to

higher revenues from equity derivatives reflecting higher volatility in Asian markets and increased client activity. Fixed income sales and trading revenues decreased 21% to CHF 80 million, mainly due to lower revenues from emerging markets rates products.

Compared to 3Q16, net revenues decreased 22%, reflecting lower fixed income and equity sales and trading revenues. Fixed income sales and trading revenues decreased 40%, mainly driven by lower revenues from emerging markets rates products compared to a strong 3Q16. Developed markets rates products revenue in 3Q16 included a positive impact of CHF 33 million resulting from an increase in the funding value of certain structured deposits originated in Asia Pacific. Equity sales and trading revenues decreased 13%, mainly due to the transition of the systematic market making business to International Wealth Management that was completed in 1Q17 and lower revenues from prime services.

**Total operating expenses**

Total operating expenses of CHF 297 million were stable compared to 2Q17, mainly reflecting slightly higher compensation and benefits, offset by lower restructuring expenses. Compensation and benefits increased slightly to CHF 147 million, primarily driven by higher discretionary compensation expenses, partially offset by lower salary expenses. General and administrative expenses were stable at CHF 97 million. Adjusted total operating expenses of CHF 292 million were stable compared to 2Q17.

Compared to 3Q16, total operating expenses decreased 22%, reflecting lower expenses across all categories. General and administrative expenses decreased 27%, mainly due to lower allocated corporate function costs and lower professional services fees. Compensation and benefits decreased 15%, primarily driven by lower deferred compensation expenses from prior-year awards and lower salary expenses. Adjusted total operating expenses decreased 20% compared to 3Q16.

# Global Markets

In 3Q17, Global Markets reported income before taxes of CHF 71 million and net revenues of CHF 1,262 million. Net revenues decreased 17% compared to 2Q17, as a seasonal decline was exacerbated by persistently low volatility and decreased trading volumes which led to reduced client activity.

## RESULTS SUMMARY

### 3Q17 results

In 3Q17, we implemented a change in financial reporting to reflect an amended business structure consisting of equity sales and trading, fixed income sales and trading and underwriting. Prior periods have been reclassified to conform to the current presentation.

In 3Q17, we reported income before taxes of CHF 71 million and net revenues of CHF 1,262 million. Compared to 2Q17, net revenues decreased 17%, primarily due to less favorable market conditions across our trading and underwriting businesses. Net revenues decreased 7% compared to 3Q16 results, which had benefited from more favorable market conditions.

Total operating expenses of CHF 1,185 million decreased 5% compared to 2Q17, reflecting lower compensation and benefits and reduced restructuring costs, partially offset by higher

commission expense. Compared to 3Q16, total operating expenses decreased 7%, reflecting lower compensation and benefits and reduced restructuring costs, partially offset by higher commission expenses. Adjusted income before taxes was CHF 98 million in 3Q17, compared to adjusted income before taxes of CHF 289 million in 2Q17 and adjusted income before taxes of CHF 146 million in 3Q16.

### Capital and leverage metrics

As of the end of 3Q17, we reported risk-weighted assets of USD 57.9 billion, reflecting an increase of USD 4.3 billion compared to the end of 2Q17 mainly due to the expiration of a credit risk hedge. Leverage exposure was USD 291.0 billion, reflecting an increase of USD 2.2 billion compared to the end of 2Q17.

## RESULTS

## Fixed income sales and trading

In 3Q17, fixed income sales and trading revenues of CHF 698 million decreased 14% compared to 2Q17, primarily driven by lower securitized products revenues, particularly in non-agency trading compared to a strong 2Q17 performance. Global credit products revenues decreased significantly, driven by lower leveraged finance and investment grade trading revenues. Macro products revenues declined reflecting lower foreign exchange results partially offset by higher revenues in our rates business. In addition, emerging markets revenues increased reflecting improved Brazil trading and financing activity.

Fixed income sales and trading revenues decreased 9% compared to a strong 3Q16, due to persistently low levels of volatility, which led to reduced client activity. Macro products revenues declined significantly across our rates and foreign exchange businesses, which benefited from higher levels of volatility and increased client activity in 3Q16 following the UK referendum and US elections. Emerging markets revenues declined driven by lower

Brazil trading and financing activity compared to 3Q16, which included the positive impact of significant deal activity. In addition, global credit products revenues decreased due to lower leveraged finance and investment grade trading activity given tighter credit spreads. This was partially offset by continued strength in securitized products revenues due to significantly higher asset finance results.

## Equity sales and trading

In 3Q17, equity sales and trading revenues of CHF 383 million decreased 24% compared to 2Q17, reflecting a seasonal slow-down in client activity coupled with a difficult trading environment characterized by persistently low levels of volatility and reduced trading volumes. Prime services revenues declined compared to a seasonally higher 2Q17. Equity derivatives revenues decreased significantly due to continued low levels of volatility, which negatively impacted structured and flow derivatives. We also had slightly lower revenues in cash equities consistent with lower trading volumes across regions.

Compared to 3Q16, equity sales and trading revenues increased 10% amid the difficult trading environment. Prime services revenues increased, reflecting higher commissions in listed derivatives and higher client financing revenues. Equity derivatives revenues increased, albeit from subdued levels, reflecting improved flow derivatives results, partially offset by lower structured derivatives revenues. In addition, cash equities trading revenues increased reflecting improved secondary revenues in Latin America. This increase was partially offset by significantly lower systematic market making revenues, largely due to challenging operating conditions in that business and its transition to International Wealth Management in 1Q17.

**Underwriting**

In 3Q17, underwriting revenues of CHF 240 million decreased 4% compared to 2Q17, reflecting a slowdown in issuance activity. Equity underwriting revenues declined significantly, consistent with a slowdown in primary issuance volumes. This was partially offset by higher debt underwriting revenues, reflecting increased revenues across leveraged finance and investment grade.

Underwriting revenues decreased 15% compared to strong 3Q16 results, which benefited from significant client deals, particularly in debt underwriting. Debt underwriting revenues declined, due to lower investment grade revenues partially offset by higher leveraged finance revenues. In addition, we also had lower equity underwriting revenues.

**Provision for credit losses**

Global markets recorded a provision for credit losses of CHF 6 million, including increased provisions reflecting a methodology change for probable losses inherent in the portfolio relating to the period of time expected to identify defaults once they have occurred. This compares to a provision for credit losses of CHF 12 million in 2Q17 and a release of provision for credit losses of CHF 5 million in 3Q16.

**Total operating expenses**

In 3Q17, total operating expenses of CHF 1,185 million decreased 5% compared to 2Q17, reflecting lower compensation and benefits and reduced restructuring costs partially offset by higher commission expenses. The decrease in compensation and benefits reflected the lower results. During 3Q17, we incurred restructuring costs of CHF 27 million. General and administrative expenses were slightly lower, as the lower UK bank levy was partially offset by slightly higher allocated corporate function costs. Adjusted total operating expenses decreased 5%.

Compared to 3Q16, total operating expenses decreased 7%, reflecting lower compensation and benefits and restructuring costs, partially offset by higher commission expenses. The decrease in compensation and benefits reflected the lower results. General and administrative expenses decreased slightly, reflecting lower allocated corporate functions costs partially offset by higher professional services fees. Adjusted total operating expenses decreased 5%.

# Investment Banking & Capital Markets

In 3Q17, Investment Banking & Capital Markets reported income before taxes of CHF 35 million and net revenues of CHF 457 million. Net revenues decreased 2% compared to 3Q16.

## RESULTS SUMMARY

### 3Q17 results

In 3Q17, we reported income before taxes of CHF 35 million, a decrease of 55% compared to 2Q17. Net revenues of CHF 457 million decreased 11% compared to 2Q17, due to lower revenues from equity underwriting and debt underwriting, partially offset by higher revenues from advisory and other fees. Compared to 2Q17, revenues from equity underwriting decreased 38% and debt underwriting decreased 9%, while advisory and other fees increased 8%. Total operating expenses of CHF 410 million decreased 2%, driven by lower compensation and benefits and general and administrative expenses, partially offset by higher restructuring expenses.

Compared to 3Q16, our reported income before taxes decreased 10% in 3Q17, driven by 2% lower revenues and higher provision for credit losses, partially offset by lower operating

expenses. Debt underwriting revenues decreased 3%, equity underwriting revenues decreased 12%, while advisory and other fees increased 12%. Total operating expenses of CHF 410 million decreased 6% driven by lower compensation and benefits and lower general and administrative expenses.

### Capital and leverage metrics

As of the end of 3Q17, risk-weighted assets were USD 20.1 billion, an increase of USD 0.7 billion compared to the end of 2Q17. The increase was driven primarily by an increase in loan commitments. Leverage exposure was USD 44.2 billion, a decrease of USD 0.8 billion compared to the end of 2Q17, reflecting a shift in the mix of loan commitments towards more non-investment grade exposures.

## RESULTS

## Advisory and other fees

In 3Q17, revenues from advisory and other fees of CHF 180 million increased 8% compared to 2Q17, reflecting higher revenues from completed M&A transactions.

Compared to 3Q16, revenues increased 12%, despite an industry-wide decline in the overall M&A fee pool.

## Debt underwriting

In 3Q17, debt underwriting revenues of CHF 233 million decreased 9% compared to 2Q17, driven by lower leveraged finance revenues, partially offset by higher investment grade underwriting revenues.

Compared to 3Q16, revenues decreased 3%, driven by lower industry-wide leveraged finance activity and lower investment grade acquisition financing revenues compared to strong 3Q16 results.

## Equity underwriting

In 3Q17, revenues from equity underwriting of CHF 65 million decreased 38% compared to 2Q17, due to lower revenues from IPOs, rights offerings and follow-ons.

Compared to 3Q16, revenues decreased 12%, primarily driven by lower revenues from convertible bonds and follow-on offerings.

## Provision for credit losses

In 3Q17, we recorded a provision for credit losses of CHF 12 million, including increased provisions reflecting a methodology change for probable losses inherent in the portfolio relating to the period of time expected to identify defaults once they have occurred. This compares to a provision for credit losses of CHF 13 million in 2Q17. In 3Q16, we recorded a release of provision for credit losses of CHF 9 million, reflecting a continued stabilization in the energy sector.

### Total operating expenses

Total operating expenses of CHF 410 million decreased 2% compared to 2Q17, driven by lower compensation and benefits and general and administrative expenses, partially offset by higher restructuring expenses. Compensation and benefits of CHF 293 million decreased 3%, reflecting a lower discretionary compensation accrual and lower deferred compensation from prior year awards. General and administrative expenses of CHF 99 million decreased 5% compared to 2Q17.

Compared to 3Q16, total operating expenses decreased 6%, driven by a lower discretionary compensation accrual, partially offset by higher deferred compensation expenses.

### Global advisory and underwriting revenues

The Group's global advisory and underwriting business operates across multiple business divisions that work in close collaboration with each other to generate these revenues. In order to reflect the global performance and capabilities of this business and for enhanced comparability versus its peers, the following table aggregates total advisory and underwriting revenues for the Group into a single metric in US dollar terms before cross-divisional revenue sharing agreements.

			in	% change			in	% change

# Strategic Resolution Unit

In 3Q17, the Strategic Resolution Unit reported a loss before taxes of CHF 578 million and decreased its risk-weighted assets by USD 2.7 billion and its leverage exposure by USD 7.2 billion.

## RESULTS SUMMARY

### 3Q17 results

In 3Q17, we reported a loss before taxes of CHF 578 million compared to losses of CHF 563 million in 2Q17 and CHF 852 million in 3Q16. In 3Q17, we reported an adjusted loss before taxes of CHF 469 million, compared to adjusted losses of CHF 531 million in 2Q17 and CHF 513 million in 3Q16.

We reported negative net revenues of CHF 255 million in 3Q17, primarily driven by overall funding costs, exit losses related to the sale of legacy asset management positions and valuation adjustments, partially offset by revenues from our legacy cross-border and small markets businesses. Total operating expenses in 3Q17 were CHF 331 million, including CHF 216 million of general and administrative expenses, of which CHF 100 million were litigation provisions, and CHF 85 million of compensation and benefits. In 3Q17, we reported adjusted total operating expenses

of CHF 222 million, compared to CHF 244 million in 2Q17 and CHF 343 million in 3Q16.

### Capital and leverage metrics

As of the end of 3Q17, we reported risk-weighted assets of USD 37.0 billion, a decrease of USD 2.7 billion and USD 17.9 billion compared to the end of 2Q17 and 3Q16, respectively. In 3Q17, risk-weighted assets reduction was achieved through the sale of legacy asset management positions, sales and restructuring in the residual loan portfolio and continued risk reduction in the derivatives portfolio. Leverage exposure was USD 67.6 billion as of the end of 3Q17, reflecting a decrease of USD 7.2 billion and USD 51.1 billion compared to the end of 2Q17 and 3Q16, respectively. Leverage exposure reduction was achieved through various initiatives, including assets sales and reduction across the derivatives portfolio, including novations and restructurings.

## RESULTS

## Net revenues

We reported negative net revenues of CHF 255 million in 3Q17 compared to negative net revenues of CHF 274 million in 2Q17 and CHF 165 million in 3Q16. Compared to 2Q17, the improvement was primarily driven by a reduction in overall funding costs and lower negative valuation adjustments, partially offset by

higher exit losses related to the sale of legacy asset management positions.

Compared to 3Q16, the movement was primarily driven by a reduction in fee-based revenues as a result of accelerated business exits and higher exit losses related to the sale of legacy asset management positions. This movement was partially offset by lower overall funding costs.

**Provision for credit losses**

In 3Q17, there was a release of provision for credit losses of CHF 8 million compared to a provision for credit losses of CHF 13 million in 2Q17 and CHF 5 million in 3Q16. The improvement in 3Q17 was primarily related to improved economics of a single financing deal.

**Total operating expenses**

Total operating expenses of CHF 331 million increased CHF 55 million compared to 2Q17, primarily reflecting higher general and administrative expenses, including an increase in litigation provisions by CHF 72 million mainly in connection with

mortgage-related matters. Total operating expenses in 3Q17 included costs of CHF 40 million to meet requirements related to the settlements with US authorities regarding US cross-border matters. Adjusted total operating expenses decreased 9%.

Compared to 3Q16, total operating expenses decreased CHF 351 million, due to lower general and administrative expenses, including significantly lower litigation provisions mainly in connection with mortgage-related matters, and lower compensation and benefits as a result of various cost reduction initiatives, including the impact of the transfer of our US private banking business. Adjusted total operating expenses decreased 35%.

# Corporate Center

In 3Q17, Corporate Center recorded a loss before taxes of CHF 127 million compared to a loss of CHF 245 million in 2Q17 and a loss of CHF 207 million in 3Q16.

## 3Q17 results

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

In 3Q17, Corporate Center recorded a loss before taxes of CHF 127 million compared to a loss of CHF 245 million in 2Q17, primarily driven by movements in treasury results, and compared to a loss of CHF 207 million in 3Q16.

Treasury results include the impact of volatility in the valuations of certain central funding transactions such as structured notes issuances and swap transactions. In 3Q17, treasury results reflected revenues with respect to structured notes volatility of CHF 150 million, compared to CHF 58 million in 3Q16. The 3Q17 results included the positive impact of an enhancement to the valuation methodology relating to the instrument-specific credit risk on fair value option elected structured notes that were previously recorded in accumulated other comprehensive income and were transferred to net income during 3Q17. We are in the process of migrating our structured notes portfolio to a new target operating model that allows for a more granular and precise valuation of the individual notes. This migration became sufficiently advanced during 3Q17 with respect to the rates sub-portfolio to allow for

this change in estimate. Since 2Q17, treasury results also include additional interest charges from transfer pricing to align funding costs to assets held in the Corporate Center. Other revenues include required elimination adjustments associated with trading in own shares and, beginning in 3Q17, include the cost of certain hedging transactions executed in connection with the Group's risk-weighted assets.

Compensation and benefits mainly reflect fair value adjustments on certain deferred compensation plans not allocated to the segments and certain deferred compensation retention awards intended to support the restructuring of the Group relating to Global Markets and Investment Banking & Capital Markets, predominantly through the end of 2017, and to Asia Pacific predominantly through the end of 2018. General and administrative expenses primarily reflected costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements.

As announced in 2Q17, FINMA imposed an add-on to our risk-weighted assets relating to operational risk effective 3Q17. This add-on of CHF 5.2 billion was primarily in respect of our RMBS settlements. This increase was partially offset by CHF 2.7 billion movements in risk levels, primarily in credit risk, including the impact of the hedging transactions executed in connection with the Group's risk-weighted assets.

Corporate services and business support, including in finance, operations, human resources, legal, compliance, risk management and IT, are provided by corporate functions, and the related costs are allocated to the segments and the Corporate Center based on their requirements and other relevant measures.

# Assets under management

As of the end of 3Q17, assets under management were CHF 1,344.8 billion, with net asset outflows of CHF 1.8 billion in 3Q17.

## Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by the Asset Management business of International Wealth Management for other businesses are reported in each applicable business and eliminated at the Group level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic

participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

## Net new assets

Net new assets include individual cash payments, delivery of securities and cash flows resulting from loan increases or repayments.

Interest and dividend income credited to clients and commissions, interest and fees charged for banking services as well as changes in assets under management due to currency and market volatility are not taken into account when calculating net new assets, as such charges or market movements are not directly related to the Group's success in acquiring assets under management. Similarly structural effects mainly relate to asset inflows and outflows due to acquisition or divestiture, exit from businesses or markets or exits due to new regulatory requirements and are not taken into account when calculating net new assets. The Group reviews relevant policies regarding client assets on a regular basis.

### 3Q17 results

As of the end of 3Q17, assets under management of CHF 1,344.8 billion increased CHF 37.5 billion compared to the end of 2Q17. The increase was mainly driven by favorable market and foreign exchange-related movements, partially offset by net asset outflows of CHF 1.8 billion.

Net asset outflows of CHF 1.8 billion mainly reflected outflows of CHF 13.7 billion in the Corporate & Institutional Clients business of Swiss Universal Bank primarily due to redemptions of CHF 13.3 billion from a single public sector mandate, partially

offset by net new assets of CHF 5.8 billion in the Private Banking business of Asia Pacific, primarily reflecting inflows from Greater China and net new assets of CHF 3.6 billion in the Private Banking business of International Wealth Management, reflecting solid inflows from emerging markets and Europe.

# Liquidity and funding management

In 3Q17, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

## OVERVIEW

Securities for funding and capital purposes have historically been issued primarily by the Bank, our principal operating subsidiary and a US registrant. In response to regulatory reform, we have focused our issuance strategy on offering long-term debt securities at the Group level. Proceeds from issuances are lent to operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements and the former as desired by management to support business initiatives and liquidity needs.

Our internal liquidity risk management framework is subject to review and monitoring by the FINMA, other regulators and rating agencies.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on liquidity and funding management.

## REGULATORY FRAMEWORK

### Basel III liquidity framework

In 2010, the Basel Committee on Banking Supervision (BCBS) issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR). As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions and estimates. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown in this report.

The LCR, which is being phased in from January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have unencumbered high-quality liquid assets (HQLA) available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of HQLA in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% per year until January 1, 2019.

The NSFR establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's on- and off-balance sheet activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds.

The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and once implemented by national regulators, should always be at least 100%.

### Swiss liquidity requirements

In 2012, the Swiss Federal Council adopted a liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making, including with respect to the final Basel III LCR rules adopted in 2014. Under the Liquidity Ordinance, as amended, certain Swiss banks became subject to an initial 60% LCR requirement, with incremental increases by 10% per year until January 1, 2019. Systemically relevant banks like Credit Suisse became subject to an initial minimum LCR requirement of 100% beginning on January 1, 2015 and the associated disclosure requirements. Further, beginning in May 2015, FINMA required us to maintain a minimum LCR of 110% at all times.

In connection with the implementation of Basel III, regulatory LCR disclosures for the Group and certain subsidiaries are required. Further details on our LCR can be found on our website.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for additional information.

FINMA requires us to report the NSFR to FINMA on a monthly basis. The reporting instructions are generally aligned with the final BCBS NSFR requirements. Following an observation period that began in 2012, the NSFR will become a minimum standard in Switzerland on January 1, 2019, at which time banks will be required to comply with disclosure requirements prescribed by the BCBS and implemented by FINMA.

Our liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on the Basel III liquidity framework and Swiss liquidity requirements.

## LIQUIDITY RISK MANAGEMENT FRAMEWORK

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage

our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we expect to have sufficient liquidity to sustain operations for a period of time in excess of our minimum limit. This includes potential currency mismatches, which are not deemed to be a major risk but are monitored and subject to limits, particularly in the significant currencies of euro, Japanese yen, pound sterling, Swiss franc and US dollar.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on our approach to liquidity risk management, governance and contingency planning.

## LIQUIDITY METRICS

### Liquidity pool

Treasury manages a sizeable portfolio of liquid assets comprised of cash held at central banks and securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top-rated counterparties. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash held at central banks and highly rated government bonds and on short-term reverse repurchase agreements. These government bonds are eligible as collateral for liquidity facilities with various central banks including the SNB, the Fed, the ECB and the BoE. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities.

The liquidity pool may be used to meet the liquidity requirements of our operating companies.

As of the end of 3Q17, our liquidity pool managed by Treasury had an HQLA value of CHF 166.0 billion. The liquidity pool consisted of CHF 97.8 billion of cash held at major central banks, primarily the SNB, the Fed and the ECB, and CHF 68.2 billion market value of securities issued by governments and government agencies, primarily from the US, UK and France.

In addition to the liquidity portfolio managed by Treasury, there is also a portfolio of unencumbered liquid assets managed by various businesses, primarily in the Global Markets and Investment Banking & Capital Markets divisions. These assets generally include high-grade bonds and highly liquid equity securities that form part of major indices. In coordination with the businesses, Treasury can access these assets to generate liquidity if required.

As of the end of 3Q17, the portfolio that is not managed by Treasury had a market value of CHF 31.3 billion, consisting of CHF 8.1 billion of high-grade bonds and CHF 23.2 billion of highly liquid equity securities. Under our internal model, an average stress-level haircut of 17% is applied to these assets. The haircuts applied to these portfolios reflect our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

### Liquidity pool – Group

End of					3Q17	2Q17	4Q16
	Swiss franc	US dollar	Euro	Other currencies	Total	Total	Total
<b>Liquid assets (CHF million)</b>

<b>Liquid assets <sup>1</sup></b>	<b>78,798</b>	<b>49,107</b>	<b>16,491</b>	<b>21,571</b>	<b>165,967</b>	<b>155,709</b>	<b>189,974</b>

<sup>1</sup> Reflects a pre-cancellation view.

### Liquidity Coverage Ratio

Our calculation methodology for the LCR is prescribed by FINMA. For disclosure purposes, since January 1, 2017, our LCR is calculated using a three-month average that is measured using daily calculations during the quarter. The FINMA calculation of HQLA takes into account a cancellation mechanism (post-cancellation view) and is therefore not directly comparable to the assets presented in the financial statements that could potentially be monetized under a severe stress scenario. The cancellation mechanism effectively excludes the impact of certain secured financing transactions from available HQLA and simultaneously adjusts the level of net cash outflows calculated. Application of the cancellation mechanism adjusts both the numerator and denominator of the LCR calculation, meaning that the impact is mostly neutral on the LCR itself.

Beginning on March 31, 2017, our HQLA measurement methodology excludes potentially eligible HQLA available for use by

entities of the Group in certain jurisdictions that may not be readily accessible for use by the Group as a whole. These HQLA eligible amounts may be restricted for reasons such as local regulatory requirements, including large exposure requirements, or other binding constraints that could limit the transferability to other Group entities in other jurisdictions.

On this basis, the level of our LCR was 181% as of the end of 3Q17, an increase from 165% as of the end of 2Q17, representing an average HQLA of CHF 167.8 billion and average net cash outflows of CHF 92.5 billion.

A significant part of the increase in the LCR in 3Q17 resulted from an increase in HQLA, which was mainly driven by the increase in the amount of securities held. The remainder of the increase resulted from a reduction in net cash outflows compared to the prior quarter, primarily arising from decreased cash outflows associated with other collateral requirements, credit and liquidity facilities and balances related to open and failed trades.

<b>Liquidity coverage ratio (%)</b>		<b>181</b>	<b>165</b>	<b>202</b>

Calculated using a three-month average which since 1Q17 is calculated on a daily basis.

<sup>1</sup> Calculated as outstanding balances maturing or callable within 30 days.

<sup>2</sup> Calculated after the application of haircuts for high-quality liquid assets or inflow and outflow rates.

<sup>3</sup> Consists of cash and eligible securities as prescribed by FINMA and reflects a post-cancellation view.

## FUNDING SOURCES AND USES

We fund our balance sheet primarily through core customer deposits, long-term debt, including structured notes, and shareholders' equity. We monitor the funding sources, including their concentrations against certain limits, according to their counterparty, currency, tenor, geography and maturity, and whether they are secured or unsecured.

A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 18% as of the end of 3Q17, compared to 19% as of the end of 2Q17, primarily reflecting a small increase in deposits and loans. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as the haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 327 billion as of the end of 3Q17, compared to CHF 323 billion as of the end of 2Q17,

reflecting a small increase in the customer deposit base in our private banking and corporate & institutional banking businesses. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proven to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

► Refer to the chart "Balance sheet funding structure" and "Balance sheet" in Balance sheet, and off-balance sheet for further information.

## DEBT ISSUANCES AND REDEMPTIONS

Our long-term debt includes senior, senior bail-in and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or historically from our own international covered bond program.

## Balance sheet funding structure

as of September 30, 2017 (CHF billion)

Reverse repurchase agreements	59	Match funded	69	Repurchase agreements
Encumbered trading assets	39		29	Short positions
Funding-neutral assets <sup>1</sup>	67		67	Funding-neutral liabilities
Cash & due from banks	106	118% coverage	11	Other short-term liabilities <sup>2</sup>

Assets	789		789	Liabilities and Equity

<sup>1</sup> Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.

<sup>2</sup> Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.

<sup>3</sup> Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.

<sup>4</sup> Excludes loans with banks.

<sup>5</sup> Excludes due to banks and certificates of deposit.

As of the end of 3Q17, we had outstanding long-term debt of CHF 180.3 billion, which included senior and subordinated instruments. We had CHF 57.0 billion and CHF 18.7 billion of structured notes and covered bonds outstanding, respectively, as of the end of 3Q17 compared to CHF 57.7 billion and CHF 18.4 billion, respectively, as of the end of 2Q17.

► Refer to "Issuances and redemptions" in Capital management for information on capital issuances, including buffer and progressive capital notes.

As of the end of 3Q17, the weighted average maturity of long-term debt was 5.9 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Short-term borrowings decreased to CHF 16.2 billion as of the end of 3Q17 compared to CHF 17.2 billion as of the end of 2Q17, mainly due to the maturity of outstanding notes and lower issuances.

The following table provides information on long-term debt issuances, maturities and redemptions in 3Q17, excluding structured notes.

## Debt issuances and redemptions

in 3Q17	Senior	Senior bail-in	Sub-ordinated	Long-term debt
<b>Long-term debt (CHF billion, notional value)</b>				
<b>Issuances</b>	<b>0.1</b>	<b>4.0</b>	<b>0.0</b>	<b>4.1</b>
of which unsecured	0.0	4.0	0.0	4.0
of which secured <sup>1</sup>	0.1	0.0	0.0	0.1
<b>Maturities / Redemptions</b>	<b>2.7</b>	<b>0.0</b>	<b>0.0</b>	<b>2.7</b>
of which unsecured	2.7	0.0	0.0	2.7
of which secured <sup>1</sup>	0.0	0.0	0.0	0.0

Excludes structured notes.

<sup>1</sup> Includes covered bonds.

## CREDIT RATINGS

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.4 billion, CHF 1.7 billion and CHF 2.4 billion, respectively, as of the end of 3Q17, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

Potential cash outflows on these derivative contracts associated with a downgrade of our long-term debt credit ratings, such as the requirement to post additional collateral to the counterparty, the loss of re-hypothecation rights on any collateral received and impacts arising from additional termination events are monitored and taken into account in the calculation of our liquidity requirements. There are additional derivative related risks that do not relate to the downgrade of our long term debt credit ratings and which may impact our liquidity position, including risks relating to holdings of derivatives collateral or potential movements in the valuation of derivatives positions. The potential outflows resulting across all derivative product types are monitored as part of the LCR scenario parameters and the internal liquidity reporting.

► Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information.

# Capital management

As of the end of 3Q17, our BIS CET1 ratio was 14.0% and 13.2% on a look-through basis. Our BIS tier 1 leverage ratio was 5.7% and 5.2% on a look-through basis.

## REGULATORY CAPITAL FRAMEWORK

Effective January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder (Swiss Requirements). Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business.

References to phase-in and look-through included herein refer to Basel III capital requirements and Swiss Requirements. Phase-in reflects that, for the years 2014 – 2018, there will be a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

► Refer to “Capital management” in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information.

## BIS REQUIREMENTS

The BCBS, the standard setting committee within the BIS, issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and become fully effective on January 1, 2019 for those countries that have adopted Basel III.

► Refer to the table “BIS phase-in requirements for Credit Suisse” for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum CET1 requirement is 4.5% of risk-weighted assets (RWA). In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends and make discretionary bonus payments and other earnings distributions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank’s systemic importance, is an additional capital requirement for G-SIB. The Financial Stability Board has identified Credit Suisse as a G-SIB and currently requires Credit Suisse to maintain a 1.5% progressive buffer.

In addition to the CET1 requirements, there is also a requirement for 1.5% of additional tier 1 capital and 2% of tier 2 capital. These requirements may also be met with CET1 capital.

## Basel III capital frameworks for Credit Suisse

<sup>1</sup> Does not include any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

**BIS phase-in requirements for Credit Suisse**

For	2017	2018	2019
<b>Capital ratios</b>			
CET1	4.5%	4.5%	4.5%
Capital conservation buffer	1.250% <sup>1</sup>	1.875% <sup>1</sup>	2.5%
Progressive buffer for G-SIB	0.750% <sup>1</sup>	1.125% <sup>1</sup>	1.5%
<b>Total CET1</b>	<b>6.5%</b>	<b>7.5%</b>	<b>8.5%</b>

Capital instruments subject to phase-out	Phased out over a 10-year horizon beginning 2013 through 2022		

<sup>1</sup> Indicates phase-in period.

<sup>2</sup> Includes goodwill, other intangible assets and certain deferred tax assets.

To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125% as well as a trigger at the point of non-viability.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1. This requirement is imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

Capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, are phased out at their effective maturity date, which is generally the date of the first step-up coupon.

Banks are required to maintain a tier 1 leverage ratio of 3% beginning on January 1, 2018.

**SWISS REQUIREMENTS**

The legislation implementing the Basel III framework in Switzerland in respect of capital requirements for systemically relevant banks, including Credit Suisse, goes beyond the Basel III minimum standards for systemically relevant banks.

In May 2016, the Swiss Federal Council amended the Capital Adequacy Ordinance applicable to Swiss banks. The amendment recalibrates and expands the existing "Too Big to Fail" regime in Switzerland. Under the amended regime, systemically important banks operating internationally, such as Credit Suisse, will be subject to two different minimum requirements for loss-absorbing capacity: G-SIBs must hold sufficient capital that absorbs current operating losses to ensure continuity of service (going concern requirement) and they must issue sufficient debt instruments to fund restructuring without recourse to public resources (gone concern requirement). Going concern capital and gone concern capital together form our total loss-absorbing capacity (TLAC). The going concern and gone concern requirements are generally aligned with the FSB's total loss-absorbing capacity standard. The amended Capital Adequacy

Ordinance came into effect on July 1, 2016, subject to phase-in and grandfathering provisions for certain outstanding instruments, and has to be fully applied by January 1, 2020.

**Going concern requirement**

The going concern requirement applicable in 2020 for a G-SIB consists of (i) a base requirement of 12.86% of RWA and 4.5% of leverage exposure; and (ii) a surcharge, which reflects the G-SIB's systemic importance. For Credit Suisse, this currently translates into a going concern requirement of 14.3% of RWA, of which the minimum CET1 component is 10%, with the remainder to be met with a maximum of 4.3% additional tier 1 capital, which includes high-trigger capital instruments that would be converted into common equity or written down if the CET1 ratio falls below 7%. Under the going concern requirement, the Swiss leverage ratio must be 5%, of which the minimum CET1 component is 3.5%, with the remainder to be met with a maximum of 1.5% additional tier 1 capital, which includes high-trigger capital instruments.

**Gone concern requirement**

The gone concern requirement of a G-SIB is equal to its total going concern requirement, which in 2020, consists of a base requirement of 12.86% of RWA and 4.5% of leverage exposure, plus any surcharges applicable to the relevant G-SIB. The gone concern requirement does not include any countercyclical buffers. Credit Suisse is currently subject to a gone concern requirement of 14.3% of RWA and a 5% Swiss leverage ratio and is subject to potential capital rebates for resolvability and for certain tier 2 low-trigger instruments recognized as gone concern capital.

The gone concern requirement should primarily be fulfilled with bail-in debt instruments that are designed to absorb losses after the write-down or conversion into equity of regulatory capital of a G-SIB in a restructuring scenario, but before the write-down or conversion into equity of other senior obligations of the G-SIB. Bail-in debt instruments do not feature capital triggers that may lead to a write-down and/or a conversion into equity outside of restructuring, but only begin to bear losses once the G-SIB is formally in restructuring proceedings and FINMA orders capital measures (i.e., a write-down and/or a conversion into equity) in the restructuring plan.

According to the amended Capital Adequacy Ordinance, bail-in debt instruments must fulfill certain criteria in order to qualify under the gone concern requirement, including FINMA approval. In addition to bail-in debt instruments, the gone concern requirement may further be fulfilled with other capital instruments, including CET1, additional tier 1 capital instruments or tier 2 capital instruments.

**Grandfathering provisions**

The Capital Adequacy Ordinance provides for a number of grandfathering provisions with regard to the qualification of previously issued additional tier 1 capital instruments and tier 2 capital instruments:

- Additional tier 1 capital instruments with a low trigger qualify as going concern capital until their first call date. Additional tier 1 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital;

## Swiss capital and leverage phase-in requirements for Credit Suisse

Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital. As of the end of 3Q17, the Swiss countercyclical buffer for the Group and the Bank was CHF 432 million, which is equivalent to 0.2% of CET1 capital, and the required extended countercyclical buffer was insignificant. As of the end of 3Q17, the rebate for resolvability relating to the Group and the Bank's capital ratios was 0.868%, resulting in a gone concern requirement of 5.332%, and 0.28% relating to the leverage ratios, resulting in a gone concern leverage requirement of 1.72%.

- Tier 2 capital instruments with a high trigger qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity; and
- Tier 2 capital instruments with a low trigger also qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity.

Furthermore, to be eligible as gone concern capital, outstanding bail-in debt instruments issued before July 1, 2016 and bail-in debt instruments issued by a (Swiss or foreign) special purpose vehicle before January 1, 2017 must have been approved by FINMA.

Both the going concern and the gone concern requirements are subject to a phase-in with gradually increasing requirements and have to be fully applied by January 1, 2020.

#### Other requirements

Effective July 1, 2016, Switzerland implemented an extended countercyclical buffer, which is based on the BIS countercyclical buffer that could require banks to hold up to 2.5% of RWA in the form of CET1 capital. The extended countercyclical buffer relates to a requirement that can be imposed by national regulators when credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

The Swiss Federal Council has not activated the BIS countercyclical buffer for Switzerland but instead requires banks to hold CET1 capital in the amount of 2% of their RWA pertaining to mortgage loans that finance residential property in Switzerland (Swiss countercyclical buffer).

In 2013, FINMA introduced increased capital charges for mortgages that finance owner occupied residential property in Switzerland (mortgage multiplier) to be phased in through January 1, 2019. The mortgage multiplier applies for purposes of both BIS and FINMA requirements.

In December 2013, FINMA issued a decree (2013 FINMA Decree) specifying capital adequacy requirements for the Bank, on a stand-alone basis (Bank parent company), and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions.

► Refer to "Regulatory developments and proposals" below and in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2016 for further information on the FINMA Decree.

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR), risks not in VaR and advanced credit valuation adjustment (CVA).

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for

every regulatory VaR backtesting exception over four in the prior rolling 12-month period. In 3Q17, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

► Refer to "Market risk review" in Risk management for further information.

## REGULATORY DEVELOPMENTS AND PROPOSALS

### Partial replacement of the 2013 FINMA Decree

In October 2017, FINMA issued an additional decree with respect to the regulatory capital requirements of the Bank parent company (2017 FINMA Decree), specifying the treatment of investments in subsidiaries for capital adequacy purposes. This decree partially replaces certain aspects of the 2013 FINMA Decree, but all other aspects of that decree remain in force. The 2017 FINMA Decree is effective retroactively as of July 1, 2017. The changes aim to create a capital adequacy framework for the Bank parent company that is more comparable to relevant international frameworks and does not rely on exemptions from, or corrections of, the basic framework applicable to all Swiss banks. The changes only apply to the going concern capital requirements for the Bank parent company, which, as of July 1, 2017, amount to 14.3% of RWA, of which the minimum CET1 component is 10%, with the remainder to be met with a maximum of 4.3% additional tier 1 capital, which includes high-trigger capital instruments. Additional effects from countercyclical buffers impact the CET1 minimum requirement. Under the going concern requirement, the Swiss leverage ratio must be 5%, of which the minimum CET1 component is 3.5%, with the remainder to be met with a maximum of 1.5% additional tier 1 capital, which includes high-trigger capital instruments.

The new rules will require the Bank parent company to risk-weight both direct and indirect investments in subsidiaries, with the initial risk-weight set at 200%. Beginning in 2019, these risk-weights will gradually increase over 10 years to 250% for participations in subsidiaries in Switzerland and to 400% for participations in subsidiaries abroad. This replaces the existing framework that, for systemically relevant banks, provided exemptions to the general rule of capital deduction with respect to investments in subsidiaries to avoid unintended effects from the existing "Too Big to Fail" legislation and capital requirements thereunder. Furthermore, the Swiss administration plans to amend the Capital Adequacy Ordinance accordingly so that these new rules will apply to all banks in Switzerland.

The 2017 FINMA Decree also applies an adjustment (referred to as a regulatory filter) to any impact on CET1 capital arising from the upcoming accounting change under applicable Swiss banking rules for the Bank parent company's investments in subsidiaries from the current portfolio valuation method to the individual valuation method by 2020. The regulatory filter allows for the measurement of the regulatory capital position as if the Bank parent company had maintained the portfolio valuation method, which results in higher total participation values subject to risk weighting.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for the Bank parent company's regulatory disclosures.

**Other developments**

In October 2017, the BCBS published final guidelines on the identification and management of step-in risk. Step-in risk refers to the risk that a bank decides to provide financial support to an unconsolidated entity that is facing financial stress in the absence of, or in excess of, any contractual obligations or equity ties to actually provide such support, in particular to avoid reputational risks. The guidelines do not prescribe any automatic liquidity or capital charge, but rather rely on existing prudential measures to mitigate significant step-in risk through identification and management of step-in risks and a supervisory process built on reporting. The BCBS expects the guidelines to be implemented in member jurisdictions by 2020.

In October 2017, FINMA announced its re-assessment of rebates for resolvability relating to the gone concern requirement. The eligibility for the rebates for resolvability is assessed on an annual basis. Effective July 1, 2017, our capital ratio rebate is 0.868% and our leverage ratio rebate is 0.28%.

**ISSUANCES AND REDEMPTIONS****Issuances**

In July 2017, the Group issued EUR 1.5 billion 1.25% senior notes due 2025.

In September 2017, the Group issued GBP 750 million 2.125% senior notes due 2025, USD 1,000 million 2.997% senior notes due 2023 and USD 500 million floating rate senior notes due 2023.

In October 2017, the Group issued JPY 38.7 billion 0.553% callable senior notes due 2023, JPY 8.3 billion 0.904% callable senior

notes due 2027 and JPY 10 billion 1.269% callable senior notes due 2033.

All of the above-mentioned issuances count as bail-in instruments.

**Higher Trigger Capital Amount**

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert into equity or be written down prior to the write-down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion into equity or write-down is referred to as the Higher Trigger Capital Amount.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5.125%, the Higher Trigger Capital Amount was CHF 7.5 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 2.8%, both as of the end of 3Q17.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5%, the Higher Trigger Capital Amount was CHF 12.4 billion and the Higher Trigger Capital Ratio was 4.6%, both as of the end of 3Q17.

► Refer to the table "BIS capital metrics – Group" for further information on the BIS metrics used to calculate such measures.

► Refer to "Higher Trigger Capital Amount" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Issuances and redemptions in the Credit Suisse Annual Report 2016 for further information on the Higher Trigger Capital Amount.

**BIS capital metrics – Group**

end of	Phase-in				Look-through			
	3Q17	2Q17	4Q16	% change QoQ	3Q17	2Q17	4Q16	% change QoQ
<b>Capital and risk-weighted assets (CHF million)</b>								
CET1 capital	37,331	37,011	36,576	1	34,860	34,467	30,783	1
Tier 1 capital	51,848	51,260	48,865	1	47,210	46,687	41,879	1

Risk-weighted assets	266,588	260,918	271,372	2	265,012	259,337	268,045	2
<b>Capital ratios (%)</b>								
CET1 ratio	14.0	14.2	13.5	–	13.2	13.3	11.5	–
Tier 1 ratio	19.4	19.6	18.0	–	17.8	18.0	15.6	–
Total capital ratio	21.5	21.7	20.5	–	19.4	19.6	17.4	–

**BIS CAPITAL METRICS**

Our CET1 ratio was 14.0% as of the end of 3Q17 compared to 14.2% as of the end of 2Q17, reflecting a slight increase in CET1 capital and higher RWA. Our tier 1 ratio was 19.4% as of the end of 3Q17 compared to 19.6% as of the end of 2Q17. Our total capital ratio was 21.5% as of the end of 3Q17 compared to 21.7% as of the end of 2Q17.

CET1 capital was CHF 37.3 billion as of the end of 3Q17, a slight increase compared to CHF 37.0 billion as of the end of 2Q17, mainly reflecting a positive foreign exchange impact and net income attributable to shareholders, partially offset by the impact

of a dividend accrual and the net regulatory impact of losses on fair-valued financial liabilities due to changes in own credit risk.

Additional tier 1 capital increased to CHF 14.5 billion as of the end of 3Q17 compared to CHF 14.2 billion as of the end of 2Q17, mainly reflecting a positive foreign exchange impact and the impact of the prescribed amortization of issuance fees as instruments move closer to their maturity date.

Tier 2 capital increased slightly to CHF 5.4 billion as of the end of 3Q17 compared to CHF 5.3 billion as of the end of 2Q17, mainly reflecting a positive foreign exchange impact.

<sup>1</sup> Includes regulatory adjustments not subject to phase-in, including a cumulative dividend accrual.

<sup>2</sup> Net of deferred tax liability.

<sup>3</sup> Includes cash flow hedge reserve.

<sup>4</sup> Reflects 80% phase-in deductions, including goodwill, other intangible assets and certain deferred tax assets, and 20% of an adjustment primarily for the accounting treatment of pension plans pursuant to phase-in requirements.

<sup>5</sup> Includes hybrid capital instruments that are subject to phase-out.

<sup>6</sup> Includes 20% of goodwill and other intangible assets (CHF 1.0 billion) and other capital deductions, including the regulatory reversal of gains/(losses) due to changes in own credit risk on fair-valued financial liabilities, which will be deducted from CET1 once Basel III is fully implemented.

Total eligible capital was CHF 57.2 billion as of the end of 3Q17 compared to CHF 56.5 billion as of the end of 2Q17.

As of the end of 3Q17, the look-through CET1 ratio was 13.2% compared to 13.3% as of the end of 2Q17. As of the end

of 3Q17, the look-through total capital ratio was 19.4% compared to 19.6% as of the end of 2Q17.

<sup>1</sup> Includes US GAAP cumulative translation adjustments and the foreign exchange impact on regulatory CET1 adjustments.

<sup>2</sup> Includes the impact of a dividend accrual, the net effect of share-based compensation and pensions and a change in other regulatory adjustments (e.g., the net regulatory impact of gains/(losses) on fair-valued financial liabilities due to changes in own credit risk and certain deferred tax assets).

<sup>3</sup> Includes the impact of the prescribed amortization of issuance fees as instruments move closer to their maturity date and the net regulatory impact of gains/(losses) on fair-valued financial liabilities due to changes in own credit risk, which will be deducted from CET1 once Basel III is fully implemented.

### RISK-WEIGHTED ASSETS

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as credit, market and operational risk RWA. When assessing RWA, it is not the nominal size, but rather the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Capital requirements for premises and equipment are also included in credit risk. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is

deducted from CET1 capital and the amount below the threshold is risk-weighted. RWA subject to such threshold adjustments are included in credit risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

RWA increased 2% to CHF 266.6 billion as of the end of 3Q17 compared to CHF 260.9 billion as of the end of 2Q17, primarily driven by methodology and policy changes in operational risk and credit risk and a foreign exchange impact. These increases were partially offset by decreases resulting from movements in risk levels in credit risk.

Excluding the foreign exchange impact, the decrease in **credit risk** was primarily driven by movements in risk levels attributable to book size, partially offset by increases related to methodology and policy changes. The decrease in risk levels attributable to book size in the Corporate Center mainly reflected the impact of hedging transactions executed in connection with managing the Group's risk-weighted asset position. The decrease in risk levels attributable to book size in the Strategic Resolution Unit was partially related to the sale of legacy asset management positions, and the decrease in Asia Pacific was partially due to the securitization of certain lending exposures. Risk levels attributable to book size were also impacted by reductions in advanced CVA resulting from decreased exposures in the Strategic Resolution Unit and Swiss Universal Bank. These decreases were partially offset by the expiration of a credit risk hedge and increases in derivative exposures primarily in Global Markets. The increase relating to methodology and policy changes was mainly due to an additional phase-in of the multiplier on income producing real estate exposures within Swiss Universal Bank and an additional phase-in of a multiplier on certain investment banking corporate exposures in Investment Banking & Capital Markets, Global Markets and Asia Pacific.

Excluding the foreign exchange impact, the increase in **market risk** was primarily driven by movements in risk levels in Global Markets, partially offset by a decrease relating to movements in risk levels primarily in Asia Pacific.

The increase in **operational risk** was driven by methodology and policy changes reflecting the FINMA-imposed add-on of CHF 5.2 billion primarily in respect of our RMBS settlements.

## Risk-weighted assets and capital ratios – Group

**LEVERAGE METRICS**

Beginning in 1Q15, Credit Suisse adopted the BIS leverage ratio framework, as issued by the BCBS and implemented in Switzerland by FINMA. Under the BIS framework, the leverage ratio measures tier 1 capital against the end-of-period exposure. BIS leverage amounts are calculated based on our interpretation of, and assumptions and estimates related to, the BIS requirements as implemented in Switzerland by FINMA. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown here.

As used herein, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments.

The look-through leverage exposure was CHF 909.0 billion as of the end of 3Q17, stable compared to the end of 2Q17 reflecting the Group's stable balance sheet assets.

► Refer to "Balance sheet and off-balance sheet" for further information on the reduction in the Group's consolidated balance sheet.

**Look-through leverage exposure – Group**

end of	3Q17	2Q17	4Q16
<b>Look-through leverage exposure (CHF million)</b>			
Swiss Universal Bank	256,207	260,479	252,889

<b>Leverage exposure</b>	<b>908,967</b>	<b>906,194</b>	<b>950,763</b>

**BIS leverage ratios – Group**

The tier 1 leverage ratio was 5.7% as of the end of 3Q17, with a CET1 component of 4.1%. On a look-through basis, the tier 1 leverage ratio was 5.2%, with a CET1 component of 3.8%.

The CET1 leverage ratio of 4.1% as of the end of 3Q17 was stable compared to the end of 2Q17, reflecting a slight increase in CET1 capital and stable leverage exposure.

The tier 1 leverage ratio of 5.7% as of the end of 3Q17 increased compared to 5.6% as of the end of 2Q17, mainly reflecting a slight increase in tier 1 capital and stable leverage exposure.

## SWISS CAPITAL AND LEVERAGE METRICS

### Swiss capital metrics

► Refer to "Swiss Requirements" for further information on Swiss regulatory requirements.

As of the end of 3Q17, our Swiss CET1 ratio was 13.9%, our going concern capital ratio was 20.1%, our gone concern capital ratio was 12.7% and our TLAC ratio was 32.8%.

On a look-through basis, as of the end of 3Q17, our Swiss CET1 capital was CHF 34.7 billion and our Swiss CET1 ratio was 13.1%. Our going concern capital was CHF 47.1 billion and our going concern capital ratio was 17.7%. Our gone concern capital was CHF 33.5 billion and our gone concern capital ratio was 12.6%. Our total loss-absorbing capacity was CHF 80.6 billion and our TLAC ratio was 30.3%.

## Swiss capital and leverage ratios for Credit Suisse

Rounding differences may occur. Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

### Swiss leverage metrics

The leverage exposure used in the Swiss leverage ratio is measured on the same period-end basis as the leverage exposure for the BIS leverage ratio.

As of the end of 3Q17, our Swiss CET1 leverage ratio was 4.1%, our going concern leverage ratio was 5.9%, our gone

concern leverage ratio was 3.7% and our TLAC leverage ratio was 9.6%.

On a look-through basis, as of the end of 3Q17, our Swiss CET1 leverage ratio was 3.8%, our going concern leverage ratio was 5.2%, our gone concern leverage ratio was 3.7% and our TLAC leverage ratio was 8.9%.

**BANK REGULATORY DISCLOSURES**

The following capital, RWA and leverage disclosures apply to the Bank. The business of the Bank is substantially the same as that of the Group, including business drivers and trends relating to capital, RWA and leverage metrics.

**BIS capital and leverage metrics – Bank**

► Refer to “BIS capital metrics”, “Risk-weighted assets” and “Leverage metrics” for further information.

**OTHER REGULATORY DISCLOSURES**

In connection with the implementation of Basel III, certain regulatory disclosures for the Group and certain of its subsidiaries are required. The Group's Pillar 3 disclosure, regulatory disclosures, additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base, G-SIB financial indicators, reconciliation requirements, leverage ratios and certain liquidity disclosures as well as regulatory disclosures for subsidiaries can be found on our website.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for additional information.

**SHAREHOLDERS' EQUITY AND SHARE METRICS****Total shareholders' equity**

Our total shareholders' equity increased from CHF 43.5 billion as of the end of 2Q17 to CHF 43.9 billion as of the end of 3Q17. Total shareholders' equity was positively impacted by foreign exchange-related movements on cumulative translation adjustments, net income attributable to shareholders and an increase in the share-based compensation obligation. These movements were partially offset by losses on fair value elected liabilities relating to credit risk and transactions relating to the settlement of share-based compensation awards.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

# Risk management

In 3Q17, our available economic capital increased CHF 0.8 billion to CHF 50.0 billion, economic risk capital increased CHF 0.7 billion to CHF 32.4 billion and average risk management VaR decreased 4% to USD 26 million. Gross impaired loans of CHF 2.2 billion decreased slightly on a gross loan portfolio of CHF 276.9 billion.

## OVERVIEW AND RISK-RELATED DEVELOPMENTS

Fundamental to our business is the prudent taking of risk in line with our strategic priorities. The primary objectives of risk management are to protect our financial strength and reputation, while ensuring that capital is well deployed to support business activities. Our risk management framework is based on transparency, management accountability and independent oversight.

► Refer to "Key risk developments", "Risk management oversight", "Risk appetite framework" and "Risk coverage and management" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2016 for further information and additional details of our current risk management framework and activities, including definitions of certain terms and relevant metrics.

### Key risk developments

#### North Korean crisis

Following North Korea's launch of several missiles and a nuclear test, the United Nations (UN) passed new sanctions. Against this uncertain environment, we enhanced risk controls around the relevant portfolios and increased the size of the macro hedge program to offset potential losses. We continued to closely assess and monitor the related risks in our portfolio through several scenarios.

#### US markets and Fed tapering

In September the Fed announced the unwinding of its quantitative easing (QE) program and indicated that there could be another rate hike by year end, despite persistently low inflation. Also, valuations are currently high in equity and credit markets. Using a suite of scenarios, we continue to monitor the risk associated with high valuations and a potential disorderly QE program wind down.

#### Natural disasters

Recent hurricanes in the Caribbean and the US caused immediate and widespread economic disruption and affected some Credit Suisse offices, including utility power loss and infrastructure shut-down. Our crisis management team successfully engaged recovery procedures and notification tools allowing offices to continue operation. Some insurance-linked funds managed by Credit Suisse have an exposure to the affected areas. We expect a limited impact on revenues in our insurance-linked funds business and on our credit portfolio. An earthquake in Mexico required staff evacuation, however, did not have any further implications.

## ECONOMIC RISK CAPITAL REVIEW

Economic risk capital is used as a consistent and comprehensive tool for capital management, limit monitoring and performance management. Economic risk capital is our core Group-wide risk management tool for measuring and reporting the combined impact from quantifiable risks such as market, credit, operational, pension, expense and model risks, each of which has an impact on our capital position.

Economic risk capital measures risks in terms of economic realities rather than regulatory or accounting rules and estimates the amount of capital needed to remain solvent and in business under extreme market, business and operating conditions over the period of one year, given our target financial strength (our long-term credit rating). Economic risk capital is set to a level needed to absorb unexpected losses at a confidence level of 99.97%. Our economic risk capital model is a set of methodologies used for measuring quantifiable risks associated with our business activities on a consistent basis. It is calculated separately for position risk (reflecting our exposure to market and credit risks), operational risk and other risks.

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of material methodology changes and dataset and model parameter updates, prior-period balances are restated in order to show meaningful trends.

► Refer to "Economic risk capital" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on economic risk capital.

With effect from July 1, 2017, the Global Markets division entered into an agreement with Swiss Universal Bank and International Wealth Management whereby it provides centralized trading and sales services to private and institutional clients across the three divisions. These services are now managed as a single business within the Global Markets division, referred to as ITS. As a result, we have updated our divisional capital allocation key and revenue sharing agreements. The impact of this update on our economic risk capital measures was immaterial and prior periods have not been restated.

<sup>1</sup> Includes primarily high- and low-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to BIS look-through CET1 capital to enable comparison between economic risk capital and available economic capital under the Basel III framework.

<sup>2</sup> This category comprises fixed income trading, foreign exchange, commodity and insurance exposures.

<sup>3</sup> This category comprises commercial and residential real estate (including RMBS and CMBS), ABS exposure, real estate acquired at auction and real estate fund investments.

<sup>4</sup> Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

<sup>5</sup> Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between available economic capital and economic risk capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain planned methodology changes.

<sup>6</sup> Ratio of available economic capital to economic risk capital.

## Available economic capital trends

As of the end of 3Q17, our available economic capital for the Group was CHF 50.0 billion, an increase of CHF 0.8 billion from the end of 2Q17. BIS look-through CET1 capital increased CHF 0.4 billion, mainly reflecting net income attributable to

shareholders and a positive foreign exchange impact. Economic adjustments increased CHF 0.4 billion, mainly reflecting a positive foreign exchange impact on contingent capital instruments and an increase in dividend accruals.

<sup>1</sup> Includes primarily expense risk, operational risk, diversification benefits from the divisions and foreign exchange risk between available economic capital and economic risk capital.

### Economic risk capital trends

Compared to the end of 2Q17, our economic risk capital increased slightly to CHF 32.4 billion, mainly due to an 8% increase in operational risk, primarily reflected in our Corporate Center. The increase in operational risk was mainly driven by the add-on to our risk-weighted assets relating to operational risk imposed by FINMA, primarily in respect of our RMBS settlements. Overall position risk was stable. Emerging markets country event risk increased, mainly reflecting higher exposures in Brazil. International lending & counterparty exposures and private banking corporate & retail lending exposures decreased, primarily in Asia, driven by the securitization of certain lending exposures and decreased counterparty risk, respectively. Equity trading & investments risk decreased due to reduced private equity exposure across several regions. Other risks were stable, primarily reflecting increased foreign exchange risk between available economic capital and economic risk capital offset by lower pension risk driven by reduced equity risk in our Swiss and UK pension plans.

For Swiss Universal Bank, economic risk capital decreased 5% to CHF 5.3 billion from the end of 2Q17, mainly due to an impact from the agreement related to ITS and the lower pension risk driven by reduced equity risk in our Swiss pension plan.

For International Wealth Management, economic risk capital was stable at CHF 4.5 billion compared to the end of 2Q17.

For Asia Pacific, economic risk capital decreased 15% to CHF 3.4 billion from the end of 2Q17, mainly due to the securitization of certain lending exposures in international lending & counterparty exposures and a reduction in private banking corporate & retail lending exposures reflecting decreased counterparty risk. These reductions were partially offset by increased traded equity exposures in equity trading & investments and higher interest rate derivatives risk in fixed income trading.

For Global Markets, economic risk capital increased 10% to CHF 9.4 billion compared to the end of 2Q17, mainly due to increased exposures in Brazil in emerging markets country event risk and new loan commitments in international lending & counterparty exposures. These increases were partially offset by the impact of divisional revenue sharing agreements and the reduced pension risk in our UK pension plan.

For Investment Banking & Capital Markets, economic risk capital increased slightly to CHF 5.3 billion from the end of 2Q17, mainly due to increased credit risk model reserve in other risks.

For the Strategic Resolution Unit, economic risk capital decreased 6% to CHF 3.2 billion from the end of 2Q17, mainly reflecting decreased risk in equity trading & investments due to reduced private equity exposure across several regions.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

### MARKET RISK REVIEW

Market risk is the risk of financial loss arising from movements in market prices. Market risks arise from both our trading and non-trading business activities. The classification of assets into trading book and banking book portfolios determines the approach for analyzing our market risk exposure. Market risk in the trading book is measured using VaR and market risk in our banking book is measured using sensitivity analysis on related market factors.

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on market risk including our VaR methodology.

### Trading book

Market risks from our trading book relate to our trading activities primarily in Global Markets and Asia Pacific. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products. Some of the structured products are customized transactions using combinations of derivatives and are executed to meet specific client or internal needs. As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations.

VaR is a risk measure which quantifies the potential loss on a given portfolio of financial instruments over a certain holding period and that is expected to occur at a certain confidence level. VaR is an important tool in risk management and is used for measuring quantifiable risks from our activities exposed to market risk on a daily basis. In addition, VaR is one of the main risk measures for limit monitoring, financial reporting, calculation of regulatory capital and regulatory backtesting.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 3Q17, we updated our VaR methodology to capture volatility risk in exotic interest rate products. The volatility modelling now accounts for a close to zero and a negative interest rate environment for major developed markets and for select emerging markets. The impact of this methodology change was immaterial and prior periods have not been restated.

We continue to receive regulatory approval for ongoing enhancements to our VaR methodology used for the calculation of regulatory capital, and the model is subject to regular reviews by regulators.

Information required under Pillar 3 of the Basel framework related to risk is available on our website at [www.credit-suisse.com/pillar3](http://www.credit-suisse.com/pillar3).

The tables entitled “Average one-day, 98% risk management VaR by division” and “One-day, 98% risk management VaR” show our trading-related market risk exposure, as measured by one-day, 98% risk management VaR in Swiss francs and US dollars. As we measure trading book VaR for internal risk management purposes using the US dollar as the base currency, the VaR figures

were translated into Swiss francs using daily foreign exchange translation rates. VaR estimates are computed separately for each risk type and for the whole portfolio using the historical simulation methodology. The different risk types are grouped into five categories including interest rate, credit spread, foreign exchange, commodity and equity.

### One-day, 98% risk management VaR

Maximum	19	24	9	3	17	- <sup>1</sup>	32
End of period	15	21	6	1	13	(28)	28

Excludes risks associated with counterparty and own credit exposures.

<sup>1</sup> As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

## Average one-day, 98% risk management VaR by division

in	Swiss Universal Bank	International Wealth Management	Asia Pacific	Global Markets	Strategic Resolution Unit	Diversi- fication benefit <sup>1</sup>	Credit Suisse
<b>Average risk management VaR (CHF million)</b>							
3Q17	0	4	12	20	5	(16)	25
2Q17	0	4	13	22	7	(20)	26
4Q16	0	5	15	21	7	(21)	27
<b>Average risk management VaR (USD million)</b>							
3Q17	0	4	12	21	5	(16)	26
2Q17	0	4	13	22	7	(19)	27
4Q16	0	5	15	21	7	(21)	27

Excludes risks associated with counterparty and own credit exposures. Investment Banking & Capital Markets has only banking book positions.

<sup>1</sup> Difference between the sum of the standalone VaR for each division and the VaR for the Group.

We measure VaR in US dollars, as the majority of our trading activities are conducted in US dollars.

Average risk management VaR decreased 4% to USD 26 million from 2Q17, mainly driven by decreased interest rate derivatives exposures in Europe, primarily reflected in the Strategic Resolution Unit. For Global Markets, the decrease in average risk management VaR was mainly driven by lower credit spread risk from commercial mortgage-backed securities (CMBS) in the US.

Period-end risk management VaR was stable at USD 24 million compared to 2Q17, mainly due to an increase in interest rate exposures offset by a decrease in credit spread risk reflecting reduced exposures in CMBS in the US.

The chart entitled “Daily risk management VaR” shows the aggregated market risk in our trading book on a consolidated basis.

## Daily risk management VaR (rolling four quarters)

— One-day risk management VaR (98%)

Excludes risks associated with counterparty and own credit exposures.

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 3Q17 with those for 2Q17 and 4Q16. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. We had no trading loss days in 3Q17 and 2Q17 and two trading loss days in 4Q16.

## Actual daily trading revenues

■ 3Q17 ■ 2Q17 ■ 4Q16

Trading revenues exclude Neue Aargauer Bank AG and valuation adjustments associated with counterparty and own credit exposures.

## VaR backtesting

Various techniques are used to assess the accuracy of the VaR methodology used for risk management and regulatory purposes and to assess if our regulatory capital is sufficient to absorb actual losses. Our VaR backtesting process is used to assess the accuracy and performance of our regulatory VaR model and to encourage developments to our VaR model. Backtesting involves comparing the results produced from the VaR model with the daily trading revenues. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period calculated using a subset of the actual daily trading revenues also referred to as “hypothetical” trading revenues under the Basel framework. In the rolling 12-month period through the end of 3Q17, we had no backtesting exceptions in our regulatory VaR model calculated using the subset of actual daily trading revenues. Since there were fewer than five backtesting exceptions in the rolling 12-month period

through the end of 3Q17, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on VaR backtesting.

► Refer to "Other requirements" in Capital management – Swiss requirements for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

### Banking book

Market risks from our banking book primarily relate to asset and liability mismatch exposures, equity participations and investments in bonds and money market instruments. Our businesses and the Corporate Center have non-trading portfolios that carry market risks, mainly related to changes in interest rates but also to changes in foreign exchange rates, equity prices and, to a lesser extent, commodity prices.

Interest rate risk on banking book positions is measured by estimating the impact resulting from a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive banking book positions. As of the end of 3Q17, the interest rate sensitivity of a one basis point parallel increase in yield curves would have been positive CHF 5.5 million, compared to positive CHF 4.1 million as of the end of 2Q17.

### CREDIT RISK REVIEW

All transactions that are exposed to potential losses due to a counterparty failing to meet an obligation are subject to credit risk exposure measurement and management. The majority of our credit risk is concentrated in the private banking, corporate and institutional businesses and in the investment banking businesses.

► Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on credit risk.

► Refer to "Note 16 – Loans, allowance for loan losses and credit quality" and "Note 28 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information on loans and impaired loans and counterparty credit risk, respectively.

### Loans

Compared to the end of 2Q17, gross loans increased CHF 2.0 billion to CHF 276.9 billion as of the end of 3Q17, mainly driven by higher loans collateralized by securities, higher mortgages, increased loans to the real estate sector and higher loans to financial institutions and the translation impact from the US dollar and the euro. These increases were partially offset by lower commercial and industrial loans and a decrease in consumer finance loans. The net increase of CHF 1.6 billion in loans collateralized by securities was mainly driven by Asia Pacific and International Wealth Management. The net increase of CHF 0.5 billion in mortgages was mainly driven by increases in International Wealth Management and Swiss Universal Bank. Loans to the real estate sector increased CHF 0.3 billion, primarily in Asia Pacific and International Wealth Management. Loans to financial institutions increased CHF 0.3 billion, primarily in International Wealth Management and Global Markets, partially offset by a decrease in the Strategic Resolution Unit. The net decrease of CHF 0.4 billion in commercial and industrial loans primarily reflected decreases in the Strategic Resolution Unit, Swiss Universal Bank and Investment Banking & Capital Markets, partially offset by an increase in Global Markets. The net decrease of CHF 0.2 billion in consumer finance loans was mainly driven by Swiss Universal Bank.

On a divisional level, increases in gross loans of CHF 1.5 billion in Asia Pacific, CHF 1.3 billion in International Wealth Management and CHF 0.5 billion in Global Markets were partially offset by decreases in gross loans of CHF 0.8 billion in the Strategic Resolution Unit, CHF 0.2 billion in Swiss Universal Bank and CHF 0.2 billion in Investment Banking & Capital Markets.

## Impaired loans

Compared to the end of 2Q17, gross impaired loans decreased slightly to CHF 2.2 billion as of the end of 3Q17, mainly reflecting lower potential problem loans and lower restructured loans, primarily in the Strategic Resolution Unit.

In the Strategic Resolution Unit, gross impaired loans decreased CHF 68 million, primarily driven by a reduction in ship finance. In Asia Pacific, gross impaired loans decreased CHF 31 million, mainly reflecting the repayment of a share-backed loan

exposure. In International Wealth Management, gross impaired loans increased CHF 35 million, primarily driven by a small number of newly defaulted mortgages and secured loans in ship finance, partially offset by reductions mainly in aviation finance. In Swiss Universal Bank, gross impaired loans increased CHF 17 million, mainly driven by the default of an exposure in commodity trade finance. Gross impaired loans for Global Markets and Investment Banking & Capital Markets were stable at CHF 37 million and CHF 35 million, respectively.

### SELECTED EUROPEAN CREDIT RISK EXPOSURES

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion.

► Refer to "Selected European credit risk exposures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2016 for further information on selected European credit risk exposures.

### Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our overall risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses of our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G7 and non-G7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

### Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Cyprus, Croatia, Greece, Ireland, Italy, Malta, Portugal and Spain increased 4% to EUR 3,237 million as of the end of 3Q17, compared to EUR 3,124 million as of the end of 2Q17. Our net exposure to these sovereigns was EUR 1,314 million, 9% higher compared to EUR 1,207 million as of the end of 2Q17. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 3Q17 included net exposure to financial institutions of EUR 1,824 million and to corporates and other counterparties of EUR 2,225 million, 6% higher compared to EUR 1,726 million and 3% higher compared to EUR 2,162 million, respectively, as of the end of 2Q17.

► Refer to "Selected European credit risk exposures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2016 for further information on the presentation of selected European credit risk exposures.

### Sovereign debt rating developments

In 3Q17, the long-term sovereign debt ratings of the countries listed in the table changed as follows: Standard & Poor's increased its rating for Portugal from BB+ to BBB-, Fitch increased its rating for Greece from CCC to B- and Moody's increased its rating for Cyprus from B1 to Ba3.

# Balance sheet and off-balance sheet

Total assets were CHF 788.7 billion, total liabilities were CHF 744.6 billion and total equity was CHF 44.1 billion. Total assets increased 1% and total liabilities increased 1% for the quarter, reflecting the foreign exchange translation impact and lower operating activities. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

## BALANCE SHEET

Total assets were CHF 788.7 billion as of the end of 3Q17, an increase of CHF 5.3 billion, or 1%, from the end of 2Q17, reflecting the foreign exchange translation impact and lower operating activities. Excluding the foreign exchange translation impact, total assets decreased CHF 2.2 billion.

Compared to the end of 2Q17, central bank funds sold, securities purchased under resale agreements and securities borrowing

transactions increased CHF 10.7 billion, or 8%, mainly driven by an increase in reverse repurchase transactions from banks and customers and cash collateral from banks. Trading assets and net loans were stable. Brokerage receivables decreased CHF 4.8 billion, or 12%, primarily reflecting decreases in failed settlements and margin lending. Cash and due from banks decreased CHF 4.6 billion, or 4%, mainly driven by lower cash positions at the Fed. All other assets were stable.

Trading liabilities	43,920	43,535	44,930	1	(2)
Long-term debt	180,294	176,700	193,315	2	(7)
Brokerage payables	32,416	33,545	39,852	(3)	(19)
All other liabilities	82,950	80,756	87,804	3	(6)
<b>Total liabilities</b>	<b>744,609</b>	<b>739,575</b>	<b>777,550</b>	<b>1</b>	<b>(4)</b>
<b>Total shareholders' equity</b>	<b>43,858</b>	<b>43,493</b>	<b>41,897</b>	<b>1</b>	<b>5</b>
Noncontrolling interests	223	343	414	(35)	(46)
<b>Total equity</b>	<b>44,081</b>	<b>43,836</b>	<b>42,311</b>	<b>1</b>	<b>4</b>
<b>Total liabilities and equity</b>	<b>788,690</b>	<b>783,411</b>	<b>819,861</b>	<b>1</b>	<b>(4)</b>

Total liabilities were CHF 744.6 billion as of the end of 3Q17, an increase of CHF 5.0 billion, or 1%, from the end of 2Q17, reflecting the foreign exchange translation impact and lower operating activities. Excluding the foreign exchange translation impact, total liabilities decreased CHF 0.8 billion.

Compared to the end of 2Q17, long-term debt increased CHF 3.6 billion, or 2%, primarily reflecting issuances of senior debt, the foreign exchange translation impact and valuation adjustments, partially offset by maturities of senior debt. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions increased CHF 2.4 billion, or 8%, primarily due to an increase in repurchase transactions with customers. Due to banks, customer deposits and trading liabilities were stable. Brokerage payables decreased CHF 1.1 billion, or 3%, mainly due to decreases in failed settlements. All other liabilities increased CHF 2.2 billion, or 3%, reflecting increases of CHF 2.5 billion, or 8%, in obligation to return securities received as collateral and CHF 0.7 billion, or 2%, in other liabilities, partially offset by a decrease of CHF 1.0 billion, or 6%, in short-term borrowings.

► Refer to "Funding sources and uses" in Liquidity and funding management and "Capital management" for further information, including our funding of the balance sheet and the leverage ratio.

## OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

► Refer to "Balance sheet, off-balance sheet and other contractual obligations" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 and "Note 26 – Guarantees and commitments" and "Note 30 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information.

## Report of Independent Registered Public Accounting Firm

### To the Board of Directors of Credit Suisse Group AG, Zurich

We have reviewed the accompanying condensed consolidated balance sheet of Credit Suisse Group AG and subsidiaries ("the Group") as of September 30, 2017, the related condensed consolidated statements of operations, comprehensive income, and changes in equity for the three and nine-month periods ended September 30, 2017 and 2016, and the related condensed consolidated statements of cash flows for the nine-month periods ended September 30, 2017 and 2016. These condensed consolidated financial statements are the responsibility of the Group's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Group as of December 31, 2016, and the related consolidated statements of operations, comprehensive income, changes in equity, and cash flows for the year then ended (not presented herein); and in our report dated March 24, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

### Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2016 included in the Credit Suisse Annual Report 2016.

► Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for a description of the Group's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current

period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 2Q17 consolidated statements of operations and comprehensive income, the 2Q17 consolidated balance sheets and the 3Q17, 2Q17 and 3Q16 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2 Recently issued accounting standards

### Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

► Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for a description of accounting standards adopted in 2016.

### ASC Topic 350 – Intangibles – Goodwill and Other

In January 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-04, "Simplifying the Test for Goodwill Impairment" (ASU 2017-04), an update to Accounting Standards Codification (ASC) Topic 805 – Business Combinations. ASU 2017-04 simplifies the subsequent measurement of goodwill by eliminating step two from the goodwill impairment test. ASU 2017-04 is effective for annual reporting periods beginning after December 15, 2019, and for the interim periods within those annual reporting periods. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. ASU 2017-04 is to be applied on a prospective basis. The Group elected to early adopt ASU 2017-04 on January 1, 2017, which did not have a material impact on the Group's financial position, results of operations or cash flows.

### ASC Topic 718 – Compensation – Stock Compensation

In March 2016, the FASB issued ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting" (ASU 2016-09), an update to ASC Topic 718 – Compensation—Stock Compensation. The amendments in ASU 2016-09 provide simplification updates for several aspects of the accounting for share-based payment

transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The adoption of ASU 2016-09 on January 1, 2017 resulted in the recognition of previously unrecorded deferred tax asset net operating loss balances which arose due to prior tax windfalls that did not immediately result in cash tax savings. The adjustment resulted in an increase in retained earnings of CHF 85 million upon adoption.

### ASC Topic 740 – Income Taxes

In October 2016, the FASB issued ASU 2016-16, "Intra-Entity Transfers of Assets Other Than Inventory" (ASU 2016-16), an update to ASC Topic 740 – Income Taxes. The amendments in ASU 2016-16 eliminate the exception for an intra-entity transfer of an asset other than inventory. ASU 2016-16 is required to be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted. The Group elected to early adopt ASU 2016-16 on January 1, 2017, which resulted in a reclassification from other assets to deferred tax assets. The net impact upon adoption was a reduction in retained earnings of CHF 81 million.

### ASC Topic 825 – Financial Instruments – Overall

In January 2016, the FASB issued ASU 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities" (ASU 2016-01), an update to ASC Topic 825 – Financial

Instruments – Overall. The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The amendments primarily affect the accounting for equity investments, financial liabilities under the fair value option and the presentation and disclosure requirements for financial instruments. ASU 2016-01 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption of the full standard is not permitted; however, certain sections of ASU 2016-01 relating to fair value option-elected financial liabilities can be early adopted in isolation. These amendments to ASU 2016-01 require the changes in fair value relating to instrument-specific credit risk of fair value option elected financial liabilities to be presented separately in accumulated other comprehensive income (AOCI). The Group has early adopted these sections of the update on January 1, 2016. As a result of adoption, a reclassification of a gain from retained earnings to AOCI of CHF 475 million, net of tax, was recorded. The Group is currently evaluating the impact of the adoption of the remaining sections of ASU 2016-01 on the Group's financial position, results of operations and cash flows.

#### **Standards to be adopted in future periods**

##### **ASC Topic 230 – Statement of Cash Flows**

In August 2016, the FASB issued ASU 2016-15, "Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)" (ASU 2016-15), an update to ASC Topic 230 – Statement of Cash Flows. The amendments in ASU 2016-15 provide guidance regarding classification of certain cash receipts and payments where diversity in practice was observed. ASU 2016-15 is required to be applied retrospectively to all periods presented beginning in the year of adoption. ASU 2016-15 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted, including adoption in an interim period. The Group is currently evaluating the impact of the adoption of ASU 2016-15 on the Group's financial position, results of operations and cash flows.

##### **ASC Topic 326 – Financial Instruments – Credit Losses**

In June 2016, the FASB issued ASU 2016-13, "Measurement of Credit Losses on Financial Instruments" (ASU 2016-13), creating ASC Topic 326 – Financial Instruments – Credit Losses. ASU 2016-13 is intended to improve financial reporting by requiring timelier recording of credit losses on financial assets measured at amortized cost basis (including, but not limited to loans), net investments in leases recognized as lessor and off-balance sheet credit exposures. ASU 2016-13 eliminates the probable initial recognition threshold under the current incurred loss methodology for

recognizing credit losses. Instead, ASU 2016-13 requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. The Group will incorporate forward-looking information and macroeconomic factors into its credit loss estimates. ASU 2016-13 requires enhanced disclosures to help investors and other financial statement users to better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. As the Group is a US Securities and Exchange Commission (SEC) filer, ASU 2016-13 is effective for annual reporting periods beginning after December 15, 2019, and for the interim periods within those annual reporting periods. Early application will be permitted for annual reporting periods and for the interim periods within those annual reporting periods, beginning after December 15, 2018.

The Group has established a cross-functional implementation team and governance structure for the project. The Group has decided on a current expected credit loss (CECL) methodology while it is adjusting for key interpretive issues. Furthermore, the Group will continue to monitor the initial scope assessment, as a basis to determine the requirements and data sourcing of the CECL models, and to design, build and test the models until the effective date.

The Group expects that the new CECL methodology would generally result in increased and more volatile allowance for loan losses. The main impact drivers include:

- the remaining life of the loans measured at amortized cost and the off-balance sheet credit exposures at the adoption date and subsequent reporting dates because of the new requirement to measure lifetime expected credit losses;
- the point of time in the economic cycle at the adoption date and subsequent reporting dates because of the new requirement to incorporate reasonable and supportable forward-looking information and macroeconomic factors; and
- the credit quality of the loans measured at amortized cost and the off-balance sheet credit exposures at the adoption date and subsequent reporting dates.

Upon adoption of the standard, the Group expects an adjustment to be posted to retained earnings for any changes in loan losses. As the implementation progresses, the Group will continue to evaluate the extent of the impact of the adoption of ASU 2016-13 on the Group's financial position, results of operations and cash flows.

##### **ASC Topic 606 – Revenue from Contracts with Customers**

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), an update to ASC Topic 606 – Revenue from Contracts with Customers. The

core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU outlines key steps that an entity should follow to achieve the core principle. ASU 2014-09 and its subsequent amendments are effective for the annual reporting period beginning after December 15, 2017, and for the interim periods within those annual reporting periods.

The Group has established a cross-functional implementation team and governance structure for the project. The Group's implementation efforts include the identification of revenue and costs within the scope of the guidance, as well as the evaluation of revenue contracts under the new guidance and related accounting policies. The guidance does not apply to revenue associated with financial instruments, including loans and securities that are accounted for under other US GAAP guidance. To date, the recognition and timing impacts that the Group has identified relate to the timing of certain fees. The new guidance eliminates industry specific guidance and as a result will have an impact on the gross versus net presentation of certain income and expenses, for example a change from net to gross reporting of underwriting expenses and reimbursed costs from advisory activities. The changes identified thus far are not expected to have a material impact on the Group's financial position, results of operations or cash flows; however, the evaluation remains ongoing.

#### **ASC Topic 715 – Compensation – Retirement Benefits**

In March 2017, the FASB issued ASU 2017-07, "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost" (ASU 2017-07), an update to ASC Topic 715 – Compensation – Retirement Benefits. The amendments in ASU 2017-07 require that the service cost component of the net periodic benefit cost be presented in the same income statement line item(s) as other employee compensation costs arising from services rendered during the period. Other components of the net periodic benefit cost should be reported separately from the line item(s) that includes the service cost and outside of any subtotal of operating income. ASU 2017-07 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted. The Group is currently evaluating the impact of the adoption of ASU 2017-07 on the Group's financial position, results of operations and cash flows.

#### **ASC Topic 815 – Derivatives and Hedging**

In August 2017, the FASB issued ASU 2017-12, "Targeted Improvements to Accounting Hedging Activities" (ASU 2017-12), an update to ASC Topic 815 – Derivatives and Hedging. ASU 2017-12 makes changes to the hedge accounting model intended to facilitate financial reporting that more closely reflects an entity's risk management activities and to simplify application of hedge accounting. The amendments in ASU 2017-12 provide more hedging strategies that will be eligible for hedge accounting, ease the documentation and effectiveness assessment requirements and result in changes to the presentation and disclosure requirements of hedge accounting activities.

ASU 2017-12 is effective for annual reporting periods beginning after December 15, 2018, and for the interim periods within those annual reporting periods. Early adoption is permitted in any interim period after issuance. The Group is currently evaluating the impact of the adoption of ASU 2017-12 on the Group's financial position, results of operations and cash flows.

#### **ASC Topic 842 – Leases**

In February 2016, the FASB issued ASU 2016-02, "Leases" (ASU 2016-02), creating ASC Topic 842 – Leases. ASU 2016-02 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. ASU 2016-02 also includes disclosure requirements to provide more information about the amount, timing and uncertainty of cash flows arising from leases. Lessor accounting is substantially unchanged compared to the current accounting guidance. Under the current lessee accounting model, the Group is required to distinguish between finance leases, which are recognized on the balance sheet, and operating leases, which are not. ASU 2016-02 will require lessees to present a right-of-use asset and a corresponding lease liability on the balance sheet for all leases with a lease term of greater than twelve months. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and for the interim periods within those annual reporting periods.

The Group has established a cross-functional implementation team and governance structure for the project. The Group is currently reviewing its existing contracts to determine the impact of the adoption of ASU 2016-02. The Group expects an increase in total assets and total liabilities as a result of recognizing right-of-use assets and lease liabilities for all leases under the new guidance. The Group does not expect a material change to the timing of expense recognition and is currently evaluating the impact of the adoption of ASU 2016-02 on the Group's results of operations and cash flows.

### **3 Business developments**

There were no significant business developments in 3Q17.

## 4 Segment information

The Group is a global financial services company domiciled in Switzerland and serves its clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specialized in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios from the former non-strategic units plus additional businesses and

positions that do not fit with the strategic direction. The segment information reflects the Group's six reportable segments and the Corporate Center, which are managed and reported on a pre-tax basis.

► Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on segment information, revenue sharing and cost allocation and funding.

Available for common shares	244	303	41	1,143	(94)
Available for unvested share-based payment awards	0	0	0	0	3
<b>Weighted-average shares outstanding (million)</b>					
<b>Weighted-average shares outstanding for basic earnings per share available for common shares</b>	<b>2,565.5</b>	<b>2,309.6</b>	<b>2,181.0</b>	<b>2,363.1</b>	<b>2,119.0</b>
Dilutive share options and warrants	1.8	4.2	2.8	3.2	0.0
Dilutive share awards	58.8	40.3	52.9	51.4	0.0
<b>Weighted-average shares outstanding for diluted earnings per share available for common shares <sup>1</sup></b>	<b>2,626.1</b>	<b>2,354.1</b>	<b>2,236.7</b>	<b>2,417.7</b>	<b>2,119.0 <sup>2</sup></b>
<b>Weighted-average shares outstanding for basic/diluted earnings per share available for unvested share-based payment awards</b>	<b>0.1</b>	<b>0.1</b>	<b>0.2</b>	<b>0.1</b>	<b>3.9</b>
<b>Earnings/(loss) per share available for common shares (CHF)</b>					
<b>Basic earnings/(loss) per share available for common shares</b>	<b>0.10</b>	<b>0.13</b>	<b>0.02</b>	<b>0.48</b>	<b>(0.04)</b>
<b>Diluted earnings/(loss) per share available for common shares</b>	<b>0.09</b>	<b>0.13</b>	<b>0.02</b>	<b>0.47</b>	<b>(0.04)</b>

Prior periods have been adjusted to reflect the increase in the number of shares outstanding as a result of the discount element in the 2017 rights issue and scrip dividend, as required under US GAAP.

<sup>1</sup> Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 10.7 million, 10.4 million, 13.4 million, 9.6 million and 11.0 million for 3Q17, 2Q17, 3Q16, 9M17 and 9M16, respectively.

<sup>2</sup> Due to the net loss in 9M16, 2.9 million of weighted-average share options and warrants outstanding and 49.9 million of weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

## 14 Trading assets and liabilities

In accordance with US GAAP, the Group continually assesses whether or not there has been a triggering event requiring a review of goodwill. There was no triggering event in 3Q17. As of September 30, 2017, the Group's market capitalization was below book value.

On December 7, 2016, and on February 14, 2017, the Group announced a reorganization and change to financial reporting affecting its Swiss Universal Bank and Asia Pacific segments. During 1Q17, these measures were implemented. The Group determined that these changes constituted triggering events. The Group's reporting units as a result of these measures are defined as follows: Swiss Universal Bank – Private Clients (formerly Private Banking), Swiss Universal Bank – Corporate & Institutional Clients (formerly Corporate & Institutional Banking), International Wealth Management – Private Banking, International Wealth Management – Asset Management, Asia Pacific – Wealth Management & Connected (formerly Private Banking), Asia Pacific – Markets (formerly Investment Banking), Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit.

The carrying value of each reporting unit for the purpose of the goodwill impairment test is determined by considering the reporting units' risk-weighted assets usage, leverage ratio exposure, deferred tax assets, goodwill and intangible assets. Any residual

equity, after considering the total of these elements, is allocated to the reporting units on a pro-rata basis.

In estimating the fair value of its reporting units, the Group applied a combination of the market approach and the income approach. Under the market approach, consideration was given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows, which are determined from the Group's financial plan.

In determining the estimated fair value, the Group relied upon its updated five-year strategic business plan which included significant management assumptions and estimates based on its view of current and future economic conditions and regulatory changes.

Goodwill is tested for impairment before and immediately after a reorganization or restructuring of reporting units. As a result, the goodwill impairment test was performed during 1Q17 under the old business structure and then again under the modified structure according to the measures implemented in connection with the announcements on December 7, 2016 and on February 14, 2017.

The Group concluded that the estimated fair value for all of its reporting units impacted by the measures implemented in connection with the December 7, 2016 and February 14, 2017 announcements substantially exceeded their related carrying values and that no impairment was necessary.

The results of the impairment evaluation of each reporting unit's goodwill would be significantly impacted by adverse changes

in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a significant margin from its best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, the Group could potentially incur material impairment charges in the future.

## 18 Other assets and other liabilities

<sup>2</sup> At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 653,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 415,099,918 of these shares were reserved for capital instruments.

## 21 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

### Derivatives

The Group transacts bilateral OTC derivatives mainly under the International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC

derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values (PRV/NRV) and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Exchange-traded derivatives or OTC-cleared derivatives, that are fully margined and for which the daily margin payments constitute settlement of the outstanding exposure, are not included in the offsetting disclosures because they are not subject to offsetting due to the daily settlement. The daily margin payments, which are not settled until the next settlement cycle is conducted, are presented in brokerage receivables or brokerage payables. The notional amount for these daily settled derivatives is included in the fair value of derivative instruments table in "Note 25 – Derivatives and hedging activities".

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for a bifurcable hybrid debt instrument which the Group did not elect to account for at fair value. However, this bifurcated embedded derivative is not subject to an enforceable master netting agreement and is not recorded as a derivative instrument under trading assets and liabilities or other assets and other liabilities. Information on this bifurcated embedded derivative has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of

derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

### Offsetting of derivatives

<sup>1</sup> Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

### Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not

meet the criterion of having the same settlement date specified at inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

### Offsetting of securities purchased under resale agreements and securities borrowing transactions

end of	3Q17			4Q16		
	Gross	Offsetting	Net book value	Gross	Offsetting	Net book value
<b>Securities purchased under resale agreements and securities borrowing transactions (CHF billion)</b>

of which obligation to return securities received as collateral, at fair value	35.9	0.0	35.9	32.6	0.0	32.6

<sup>1</sup> Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

<sup>2</sup> CHF 17,300 million and CHF 19,634 million of the total net amount as of the end of 3Q17 and 4Q16, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and

borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

### Amounts not offset in the consolidated balance sheets

end of	3Q17				4Q16			
	Net book value	Financial instruments <sup>1</sup>	Cash collateral received/pledged <sup>1</sup>	Net exposure	Net book value	Financial instruments <sup>1</sup>	Cash collateral received/pledged <sup>1</sup>	Net exposure
<b>Financial assets subject to enforceable master netting agreements (CHF billion)</b>								
Derivatives	16.4	5.6	0.0	10.8	21.3	6.3	0.0	15.0
Securities purchased under resale agreements	82.4	82.4	0.0	0.0	73.0	73.0	0.0	0.0
Securities borrowing transactions	13.8	13.5	0.0	0.3	19.5	18.6	0.0	0.9
<b>Total financial assets subject to enforceable master netting agreements</b>	<b>112.6</b>	<b>101.5</b>	<b>0.0</b>	<b>11.1</b>	<b>113.8</b>	<b>97.9</b>	<b>0.0</b>	<b>15.9</b>
<b>Financial liabilities subject to enforceable master netting agreements (CHF billion)</b>								
Derivatives	9.3	2.2	0.0	7.1	14.0	3.3	0.0	10.7
Securities sold under repurchase agreements	21.2	21.2	0.0	0.0	22.3	22.3	0.0	0.0
Securities lending transactions	5.5	5.2	0.0	0.3	5.9	5.7	0.0	0.2
Obligation to return securities received as collateral, at fair value	32.7	30.4	0.0	2.3	31.9	30.4	0.0	1.5
<b>Total financial liabilities subject to enforceable master netting agreements</b>	<b>68.7</b>	<b>59.0</b>	<b>0.0</b>	<b>9.7</b>	<b>74.1</b>	<b>61.7</b>	<b>0.0</b>	<b>12.4</b>

<sup>1</sup> The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of credit default swaps (CDS) and credit insurance contracts.

Therefore, the net exposure presented in the table above is not representative of the Group's counterparty exposure.

## 22 Tax

The 3Q17 income tax expense of CHF 153 million includes the impact of the continuous reassessment of the estimated annual effective tax rate as well as the impact of items that need to be recorded in the specific interim period in which they occur. Further details are outlined in the tax expense reconciliation below.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of September 30, 2017, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 5.1 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 70 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Brazil – 2012; Japan – 2012; Switzerland – 2011; the US – 2010; the UK – 2009; and the Netherlands – 2006.

### Effective tax rate

in	3Q17	2Q17	3Q16	9M17	9M16
Effective tax rate (%)	38.3	47.4	83.3	30.7	(42.9)

### Tax expense reconciliation

in	3Q17
<b>CHF million</b>	
Income tax expense computed at the Swiss statutory tax rate of 22%	88
Increase/(decrease) in income taxes resulting from	
Foreign tax rate differential	22
Other non-deductible expenses	(89)
Changes in deferred tax valuation allowance	40
Lower taxed income	(20)
(Windfall tax benefits)/shortfall tax charges on share-based compensation	1
Other	111
<b>Income tax expense</b>	<b>153</b>

### Foreign tax rate differential

3Q17 included a foreign tax expense of CHF 22 million in respect of earnings in higher tax jurisdictions, such as Brazil, as well as earnings in lower tax jurisdictions, such as Singapore.

### Other non-deductible expenses

3Q17 included the reversal of non-deductible interest expenses of CHF 201 million arising from the reassessment of a previously taken tax position relating to the deductibility of such costs, partially offset by a tax expense of CHF 106 million relating to the non-deductible interest expenses and a tax expense of CHF 6 million in respect of non-deductible bank levy costs and other non-deductible expenses.

### Changes in deferred tax valuation allowance

3Q17 included the impact of the increase of valuation allowances of CHF 92 million mainly in respect of three of the Group's operating entities, two in the UK and one in Switzerland, and a decrease of valuation allowances of CHF 52 million mainly in respect of two of the Group's operating entities, one in the UK and one in Switzerland, related to estimated current year earnings.

### Lower taxed income

3Q17 included the impacts of CHF 6 million related to non-taxable life insurance income, a beneficial earnings mix in one of the Group's operating entities in Switzerland of CHF 14 million, and various smaller items.

**Other**

3Q17 included a tax expense of CHF 96 million from an adverse earnings mix in one of the Group's operating entities in Switzerland, a tax expense of CHF 55 million relating to the increase of tax contingency accruals and a tax expense of CHF 11 million from prior year adjustments, partially offset by a tax benefit of CHF 49 million from a favorable court decision and a tax benefit of CHF 20 million from own-credit revaluation losses. The remaining balance included various smaller items.

**Net deferred tax assets**

end of	3Q17	2Q17
<b>Net deferred tax assets (CHF million)</b>		
Deferred tax assets	7,503	7,542
of which net operating losses	2,666	2,787
of which deductible temporary differences	4,837	4,755
Deferred tax liabilities	(271)	(231)
<b>Net deferred tax assets</b>	<b>7,232</b>	<b>7,311</b>

**23 Employee deferred compensation**

The Group's current and previous deferred compensation plans include share awards, performance share awards, Contingent Capital Awards, Capital Opportunity Facility awards, Plus Bond awards, 2008 Partner Asset Facilities awards and other cash awards.

► Refer to "Note 29 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information.

The following tables show the compensation expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 3Q17 and prior periods and the remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized compensation expense was based on the fair value of each award on the grant date and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

**Deferred compensation expense**

in	3Q17	2Q17	3Q16	9M17	9M16
<b>Deferred compensation expense (CHF million)</b>					
Share awards	119	130	145	395	481
Performance share awards	83	87	80	268	286
Contingent Capital Awards	65	65	84	215	146
Contingent Capital share awards	4	6	10	15	16
Capital Opportunity Facility awards	3	3	4	10	10
Plus Bond awards	0	0	0	0	5 <sup>1</sup>
2008 Partner Asset Facility awards <sup>2</sup>	0	0	21	7	5
Other cash awards	130	87	107	312	242
<b>Total deferred compensation expense</b>	<b>404</b>	<b>378</b>	<b>451</b>	<b>1,222</b>	<b>1,191</b>

<sup>1</sup> Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.

<sup>2</sup> Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

**Estimated unrecognized deferred compensation**

end of	3Q17
<b>Estimated unrecognized compensation expense (CHF million)</b>	
Share awards	592
Performance share awards	249
Contingent Capital Awards	162
Contingent Capital share awards	8
Other cash awards	232
<b>Total</b>	<b>1,243</b>
<b>Weighted-average requisite service period (years)</b>	
Aggregate remaining weighted-average requisite service period	1.3

**3Q17 activity**

In 3Q17, the Group granted fixed deferred cash awards of CHF 90 million to certain employees in the US. These awards will be expensed in the Global Markets, Investment Banking & Capital Markets and International Wealth Management divisions over a three-year period from the grant date, with CHF 38 million being expensed in 3Q17.

**Share-based award activity**

	3Q17			9M17		
	Share awards	Performance share awards	Contingent Capital share awards	Share awards	Performance share awards	Contingent Capital share awards
Number of awards (in millions)						
<b>Share-based award activities</b>						
<b>Balance at beginning of period</b>	<b>87.1</b>	<b>56.5</b>	<b>8.9</b>	<b>73.2</b>	<b>48.4</b>	<b>13.5</b>
Granted	2.2	0.0	0.0	49.9 <sup>1</sup>	31.8 <sup>1</sup>	0.3 <sup>1</sup>

Forfeited	(1.8)	(1.2)	(0.2)	(3.2)	(1.6)	(0.2)
<b>Balance at end of period</b>	<b>82.9</b>	<b>54.8</b>	<b>8.6</b>	<b>82.9</b>	<b>54.8</b>	<b>8.6</b>
of which vested	6.9	5.8	1.2	6.9	5.8	1.2
of which unvested	76.0	49.0	7.4	76.0	49.0	7.4

<sup>1</sup> Includes an adjustment for share awards granted in 2Q17 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on May 18, 2017. The number of deferred share-based awards held by each individual was increased by 3.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional shares granted.

**24 Pension and other post-retirement benefits**

The Group expects to contribute CHF 442 million to the Swiss and international defined benefit plans and other post-retirement

defined benefit plans in 2017. As of the end of 3Q17, CHF 343 million of contributions have been made.

**Components of total benefit costs**

## 25 Derivatives and hedging activities

► Refer to "Note 32 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to "Note 28 – Financial instruments" for further information.

### Fair value of derivative instruments

	Trading			Hedging <sup>1</sup>

<b>Details of cash flow hedges (CHF million)</b>					
Net gains/(losses) on the ineffective portion <sup>2</sup>	(2)	(2)	(13)	(1)	18

Represents gains/(losses) on effective portion.

<sup>1</sup> Included in interest and dividend income.

<sup>2</sup> Included in trading revenues.

<sup>3</sup> Included in other revenues.

<sup>4</sup> Included in total other operating expenses.

As of the end of 3Q17, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was five years.

The net loss associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months is CHF 21 million.

### Net investment hedges

in	3Q17	2Q17	3Q16	9M17	9M16
<b>Gains/(losses) recognized in AOCI on derivatives (CHF million)</b>					
Foreign exchange products	(213)	133	(128)	(267)	(380)
<b>Total</b>	<b>(213)</b>	<b>133</b>	<b>(128)</b>	<b>(267)</b>	<b>(380)</b>

Represents gains/(losses) on effective portion.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 7 – Trading revenues" for gains and losses on trading activities by product type.

### Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch, two-notch and a three-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

## Contingent credit risk

end of	3Q17							4Q16

Impact of a one-notch downgrade event	0.2	0.1	0.1	<b>0.4</b>	0.3	0.2	0.0	<b>0.5</b>
Impact of a two-notch downgrade event	1.0	0.2	0.5	<b>1.7</b>	1.3	0.4	0.5	<b>2.2</b>
Impact of a three-notch downgrade event	1.1	0.6	0.7	<b>2.4</b>	1.5	0.7	0.7	<b>2.9</b>

The impact of a downgrade event reflects the amount of additional collateral required for bilateral counterparties and special purpose entities and the amount of additional termination expenses for accelerated terminations, respectively.

## Credit derivatives

► Refer to “Note 32 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on credit derivatives.

## Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its

underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Total return swaps (TRS) of CHF 6.4 billion and CHF 7.8 billion as of the end of 3Q17 and 4Q16, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

<sup>1</sup> Represents credit protection purchased with identical underlyings and recoveries.

<sup>2</sup> Based on internal ratings of BBB and above.

<sup>3</sup> Includes synthetic securitized loan portfolios.

### Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

### Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

### Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

### Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

### Credit derivatives

end of	3Q17	4Q16
<b>Credit derivatives (CHF billion)</b>		
Credit protection sold	242.9	238.6
Credit protection purchased	228.8	228.9
Other protection purchased	73.3	83.4
Other instruments <sup>1</sup>	6.2	7.8
<b>Total credit derivatives</b>	<b>551.2</b>	<b>558.7</b>

<sup>1</sup> Consists of total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

### Maturity of credit protection sold

end of	Maturity less than 1 year	Maturity between 1 to 5 years	Maturity greater than 5 years	Total
<b>3Q17 (CHF billion)</b>

<b>Total instruments</b>	<b>51.7</b>	<b>157.4</b>	<b>29.5</b>	<b>238.6</b>

## 26 Guarantees and commitments

### Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate the Group to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, derivatives and other guarantees. The Group no longer provides guarantees for securities lending indemnifications.

► Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a detailed description of guarantees.

## Guarantees

end of	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Carrying value	Collateral received
<b>3Q17 (CHF million)</b>						
Credit guarantees and similar instruments	1,791	1,081	2,872	2,629	21	1,649
Performance guarantees and similar instruments	4,803	2,221	7,024	6,073	28	3,011
Derivatives <sup>2</sup>	11,638	9,782	21,420	21,420	437	– <sup>3</sup>
Other guarantees	3,692	1,854	5,546	5,541	50	3,506
<b>Total guarantees</b>	<b>21,924</b>	<b>14,938</b>	<b>36,862</b>	<b>35,663</b>	<b>536</b>	<b>8,166</b>
<b>4Q16 (CHF million)</b>						
Credit guarantees and similar instruments	1,962	1,171	3,133	2,913	13	2,043
Performance guarantees and similar instruments	5,109	2,005	7,114	6,124	76	3,090
Derivatives <sup>2</sup>	15,864	7,943	23,807	23,807	684	– <sup>3</sup>
Other guarantees	3,460	2,000	5,460	5,456	44	3,668
<b>Total guarantees</b>	<b>26,395</b>	<b>13,119</b>	<b>39,514</b>	<b>38,300</b>	<b>817</b>	<b>8,801</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

<sup>3</sup> Collateral for derivatives accounted for as guarantees is not significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2017 to June 30, 2018 is CHF 0.5 billion. These deposit insurance guarantees were reflected in other guarantees.

### Representations and warranties on residential mortgage loans sold

In connection with the former Investment Banking division's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac; institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value

ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims made within the statute of limitations (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

During the first nine months of 2017, the Group received repurchase claims for residential mortgage loans that were not significant, and loans repurchased during this period and related losses were not significant. The balance of outstanding repurchase claims as of the end of 3Q17 was not significant.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in this Guarantees and commitments disclosure but are addressed in litigation and related loss contingencies and provisions. The Group is involved in litigation relating to representations and warranties on residential mortgages sold.

► Refer to "Note 30 – Litigation" for further information.

**Disposal-related contingencies and other indemnifications**

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the “Guarantees” table.

► Refer to “Disposal-related contingencies and other indemnifications” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a description of these guarantees.

**Other commitments**

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

► Refer to “Other commitments” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a description of these commitments.

**Other commitments**

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Irrevocable loan commitments do not include a total gross amount of CHF 106,901 million and CHF 95,743 million of unused credit limits as of the end of 3Q17 and 4Q16, respectively, which were revocable at the Group's sole discretion upon notice to the client.

**27 Transfers of financial assets and variable interest entities**

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

**TRANSFERS OF FINANCIAL ASSETS****Securitizations**

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities

(CMBS), RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include managed collateralized loan obligations (CLOs), CLOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CLOs are collateralized by loans transferred to the CLO vehicle and pay a return based on the returns on the loans. Leveraged finance structures are used to assist in

the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and loans involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 9M17 and 9M16 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group maintained continuing involvement from the time of the transaction, regardless of when the securitization occurred.

## Securitizations

in	9M17	9M16
<b>Gains and cash flows (CHF million)</b>		
<b>CMBS</b>		
Net gain <sup>1</sup>	32	0
Proceeds from transfer of assets	4,234	3,315
Cash received on interests that continue to be held	23	53
<b>RMBS</b>		
Net gain/(loss) <sup>1</sup>	3	(1)
Proceeds from transfer of assets	11,329	7,706
Servicing fees	2	2
Cash received on interests that continue to be held	225	394
<b>Other asset-backed financings</b>		
Net gain <sup>1</sup>	31	22
Proceeds from transfer of assets	5,833	1,963
Fees <sup>2</sup>	93	93
Cash received on interests that continue to be held	4	2

<sup>1</sup> Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

<sup>2</sup> Represents management fees and performance fees earned for investment management services provided to managed CLOs.

## Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

► Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 3Q17 and 4Q16, regardless of when the transfer of assets occurred.

## Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	3Q17	4Q16
<b>CHF million</b>		
<b>CMBS</b>		
Principal amount outstanding	20,968	28,779
Total assets of SPE	31,424	40,234
<b>RMBS</b>		
Principal amount outstanding	35,152	38,319
Total assets of SPE	36,310	39,680
<b>Other asset-backed financings</b>		
Principal amount outstanding	20,295	19,777
Total assets of SPE	36,348	36,049

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

## Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

### Key economic assumptions at the time of transfer

► Refer to "Note 28 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in	9M17		9M16	
	CMBS	RMBS	CMBS	RMBS
<b>CHF million, except where indicated</b>				
Fair value of beneficial interests	71	1,323	42	1,499
of which level 2	71	1,254	42	1,396
of which level 3	0	69	0	103
Weighted-average life, in years	10.4	8.1	10.7	6.4
Prepayment speed assumption (rate per annum), in % <sup>1</sup>	– <sup>2</sup>	5.0–17.9	– <sup>2</sup>	8.0–33.0
Cash flow discount rate (rate per annum), in % <sup>3</sup>	2.4–3.5	2.0–9.9	2.4–4.9	1.4–24.4
Expected credit losses (rate per annum), in %	0.6–0.6	0.8–2.1	0.0–0.0	11.2–11.2

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

<sup>1</sup> Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>2</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>3</sup> The rate was based on the weighted-average yield on the beneficial interests.

### Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 3Q17 and 4Q16.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

end of	3Q17			4Q16		
	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>
<b>CHF million, except where indicated</b>						
Fair value of beneficial interests	200	1,571	608	258	1,851	443
of which non-investment grade	91	314	32	70	523	32
Weighted-average life, in years	6.3	8.1	6.0	7.2	8.1	5.6
Prepayment speed assumption (rate per annum), in % <sup>3</sup>	–	1.0–21.1	–	–	2.0–26.9	–
Impact on fair value from 10% adverse change	–	(23.7)	–	–	(28.7)	–
Impact on fair value from 20% adverse change	–	(46.4)	–	–	(55.9)	–
Cash flow discount rate (rate per annum), in % <sup>4</sup>	2.2–13.1	1.6–30.9	1.0–29.0	2.3–28.8	1.7–47.2	0.8–21.2
Impact on fair value from 10% adverse change	(4.2)	(36.5)	(30.2)	(6.0)	(48.1)	(8.3)
Impact on fair value from 20% adverse change	(8.2)	(71.1)	(48.2)	(11.7)	(93.5)	(16.4)
Expected credit losses (rate per annum), in %	0.6–11.9	0.8–28.7	1.1–28.0	0.7–28.0	0.9–44.9	0.9–21.2
Impact on fair value from 10% adverse change	(2.5)	(18.2)	(7.9)	(3.5)	(27.3)	(5.1)
Impact on fair value from 20% adverse change	(4.9)	(35.7)	(29.3)	(6.9)	(53.3)	(10.0)

<sup>1</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>2</sup> CDOs and CLOs within this category are generally structured to be protected from prepayment risk.

<sup>3</sup> PSA is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the CPR assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>4</sup> The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

#### Transfers of financial assets where sale treatment was not achieved

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 3Q17 and 4Q16.

► Refer to "Note 29 – Assets pledged and collateral" for further information.

#### Transfers of financial assets accounted for as a sale

US GAAP requires the disclosure of a transaction accounted for as a sale that comprises both of the following: a transfer of financial assets to a transferee and an agreement entered into in contemplation of the initial transfer with the transferee that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. In the ordinary course of business, the Group transfers a financial asset accounted for as a sale and, in some instances, enters into an agreement in contemplation of that initial transfer with the same counterparty to retain substantially all of the economics of that transferred financial asset. As of the end of 3Q17 and 4Q16, the Group had agreements in the form of longevity swaps on life insurance policies.

The following table presents information about the transfers of financial assets accounted for as sales with agreements that result in the Group retaining substantially all of the exposure to the economic return on the transferred assets at the date of sale and remain outstanding as of the end of 3Q17 and 4Q16, respectively, gross cash proceeds received for assets derecognized at the date of sale and the fair values of transferred assets and the aforementioned agreements as of the end of 3Q17 and 4Q16.

#### Transfer of financial assets accounted for as sales – by transaction type

	at date of derecognition		end of		
	Carrying amount derecognized	Gross cash proceeds received for assets derecognized	Fair value of transferred assets	Gross derivative assets recorded <sup>1</sup>	Gross derivative liabilities recorded <sup>1</sup>
<b>3Q17 (CHF million)</b>					
Sales with longevity swaps	262	322	355	523	–
<b>Total transactions outstanding</b>	<b>262</b>	<b>322</b>	<b>355</b>	<b>523 <sup>2</sup></b>	<b>0</b>
<b>4Q16 (CHF million)</b>					
Sales with longevity swaps	277	340	374	556	–
<b>Total transactions outstanding</b>	<b>277</b>	<b>340</b>	<b>374</b>	<b>556 <sup>2</sup></b>	<b>0</b>

<sup>1</sup> Balances presented on a gross basis, before application of counterparty and cash collateral netting.

<sup>2</sup> As of the end of 3Q17 and 4Q16, gross derivative assets of CHF 523 million and CHF 556 million, respectively, were included in other products, as disclosed in Note 25 – Derivatives and hedging activities.

### Securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings

For securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings, US GAAP requires the disclosure of the collateral pledged and the associated risks to which a transferor continues to be exposed after the transfer. This provides an understanding of the nature and risks of short-term collateralized financing obtained through these types of transactions.

Securities sold under repurchase agreements and securities lending transactions represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activities. These transactions are collateralized principally by government debt securities, corporate debt securities, asset-backed securities, equity securities and other collateral and have terms ranging from on demand to a longer period of time.

In the event of the Group's default or a decline in fair value of collateral pledged, the repurchase agreement provides the counterparty with the right to liquidate the collateral held or request additional collateral. Similarly, in the event of the Group's default, the securities lending transaction provides the counterparty the right to liquidate the securities borrowed.

The following tables provide the gross obligation relating to securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as

collateral by the class of collateral pledged and by remaining contractual maturity as of the end of 3Q17 and 4Q16.

### Securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral – by class of collateral pledged

<sup>1</sup> Includes contracts with no contractual maturity that may contain termination arrangements subject to a notice period.

<sup>2</sup> Includes overnight transactions.

► Refer to "Note 21 – Offsetting of financial assets and financial liabilities" for further information on the gross amount of securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral and the net amounts disclosed in the consolidated balance sheets.

## VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered variable interest entities (VIEs) and are grouped into three primary categories: collateralized debt obligations (CDOs)/CLOs, CP conduits and financial intermediation.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for a detailed description of VIEs, CDO/CLOs, CP conduit or financial intermediation.

### Collateralized debt and loan obligations

The Group engages in CDO/CLO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

### Commercial paper conduit

In 2Q16, the Group established Alpine Securitization Ltd (Alpine), a multi-seller asset-backed CP conduit used for client and Group financing purposes. The Group acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. The CP conduit can enter into liquidity facilities with third-party entities pursuant to which it may purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support to the CP conduit in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting

purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 164 days as of the end of 3Q17. Alpine was rated A-1(sf) by Standard & Poor's and P-1(sf) by Moody's and had exposures mainly in a reverse repurchase agreement, credit card receivables, student loans and car loans.

The Group's commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Group's economic risks associated with the CP conduit are included in the Group's risk management framework including counterparty, economic risk capital and scenario analysis.

### Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

### Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 3Q17 and 4Q16.

## Consolidated VIEs in which the Group was the primary beneficiary

### Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory,

certain repurchase financings to funds and single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for further information on non-consolidated VIEs.

## 28 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes);
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

### CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's concentrations of credit risk.

### FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on fair value measurement of financial instruments and the definition of the levels of the fair value hierarchy.

<sup>1</sup> Derivative contracts are reported on a gross basis by level. The impact of netting represents legally enforceable master netting agreements.

<sup>2</sup> In accordance with US GAAP, certain investments that are measured at fair value using the net asset value per share practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the consolidated balance sheet.

<sup>1</sup> Derivative contracts are reported on a gross basis by level. The impact of netting represents legally enforceable master netting agreements.

<sup>2</sup> In accordance with US GAAP, certain investments that are measured at fair value using the net asset value per share practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the consolidated balance sheet.

## Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 9M17, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers from trading assets were mainly in exchange traded derivatives and equity securities as prices became observable. The transfers from trading liabilities were primarily in exchange traded derivatives as prices became observable.

In 9M17, transfers out of level 1 to level 2 were primarily from trading assets, mainly in debt and equity securities, for which suitable closing prices were unobtainable as of the end of 9M17.

<sup>1</sup> For all transfers to level 3 or out of level 3, the Group determines and discloses as level 3 events only gains or losses through the last day of the reporting period.

<sup>2</sup> Includes unrealized losses recorded in trading revenues of CHF (48) million primarily related to subprime exposures in securitized products business and market movements across the wider loans held-for-sale portfolio.

	Trading revenues	Other revenues	Total revenues	Trading revenues	Other revenues	Total revenues
<b>Gains and losses on assets and liabilities (CHF million)</b>						
Net realized/unrealized gains/(losses) included in net revenues	(979)	(221)	<b>(1,200)<sup>1</sup></b>	(575)	(41)	<b>(616)<sup>1</sup></b>
Whereof:						
Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date	(1,194)	107	<b>(1,087)</b>	(239)	3	<b>(236)</b>

<sup>1</sup> Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

**Transfers in and out of level 3**

Transfers into level 3 assets during 9M17 were CHF 2,002 million, primarily from loans and trading assets. The transfers were primarily in the credit, fixed income and financing businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 9M17 were CHF 2,390 million, primarily in trading assets and loans. The transfers were primarily in the Strategic Resolution Unit and credit businesses due to increased observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 3Q17 were CHF 764 million, primarily from loans and trading assets. The transfers were primarily in the Strategic Resolution Unit, credit, fixed income and financing businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 3Q17 were CHF 683 million, primarily in trading assets and loans. The transfers were primarily in the Strategic Resolution Unit and credit businesses due to increased observability of pricing data and increased availability of pricing information from external providers.

**Qualitative disclosures of valuation techniques**
**Overview**

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that

define the principles for controlling the valuation of the Group's financial instruments.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's valuation control framework.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables "Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

**Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions**

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. The significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

**Debt securities**

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt

securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price and correlation. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

#### CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity, discount rate and credit spread. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual

rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

#### Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include market comparable price and earnings before interest, taxes, depreciation and amortization (EBITDA) multiple.

#### Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

The valuation of derivatives includes an adjustment for the cost of funding uncollateralized OTC derivatives.

#### Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the

anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility skew, prepayment rate and basis spread.

#### Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate, correlation and contingent probability.

#### Equity and index-related derivatives

Equity derivatives include a variety of products ranging from vanilla options and swaps to exotic structures with bespoke payoff profiles. The main inputs in the valuation of equity derivatives may include volatility, buyback probability, gap risk, correlation and price.

Generally, the interrelationship between the volatility and correlation is positively correlated.

#### Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread and correlation. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

#### Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which

examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

#### Other investments

##### Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published net asset values (NAVs) as permitted by ASC Topic 820 – Fair Value Measurement. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not in line with the fund's observable market data, it is probable that the investment will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs. The investments for which the fair value is measured using the NAV practical expedient are not categorized within the fair value hierarchy.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

#### Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

#### Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a loan pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available. The fair value of the consolidated financial assets of RMBS and CMBS securitization vehicles, which qualify as CFEs, are measured on the basis of the more observable fair value of the VIEs' financial liabilities.

Accrual based loans in the Group's private, corporate and institutional banking businesses, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted

discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

#### Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

#### Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcable and non-bifurcable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buy-back probability, gap risk, correlation, volatility, credit spread, mean reversion and price.

Generally, the interrelationships between volatility, correlation, gap risk and credit spread inputs are positively correlated.

#### Other liabilities

##### Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

#### Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

### Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of EBITDA multiple, market implied life expectancy (for life finance instruments), buyback probability, correlation, contingent probability, price, volatility, volatility skew or funding spread, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of market implied life expectancy (for life settlement and premium finance instruments), capitalization rate, discount rate, prepayment rate, gap risk, recovery rate or credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, in general, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input mean reversion would increase the fair value. An increase in the

significant unobservable input basis spread would decrease the fair value.

### Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

### Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

### Quantitative information about level 3 assets at fair value

### Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above results in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

#### Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

#### Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates to collateral with a greater risk of default.

#### Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

#### Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

#### Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

#### Volatility and volatility skew

Volatility and its skew are both impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility may vary significantly between different underlying currencies and expiration dates on the options. Similarly, in the case of equity derivatives, the volatility attributed to a structure may vary depending upon the underlying reference name on the derivative.

#### Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of the insured.

#### Price

Bond equivalent price is a primary significant unobservable input for multiple products. Where market prices are not available for an instrument, benchmarking may be utilized to identify comparable issues (same industry and similar product mixes) while adjustments are considered for differences in deal terms and performance.

#### Buyback probability

Buyback probability is the probability assigned to structured notes being unwound prior to their legal maturity.

#### Gap risk

Gap risk is the primary significant unobservable input for fund-linked Constant Proportion Portfolio Insurance products and structures where the payoff may be sensitive to discontinuity in the hedging portfolio.

#### Mean reversion

Mean reversion is the primary significant unobservable input for callable constant maturity swap (CMS) spread exotics and represents the idea that prices and returns eventually move back towards the historical average.

#### Funding spread

Funding spread is the primary significant unobservable input for special purpose vehicle funding facilities. Synthetic funding curves which represent the assets pledged as collateral are used to value structured financing transactions. The curves provide an estimate of where secured funding can be sourced and are expressed as a basis point spread in relation to the referenced benchmark rate.

#### Capitalization rate

Capitalization rate is the primary significant unobservable input for CMBS loans and is used to estimate the potential return on investment. This is done by dividing the yearly income by the total value of the property.

#### Basis spread

Basis spread is the primary significant unobservable input for non-callable constant maturity treasury-CMS products and is used to determine interest rate risk as a result of differing lending and borrowing rates.

### EBITDA multiple

EBITDA multiple is a primary significant unobservable input for some equity deals which are benchmarked using industry comparables. The EBITDA multiple may be preferred over other measures because it is normalized for differences between the accounting policies of similar companies.

### Contingent probability

Contingent probability is the primary significant unobservable input for contingent foreign exchange forward trades where the delivery or exercise and the premium payment are contingent on an event such as completion of an M&A deal or regulatory approval for a product.

### Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount

of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which is generally up to 10 years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

### Fair value, unfunded commitments and term of redemption conditions

<sup>2</sup> 58% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period primarily of less than 30 days, 23% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 17% is redeemable on a quarterly basis with a notice period primarily of more than 45 days, and 2% is redeemable on an annual basis with a notice period of more than 60 days.

<sup>3</sup> 51% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 45 days, 42% is redeemable on a monthly basis with a notice period primarily of less than 30 days, and 7% is redeemable on demand with a notice period primarily of less than 30 days.

<sup>4</sup> 68% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 26% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 5% is redeemable on demand with a notice period primarily of less than 30 days, and 1% is redeemable on an annual basis with a notice period primarily of more than 45 days.

<sup>5</sup> Includes CHF 219 million and CHF 334 million attributable to noncontrolling interests in 3Q17 and 4Q16, respectively.

<sup>6</sup> Includes CHF 105 million and CHF 231 million attributable to noncontrolling interests in 3Q17 and 4Q16, respectively.

<sup>7</sup> Includes CHF 69 million and CHF 88 million attributable to noncontrolling interests in 3Q17 and 4Q16, respectively.

### Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use. Nonrecurring measurements are completed as of the end of the period unless otherwise stated.

### Nonrecurring fair value changes

### FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in the investment banking businesses and International Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's election of the fair value option for certain of its financial statement captions.

### Difference between the aggregate fair value and the aggregate unpaid principal balances of loans and financial instruments

<sup>2</sup> Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

## 29 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

### Assets pledged

end of	3Q17	4Q16
<b>Assets pledged (CHF million)</b>		
Total assets pledged or assigned as collateral	117,553	122,805
of which encumbered	72,209	83,473

### Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

### Collateral

end of	3Q17	4Q16
<b>Collateral (CHF million)</b>		
Fair value of collateral received with the right to sell or repledge	429,171	402,690
of which sold or repledged	169,464	167,487

## 30 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 39 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016* and updated in subsequent quarterly reports (including those discussed below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably

estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings.

Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 39 referenced above and updated in quarterly reports (including below) for which the Group believes an estimate is possible is zero to CHF 1.3 billion.

In 3Q17, the Group recorded net litigation provisions of CHF 162 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

#### **Enron-related litigation**

On September 27, 2017, following a settlement, an order of final judgment was entered by the US District Court for the Southern District of Texas, presiding in the action brought by Connecticut Resources Recovery Authority, dismissing with prejudice all claims against Credit Suisse Securities (USA) LLC (CSS LLC) and its affiliates.

#### **Mortgage-related matters**

##### **Civil litigation**

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

##### **Individual investor actions**

On September 12, 2017, following a settlement, the US District Court for the District of Massachusetts, presiding in the two actions brought by Massachusetts Mutual Life Insurance

Company, dismissed with prejudice all claims against CSS LLC and its employees related to approximately USD 107 million of RMBS at issue.

On October 30, 2017, CSS LLC reached an agreement in principle with CMFG Life Insurance Company and affiliated entities to settle the action brought against CSS LLC relating to approximately USD 62 million of RMBS.

#### **Rates-related matters**

Regulatory authorities in a number of jurisdictions, including the Swiss Competition Commission, the European Competition Commission, the South African Competition Commission, the Brazilian Competition Authority and the New York Department of Financial Services, have been conducting investigations into the trading activities, information sharing and the setting of benchmark rates in the foreign exchange (including electronic trading) markets. On March 31, 2014, the Swiss Competition Commission announced a formal investigation of numerous Swiss and international financial institutions, including the Group, in relation to the setting of exchange rates in foreign exchange trading. The Group is cooperating fully with these investigations.

On September 29, 2017, the US District Court for the Southern District of New York (SDNY) in the multi-district litigation concerning US Dollar LIBOR dismissed without prejudice Credit Suisse AG from the remaining non-stayed putative class action on the ground that there were no remaining class representatives with claims against any Credit Suisse entity.

On September 25, 2017, the SDNY granted defendants' motion to dismiss all claims against Credit Suisse Group AG and other defendants in the putative class action relating to Swiss franc LIBOR. The SDNY has granted plaintiffs leave to file an amended complaint by November 6, 2017.

On August 18, 2017, the SDNY dismissed all claims against Credit Suisse Group AG and affiliates in the putative class action lawsuit relating to the Singapore Interbank Offered Rate and Singapore Swap Offer Rate. On September 18, 2017, the plaintiffs filed an amended complaint. On October 18, 2017, defendants filed motions to dismiss the amended complaint.

On August 11, 2017, defendants filed motions to dismiss the consolidated putative class action complaint in the SDNY alleging manipulation of the foreign exchange market on behalf of indirect purchasers of foreign exchange instruments.

On August 23, 2017, the SDNY appointed lead counsel in the consolidated putative class actions relating to the US treasury markets. On August 25, 2017, three purported class representatives re-filed their complaints as a collective individual action.

On July 28, 2017, the SDNY granted in part and denied in part defendants' motion to dismiss plaintiffs' consolidated putative civil class action complaint and plaintiffs' consolidated individual complaint, relating to interest rate swaps.

On October 6, 2017, in response to defendants' motions to dismiss the putative class action in the SDNY relating to supranational, sub-sovereign, and agency bonds, plaintiffs filed a motion for leave to file a consolidated amended class action complaint.

On August 17, 2017, Credit Suisse Group AG and affiliates, along with other financial institutions, were named in a civil putative class action lawsuit filed in the SDNY, alleging that defendants conspired to keep stock loan trading fixed in an over-the-counter market and collectively boycotted certain trading platforms which sought to enter the market.

#### **CDS-related matters**

On September 11, 2017, defendants filed motions to dismiss the civil action in the SDNY filed by Tera Group, Inc. and related entities alleging violations of antitrust law by credit default swap dealers.

#### **ATA litigation**

On September 11, 2017, Credit Suisse AG and other defendants served motions to dismiss the plaintiffs' amended complaint in the case filed against a number of banks alleging claims under the United States Anti-Terrorism Act (ATA) that was transferred to the US District Court for the Eastern District of New York (EDNY) by order dated April 12, 2017. On October 3, 2017, the plaintiffs filed a stipulation of voluntary dismissal and withdrew their complaint. The separate lawsuit that was filed on November 10, 2014 in the EDNY against a number of banks, including Credit Suisse AG, alleging claims under the ATA, remains pending.

#### **Customer account matters**

In connection with claims that a former relationship manager in Switzerland had exceeded his investment authority, civil liability lawsuits were initiated on August 25, 2017 in the High Court of Singapore, the High Court of New Zealand and the Supreme Court of Bermuda against Credit Suisse AG and certain affiliates, based on the findings established in the criminal proceedings against the former relationship manager.

#### **Tax and securities law matters**

On May 19, 2014, Credit Suisse AG entered into settlement agreements with several US regulators regarding its US cross-border matters, including the New York State Department of Financial Services (DFS). As part of the settlement, Credit Suisse AG, among other things, engaged an independent corporate monitor that reports to the DFS (a separate position from the independent consultant agreed to in the settlement with the SEC) and provides ongoing reports to various agencies. Credit Suisse AG is paying for the cost of the monitor. Credit Suisse AG is presently in discussions with the DFS regarding a potential limited extension of the monitor's term.

### **31 Subsidiary guarantee information**

Certain wholly owned finance subsidiaries of the Group, including Credit Suisse Group Funding (Guernsey) Limited, which is a Guernsey incorporated non-cellular company limited by shares, have issued securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law for the Guernsey subsidiary, applicable to some of the Group's subsidiaries that may limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against

Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

As part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing intermediate holding companies in the US for non-US banks, legal entities are re-parented as subsidiaries of Credit Suisse (USA), Inc.

In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division, during 1Q17, the equity stakes in Neue Aargauer Bank AG, BANK-now AG and Swisscard AECS GmbH held by the Group were transferred to Credit Suisse (Schweiz) AG, a wholly owned subsidiary of the Bank.

Prior periods are restated to conform to the current presentation to reflect the impact of such transactions.

### Cautionary statement regarding forward-looking information

This document contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries or in emerging markets in 2017 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including cost efficiency, net new asset, pre-tax income/(loss), capital ratios and return on regulatory capital, leverage exposure threshold, risk-weighted assets threshold and other targets and ambitions;

- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyberattacks on our business or operations;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- the potential effects of proposed changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2016.

## Explanatory note

On July 28, 2017, the Credit Suisse Financial Report 2Q17 was published. A copy of the Financial Report is attached as an exhibit to this report on Form 6-K. This report on Form 6-K (including the exhibits hereto) is hereby (i) incorporated by reference into the Registration Statement on Form F-3 (file no. 333-218604) and the Registration Statements on Form S-8 (file nos. 333-101259, 333-208152 and 333-217856), and (ii) shall be deemed to be “filed” for purposes of the Securities Exchange Act of 1934, as amended, except, in the case of both (i) and (ii), (a) the section entitled “Differences between Group and Bank” and any exhibits hereto or information contained therein which relate exclusively to Credit Suisse AG or the Bank shall not be incorporated by reference into, or be deemed “filed”, with respect to the Registration Statements on Form S-8 (file nos. 333-101259, 333-208152 and 333-217856) and (b) the sections of the attached Financial Report entitled “Investor information” and “Financial calendar and contacts” shall not be incorporated by reference into, or be deemed “filed”, with respect to any such Registration Statements.

Credit Suisse Group AG and Credit Suisse AG file an annual report on Form 20-F and file quarterly reports, including unaudited interim financial information, and furnish or file other reports on Form 6-K with the US Securities and Exchange Commission (SEC) pursuant to the requirements of the Securities Exchange Act of 1934, as amended. The SEC reports of Credit Suisse Group AG and Credit Suisse AG are available to the public over the internet at the SEC’s website at [www.sec.gov](http://www.sec.gov) and from the SEC’s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549 (telephone 1-800-SEC-0330). The SEC reports of Credit Suisse Group AG and Credit Suisse AG are also available under “Investor Relations” on Credit Suisse Group AG’s website at [www.credit-suisse.com](http://www.credit-suisse.com) and at the offices of the New York Stock Exchange, 20 Broad Street, New York, NY 10005.

Unless the context otherwise requires, references herein to “Credit Suisse Group,” “Credit Suisse,” “the Group,” “we,” “us” and “our” mean Credit Suisse Group AG and its consolidated subsidiaries and the term “the Bank” means Credit Suisse AG, the direct bank subsidiary of the Group, and its consolidated subsidiaries.

SEC regulations require certain information to be included in registration statements relating to securities offerings. Such additional information for the Group and the Bank is included in this report on Form 6-K, which should be read together with the Group’s and the Bank’s annual report on Form 20-F for the year ended December 31, 2016 (Credit Suisse 2016 20-F) filed with the SEC on March 24, 2017, the Group’s financial report for the first quarter of 2017 (Credit Suisse Financial Report 1Q17), filed with the SEC on Form 6-K on May 4, 2017, and the Group’s financial report for the second quarter of 2017 (Credit Suisse Financial Report 2Q17), filed with the SEC as Exhibit 99.1 hereto.

The Bank, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. The Bank’s registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to “CHF” are to Swiss francs.

## Forward-looking statements

This Form 6-K and the information incorporated by reference in this Form 6-K include statements that constitute forward-looking statements. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Credit Suisse 2016 20-F, and subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC and the Group’s and the Bank’s reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

[illegible]

## Results summary

In 6M17, Credit Suisse reported net income attributable to shareholders of CHF 899 million compared to a net loss attributable to shareholders of CHF 132 million in 6M16.

**Net revenues** of CHF 10,739 million increased 10% compared to 6M16, primarily reflecting lower negative net revenues in the Strategic Resolution Unit and higher net revenues in Global Markets, Investment Banking & Capital Markets and International Wealth Management.

**Provision for credit losses** of CHF 135 million primarily reflected net provisions of CHF 46 million in Swiss Universal Bank, CHF 37 million in the Strategic Resolution Unit, CHF 19 million in Investment Banking & Capital Markets and CHF 17 million in Global Markets. The net increase in provision for credit losses of CHF 13 million from CHF 122 million in 6M16 was mainly related to increases of CHF 31 million in Swiss Universal Banking, CHF 22 million in Asia Pacific and CHF 11 million in Global Markets, partially offset by a decrease of CHF 41 million in the Strategic Resolution Unit.

**Total operating expenses** of CHF 9,352 million decreased 6% compared to 6M16, primarily reflecting lower general and administrative expenses, mainly due to lower professional services expenses, and lower restructuring expenses. We incurred CHF 206 million of restructuring expenses in 6M17 in connection with our strategy, of which CHF 179 million related to compensation and benefits.

**Income tax expense** of CHF 354 million recorded in 6M17 mainly reflected the impact of the geographical mix of results and the impact from shortfall tax charges on share-based compensation, partially offset by the impact of deferred tax asset re-assessments in Switzerland, a re-assessment relating to the tax deductibility on previously taken litigation accruals and a release of tax contingency accruals. Overall, net deferred tax assets increased CHF 1,612 million to CHF 7,311 million as of the end of 6M17 compared to the end of 2016, mainly driven by intra-entity asset transfer rules, share-based payments and the Swiss deferred tax asset re-assessment, partially offset by earnings and a foreign exchange impact. Deferred tax assets on net operating losses increased CHF 609 million to CHF 2,787 million during 6M17. The Credit Suisse effective tax rate was 28.3% in 6M17, compared to 55.4% in 6M16. The 6M17 effective tax rate was negatively impacted by an additional tax charge of CHF 95 million arising from the shortfall tax charges. The effective tax rate excluding the shortfall tax charges (net of valuation allowances) was 21.9%.

## Segment results

In 6M17, **Swiss Universal Bank** reported income before taxes of CHF 906 million and net revenues of CHF 2,759 million. Compared to 6M16, net revenues were slightly higher, mainly due to slightly higher net interest income, slightly higher recurring commissions and fees and slightly higher transaction-based revenues.

Net revenues in *Private Clients* were stable compared to 6M16, reflecting slightly lower transaction-based revenues while net interest income and recurring commissions and fees were stable. Transaction-based revenues decreased slightly, reflecting lower revenues from trading services and lower fees from foreign exchange client business. Transaction-based revenues also included a gain from the sale of an investment, offset by the absence of proceeds from the sale of our equity stake in Visa Europe Ltd. to Visa Inc. in 2Q16. Net interest income was stable compared to 6M16 with higher deposit margins and stable loan margins on slightly higher average deposit and loan volumes. Recurring commissions and fees were stable, mainly due to higher revenues from wealth structuring solutions and higher investment advisory fees, offset by lower discretionary mandate management fees.

Net revenues in *Corporate & Institutional Clients* increased 6% compared to 6M16, reflecting higher net interest income, transaction-based revenues and recurring commissions and fees. Net interest income was 6% higher with stable loan margins on stable average loan volumes and lower deposit margins on higher average deposit volumes. Transaction-based revenues increased 6%, primarily due to strong revenues from our Swiss investment banking business and our profit share on the sale of an investment, partially offset by lower revenues from trading services. Recurring commissions and fees were 6% higher, primarily reflecting increased fees from lending activities and higher security account and custody services fees, partially offset by lower discretionary mandate management fees and lower revenues from wealth structuring solutions.

In 6M17, we recorded a provision for credit losses of CHF 46 million compared to CHF 15 million recorded in 6M16.

Total operating expenses were stable compared to 6M16 with higher general and administrative expenses and higher commission expenses, offset by lower compensation and benefits.

In 6M17, **International Wealth Management** reported income before taxes of CHF 656 million and net revenues of CHF 2,485 million. Net revenues increased 7% compared to 6M16, primarily reflecting higher recurring commissions and fees and, within *Private Banking*, higher net interest income and higher transaction- and performance-based revenues, partially offset by lower other revenues which included the impact of lower investment-related gains in *Asset Management*.

Net revenues in *Private Banking* increased 9% compared to 6M16, primarily driven by higher net interest income, higher recurring commissions and fees and higher transaction- and performance-based revenues. Net interest income increased 12%, reflecting higher loan and deposit margins on higher average loan and deposit volumes. Recurring commissions and fees increased 8%, primarily driven by higher investment product management fees, higher security account and custody services fees, higher revenues from wealth structuring solutions and higher banking services fees, partially offset by a decline in discretionary mandate management fees. Transaction- and performance-based revenues increased 5%, mainly driven by higher brokerage and product issuing fees and higher fees from foreign exchange client business, partially offset by lower revenues from trading services.

Net revenues in *Asset Management* were slightly higher compared to 6M16, as an increase in management fees and performance and placement revenues was partially offset by lower investment and partnership income. Management fees increased 18% and included the impact of higher average assets under management. Performance and placement revenues increased 25% primarily from higher placement fees and higher performance fees, partially offset by lower investment-related gains. Investment and partnership income decreased 48%, mainly as 6M16 included a residual gain from a private equity interest and an investment gain from Asset Management Finance LLC.

In 6M17, we recorded a provision for credit losses of CHF 10 million compared to CHF 14 million recorded in 6M16.

Total operating expenses were slightly higher compared to 6M16, with higher compensation and benefits and higher restructuring expenses of CHF 43 million in 6M17 compared to CHF 23 million in 6M16, partially offset by lower general and administrative expenses.

In 6M17, **Asia Pacific** reported income before taxes of CHF 335 million and net revenues of CHF 1,729 million. Compared to 6M16, net revenues decreased 5%, primarily driven by lower revenues in our *Markets* business, partially offset by higher revenues in the *Wealth Management & Connected* business.

Net revenues in our *Wealth Management & Connected* business increased 33% compared to 6M16, mainly reflecting increases in advisory, underwriting and financing revenues, transaction-based revenues, net interest income and recurring commissions and fees. The increase in advisory, underwriting and financing revenues was mainly due to higher financing and debt underwriting revenues, partially offset by lower advisory fees from M&A transactions. Financing revenues in 6M17 included a positive net fair value impact of CHF 43 million on a portfolio of impaired loans in recovery management and additional revenues related to the recovery of interest payments on a portfolio of previously impaired loans. The increase in transaction-based revenues reflected higher brokerage and product issuing fees and higher corporate advisory fees arising from integrated solutions, partially offset by the absence of a dividend from an equity participation in 6M16. The increase in net interest income reflected stable deposit margins on higher average deposit volumes and slightly lower loan margins on higher average loan volumes. The increase in recurring commissions and fees was mainly due to higher investment product management, wealth structuring solutions and discretionary mandate management fees.

Net revenues in our *Markets* business decreased 39% compared to 6M16, due to lower fixed income and equity sales and trading revenues. Fixed income sales and trading revenues decreased primarily driven by lower revenues from developed markets rates products, partially offset by higher revenues from credit products. Equity sales and trading revenues decreased mainly due to lower revenues from equity derivatives reflecting lower client activity and market volatility and the absence of the positive impact of CHF 65 million in 6M16 in equity derivatives resulting from a recalibration of the valuation model for certain hybrid instruments.

In 6M17, we recorded a provision for credit losses of CHF 3 million compared to a release of provision for credit losses of CHF 19 million recorded in 6M16.

Total operating expenses increased slightly compared to 6M16, reflecting higher general and administrative expenses and increased restructuring expenses, partially offset by lower compensation and benefits and lower commission expenses.

In 6M17, **Global Markets** reported income before taxes of CHF 574 million and net revenues of CHF 3,126 million. Net revenues increased 9% compared to 6M16, primarily driven by significantly improved operating conditions, particularly in our credit franchises.

Revenues from credit of CHF 1,818 million increased 61% compared to 6M16, due to substantially higher results in our securitized products business and higher global credit products revenues. Securitized products trading revenues increased, reflecting significantly higher agency and non-agency trading revenues compared to subdued prior period results. Global credit products revenues were higher, as an industry-wide increase in leveraged finance issuance activity led to higher secondary activity.

Revenues from equities of CHF 934 million increased slightly compared to 6M16, driven by higher cash equities revenues reflecting higher industry-wide issuance activity and higher secondary trading revenues. In addition, prime services revenues were stable.

Solutions revenues of CHF 457 million declined 39% compared to 6M16, reflecting difficult operating conditions across global macro products and equity derivatives, partially offset by higher emerging markets results. Global macro products revenues decreased due to reduced client activity in our rates business and our reduced issuance of structured notes, partially offset by improved performance in our foreign exchange business. Our lower equity derivatives revenues were primarily attributable to low volatility, which negatively impacted our flow derivatives business. These declines were partially offset by higher emerging markets revenues.

Systematic market making revenues declined compared to 6M16, primarily due to the transition of the business to International Wealth Management in 1Q17 and challenging operating conditions in that business.

In 6M17, we recorded a provision for credit losses of CHF 17 million compared to CHF 6 million recorded in 6M16.

Total operating expenses declined 13% compared to 6M16, due to lower compensation and benefits, lower general and administrative expenses and reduced restructuring costs booked in 6M17. Total operating expenses included CHF 52 million in restructuring expenses in 6M17.

In 6M17, **Investment Banking & Capital Markets** reported income before taxes of CHF 227 million, an increase of 211% compared to 6M16. Net revenues of CHF 1,117 million increased 20% compared to 6M16, primarily due to higher debt and equity underwriting revenues, partially offset by lower revenues from advisory and other fees. Compared to 6M16, debt underwriting revenues of CHF 548 million increased 17% due to higher leveraged finance revenues. Equity underwriting revenues of CHF 208 million increased 50%, driven by higher industry-wide IPO and rights offering issuance activity. Revenues from advisory and other fees of CHF 384 million decreased 9%, more than the industry-wide fee pool which was flat compared to 6M16.

In 6M17, we recorded a provision for credit losses of CHF 19 million compared to CHF 29 million recorded in 6M16.

Total operating expenses increased 5% compared to 6M16, primarily reflecting an increase in compensation and benefits, partially offset by a decrease in general and administrative expenses.

In 6M17, the **Strategic Resolution Unit** reported a loss before taxes of CHF 1,102 million, an improvement of 45% compared to 6M16. Negative net revenues of CHF 480 million decreased 47% compared to 6M16, primarily driven by significant mark-to-market losses on the legacy investment banking portfolio in 6M16, partially offset by lower fee based revenues as a result of the restructuring of select onshore businesses and accelerated business exits in our legacy investment banking portfolio.

Total operating expenses decreased 43% compared to 6M16, driven by lower compensation and benefits, reflecting the transfer of our US private banking business, and lower general and administrative expenses due to an overall smaller footprint.

**Corporate Center** reported a loss before taxes of CHF 344 million in 6M17 compared to a loss before taxes of CHF 202 million in 6M16. Compensation and benefits mainly reflect fair value adjustments on certain deferred compensation plans not allocated to the segments and certain deferred compensation retention awards intended to support the restructuring of the Group relating to Global Markets and Investment Banking & Capital Markets, predominantly through the end of 2017, and to Asia Pacific predominantly through the end of 2018. General and administrative expenses primarily reflected costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements. Other revenues include required elimination adjustments associated with trading in own shares. Treasury results include the impact of volatility in the valuations of certain central funding transactions such as structured notes issuances and swap transactions. Beginning in 2Q17, treasury results also include additional interest charges from transfer pricing to align funding costs to assets held in the Corporate Center.

## Differences between Group and Bank

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Swiss Universal Bank, International Wealth Management, Asia Pacific, Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit segments. These segment results are included in Core Results, except for the Strategic Resolution Unit, which is part of the Credit Suisse results. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank. Certain other assets, liabilities and results of operations are managed as part of the activities of the six segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to (i) financing vehicles of the Group, which include special purpose vehicles for various funding activities of the Group, including for the purpose of raising capital; and (ii) hedging activities relating to share-based compensation awards.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

For further information on the differences between the Group and the Bank, refer to "Note 31 – Subsidiary guarantee information" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q17.

# Financial Report 2Q17

I	Credit Suisse results	3
II	Treasury, risk, balance sheet and off-balance sheet	49
III	Condensed consolidated financial statements – unaudited	83
	List of abbreviations	172
	Investor information	173
	Financial calendar and contacts	174
	Cautionary statement regarding forward-looking information	175

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the direct bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of "–" indicates not meaningful or not applicable.

# Credit Suisse at a glance

## Credit Suisse

Our strategy builds on Credit Suisse's core strengths: its position as a leading global wealth manager, its specialist investment banking capabilities and its strong presence in our home market of Switzerland. We seek to follow a balanced approach to wealth management, aiming to capitalize on both the large pool of wealth within mature markets as well as the significant growth in wealth in Asia Pacific and other emerging markets. Founded in 1856, we today have a global reach with operations in about 50 countries and 46,230 employees from over 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture growth opportunities around the world. We serve our clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specializing in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios from the former non-strategic units plus additional businesses and positions that do not fit with our strategic direction. Our business divisions cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

## Swiss Universal Bank

The Swiss Universal Bank division offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients primarily domiciled in our home market Switzerland, which offers attractive growth opportunities and where we can build on a strong market position across our key businesses. Our Private Clients business has a leading franchise in our Swiss home market and serves ultra-high-net-worth individuals, high-net-worth individuals, affluent and retail clients. Our Corporate & Institutional Clients business serves large corporate clients, small and medium-sized enterprises, institutional clients, external asset managers and financial institutions.

## Asia Pacific

In the Asia Pacific division, our wealth management, financing and underwriting and advisory teams work closely together to deliver integrated advisory services and solutions to our target ultra-high-net-worth, entrepreneur and corporate clients. Our Wealth Management & Connected business combines our activities in wealth management with our financing, underwriting and advisory activities. Our Markets business represents our equities and fixed income trading business in Asia Pacific, which supports our wealth management activities, but also deals extensively with a broader range of institutional clients.

## Investment Banking & Capital Markets

The Investment Banking & Capital Markets division offers a broad range of investment banking services to corporations, financial institutions, financial sponsors and ultra-high-net-worth individuals and sovereign clients. Our range of products and services includes advisory services related to mergers and acquisitions, divestitures, takeover defense mandates, business restructurings and spin-offs. The division also engages in debt and equity underwriting of public securities offerings and private placements.

## International Wealth Management

The International Wealth Management division through its Private Banking business offers comprehensive advisory services and tailored investment and financing solutions to wealthy private clients and external asset managers in Europe, the Middle East, Africa and Latin America, utilizing comprehensive access to the broad spectrum of Credit Suisse's global resources and capabilities as well as a wide range of proprietary and third-party products and services. Our Asset Management business offers investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals.

## Global Markets

The Global Markets division offers a broad range of financial products and services to client-driven businesses and also supports Credit Suisse's global wealth management businesses and their clients. Our suite of equities, solutions and credit products and services includes global securities sales, trading and execution, prime brokerage and comprehensive investment research. Our clients include financial institutions, corporations, governments, institutional investors, such as pension funds and hedge funds, and private individuals around the world.

## Strategic Resolution Unit

The Strategic Resolution Unit was created to facilitate the immediate right-sizing of our business divisions from a capital perspective and includes remaining portfolios from former non-strategic units plus transfers of additional exposures from the business divisions. The unit's primary focus is on facilitating the rapid wind-down of capital usage and costs to reduce the negative impact on the Group's performance. Repositioned as a separate division, this provides clearer accountability, governance and reporting.

# Operating environment

Global economic growth appeared to remain robust in 2Q17, while inflation rates receded markedly. Global equity markets ended the quarter higher and European bank stocks in particular performed well. Major government bond yields increased significantly in the second half of June 2017 and the US dollar depreciated against most major currencies.

## ECONOMIC ENVIRONMENT

After soft gross domestic product growth in 1Q17, US economic growth likely accelerated slightly in 2Q17. Nevertheless, core inflation has fallen markedly since March 2017, contrasting with the strength of the US labor market. Eurozone data on the other hand remained buoyant, with unemployment continuing to decline and core inflation ticking up. Among emerging markets, Chinese activity growth appears to have softened somewhat compared to 1Q17, while economic recovery appeared to continue in Brazil and Russia. Headline inflation declined substantially in most economies as the positive base effects from energy prices receded.

The US Federal Reserve (Fed) again raised the target range for the federal funds rate by 25 basis points at its meeting in mid-June, bringing it to 1.00-1.25%, and announced plans to reduce its balance sheet in the future. The European Central Bank (ECB) left policy rates unchanged but changed its forward guidance by no longer referring to the possibility of future rate cuts. The Swiss National Bank (SNB) and the Bank of England (BoE) also left monetary policy unchanged. Among major emerging markets, policy rates were cut twice in both Russia and Brazil during the quarter.

During 2Q17, global equities showed further positive momentum (refer to the charts under "Equity markets"), due to positive revisions to earnings estimates. Among developed markets, Swiss and Japanese equities outperformed global equity markets while Australian and Canadian equities suffered from a sell-off in commodities markets. Emerging market equities again outperformed

developed markets as they benefited from further declines in US Treasury 10-year yields and the US dollar, with both assets reaching their lowest levels of the year by the end of 2Q17. As in 1Q17, oil and commodity exporting emerging markets such as Russia and the Middle East underperformed due to the consolidation in oil and commodity prices. Among sectors, healthcare, industrials and IT were the top performers while the energy sector was the worst underperformer with the telecom sector also lagging. During 2Q17, equity market volatility, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), remained at multi-year lows. The Credit Suisse Hedge Fund Index increased 0.8% in 2Q17.

In fixed income, major long-dated government bond yields drifted lower in the quarter until the middle of June 2017. This decline was mainly due to lower inflation expectations, with core inflation data unexpectedly declining and energy prices dropping. In the second part of June 2017, major longer-dated government bond yields increased due to more restrictive central bank monetary policy communication and better than-expected German inflation data (refer to the charts under "Yield curves"). In credit markets, spreads continued to tighten in 2Q17 (refer to the charts under "Credit spreads"), though the pace of the narrowing slowed, especially for emerging market issuers. Prices for global investment grade corporate bonds increased in line with global high yield bonds. In US dollar terms, emerging market local currency bonds remained one of the best fixed income performing asset classes in 2Q17.

## Yield curves

Major government bond yields increased significantly in the second half of June.

Source: Datastream, Credit Suisse

## Equity markets

Global equities ended the quarter higher with volatility remaining low. European bank stocks outperformed global stocks in general.

The US dollar depreciated against most major currencies in 2Q17 as US economic and in particular inflation data weakened more than expected. The euro was one of the strongest currencies, positively impacted by reduced political concerns about the Eurozone following the outcome of the French presidential election and strong economic data. In this context, the euro also appreciated against the Swiss franc. The Japanese yen decreased slightly against the US dollar. In emerging markets, the Brazilian real was among the weakest currencies amid renewed political concerns.

The Credit Suisse Commodities Benchmark slipped 5.5% in 2Q17, primarily due to weak energy markets. Energy prices declined during 2Q17 amid resilient supply. Rising US real interest rates weighed on precious metals and industrial metals were negatively impacted by moderating industrial activity in China.

## Credit spreads

Credit spreads continued to tighten in 2Q17.

<sup>3</sup> 6M17 vs 6M16.

**SECTOR ENVIRONMENT**

European bank stocks generally outperformed global stocks in 2Q17 and ended the quarter 5% higher. North American bank stocks also posted positive returns similar to the global stock market (refer to the charts under “Equity markets”).

In private banking, market conditions remained challenging in light of political and economic uncertainty and the persistence of the low interest rate environment. The sector continues to face significant structural pressure as it adapts to industry-specific regulatory changes, tax regularization and anti-money laundering initiatives.

In investment banking, equity trading volumes increased globally and in Europe compared to 1Q17 and to 2Q16. Announced and completed mergers and acquisitions (M&A) increased globally

compared to 1Q17 and decreased compared to 2Q16. In Europe, announced and completed M&A increased compared to 1Q17 and 2Q16. Global equity underwriting volumes were lower compared to 1Q17 and higher compared to 2Q16. European equity underwriting volumes were higher compared to 1Q17 and 2Q16. Global and European debt underwriting volumes were lower compared to 1Q17. Compared to 2Q16, global debt underwriting was lower and European debt underwriting was higher. Compared to 1Q17, total US fixed income trading volumes were lower, mainly driven by a decrease in treasuries and corporate volumes. Compared to 2Q16, total US fixed income trading volumes were higher, mainly driven by an increase in treasuries and federal agency volumes.

# Credit Suisse

In 2Q17, we recorded net income attributable to shareholders of CHF 303 million. Diluted earnings per share were CHF 0.13 and return on equity attributable to shareholders was 3.0%. As of the end of 2Q17, our BIS CET1 ratio was 13.3% on a look-through basis.

## Credit Suisse reporting structure

Credit Suisse includes the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core Results do not include revenues and expenses from our Strategic Resolution Unit.

## RESULTS SUMMARY

In 2Q17, Credit Suisse reported net income attributable to shareholders of CHF 303 million compared to CHF 596 million in 1Q17 and CHF 170 million in 2Q16.

**Net revenues** of CHF 5,205 million decreased 6% compared to 1Q17, primarily reflecting lower net revenues in Corporate Center, Investment Banking & Capital Markets, Global Markets and the Strategic Resolution Unit, partially offset by increases in Swiss Universal Bank and International Wealth Management. The decrease in Investment Banking & Capital Markets reflected lower revenues from advisory and debt underwriting, partially offset by higher revenues from equity underwriting. The decrease in Global Markets reflected less favorable market conditions across its Solutions businesses and a slowdown in industry-wide debt issuance activity. The movement in the Strategic Resolution Unit reflected higher negative valuation adjustments and lower fee-based revenues as a result of accelerated business exits, both in its legacy investment banking portfolio. The increase in Swiss Universal Bank primarily reflected higher transaction-based revenues. The increase in International Wealth Management primarily reflected higher transaction- and performance-based revenues, higher net interest income and higher recurring commissions and fees.

Net revenues increased 2% compared to 2Q16, primarily reflecting higher net revenues in International Wealth Management and Swiss Universal Bank and decreased negative net revenues in the Strategic Resolution Unit, partially offset by lower net revenues in Global Markets and Asia Pacific. The increase in International Wealth Management primarily reflected higher net interest income, higher recurring commissions and fees and higher transaction- and performance-based revenues. The increase in Swiss Universal Bank reflected higher net interest income and higher transaction-based revenues. The improvement in the Strategic Resolution Unit's negative net revenues was primarily driven by lower negative valuation adjustments and lower overall funding costs, partially offset by a reduction in fee-based revenues. Net revenues in Global Markets decreased as low volatility adversely impacted

trading revenues. The decrease in Asia Pacific was driven by significantly lower revenues in its Markets business across equity and fixed income sales and trading revenues, partially offset by higher revenues in its Wealth Management & Connected business.

**Provision for credit losses** of CHF 82 million primarily related to a net provision for credit losses of CHF 36 million in Swiss Universal Bank, CHF 13 million in Investment Banking & Capital Markets, CHF 13 million in the Strategic Resolution Unit and CHF 12 million in Global Markets.

**Total operating expenses** of CHF 4,541 million decreased 6% compared to 1Q17, reflecting a 4% decrease in compensation and benefits, a 4% decrease in general and administrative expenses and a 50% decrease in restructuring expenses. In 2Q17, we incurred CHF 69 million of restructuring expenses in connection with the implementation of our strategy, of which CHF 50 million were related to compensation and benefits.

Total operating expenses decreased 8% compared to 2Q16, reflecting a 7% decrease in compensation and benefits and a 10% decrease in general and administrative expenses, mainly relating to lower professional fees.

**Income tax expense** of CHF 276 million recorded in 2Q17 mainly reflected the impact of the geographical mix of results and the impact from shortfall tax charges on share-based compensation, partially offset by the impact of a re-assessment of Swiss deferred tax balances and a release of tax contingency accruals. Overall, net deferred tax assets decreased CHF 338 million to CHF 7,311 million, mainly driven by earnings, the shortfall tax charges and a foreign exchange impact, partially offset by the re-assessment of Swiss deferred tax balances. Deferred tax assets on net operating losses increased CHF 244 million to CHF 2,787 million during 2Q17. The Credit Suisse effective tax rate was 47.4% in 2Q17, compared to 11.6% in 1Q17. The 2Q17 effective tax rate was negatively impacted by an additional tax charge of CHF 95 million arising from the shortfall tax charges. The effective tax rate excluding the shortfall tax charges (net of valuation allowances) was 33.8%.

## CAPITAL INCREASE

On May 18, 2017, the Group held an Extraordinary General Meeting at which shareholders approved a capital increase by way of a rights offering. By the end of the rights exercise period on June 7, 2017, 99.2% of the rights had been exercised and 390,206,406 newly issued shares were subscribed. The remaining 3,026,166 newly issued shares that were not subscribed were sold in the market. The capital increase resulted in 393,232,572 newly issued shares and net proceeds for the Group of CHF 4.1 billion.

## CORE RESULTS

In 2Q17, Core Results net revenues of CHF 5,479 million decreased 5% compared to 1Q17, primarily reflecting lower net revenues in Corporate Center, Investment Banking & Capital Markets and Global Markets partially offset by increases in Swiss Universal Bank and International Wealth Management. Provision for credit losses was CHF 69 million, primarily reflecting net

provisions of CHF 36 million in Swiss Universal Bank, CHF 13 million in Investment Banking & Capital Markets and CHF 12 million in Global Markets. Total operating expenses of CHF 4,265 million decreased 5% compared to 1Q17, reflecting a 5% decrease in compensation and benefits, a slight decrease in general and administrative expenses and a decrease in restructuring expenses. Compared to 1Q17, restructuring expenses of CHF 58 million decreased 55%, primarily in Swiss Universal Bank and International Wealth Management.

Core Results net revenues were stable compared to 2Q16, primarily reflecting higher net revenues in International Wealth Management and Swiss Universal Bank, partially offset by a decrease in Global Markets and Asia Pacific. Total operating expenses decreased 5% compared to 2Q16, reflecting a 5% decrease in compensation and benefits and a 7% decrease in general and administrative expenses, mainly relating to professional services fees.

## Reconciliation of adjusted results

Adjusted results referred to in this report are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

## EMPLOYEES AND OTHER HEADCOUNT

There were 46,230 Group employees as of the end of 2Q17, a decrease of 410 compared to 1Q17, primarily reflecting the impact of our cost efficiency initiatives and the right-sizing of business activities, across most segments. The number of outsourced roles, contractors and consultants decreased by 710 compared to 1Q17.

### Employees and other headcount

end of	2Q17	1Q17	2Q16
<b>Employees (full-time equivalents)</b>

## REGULATORY CAPITAL

As of the end of 2Q17, our Bank for International Settlements (BIS) common equity tier 1 (CET1) ratio was 13.3%. Our risk-weighted assets (RWA) were CHF 259.3 billion, both on a look-through basis.

The Swiss Financial Market Supervisory Authority FINMA (FINMA) has requested an add-on to our operational risk exposure primarily in respect of our residential mortgage-backed securities (RMBS) settlements and which would be effective from 3Q17. Separately, Credit Suisse has approached FINMA with a request to review the appropriateness of the level of the operational risk RWA in the Strategic Resolution Unit given the progress in reducing the size of the division over the last eighteen months, with the aim of aligning reductions to the accelerated closure of the Strategic Resolution Unit by the end of 2018. This is still under discussion with FINMA and we would expect some net increase in operational risk capital usage in 3Q17 depending on the ultimate outcome and phasing of these changes.

► Refer to "Capital management" in II – Treasury, risk, balance sheet and off-balance sheet for further information.

## INFORMATION AND DEVELOPMENTS

### Format of presentation

In managing our business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, specific individual revenue categories in isolation may not be indicative of performance.

Certain reclassifications have been made to prior periods to conform to the current presentation.

### Return on regulatory capital

Credit Suisse measures firm-wide returns against total shareholders' equity and tangible shareholders' equity. In addition, it also measures the efficiency of the firm and its divisions with regard to the usage of capital as determined by the minimum requirements set by regulators. This regulatory capital is calculated as the worst of 10% of risk-weighted assets and 3.5% of the leverage exposure. Return on regulatory capital is calculated using income/(loss) after tax and assumes a tax rate of 30% and capital allocated based on the worst of 10% of average risk-weighted assets and 3.5% of average leverage exposure. These percentages are used in the calculation in order to reflect the 2019 fully phased in Swiss regulatory minimum requirements for Basel III CET1 capital and leverage ratio. For Global Markets and Investment Banking & Capital Markets, return on regulatory capital is based on US dollar denominated numbers.

End of / in 2Q17 (CHF billion, except where indicated)

Shareholders' equity		43.5
Return on equity	3.0%	
Tangible shareholders' equity		38.6
Return on tangible shareholders' equity	3.4%	4.9
Regulatory capital		31.7
Return on regulatory capital	5.1%	6.9

### Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

► Refer to "Note 1 – Summary of significant accounting policies" and "Note 28 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 2Q17, 38% and 25% of our total assets and total liabilities, respectively, were measured at fair value.

The majority of our level 3 assets are recorded in our investment banking businesses. Total assets at fair value recorded as level 3 decreased CHF 2.0 billion to CHF 17.6 billion as of the end of 2Q17, primarily reflecting net sales, mainly in trading assets and loans, and a foreign exchange translation impact, mainly in trading assets and loans.

As of the end of 2Q17, our level 3 assets comprised 2% of total assets and 6% of total assets measured at fair value, unchanged from 1Q17.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition; however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

#### **EVOLUTION OF LEGAL ENTITY STRUCTURE**

The global service company initiative has made significant progress in 2Q17 in evolving the legal entity structure of the bank and ensuring continued provision of critical services for the Group in case of a resolution event. Credit Suisse Services AG (Swiss Service Company) became operational in July 2017 with the transfer of employees, net assets and our Business Delivery Center in Poland from Credit Suisse AG. A branch of the Swiss Service Company has been registered in the UK as Credit Suisse Services AG, London Branch, which became operational in June 2017.

#### **REGULATORY DEVELOPMENTS AND PROPOSALS**

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

On June 9, 2017, the Federal Council initiated the consultation proceeding on the proposed Federal Act on Calculation of the Participation Deduction for “Too Big to Fail” Instruments. The consultation will last until the end of September 2017. If enacted, the legislation will permit systemically important banks to carve-out interest paid in respect of such instruments for purposes of calculating tax exempt net participation income and hereby remedy the effect of increased corporate income taxes from higher interest allocations as a consequence of systemically important banks being required to issue such instruments through the holding company.

On June 16, 2017, the Federal Council submitted draft legislation to the Swiss Parliament on the automatic exchange of financial account information (AEOI) with another 41 states and territories (having introduced the AEOI earlier this year with an initial 38 states and territories, including all EU member states, for which the data exchange starts in 2018). Upon approval, the Federal Council will be authorized to implement the AEOI with these additional states and territories. If implemented in 2018, as currently intended, the first set of data would be exchanged in late 2019. Before the first data is exchanged, the legislation requires the Federal Council to verify and issue a report, assessing whether these states and territories meet certain standards, in particular, concerning confidentiality and data security.

On July 21, 2017, the US banking agencies responsible for implementing the Volcker Rule released guidance providing temporary relief with respect to “foreign excluded funds” that are controlled by a foreign bank and thus could be subjected to the Volcker Rule’s proprietary trading and covered funds restrictions. The guidance provides that for one year (until July 21, 2018), the agencies will not take action with respect to such foreign excluded fund if the fund satisfies certain criteria (including that the fund is established and operated outside of the US as part of a bona fide asset management business, is not offered to US investors and that the foreign bank’s investment and/or sponsorship of the fund occurs solely outside of the US).

► Refer to “Regulation and supervision” in I – Information on the company in the Credit Suisse Annual Report 2016 for further information and “Regulatory framework” and “Regulatory developments and proposals” in II – Treasury, risk, balance sheet and off-balance sheet – Liquidity and funding management and Capital management, respectively, for further information.

# Swiss Universal Bank

In 2Q17, we reported income before taxes of CHF 502 million and net revenues of CHF 1,405 million. Income before taxes was 24% and 11% higher compared to 1Q17 and 2Q16, respectively.

## RESULTS SUMMARY

### 2Q17 results

In 2Q17, we reported income before taxes of CHF 502 million and net revenues of CHF 1,405 million. Compared to 1Q17, net revenues were 4% higher, driven by higher transaction-based revenues whereas net interest income and recurring commissions and fees were stable. Provision for credit losses was CHF 36 million compared to CHF 10 million in 1Q17, partially offset by gains from related credit hedges recorded in other revenues. Total operating expenses were 8% lower compared to 1Q17, primarily reflecting lower restructuring expenses and general and administrative expenses, partially offset by slightly higher compensation and benefits.

Compared to 2Q16, net revenues were 5% higher, with higher net interest income and higher transaction-based revenues while recurring commissions and fees were stable. Provision for credit losses was CHF 36 million compared to CHF 9 million in 2Q16. Total operating expenses were stable compared to 2Q16,

reflecting lower compensation and benefits and restructuring expenses, offset by higher general and administrative expenses and commission expenses.

Adjusted income before taxes of CHF 504 million was 4% and 10% higher compared to 1Q17 and 2Q16, respectively.

### Capital and leverage metrics

As of the end of 2Q17, we reported risk-weighted assets of CHF 64.4 billion, slightly lower compared to the end of 1Q17. An increase from methodology and policy changes reflecting the phase-in of the Swiss mortgage multipliers was more than offset by movements in risk levels reflecting the maturity of certain large loan facilities and favorable interest rate movements on our derivatives portfolio. Leverage exposure was CHF 260.5 billion, reflecting an increase of CHF 3.1 billion compared to the end of 1Q17, driven by increased high-quality liquid assets (HQLA), reflecting growth in our deposit base.

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction-based income. Other revenues include fair value gains/(losses) on synthetic securitized loan portfolios and other gains and losses.

## PRIVATE CLIENTS

## RESULTS

Income before taxes of CHF 222 million was 38% higher compared to 1Q17, primarily reflecting decreased total operating expenses and slightly higher net revenues. Compared to 2Q16, income before taxes was slightly lower, primarily reflecting higher provision for credit losses with stable total operating expenses and stable net revenues. Adjusted income before taxes of CHF 222 million was 7% higher compared to 1Q17 and was slightly lower compared to 2Q16.

## Net revenues

Compared to 1Q17, net revenues of CHF 733 million were slightly higher, primarily due to higher transaction-based revenues and slightly higher recurring commissions and fees while net interest income was stable. Transaction-based revenues of CHF 123 million were 23% higher, driven by a gain from the sale of an investment, higher equity participations income which included a regular dividend from our ownership interest in SIX Group AG and increased fees from foreign exchange client business. Recurring commissions and fees of CHF 202 million were slightly higher, reflecting higher investment advisory fees and slightly higher discretionary mandate management fees, partially offset by lower

investment product management fees and lower banking services fees. Net interest income of CHF 408 million was stable with slightly higher deposit margins on higher average deposit volumes and stable loan margins on stable average loan volumes.

Compared to 2Q16, net revenues were stable, with slightly higher transaction-based revenues and stable net interest income and recurring commissions and fees. Transaction-based revenues were slightly higher, reflecting increased client activity and also included the gain from the sale of an investment, offset by the absence of proceeds from the sale of our equity stake in Visa Europe Ltd. to Visa Inc. in 2Q16. Net interest income was stable with higher deposit margins on higher average deposit volumes and stable loan margins on slightly higher average loan volumes.

## Provision for credit losses

The Private Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities and, to a lesser extent, consumer finance loans.

In 2Q17, Private Clients recorded provision for credit losses of CHF 11 million compared to CHF 12 million in 1Q17 and CHF 8 million in 2Q16. The provision was primarily related to our consumer finance business.

### Total operating expenses

Compared to 1Q17, total operating expenses of CHF 500 million decreased 7%, primarily reflecting lower restructuring expenses, partially offset by increased compensation and benefits and higher general and administrative expenses. Restructuring expenses decreased CHF 49 million. Compensation and benefits of CHF 253 million were 5% higher, primarily reflecting higher allocated corporate function costs and increased salary expenses, partially offset by lower discretionary compensation expenses. General and administrative expenses of CHF 213 million increased 5%, primarily reflecting higher professional services fees and continued investments in digitalization projects and in regulatory and compliance functions. Adjusted total operating expenses of CHF 500 million were slightly higher compared to 1Q17.

Compared to 2Q16, total operating expenses were stable, primarily reflecting higher general and administrative expenses and increased commission expenses, offset by lower compensation and benefits and lower restructuring expenses. General and administrative expenses were 12% higher, primarily reflecting higher allocated corporate function costs, including the impact of the changes to the methodology for the allocation of corporate function costs in 2Q16, and increased professional services fees, partially offset by lower advertising and marketing expenses.

Compensation and benefits were 7% lower, primarily reflecting lower salary expenses and lower discretionary compensation expenses. Adjusted total operating expenses were slightly higher compared to 2Q16.

## MARGINS

### Gross margin

Our gross margin was 146 basis points in 2Q17, stable compared to 1Q17, mainly driven by higher transaction-based revenues, offset by slightly higher average assets under management. Compared to 2Q16, our gross margin was eight basis points lower, reflecting 6.5% higher average assets under management.

► Refer to “Assets under management” for further information.

### Net margin

Our net margin was 44 basis points in 2Q17, eleven basis points higher compared to 1Q17, mainly reflecting lower restructuring expenses and slightly higher net revenues. Compared to 2Q16, our net margin was four basis points lower, primarily reflecting the 6.5% increase in average assets under management. On the basis of adjusted income before taxes, our net margin was 44 basis points in 2Q17, one basis point higher compared to 1Q17 and four basis points lower compared to 2Q16.

## ASSETS UNDER MANAGEMENT

As of the end of 2Q17, assets under management of CHF 201.5 billion were CHF 3.3 billion higher compared to the end of 1Q17, mainly driven by favorable market movements and net new assets

of CHF 1.7 billion, partially offset by unfavorable foreign exchange-related movements. Net new assets reflected positive contributions from all businesses.

## CORPORATE & INSTITUTIONAL CLIENTS

### RESULTS

Income before taxes of CHF 280 million increased 15% compared to 1Q17, primarily due to lower total operating expenses and higher net revenues, partially offset by higher provision for credit losses in 2Q17. Compared to 2Q16, income before taxes was 23% higher, reflecting higher net revenues and lower total operating expenses, partially offset by higher provision for credit losses in 2Q17. Adjusted income before taxes of CHF 282 million increased slightly compared to 1Q17 and was 24% higher compared to 2Q16.

### Net revenues

Compared to 1Q17, net revenues of CHF 672 million were 5% higher with higher transaction-based revenues and improved other

revenues, partially offset by slightly lower recurring commissions and fees and stable net interest income. Transaction-based revenues of CHF 207 million were 15% higher, mainly due to strong revenues from our Swiss investment banking business, our profit share on the sale of an investment and a regular dividend from SIX Group, partially offset by lower revenues from trading services. Other revenues increased CHF 10 million primarily due to gains from credit hedges. Recurring commissions and fees of CHF 161 million were slightly lower, mainly due to lower fees from lending activities, partially offset by increased investment product management fees. Net interest income of CHF 309 million was stable, with higher deposit margins on higher average deposit volumes and stable loan margins on slightly lower average loan volumes.

Compared to 2Q16, net revenues were 10% higher, driven by higher net interest income and increased transaction-based revenues while recurring commissions and fees were stable. Net interest income was 11% higher, with stable loan margins on stable average loan volumes and lower deposit margins on higher

average deposit volumes. Transaction-based revenues were 12% higher, mainly due to the profit share on the sale of an investment and strong revenues from our Swiss investment banking business, partially offset by lower revenues from trading services.

### Provision for credit losses

The Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by real estate, securities and other financial collateral.

In 2Q17, Corporate & Institutional Clients recorded provision for credit losses of CHF 25 million compared to a release of provision for credit losses of CHF 2 million in 1Q17 and provision for credit losses of CHF 1 million in 2Q16, partially offset by gains from related credit hedges recorded in other revenues. The increase compared to 1Q17 reflected several individual cases.

### Total operating expenses

Compared to 1Q17, total operating expenses of CHF 367 million were 9% lower, primarily reflecting lower general and administrative expenses. General and administrative expenses of CHF 114 million decreased 25%, primarily due to lower litigation provisions. Compensation and benefits of CHF 213 million were stable. Adjusted total operating expenses of CHF 365 million were stable compared to 1Q17.

Compared to 2Q16, total operating expenses were 4% lower, mainly driven by lower general and administrative expenses and slightly lower compensation and benefits. General and administrative expenses decreased 4%, primarily due to lower allocated corporate function costs. Compensation and benefits decreased slightly mainly due to lower pension expenses and lower discretionary compensation expenses, partially offset by higher salary expenses. Adjusted total operating expenses were 4% lower compared to 2Q16.

### ASSETS UNDER MANAGEMENT

As of the end of 2Q17, assets under management of CHF 352.5 billion were CHF 3.6 billion higher compared to the end of 1Q17, primarily driven by favorable market movements. Net asset inflows were more than offset by outflows related to terminated relationships with certain external asset managers.

# International Wealth Management

In 2Q17, we reported income before taxes of CHF 365 million and net revenues of CHF 1,264 million. Income before taxes was 25% and 49% higher compared to 1Q17 and 2Q16, respectively.

## RESULTS SUMMARY

### 2Q17 results

In 2Q17, we reported income before taxes of CHF 365 million and net revenues of CHF 1,264 million. Compared to 1Q17, net revenues increased 4% due to higher transaction- and performance-based revenues, higher net interest income and higher recurring commissions and fees, partially offset by lower other revenues which included the impact of lower investment-related gains in Asset Management. Provision for credit losses was CHF 8 million compared to CHF 2 million in 1Q17. Total operating expenses were 4% lower compared to 1Q17, mainly driven by lower restructuring expenses and lower general and administrative expenses.

Compared to 2Q16, net revenues increased 10% reflecting higher net interest income, higher recurring commissions and fees and higher transaction- and performance-based revenues,

partially offset by the impact of lower investment-related gains as 2Q16 included an investment gain from Asset Management Finance LLC (AMF). Provision for credit losses was CHF 8 million compared to CHF 16 million in 2Q16. Total operating expenses were stable with slightly higher compensation and benefits, offset by lower restructuring expenses.

Adjusted income before taxes of CHF 378 million increased 16% and 45% compared to 1Q17 and 2Q16, respectively.

### Capital and leverage metrics

As of the end of 2Q17, we reported risk-weighted assets of CHF 36.5 billion, slightly higher compared to the end of 1Q17. Leverage exposure of CHF 93.1 billion was stable compared to the end of 1Q17.

## PRIVATE BANKING

### RESULTS

Income before taxes of CHF 297 million increased 24% compared to 1Q17, reflecting higher net revenues and slightly lower total operating expenses, partially offset by higher provision for credit losses. Compared to 2Q16, income before taxes increased 61% reflecting higher net revenues and lower provision for credit losses, partially offset by slightly higher total operating expenses. Adjusted income before taxes of CHF 307 million increased 17% and 56% compared to 1Q17 and 2Q16, respectively.

#### Net revenues

Compared to 1Q17, net revenues of CHF 927 million were 5% higher, with higher net interest income, higher transaction- and performance-based revenues and higher recurring commissions and fees. Net interest income of CHF 360 million increased 5% with slightly lower loan margins on higher average loan volumes and higher deposit margins on stable average deposit volumes. Transaction- and performance-based revenues of CHF 265 million increased 6%, mainly driven by higher equity participations income

which included a regular dividend from SIX Group and higher corporate advisory fees related to integrated solutions, partially offset by lower revenues from trading services as 1Q17 included a revaluation gain on an equity investment of CHF 13 million. Recurring commissions and fees of CHF 302 million were 4% higher, mainly from increased fee income on lending activities and slightly higher security account and custody services fees, including the impact of slightly higher average assets under management.

Compared to 2Q16, net revenues increased 14%, with higher net interest income, higher transaction- and performance-based revenues and higher recurring commissions and fees. Net interest income increased 18%, primarily reflecting higher loan margins and higher deposit margins on higher average loan and deposit volumes. Transaction- and performance-based revenues increased 12%, mainly driven by higher brokerage and product issuing fees. Recurring commissions and fees increased 11% mainly from higher investment product management fees, higher security account and custody services fees and higher wealth structuring solution fees, including the impact of higher average assets under management.

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction- and performance-based income.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

**Provision for credit losses**

In 2Q17, provision for credit losses was CHF 8 million, compared to CHF 2 million in 1Q17 and to CHF 16 million in 2Q16.

**Total operating expenses**

Compared to 1Q17, total operating expenses of CHF 622 million decreased slightly, mainly due to lower restructuring expenses and lower general and administrative expenses, partially offset by slightly higher compensation and benefits. Restructuring expenses of CHF 4 million decreased CHF 19 million. General and administrative expenses of CHF 182 million decreased 8%, mainly reflecting lower allocated corporate function costs and lower professional services fees, partially offset by higher litigation provisions.

Compensation and benefits of CHF 388 million increased slightly, mainly due to higher discretionary compensation expenses, partially offset by slightly lower salary expenses. Adjusted total operating expenses of CHF 612 million were stable compared to 1Q17.

Compared to 2Q16, total operating expenses increased slightly, mainly driven by higher compensation and benefits, partially offset by lower general and administrative expenses and lower restructuring expenses. Compensation and benefits increased 7%, mainly due to higher discretionary compensation expenses. General and administrative expenses were 5% lower, mainly driven by lower professional services fees, partially offset by higher litigation provisions. Restructuring expenses decreased CHF 9 million. Adjusted total operating expenses were slightly higher compared to 2Q16.

## MARGINS

### Gross margin

Our gross margin was 110 basis points in 2Q17, two basis points higher compared to 1Q17, mainly reflecting higher net revenues, partially offset by slightly higher average assets under management. Our gross margin was stable compared to 2Q16, mainly reflecting higher net revenues, offset by a 14.7% increase in average assets under management.

► Refer to "Assets under management" for further information.

### Net margin

Our net margin was 35 basis points in 2Q17, six basis points higher compared to 1Q17, reflecting higher net revenues and slightly lower total operating expenses, partially offset by slightly

higher average assets under management. Our net margin was ten basis points higher compared to 2Q16, reflecting higher net revenues, partially offset by the 14.7% increase in average assets under management. On the basis of adjusted income before taxes, our net margin was 36 basis points in 2Q17, four basis points higher compared to 1Q17 and nine basis points higher compared to 2Q16.

## ASSETS UNDER MANAGEMENT

As of the end of 2Q17, assets under management of CHF 336.4 billion were stable compared to the end of 1Q17, reflecting net new assets of CHF 4.6 billion and favorable market movements, offset by unfavorable foreign exchange-related movements. The net new assets reflected solid inflows from emerging markets and Europe.

Management fees include fees on assets under management, asset administration revenues and transaction fees related to the acquisition and disposal of investments in the funds being managed. Performance revenues relate to the performance or return of the funds being managed and includes investment-related gains and losses from proprietary funds. Placement revenues arise from our third-party private equity fundraising activities and secondary private equity market advisory services. Investment and partnership income includes equity participation income from seed capital returns and from minority investments in third-party asset managers, income from strategic partnerships and distribution agreements, and other revenues.

## RESULTS

Income before taxes of CHF 68 million increased 31% compared to 1Q17, mainly reflecting lower total operating expenses, while net revenues were stable. Income before taxes increased 11% compared to 2Q16, driven by a decrease of CHF 4 million in total operating expenses and an increase of CHF 3 million in net revenues. Adjusted income before taxes of CHF 71 million increased 9% and 13% compared to 1Q17 and 2Q16, respectively.

## Net revenues

Compared to 1Q17, net revenues of CHF 337 million were stable, reflecting lower performance and placement revenues and lower investment and partnership income, offset by an increase in management fees. Performance and placement revenues decreased CHF 10 million to CHF 32 million, mainly due to lower performance fees and lower investment-related gains, partially offset by higher placement fees. Investment and partnership income decreased CHF 6 million to CHF 36 million. Management fees of CHF 269 million increased 6%, reflecting higher average assets under management.

Compared to 2Q16, net revenues were stable, reflecting higher management fees, offset by lower investment and partnership income and lower performance and placement revenues. Management fees increased 22%, reflecting higher average assets under management. Investment and partnership income decreased 50%, mainly as 2Q16 included the investment gain from AMF of CHF 24 million and lower other residual gains. Performance and placement revenues decreased CHF 10 million, mainly driven by lower investment-related gains and lower performance fees, partially offset by higher placement fees.

## Total operating expenses

Compared to 1Q17, total operating expenses of CHF 269 million decreased 6%, mainly due to lower restructuring expenses and lower compensation and benefits. Restructuring expenses of CHF 3 million decreased CHF 10 million. Compensation and benefits of CHF 168 million decreased 4%, mainly from lower deferred compensation expenses from prior-year awards. General and administrative expenses of CHF 83 million were slightly lower, primarily reflecting lower allocated corporate function costs. Adjusted total operating expenses of CHF 266 million were slightly lower compared to 1Q17.

Compared to 2Q16, total operating expenses were stable, primarily reflecting lower compensation and benefits offset by higher general and administrative expenses. Compensation and benefits were 5% lower, mainly driven by lower deferred compensation expenses from prior-year awards, partially offset by higher salary expenses. General and administrative expenses were 11% higher, mainly reflecting higher occupancy expenses and higher market data expenses. Adjusted total operating expenses were slightly lower compared to 2Q16.

#### ASSETS UNDER MANAGEMENT

As of the end of 2Q17, assets under management of CHF 366.0 billion were stable compared to the end of 1Q17, reflecting unfavorable foreign exchange-related movements, offset by favorable market movements and net new assets of CHF 2.8 billion. Net new assets reflected inflows of CHF 4.1 billion in traditional and alternative investments, partially offset by outflows from our joint ventures.

<sup>1</sup> Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned.

# Asia Pacific

In 2Q17, we reported income before taxes of CHF 188 million and net revenues of CHF 848 million. Income before taxes increased 28% compared to 1Q17 and decreased 9% compared to 2Q16.

## RESULTS SUMMARY

### 2Q17 results

In 2Q17, we reported income before taxes of CHF 188 million and net revenues of CHF 848 million. Compared to 1Q17, net revenues decreased 4%, driven by our Wealth Management & Connected business mainly reflecting lower advisory, underwriting and financing revenues. We recorded a release of provision for credit losses of CHF 1 million in 2Q17, compared to a provision for credit losses of CHF 4 million in 1Q17. Total operating expenses of CHF 661 million decreased 9%, primarily due to lower compensation and benefits and lower general and administrative expenses.

Compared to 2Q16, net revenues decreased 7%, driven by significantly lower revenues in our Markets business across equity and fixed income sales and trading revenues, partially offset by higher revenues in our Wealth Management & Connected business, reflecting higher Private Banking revenues and higher advisory, underwriting and financing revenues. Total operating expenses decreased 6%, primarily from lower compensation and

benefits in our Markets business, mainly reflecting lower deferred compensation expenses from prior-year awards and lower salary expenses related to lower headcount.

Adjusted income before taxes of CHF 199 million increased 20% compared to 1Q17 and decreased 8% compared to 2Q16.

### Capital and leverage metrics

As of the end of 2Q17, we reported risk-weighted assets of CHF 32.3 billion, a decrease of CHF 0.8 billion compared to the end of 1Q17, mainly reflecting a foreign exchange impact and a decrease in inventory in the Markets business, partially offset by higher lending in the Wealth Management & Connected business and methodology and policy changes. Leverage exposure was CHF 101.6 billion, reflecting a decrease of CHF 4.9 billion compared to the end of 1Q17, mainly due to the foreign exchange impact and a decrease in inventory from the Markets business, offset by higher lending in the Wealth Management & Connected business.

## WEALTH MANAGEMENT &amp; CONNECTED

## RESULTS

Income before taxes of CHF 196 million decreased slightly compared to 1Q17, primarily reflecting lower net revenues, largely offset by lower total operating expenses and lower provision for credit losses. Lower net revenues primarily reflected lower advisory, underwriting and financing revenues. Compared to 2Q16, income before taxes increased 78%, primarily from higher net revenues across both Private Banking and advisory, underwriting and financing, partially offset by higher total operating expenses. Adjusted income before taxes of CHF 198 million decreased slightly compared to 1Q17 and increased 78% compared to 2Q16.

## Net revenues

Net revenues of CHF 559 million decreased 5% compared to 1Q17, mainly driven by lower advisory, underwriting and financing revenues. Advisory, underwriting and financing revenues decreased 13% to CHF 154 million, primarily due to a decrease in fees from M&A transactions and debt underwriting, partially offset by higher financing revenues and increased fees from equity underwriting. Net interest income decreased 4% to CHF 161 million. Transaction-based revenues decreased slightly to CHF 149 million, mainly reflecting lower fees from foreign exchange client business. Recurring commissions and fees increased 4% to CHF 94 million, primarily due to higher investment product management fees.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

Compared to 2Q16, net revenues increased 23%, mainly driven by higher advisory, underwriting and financing revenues, increased transaction-based revenues, higher net interest income and higher recurring commission and fees. Advisory, underwriting and financing revenues increased 31%, mainly due to higher financing and debt underwriting revenues, partially offset by lower advisory fees from M&A transactions. Financing revenues in 2Q17 included a positive net fair value impact of CHF 15 million on a portfolio of impaired loans in recovery management and additional revenues related to the recovery of interest payments on a portfolio of previously impaired loans. Transaction-based revenues increased 27%, primarily reflecting higher brokerage and product issuing fees and higher corporate advisory fees arising from integrated solutions. Net interest income increased 13%, with lower deposit and loan margins on higher average deposit and loans volumes. Recurring commissions and fees increased 22%, mainly due to higher investment product management, security account and custody services, discretionary mandate management and wealth structuring solutions fees.

#### Provision for credit losses

The Wealth Management & Connected loan portfolio primarily comprises Private Banking lombard loans, mainly backed by listed securities, and secured and unsecured loans to corporates.

In 2Q17, Wealth Management & Connected recorded a release of provision for credit losses of CHF 1 million, compared to a provision for credit losses of CHF 4 million and CHF 3 million in 1Q17 and 2Q16, respectively.

#### Total operating expenses

Total operating expenses of CHF 364 million decreased 5% compared to 1Q17, mainly reflecting lower compensation and benefits. Compensation and benefits decreased 9% to CHF 244 million, primarily driven by lower discretionary compensation expenses and lower deferred compensation expenses from prior-year awards. General and administrative expenses increased 4% to CHF 103 million, mainly due to higher expenses for IT infrastructure and support and our risk management function. Adjusted total operating expenses of CHF 362 million decreased 5% compared to 1Q17.

Compared to 2Q16, total operating expenses increased 6%, mainly reflecting higher compensation and benefits and higher commission expenses. Compensation and benefits increased 7%, primarily driven by higher compensation and benefits for our risk management function and higher discretionary compensation expenses. Commission expenses increased 50%, primarily reflecting increased client activity. General and administrative expenses were stable. Adjusted total operating expenses increased 6% compared to 2Q16.

#### MARGINS

Margin calculations are aligned with the performance metrics of our Private Banking business and its related assets under management within the Wealth Management & Connected business.

#### Gross margin

Our Private Banking gross margin was 91 basis points in 2Q17, five basis points lower compared to 1Q17, mainly reflecting a 4.3% increase in average assets under management and lower net interest income. Compared to 2Q16, our gross margin was four basis points higher, mainly reflecting higher transaction-based revenues, higher net interest income and higher recurring commissions and fees, partially offset by a 15.1% increase in average assets under management.

► Refer to "Assets under management" for further information.

#### Net margin

Our Private Banking net margin was 33 basis points in 2Q17, stable compared to 1Q17. Compared to 2Q16, our net margin was ten basis points higher, mainly reflecting higher net revenues and lower provision for credit losses, partially offset by a 15.1% increase in average assets under management and higher total operating expenses.

#### ASSETS UNDER MANAGEMENT

Assets under management and net new assets relate to our Private Banking business within the Wealth Management & Connected business. As of the end of 2Q17, assets under management of CHF 177.8 billion were CHF 0.4 billion higher compared to the end of 1Q17, mainly reflecting net new assets of CHF 4.5 billion and favorable market movements, largely offset by unfavorable foreign exchange-related movements. Net new assets reflected inflows primarily from Greater China and South East Asia.

## MARKETS

## RESULTS

Loss before taxes of CHF 8 million in 2Q17 decreased 85% compared to the loss before taxes of CHF 54 million in 1Q17, mainly due to lower total operating expenses. The loss before taxes in 2Q17 compared to income before taxes of CHF 96 million in 2Q16. The related decrease of CHF 104 million primarily reflected lower net revenues, partially offset by lower total operating expenses. Adjusted income before taxes of CHF 1 million in 2Q17 compared to an adjusted loss before taxes of CHF 39 million in 1Q17 and adjusted income before taxes of CHF 105 million in 2Q16.

## Net revenues

Net revenues of CHF 289 million were stable compared to 1Q17, reflecting lower equity sales and trading revenues, offset by higher fixed income sales and trading revenues. Equity sales and trading revenues decreased 20% to CHF 188 million, mainly due to lower revenues from equity derivatives reflecting lower client

activity, partially offset by higher revenues from prime services. Fixed income sales and trading revenues increased 74% to CHF 101 million, mainly due to higher revenues from rates and foreign exchange products, partially offset by lower revenues from credit products. Revenues from rates products increased mainly in emerging markets rates products and revenues from foreign exchange products benefited from favorable markets.

Compared to 2Q16, net revenues decreased 37%, due to lower equity and fixed income sales and trading revenues. Equity sales and trading revenues decreased 40%, mainly due to the absence of the positive impact of CHF 65 million in 2Q16 in derivatives resulting from a recalibration of the valuation model for certain hybrid instruments, lower revenues from equity derivatives reflecting lower client activity and lower market volatility. Fixed income sales and trading revenues decreased 29%, mainly driven by lower revenues from developed markets rates products, partially offset by higher revenues from emerging markets rates and credit products.

**Total operating expenses**

Total operating expenses of CHF 297 million decreased 14% compared to 1Q17, primarily due to lower general and administrative expenses and lower compensation and benefits. General and administrative expenses decreased 21% to CHF 96 million, mainly due to lower marketing expenses, lower professional services fees and lower expenses for IT infrastructure and support. Compensation and benefits decreased 9% to CHF 143 million, primarily driven by lower discretionary compensation expenses. Adjusted total operating expenses of CHF 288 million decreased 13% compared to 1Q17.

Compared to 2Q16, total operating expenses decreased 18%, mainly reflecting lower compensation and benefits, lower commission expenses and lower general and administrative expenses. Compensation and benefits decreased 25%, primarily driven by lower deferred compensation expenses from prior-year awards and lower salary expenses. Commission expenses decreased 18%, primarily reflecting the transition of the systematic market making business to the Asset Management business in International Wealth Management. General and administrative expenses decreased 5%, mainly due to lower travel and entertainment expenses and lower professional services fees. Adjusted total operating expenses decreased 18% compared to 2Q16.

# Global Markets

In 2Q17, Global Markets reported income before taxes of CHF 257 million and net revenues of CHF 1,517 million. Net revenues decreased 6% compared to a strong 1Q17, reflecting a seasonal decline in client activity.

## RESULTS SUMMARY

### 2Q17 results

In 2Q17, we reported income before taxes of CHF 257 million and net revenues of CHF 1,517 million. Compared to 1Q17, net revenues decreased 6%, due to less favorable market conditions across our Solutions businesses and a slowdown in industry-wide debt issuance activity. Net revenues decreased 7% compared to strong 2Q16 results, as low volatility adversely impacted trading revenues.

Total operating expenses of CHF 1,248 million decreased 3% compared to 1Q17, reflecting lower compensation and benefits. Compared to 2Q16, total operating expenses decreased 16%,

reflecting lower compensation and benefits, allocated corporate function and restructuring costs. Adjusted income before taxes was CHF 289 million in 2Q17, compared to adjusted income before taxes of CHF 337 million in 1Q17 and adjusted income before taxes of CHF 204 million in 2Q16.

### Capital and leverage metrics

As of the end of 2Q17, we reported risk-weighted assets of USD 53.6 billion, reflecting an increase of USD 1.6 billion compared to the end of 1Q17. Leverage exposure was USD 288.7 billion, reflecting an increase of USD 1.5 billion compared to the end of 1Q17.

## RESULTS

### Equities

In 2Q17, equities revenues of CHF 471 million increased slightly compared to 1Q17, as higher prime services revenues and resilient issuance activity were partially offset by lower trading revenues. Prime services revenues increased, reflecting higher prime brokerage and client financing revenues due to the European dividend season. These gains in revenues were partially offset by lower cash equities trading performance primarily reflecting lower trading volumes in the US and Latin America.

Compared to 2Q16, equities revenues increased 5%. Cash equities revenues were resilient, as a low volatility environment benefited primary issuance, but adversely impacted trading activity. Prime services results were stable and reflected continued growth in client balances.

### Systematic market making

Our systematic market making business was transitioned to International Wealth Management in 1Q17, in line with Credit Suisse's ongoing strategy to develop new and differentiated product

offerings. Following this transition, Global Markets continues to participate as an investor in the business.

Compared to 1Q17, systematic market making revenues declined reflecting a continued low volatility environment.

Compared to 2Q16, systematic market making revenues decreased significantly, largely due to the transition to International Wealth Management and challenging operating conditions in that business. In addition, 2Q16 systematic market making performance benefited from increased volatility surrounding the UK referendum on EU membership.

### Credit

In 2Q17, credit revenues of CHF 900 million decreased 2% compared to a strong 1Q17, reflecting a seasonal decrease in client activity. Revenues from global credit products decreased, primarily driven by a slowdown in industry-wide volumes, particularly in investment grade compared to robust 1Q17 primary issuance activity. These decreases were partially offset by an increase in securitized products revenues due to higher asset finance and non-agency trading revenues.

Compared to a strong 2Q16, credit revenues increased 21%, primarily due to a substantial increase in securitized products revenues reflecting broad-based strength across all products, particularly in non-agency and asset finance results. This was partially offset by lower global credit products revenues reflecting a slowdown in issuance activity, particularly in investment grade, and tighter credit spreads and sustained low levels of volatility which resulted in reduced trading activity.

### **Solutions**

In 2Q17, solutions revenues of CHF 195 million decreased 26% compared to 1Q17, primarily due to challenging market conditions. Emerging markets revenues declined, primarily driven by lower trading activity in Brazil due to political uncertainty. Global macro products revenues decreased, reflecting reduced client activity in our rates business, partially offset by improved foreign exchange results. In addition, we had lower equity derivatives results as persistently low levels of volatility led to reduced client activity, particularly in structured derivatives.

Compared to 2Q16, solutions revenues decreased 52%, largely due to higher client trading activity seen in 2Q16 in the days immediately following the UK referendum. Global macro products revenues declined, due to significantly lower client activity driven by low US interest rate volatility. Equity derivatives revenues declined due to reduced client activity in corporate and flow derivatives reflecting historically low levels of volatility. In addition, emerging markets revenues declined compared to a strong 2Q16, reflecting lower trading activity in Brazil due to political uncertainty.

### **Provision for credit losses**

Global markets recorded a provision for credit losses of CHF 12 million relating to adverse developments on non-fair valued loans in 2Q17. This compares to a provision for credit losses of CHF 5 million in 1Q17 and a release of provision for credit losses of CHF 17 million in 2Q16.

### **Total operating expenses**

In 2Q17, total operating expenses of CHF 1,248 million decreased 3% compared to 1Q17. Lower compensation and benefits were partially offset by slightly higher general and administrative expenses and higher restructuring costs. During 2Q17, we incurred restructuring costs of CHF 32 million. The decrease in compensation and benefits was primarily driven by lower discretionary compensation expenses and lower deferred compensation expenses from prior-year awards. General and administrative expenses were slightly higher, reflecting an increase in allocated corporate function costs. Adjusted total operating expenses decreased 4%.

Compared to 2Q16, total operating expenses decreased 16%, reflecting lower costs across compensation and benefits, allocated corporate function and restructuring costs. The decrease in compensation and benefits was driven by lower discretionary compensation expenses, deferred compensation expenses from prior-year awards and salary expenses. General and administrative expenses declined due to reduced allocated corporate function costs and lower professional services fees. Adjusted total operating expenses decreased 16%.

# Investment Banking & Capital Markets

In 2Q17, Investment Banking & Capital Markets reported income before taxes of CHF 78 million and net revenues of CHF 511 million. Net revenues decreased 6% compared to 2Q16.

## RESULTS SUMMARY

### 2Q17 results

In 2Q17, we reported income before taxes of CHF 78 million, a decrease of 48% compared to 1Q17. Net revenues of CHF 511 million decreased 16% compared to 1Q17, due to lower revenues from advisory and debt underwriting, partially offset by higher revenues from equity underwriting. Compared to 1Q17, revenues from advisory and other fees decreased 24% and debt underwriting revenues decreased 12%, while equity underwriting revenues increased 2%. Total operating expenses of CHF 420 million decreased 7%, driven by lower compensation and benefits.

Compared to 2Q16, our reported income before taxes decreased 42% in 2Q17, driven by lower revenues. Net revenues decreased 6%. Debt underwriting revenues decreased

11%, revenues from advisory and other fees decreased 13% while equity underwriting revenues increased 11%. Total operating expenses of CHF 420 million increased 3%.

### Capital and leverage metrics

As of the end of 2Q17, risk-weighted assets were USD 19.5 billion, an increase of USD 0.9 billion compared to the end of 1Q17. The increase was driven primarily by higher activity in debt underwriting, reflecting growth in the corporate bank and debt capital markets. Leverage exposure was USD 45.0 billion, an increase of USD 1.0 billion compared to the end of 1Q17, reflecting an increase in high-quality liquid assets and increased debt capital markets activity.

## RESULTS

## Advisory and other fees

In 2Q17, revenues from advisory and other fees of CHF 166 million decreased 24% compared to 1Q17, reflecting lower revenues from completed M&A transactions.

Revenues decreased 13% compared to 2Q16, slightly more than the industry-wide decline in the overall M&A fee pool.

## Debt underwriting

In 2Q17, debt underwriting revenues of CHF 257 million decreased 12% compared to 1Q17, driven by lower leveraged finance and investment grade underwriting revenues, reflecting lower refinancing activity, partially offset by higher derivatives financing revenues.

Compared to 2Q16, revenues decreased 11%, driven by lower investment grade underwriting, including acquisition financing, and decreased derivatives financing revenues, partially offset by higher leveraged finance revenues.

## Equity underwriting

In 2Q17, revenues from equity underwriting of CHF 105 million increased 2% compared to 1Q17, primarily driven by higher revenues from rights offerings.

Compared to 2Q16, revenues increased 11%, primarily driven by higher revenues from IPOs and rights offerings, partially offset by lower equity derivatives.

## Provision for credit losses

In 2Q17, we recorded a provision for credit losses of CHF 13 million relating to a single counterparty and adverse developments on non-fair valued loans in our corporate lending portfolio, compared to CHF 6 million recorded in 1Q17. There was no provision for credit losses in 2Q16.

**Total operating expenses**

Total operating expenses of CHF 420 million decreased 7% compared to 1Q17, driven by lower compensation and benefits. Compensation and benefits of CHF 303 million decreased 13%, reflecting lower deferred compensation expenses and a lower discretionary compensation accrual. General and administrative expenses of CHF 104 million increased 3%, mainly due to higher allocated corporate function costs.

Compared to 2Q16, total operating expenses increased 3%, driven by higher restructuring expenses and an increase in allocated corporate function costs.

**Global advisory and underwriting revenues**

The Group's global advisory and underwriting business operates across multiple business divisions that work in close collaboration with each other to generate these revenues. In order to reflect the global performance and capabilities of this business and for enhanced comparability versus its peers, the following table aggregates total advisory and underwriting revenues for the Group into a single metric in US dollar terms before cross-divisional revenue sharing agreements.

			in	% change			in	% change

# Strategic Resolution Unit

In 2Q17, the Strategic Resolution Unit reported a loss before taxes of CHF 563 million and decreased its risk-weighted assets by USD 1.6 billion and its leverage exposure by USD 7.9 billion.

## RESULTS SUMMARY

### 2Q17 results

In 2Q17, we reported a loss before taxes of CHF 563 million compared to losses of CHF 539 million in 1Q17 and CHF 759 million in 2Q16. In 2Q17, we reported an adjusted loss before taxes of CHF 531 million, compared to adjusted losses of CHF 500 million in 1Q17 and CHF 739 million in 2Q16.

We reported negative net revenues of CHF 274 million in 2Q17, primarily driven by overall funding costs and valuation adjustments, partially offset by revenues from our legacy cross-border and small markets businesses. Valuation adjustments in 2Q17 primarily reflected losses on specific counterparty credit events in our legacy investment banking portfolio. Total operating expenses in 2Q17 were CHF 276 million, including CHF 164 million of general and administrative expenses, of which CHF 28 million were litigation provisions, and CHF 94 million were compensation and benefits. In 2Q17, we reported adjusted total operating expenses of CHF 244 million, compared to CHF 232 million in 1Q17 and CHF 413 million in 2Q16.

### Capital and leverage metrics

As of the end of 2Q17, we reported risk-weighted assets of USD 39.8 billion, a decrease of USD 1.6 billion and USD 18.2 billion compared to the end of 1Q17 and 2Q16, respectively. Leverage exposure was USD 74.8 billion as of the end of 2Q17, reflecting a decrease of USD 7.9 billion and USD 72.8 billion compared to the end of 1Q17 and 2Q16, respectively. In 2Q17, risk-weighted assets reduction was achieved through targeted de-risking, such as the unwind of emerging market credit derivative exposures, and the sale or unwind of private equity funds and ship finance exposures. Leverage exposure reduction was achieved through various initiatives, including the reduction of emerging market loan exposures and the unwind and restructuring of life finance and derivatives exposures.

## RESULTS

## Net revenues

We reported negative net revenues of CHF 274 million in 2Q17 compared to negative net revenues of CHF 206 million in 1Q17 and CHF 363 million in 2Q16. Compared to 1Q17, the movement was primarily driven by higher negative valuation adjustments and lower fee-based revenues as a result of accelerated business exits, both in our legacy investment banking portfolio. This movement was partially offset by a reduction in overall funding costs.

Compared to 2Q16, the improvement was primarily driven by lower negative valuation adjustments and lower overall funding costs, partially offset by a reduction in fee-based revenues as a result of accelerated business exits in our legacy investment banking portfolio and from the restructuring of select onshore businesses. Valuation adjustments in 2Q17 primarily reflected mark-to-market losses on our legacy investment banking portfolio, including our macro trading portfolio.

### **Provision for credit losses**

In 2Q17, there was a provision for credit losses of CHF 13 million compared to CHF 24 million in 1Q17 and a release of provision for credit losses of CHF 37 million in 2Q16. Provision for credit losses in 2Q17 was primarily related to the disposal of ship finance exposures.

### **Total operating expenses**

Total operating expenses of CHF 276 million decreased CHF 33 million compared to 1Q17, primarily reflecting lower general and administrative expenses, including lower litigation provisions of CHF 53 million mainly in connection with mortgage-related matters, partially offset by higher expenses related to regulatory driven initiatives. Total operating expenses in 2Q17 included costs of CHF 48 million to meet requirements related to the settlements with US authorities regarding US cross-border matters. Adjusted total operating expenses increased 5%.

Compared to 2Q16, total operating expenses decreased CHF 157 million, due to lower compensation and benefits and general and administrative expenses as a result of various cost reduction initiatives, including the impact of the transfer of our US private banking business, and lower restructuring expenses. Adjusted total operating expenses decreased 41%.

### **Development of the Strategic Resolution Unit**

As part of the Group's strategy announced in 4Q15, we formed a new Strategic Resolution Unit intended to oversee the effective wind-down of businesses and positions that do not fit our strategic direction in the most efficient manner possible. At that time the Strategic Resolution Unit was created to facilitate the immediate right-sizing of our business divisions from a capital perspective and included remaining portfolios from our former non-strategic units plus additional transfers from the business divisions. The expectation at that time was that the Strategic Resolution Unit's risk-weighted assets and leverage exposure would be reduced by approximately 80% by 2020, excluding operational risk.

On March 23, 2016 we announced additional strategic measures to further lower our cost base, accelerate the risk-weighted assets and leverage reduction initiatives through the restructuring of our Global Markets business and further strengthen our capital position. The additional measures included exiting the distressed credit, European securitized products trading and long-term illiquid financing businesses and making other business reductions. The assets from these impacted businesses were transferred to the Strategic Resolution Unit in the second quarter of 2016, including a portion of the corporate loan portfolio managed by the Global Markets and Investment Banking & Capital Markets divisions. These transfers related to client lending relationship exits and exposure types that at the time we did not consider consistent with

the announced strategy. At that time we updated our expectation of the timing of an 80% reduction of the division's risk-weighted assets and leverage exposure to year-end 2019, excluding operational risk.

In 1Q17 we announced an acceleration of the release of capital from the Strategic Resolution Unit and now plan to complete the wind-down of the division by the end of 2018 without incremental impact to our existing targets for pre-tax losses from this division. At our Investor Day in 2016 we announced that we estimated expenses in the Strategic Resolution Unit would amount to approximately USD 560 million and USD 440 million in 2018 and 2019, respectively. We further estimated pre-tax losses of approximately USD 1,400 million and USD 800 million in 2018 and 2019, respectively. In light of the acceleration of the wind-down of the division by the end of 2018, we expect to disclose any updated estimates of these measures in due course. Currently the allocation of costs to the Strategic Resolution Unit is conducted pursuant to a Group-wide allocation methodology, i.e., the Strategic Resolution Unit is subject to the same cost allocation methodology as the strategic divisions; however reductions in service usage during the course of the wind-down of the division will reduce allocated costs.

On occasion, the reduction of exposures in the Strategic Resolution Unit involve the maturation of lending facilities or other transactions that wholly or partially may be renewed or extended by our strategic business divisions, such as Global Markets or International Wealth Management. Similarly, there may be occasions where strategic business divisions will enter into new transactions with counterparties resulting in exposures that may have similar characteristics to those recorded in the Strategic Resolution Unit. This is aligned with the Group's risk appetite and that of the relevant strategic divisions.

We have amended and enhanced our risk appetite framework in an effort to provide additional governance and controls to ensure all new business activities are scrutinized to distinguish between those types of business exposures held in the Strategic Resolution Unit that will be allowed for execution in our strategic divisions and those that will be prohibited or for which we have limited risk appetite.

The decline in risk-weighted assets and leverage exposure in 2Q17 for the Strategic Resolution Unit also reflected the contractual maturation of certain legacy loan facilities where the third-party counterparties entered into new agreements with the Global Markets division. The impact of these maturations on risk weighted assets and leverage exposure for the Strategic Resolution Unit was approximately USD 17 million and USD 77 million, respectively.

► Refer to "Update to the risk appetite framework" in II – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Overview and risk-related developments for further information on risk appetite framework.

# Corporate Center

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Corporate services and business support, including in finance, operations, human resources, legal, compliance, risk management and IT, are provided by corporate functions, and the related costs are allocated to the segments and the Corporate Center based on their requirements and other relevant measures.

<sup>1</sup> Disclosed on a look-through basis.

## 2Q17 results

In 2Q17, Corporate Center recorded a loss before taxes of CHF 245 million compared to losses of CHF 99 million in 1Q17, primarily driven by movements in treasury results, and compared to losses of CHF 235 million in 2Q16. Compensation and benefits mainly reflect fair value adjustments on certain deferred compensation plans not allocated to the segments and certain deferred compensation retention awards intended to support the restructuring of the Group relating to Global Markets and Investment Banking & Capital Markets, predominantly through the end of 2017, and to Asia Pacific predominantly through the end of 2018. General

and administrative expenses primarily reflected costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements. Other revenues include required elimination adjustments associated with trading in own shares. Treasury results include the impact of volatility in the valuations of certain central funding transactions such as structured notes issuances and swap transactions. Beginning in 2Q17, treasury results also include additional interest charges from transfer pricing to align funding costs to assets held in the Corporate Center.

# Assets under management

As of the end of 2Q17, assets under management were CHF 1,307.3 billion and net new assets were CHF 12.1 billion in 2Q17.

## Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by the Asset Management business of International Wealth Management for other businesses are reported in each applicable business and eliminated at the Group level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic

participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

## Net new assets

Net new assets include individual cash payments, delivery of securities and cash flows resulting from loan increases or repayments.

Interest and dividend income credited to clients and commissions, interest and fees charged for banking services as well as changes in assets under management due to currency and market volatility are not taken into account when calculating net new assets, as such charges or market movements are not directly related to the Group's success in acquiring assets under management. Similarly structural effects mainly relate to asset inflows and outflows due to acquisition or divestiture, exit from businesses or markets or exits due to new regulatory requirements and are not taken into account when calculating net new assets. The Group reviews relevant policies regarding client assets on a regular basis.

**2Q17 results**

As of the end of 2Q17, assets under management of CHF 1,307.3 billion increased CHF 3.1 billion compared to the end of 1Q17. The increase was mainly driven by favorable market movements and net new assets of CHF 12.1 billion, largely offset by unfavorable foreign exchange-related movements.

Net new assets of CHF 12.1 billion primarily reflected net new assets of CHF 4.6 billion in the Private Banking business of International Wealth Management, reflecting solid inflows from emerging markets and Europe, net new assets of CHF 4.5 billion in the

Private Banking business of Asia Pacific, primarily from inflows in Greater China and South East Asia and net new assets of CHF 2.8 billion in the Asset Management business of International Wealth Management reflecting inflows from traditional and alternative investments, partially offset by outflows from joint ventures.

# Liquidity and funding management

In 2Q17, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

## OVERVIEW

Securities for funding and capital purposes have historically been issued primarily by the Bank, our principal operating subsidiary and a US registrant. In response to regulatory reform, we are now focusing our issuance strategy on offering long-term debt securities at the Group level. Proceeds from issuances are lent to operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements and the former as desired by management to support business initiatives and liquidity needs.

Our internal liquidity risk management framework is subject to review and monitoring by the Swiss Financial Market Supervisory Authority FINMA (FINMA), other regulators and rating agencies.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on liquidity and funding management.

## REGULATORY FRAMEWORK

### Basel III liquidity framework

In 2010, the Basel Committee on Banking Supervision (BCBS) issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR). As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions and estimates. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown in this report.

The LCR, which is being phased in from January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have unencumbered high-quality liquid assets (HQLA) available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of HQLA in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% per year until January 1, 2019.

The NSFR establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's on- and off-balance sheet activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds.

The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and once implemented by national regulators, should always be at least 100%.

### Swiss liquidity requirements

In 2012, the Swiss Federal Council adopted a liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making, including with respect to the final Basel III LCR rules adopted in 2014. Under the Liquidity Ordinance, as amended, certain Swiss banks became subject to an initial 60% LCR requirement, with incremental increases by 10% per year until January 1, 2019. Systemically relevant banks like Credit Suisse became subject to an initial minimum LCR requirement of 100% beginning on January 1, 2015 and the associated disclosure requirements. Further, beginning in May 2015, FINMA required us to maintain a minimum LCR of 110% at all times.

In connection with the implementation of Basel III, regulatory LCR disclosures for the Group and certain subsidiaries are required. Further details on our LCR can be found on our website.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for additional information.

FINMA requires us to report the NSFR to FINMA on a monthly basis. The reporting instructions are generally aligned with the final BCBS NSFR requirements. Following an observation period that began in 2012, the NSFR will become a minimum standard in Switzerland on January 1, 2019, at which time banks will be required to comply with disclosure requirements prescribed by the BCBS and implemented by FINMA.

Our liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on the Basel III liquidity framework and Swiss liquidity requirements.

## LIQUIDITY RISK MANAGEMENT FRAMEWORK

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage

our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we expect to have sufficient liquidity to sustain operations for a period of time in excess of our minimum limit. This includes potential currency mismatches, which are not deemed to be a major risk but are monitored and subject to limits, particularly in the significant currencies of euro, Japanese yen, pound sterling, Swiss franc and US dollar.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on our approach to liquidity risk management, governance and contingency planning.

## LIQUIDITY METRICS

### Liquidity pool

Treasury manages a sizeable portfolio of liquid assets comprised of cash held at central banks and securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top-rated counterparties. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash held at central banks and highly rated government bonds and on short-term reverse repurchase agreements. These government bonds are eligible as collateral for liquidity facilities with various central banks including the SNB, the Fed, the ECB and the BoE. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities.

The liquidity pool may be used to meet the liquidity requirements of our operating companies.

As of the end of 2Q17, our liquidity pool managed by Treasury had an HQLA value of CHF 155.7 billion. The liquidity pool consisted of CHF 94.2 billion of cash held at major central banks, primarily the SNB, the Fed and the ECB, and CHF 61.5 billion market value of securities issued by governments and government agencies, primarily from the US, UK and France.

In addition to the liquidity portfolio managed by Treasury, there is also a portfolio of unencumbered liquid assets managed by various businesses, primarily in the Global Markets and Investment Banking & Capital Markets divisions. These assets generally include high-grade bonds and highly liquid equity securities that form part of major indices. In coordination with the businesses, Treasury can access these assets to generate liquidity if required.

As of the end of 2Q17, the portfolio that is not managed by Treasury had a market value of CHF 32.7 billion, consisting of CHF 12.5 billion of high-grade bonds and CHF 20.2 billion of highly liquid equity securities. Under our internal model, an average stress-level haircut of 15% is applied to these assets. The haircuts applied to these portfolios reflect our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

### Liquidity pool – Group

End of					2Q17	1Q17	4Q16
	Swiss franc	US dollar	Euro	Other currencies	Total	Total	Total

<b>Liquid assets <sup>1</sup></b>	<b>74,747</b>	<b>48,219</b>	<b>13,261</b>	<b>19,482</b>	<b>155,709</b>	<b>191,611</b>	<b>189,974</b>

<sup>1</sup> Reflects a pre-cancellation view.

### Liquidity Coverage Ratio

Our calculation methodology for the LCR is prescribed by FINMA. For disclosure purposes, since January 1, 2017, our LCR is calculated using a three-month average that is measured using daily calculations during the quarter. The FINMA calculation of HQLA takes into account a cancellation mechanism (post-cancellation view) and is therefore not directly comparable to the assets presented in the financial statements that could potentially be monetized under a severe stress scenario. The cancellation mechanism effectively excludes the impact of certain secured financing transactions from available HQLA and simultaneously adjusts the level of net cash outflows calculated. Application of the cancellation mechanism adjusts both the numerator and denominator of the LCR calculation, meaning that the impact is mostly neutral on the LCR itself.

Beginning on March 31, 2017, our HQLA measurement methodology excludes potentially eligible HQLA available for use by entities of the Group in certain jurisdictions that may not be readily accessible for use by the Group as a whole. These HQLA

eligible amounts may be restricted for reasons such as local regulatory requirements, including large exposure requirements, or other binding constraints that could limit the transferability to other Group entities in other jurisdictions.

On this basis, the level of our LCR was 165% as of the end of 2Q17, a decrease from 205% as of the end of 1Q17, representing an average HQLA of CHF 158.8 billion and average net cash outflows of CHF 96.2 billion.

The significant decrease in the LCR in 2Q17 resulted from the reduction in HQLA following the change in measurement methodology implemented on March 31, 2017 for assets that may be restricted. The effect of this change was reflected during the entire second quarter, leading to a greater reduction in average HQLA during 2Q17 than in 1Q17, where the effect of the change was only reflected for one day.

In addition, average net cash outflows increased slightly, mainly driven by a recalibration of our operational deposits model resulting in an increase in unsecured wholesale funding outflows. Our operational deposits model is approved by FINMA.

## Liquidity coverage ratio – Group

End of		2Q17	1Q17	4Q16
	Unweighted value <sup>1</sup>	Weighted value <sup>2</sup>	Weighted value <sup>2</sup>	Weighted value <sup>2</sup>

<b>Liquidity coverage ratio (%)</b>		<b>165</b>	<b>205</b>	<b>202</b>

Calculated using a three-month average which since 1Q17 is calculated on a daily basis.

<sup>1</sup> Calculated as outstanding balances maturing or callable within 30 days.

<sup>2</sup> Calculated after the application of haircuts for high-quality liquid assets or inflow and outflow rates.

<sup>3</sup> Consists of cash and eligible securities as prescribed by FINMA and reflects a post-cancellation view.

## FUNDING SOURCES AND USES

We fund our balance sheet primarily through core customer deposits, long-term debt, including structured notes, and shareholders' equity. We monitor the funding sources, including their concentrations against certain limits, according to their counterparty, currency, tenor, geography and maturity, and whether they are secured or unsecured.

A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 19% as of the end of 2Q17, compared to 16% as of the end of 1Q17, primarily reflecting a small increase in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as the haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 323 billion as of the end of 2Q17, compared to CHF 320 billion as of the end of 1Q17,

reflecting a small increase in the customer deposit base in our private banking and corporate & institutional banking businesses. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proven to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

► Refer to the chart "Balance sheet funding structure" and "Balance sheet" in Balance sheet, and off-balance sheet for further information.

## DEBT ISSUANCES AND REDEMPTIONS

Our long-term debt includes senior, senior bail-in and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or historically from our own international covered bond program.

## Balance sheet funding structure

as of June 30, 2017 (CHF billion)

Reverse repurchase agreements	51	<b>Match funded</b>	64	Repurchase agreements
Encumbered trading assets	40		27	Short positions
Funding-neutral assets <sup>1</sup>	70		70	Funding-neutral liabilities <sup>1</sup>
Cash & due from banks	111	<b>119% coverage</b>	10	Other short-term liabilities <sup>2</sup>
Unencumbered liquid assets <sup>3</sup>	127		51	Due to banks
Loans <sup>4</sup>	272		17	Short-term borrowings
Other illiquid assets	112		323	Deposits <sup>5</sup>
			time	87
			demand	144
			savings	64
			fiduciary	28
			177	Long-term debt
			44	Total equity
<b>Assets</b>	<b>783</b>		<b>783</b>	<b>Liabilities and Equity</b>

<sup>1</sup> Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.

<sup>2</sup> Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.

<sup>3</sup> Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.

<sup>4</sup> Excludes loans with banks.

<sup>5</sup> Excludes due to banks and certificates of deposit.

As of the end of 2Q17, we had outstanding long-term debt of CHF 176.7 billion, which included senior and subordinated instruments. We had CHF 57.7 billion and CHF 18.4 billion of structured notes and covered bonds outstanding, respectively, as of the end of 2Q17 compared to CHF 61.1 billion and CHF 18.3 billion, respectively, as of the end of 1Q17.

► Refer to "Issuances and redemptions" in Capital management for information on capital issuances, including buffer and progressive capital notes.

As of the end of 2Q17, the weighted average maturity of long-term debt was 5.8 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Short-term borrowings increased to CHF 17.2 billion as of the end of 2Q17 compared to CHF 13.8 billion as of the end of 1Q17, mainly due to an increase in commercial paper.

The following table provides information on long-term debt issuances, maturities and redemptions in 2Q17, excluding structured notes.

## Debt issuances and redemptions

in 2Q17	Senior	Senior bail-in	Sub- ordinated	Long-term debt
<b>Long-term debt (CHF billion, notional value)</b>				
<b>Issuances</b>	<b>0.2</b>	<b>0.0</b>	<b>0.0</b>	<b>0.2</b>
of which unsecured	0.0	0.0	0.0	0.0
of which secured <sup>1</sup>	0.2	0.0	0.0	0.2

of which unsecured	4.2	0.0	0.2	4.4
of which secured <sup>1</sup>	0.3	0.0	0.0	0.3

Excludes structured notes.

<sup>1</sup> Includes covered bonds.

## CREDIT RATINGS

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.3 billion, CHF 1.8 billion and CHF 2.4 billion, respectively, as of the end of 2Q17, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

Potential cash outflows on these derivative contracts associated with a downgrade of our long-term debt credit ratings, such as the requirement to post additional collateral to the counterparty, the loss of re-hypothecation rights on any collateral received and impacts arising from additional termination events are monitored and taken into account in the calculation of our liquidity requirements. There are additional derivative related risks that do not relate to the downgrade of our long term debt credit ratings and which may impact our liquidity position, including risks relating to holdings of derivatives collateral or potential movements in the valuation of derivatives positions. The potential outflows resulting across all derivative product types are monitored as part of the LCR scenario parameters and the internal liquidity reporting.

► Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information.

# Capital management

As of the end of 2Q17, our BIS CET1 ratio was 14.2% and 13.3% on a look-through basis. Our BIS tier 1 leverage ratio was 5.6% and 5.2% on a look-through basis.

## REGULATORY CAPITAL FRAMEWORK

Effective January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder (Swiss Requirements). Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business.

References to phase-in and look-through included herein refer to Basel III capital requirements and Swiss Requirements. Phase-in reflects that, for the years 2014 – 2018, there will be a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

► Refer to “Capital management” in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information.

## BIS REQUIREMENTS

The BCBS, the standard setting committee within the BIS, issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and become fully effective on January 1, 2019 for those countries that have adopted Basel III.

► Refer to the table “BIS phase-in requirements for Credit Suisse” for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum CET1 requirement is 4.5% of risk-weighted assets (RWA). In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends and make discretionary bonus payments and other earnings distributions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank’s systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified Credit Suisse as a G-SIB and currently requires Credit Suisse to maintain a 1.5% progressive buffer.

In addition to the CET1 requirements, there is also a requirement for 1.5% of additional tier 1 capital and 2% of tier 2 capital. These requirements may also be met with CET1 capital.

## Basel III capital frameworks for Credit Suisse

<sup>1</sup> Does not include any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

**BIS phase-in requirements for Credit Suisse**

For	2017	2018	2019
<b>Capital ratios</b>			
CET1	4.5%	4.5%	4.5%
Capital conservation buffer	1.250% <sup>1</sup>	1.875% <sup>1</sup>	2.5%
Progressive buffer for G-SIB	0.750% <sup>1</sup>	1.125% <sup>1</sup>	1.5%
<b>Total CET1</b>	<b>6.5%</b>	<b>7.5%</b>	<b>8.5%</b>
Additional tier 1	1.5%	1.5%	1.5%
<b>Tier 1</b>	<b>8.0%</b>	<b>9.0%</b>	<b>10.0%</b>
Tier 2	2.0%	2.0%	2.0%
<b>Total capital</b>	<b>10.0%</b>	<b>11.0%</b>	<b>12.0%</b>
Phase-in deductions from CET1 <sup>2</sup>	80.0% <sup>1</sup>	100.0%	100.0%
Capital instruments subject to phase-out	Phased out over a 10-year horizon beginning 2013 through 2022		

<sup>1</sup> Indicates phase-in period.

<sup>2</sup> Includes goodwill, other intangible assets and certain deferred tax assets.

To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125% as well as a trigger at the point of non-viability.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1. This requirement is imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

Capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, are phased out at their effective maturity date, which is generally the date of the first step-up coupon.

Banks are required to maintain a tier 1 leverage ratio of 3% beginning on January 1, 2018.

**SWISS REQUIREMENTS**

The legislation implementing the Basel III framework in Switzerland in respect of capital requirements for systemically relevant banks, including Credit Suisse, goes beyond the Basel III minimum standards for systemically relevant banks.

In May 2016, the Swiss Federal Council amended the Capital Adequacy Ordinance applicable to Swiss banks. The amendment recalibrates and expands the existing "Too Big to Fail" regime in Switzerland. Under the amended regime, systemically important banks operating internationally, such as Credit Suisse, will be subject to two different minimum requirements for loss-absorbing capacity: G-SIBs must hold sufficient capital that absorbs current operating losses to ensure continuity of service (going concern requirement) and they must issue sufficient debt instruments to fund restructuring without recourse to public resources (gone concern requirement). Going concern capital and gone concern capital together form our total loss-absorbing capacity (TLAC). The going concern and gone concern requirements are generally aligned with the FSB's total loss-absorbing capacity standard. The amended Capital Adequacy

Ordinance came into effect on July 1, 2016, subject to phase-in and grandfathering provisions for certain outstanding instruments, and has to be fully applied by January 1, 2020.

**Going concern requirement**

The going concern requirement applicable in 2020 for a G-SIB consists of (i) a base requirement of 12.86% of RWA and 4.5% of leverage exposure; and (ii) a surcharge, which reflects the G-SIB's systemic importance. For Credit Suisse, this currently translates into a going concern requirement of 14.3% of RWA, of which the minimum CET1 component is 10%, with the remainder to be met with a maximum of 4.3% additional tier 1 capital, which includes high-trigger capital instruments that would be converted into common equity or written down if the CET1 ratio falls below 7%. Under the going concern requirement, the Swiss leverage ratio must be 5%, of which the minimum CET1 component is 3.5%, with the remainder to be met with a maximum of 1.5% additional tier 1 capital, which includes high-trigger capital instruments.

**Gone concern requirement**

The gone concern requirement of a G-SIB is equal to its total going concern requirement, which in 2020, consists of a base requirement of 12.86% of RWA and 4.5% of leverage exposure, plus any surcharges applicable to the relevant G-SIB. The gone concern requirement does not include any countercyclical buffers. Credit Suisse is currently subject to a gone concern requirement of 14.3% of RWA and a 5% Swiss leverage ratio and is subject to potential capital rebates for resolvability and for certain tier 2 low-trigger instruments recognized as gone concern capital.

The gone concern requirement should primarily be fulfilled with bail-in debt instruments that are designed to absorb losses after the write-down or conversion into equity of regulatory capital of a G-SIB in a restructuring scenario, but before the write-down or conversion into equity of other senior obligations of the G-SIB. Bail-in debt instruments do not feature capital triggers that may lead to a write-down and/or a conversion into equity outside of restructuring, but only begin to bear losses once the G-SIB is formally in restructuring proceedings and FINMA orders capital measures (i.e., a write-down and/or a conversion into equity) in the restructuring plan.

According to the amended Capital Adequacy Ordinance, bail-in debt instruments must fulfill certain criteria in order to qualify under the gone concern requirement, including FINMA approval. In addition to bail-in debt instruments, the gone concern requirement may further be fulfilled with other capital instruments, including CET1, additional tier 1 capital instruments or tier 2 capital instruments.

**Grandfathering provisions**

The Capital Adequacy Ordinance provides for a number of grandfathering provisions with regard to the qualification of previously issued additional tier 1 capital instruments and tier 2 capital instruments:

- Additional tier 1 capital instruments with a low trigger qualify as going concern capital until their first call date. Additional tier 1 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital;

## Swiss capital and leverage phase-in requirements for Credit Suisse

Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital. As of the end of 2Q17, the Swiss countercyclical buffer for both the Group and the Bank was CHF 427 million, which is equivalent to 0.2% of CET1 capital. As of the end of 2Q17, the required extended countercyclical buffer for the Group and the Bank were insignificant.

- Tier 2 capital instruments with a high trigger qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity; and
- Tier 2 capital instruments with a low trigger also qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity.

Furthermore, to be eligible as gone concern capital, outstanding bail-in debt instruments issued before July 1, 2016 and bail-in debt instruments issued by a (Swiss or foreign) special purpose vehicle before January 1, 2017 must have been approved by FINMA.

Both the going concern and the gone concern requirements are subject to a phase-in with gradually increasing requirements and have to be fully applied by January 1, 2020.

### Other requirements

Effective July 1, 2016, Switzerland implemented an extended countercyclical buffer, which is based on the BIS countercyclical buffer that could require banks to hold up to 2.5% of RWA in the form of CET1 capital. The extended countercyclical buffer relates to a requirement that can be imposed by national regulators when credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

The Swiss Federal Council has not activated the BIS countercyclical buffer for Switzerland but instead requires banks to hold CET1 capital in the amount of 2% of their RWA pertaining to mortgage loans that finance residential property in Switzerland (Swiss countercyclical buffer).

In 2013, FINMA introduced increased capital charges for mortgages that finance owner occupied residential property in Switzerland (mortgage multiplier) to be phased in through January 1, 2019. The mortgage multiplier applies for purposes of both BIS and FINMA requirements.

In December 2013, FINMA issued a decree (FINMA Decree) specifying capital adequacy requirements for the Bank, on a stand-alone basis (Bank parent company), and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions.

► Refer to "Regulatory developments and proposals" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2016 for further information on the FINMA Decree.

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR), risks not in VaR (RNIV) and advanced credit valuation adjustment (CVA).

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior

rolling 12-month period. In 2017, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

► Refer to "Market risk review" in Risk management for further information.

## REGULATORY DEVELOPMENTS AND PROPOSALS

In July 2017, the FSB issued its Guiding Principles on the Internal Loss-absorbing Capacity of G-SIBs. The principles set out high-level guidelines to assist Crisis Management Group authorities in the implementation of internal TLAC mechanisms consistent with the FSB's TLAC standard of November 2015. G-SIBs should be expected to meet the internal TLAC requirements by January 1, 2019, if they have been designated by the FSB as a G-SIB before the end of 2015, which is the case for Credit Suisse.

## ISSUANCES AND REDEMPTIONS

### Issuances

On May 18, 2017, the Group held an Extraordinary General Meeting of shareholders, at which shareholders approved a capital increase. The capital increase was completed by way of a rights offering. Net proceeds of the rights offering amounted to CHF 4.1 billion.

In July 2017, the Group issued EUR 1.5 billion 1.25% senior notes due 2025 which count as bail-in instruments.

### Redemptions

In May 2017, the Group redeemed the remaining outstanding principal balances in the amounts of USD 135 million and USD 50 million of two tier 1 capital instruments. In June 2017, the Group redeemed the remaining outstanding principal balance in the amount of GBP 20 million of a tier 2 capital instrument.

### Higher Trigger Capital Amount

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert into equity or be written down prior to the write-down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion into equity or write-down is referred to as the Higher Trigger Capital Amount.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5.125%, the Higher Trigger Capital Amount was CHF 7.4 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 2.8%, both as of the end of 2017.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5%, the Higher Trigger Capital Amount was CHF 12.2 billion and the Higher Trigger Capital Ratio was 4.7%, both as of the end of 2017.

► Refer to the table "BIS capital metrics – Group" for further information on the BIS metrics used to calculate such measures.

► Refer to "Higher Trigger Capital Amount" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Issuances and redemptions in the Credit Suisse Annual Report 2016 for further information on the Higher Trigger Capital Amount.

<b>Capital ratios (%)</b>								
CET1 ratio	14.2	12.7	13.5	–	13.3	11.7	11.5	–
Tier 1 ratio	19.6	18.3	18.0	–	18.0	16.5	15.6	–
Total capital ratio	21.7	20.3	20.5	–	19.6	18.0	17.4	–

**BIS CAPITAL METRICS**

Our CET1 ratio was 14.2% as of the end of 2Q17 compared to 12.7% as of the end of 1Q17, reflecting higher CET1 capital and lower RWA. Our tier 1 ratio was 19.6% as of the end of 2Q17 compared to 18.3% as of the end of 1Q17. Our total capital ratio was 21.7% as of the end of 2Q17 compared to 20.3% as of the end of 1Q17.

CET1 capital was CHF 37.0 billion as of the end of 2Q17 compared to CHF 33.8 billion as of the end of 1Q17, mainly reflecting the capital increase and net income attributable to shareholders, partially offset by a negative foreign exchange impact.

Additional tier 1 capital decreased to CHF 14.2 billion as of the end of 2Q17 compared to CHF 14.7 billion as of the end of

1Q17, mainly reflecting a negative foreign exchange impact and the redemptions of the tier 1 capital instruments.

Tier 2 capital was CHF 5.3 billion as of the end of 2Q17 compared to CHF 5.4 billion as of the end of 1Q17, mainly reflecting a negative foreign exchange impact.

Total eligible capital was CHF 56.5 billion as of the end of 2Q17 compared to CHF 53.8 billion as of the end of 1Q17, primarily reflecting the increases in CET1 capital and tier 1 capital, partially offset by a decrease in tier 2 capital.

As of the end of 2Q17, the look-through CET1 ratio was 13.3% compared to 11.7% as of the end of 1Q17. As of the end of 2Q17, the look-through total capital ratio was 19.6% compared to 18.0% as of the end of 1Q17.

<sup>1</sup> Includes US GAAP cumulative translation adjustments and the foreign exchange impact on regulatory CET1 adjustments.

<sup>2</sup> Includes the impact of a dividend accrual, the net effect of share-based compensation and pensions and a change in other regulatory adjustments (e.g., the net regulatory impact of gains/(losses) on fair-valued financial liabilities due to changes in own credit risk and certain deferred tax assets).

<sup>3</sup> Primarily includes the net regulatory impact of gains/(losses) on fair-valued financial liabilities due to changes in own credit risk, which will be deducted from CET1 once Basel III is fully implemented.

## RISK-WEIGHTED ASSETS

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as credit, market and operational risk RWA. When assessing RWA, it is not the nominal size, but rather the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Capital requirements for premises and equipment are also included in credit risk. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in credit risk RWA. Market risk RWA reflect the capital

requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

RWA decreased 2% to CHF 260.9 billion as of the end of 2Q17 compared to CHF 265.3 billion as of the end of 1Q17, primarily driven by a foreign exchange impact and movements in risk levels, mainly in market risk. These decreases were partially offset by increases resulting from methodology and policy changes in credit risk.

Excluding the foreign exchange impact, the increase in **credit risk** was primarily driven by methodology and policy changes and movements in risk levels attributable to book size, partially offset by decreases in risk levels attributable to book quality. The increase relating to methodology and policy changes was mainly related to the phase-in impact from a FINMA requirement to treat share-backed lending without personal guarantees as corporate exposures, which was introduced in 3Q16 and primarily was reflected in International Wealth Management. The increase in methodology and policy changes was also impacted by an additional phase-in of the multiplier on income producing real estate (IPRE) exposures within Swiss Universal Bank and an additional phase-in of a multiplier on certain investment banking corporate exposures in Investment Banking & Capital Markets, Global Markets and Asia Pacific. The movements in risk levels reflected increases attributable to book size mainly from higher lending exposures in Asia Pacific, Investment Banking & Capital Markets and Global Markets. The increase in Corporate Center primarily reflected higher threshold-dependent RWA resulting from the capital increase. We also had increases in derivative exposures, primarily in Investment Banking & Capital Markets, and increases in secured financing exposures, in Global Markets. These increases were partially offset by decreases in lending exposures in Swiss Universal Bank and the Strategic Resolution Unit, reductions in advanced CVA due to increased hedging benefits in Investment Banking & Capital Markets, Swiss Universal Bank and International Wealth Management and decreases in derivative exposures in the Strategic Resolution Unit. The movements in risk levels were offset by decreases attributable to book quality for corporate lending exposures in Asia Pacific, Swiss Universal Bank and International Wealth Management.

Excluding the foreign exchange impact, the decrease in **market risk** was primarily driven by movements in risk levels, partially offset by an increase resulting from model and parameter updates. The movements in risk levels were primarily related to the Strategic Resolution Unit, Global Markets and Asia Pacific. The increase in model and parameter updates were mainly due to time series updates in Global Markets and Asia Pacific.

<sup>1</sup> Represents changes in portfolio size.<sup>2</sup> Represents changes in average risk weighting across credit risk classes.<sup>3</sup> Represents movements arising from updates to models and recalibrations of parameters and internal changes impacting how exposures are treated.<sup>4</sup> Represents externally prescribed regulatory changes impacting how exposures are treated.<sup>5</sup> The look-through adjustment impacts only credit risk within the Corporate Center. The difference between phase-in and look-through risk-weighted assets relates to transitional arrangements such as the impact from pension assets and deferred tax assets not deducted from CET1 during the phase-in period and the transitional impact from threshold-related risk-weighted assets.

## Risk-weighted assets and capital ratios – Group

**LEVERAGE METRICS**

Beginning in 1Q15, Credit Suisse adopted the BIS leverage ratio framework, as issued by the BCBS and implemented in Switzerland by FINMA. Under the BIS framework, the leverage ratio measures tier 1 capital against the end-of-period exposure. BIS leverage amounts are calculated based on our interpretation of, and assumptions and estimates related to, the BIS requirements as implemented in Switzerland by FINMA. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown here.

As used herein, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments.

The look-through leverage exposure was CHF 906.2 billion as of the end of 2Q17, a decrease of 3% compared to CHF 935.9 billion as of the end of 1Q17. The movement was primarily due to a reduction in the Group's consolidated balance sheet, reflecting a foreign exchange translation impact and lower operating activities.

► Refer to "Balance sheet and off-balance sheet" for further information on the reduction in the Group's consolidated balance sheet.

**Look-through leverage exposure – Group**

end of	2Q17	1Q17	4Q16

<b>Leverage exposure</b>	<b>906,194</b>	<b>935,911</b>	<b>950,763</b>

**BIS leverage ratios – Group**

The tier 1 leverage ratio was 5.6% as of the end of 2Q17, with a CET1 component of 4.1%. On a look-through basis, the tier 1 leverage ratio was 5.2%, with a CET1 component of 3.8%.

The CET1 leverage ratio of 4.1% as of the end of 2Q17 increased compared to 3.6% as of the end of 1Q17, reflecting the increase in CET1 capital and a decrease in the leverage exposure.

The tier 1 leverage ratio of 5.6% as of the end of 2Q17 increased compared to 5.2% as of the end of 1Q17, mainly reflecting the increase in tier 1 capital and the decrease in the leverage exposure.

## SWISS CAPITAL AND LEVERAGE METRICS

### Swiss capital metrics

► Refer to "Swiss Requirements" for further information on Swiss regulatory requirements.

As of the end of 2Q17, our Swiss CET1 ratio was 14.1%, our going concern capital ratio was 20.3%, our gone concern capital ratio was 11.3% and our TLAC ratio was 31.6%.

On a look-through basis, as of the end of 2Q17, our Swiss CET1 capital was CHF 34.3 billion and our Swiss CET1 ratio was 13.2%. Our going concern capital was CHF 46.5 billion and our going concern capital ratio was 17.9%. Our gone concern capital was CHF 29.1 billion and our gone concern capital ratio was 11.2%. Our total loss-absorbing capacity was CHF 75.6 billion and our TLAC ratio was 29.1%.

## Swiss capital and leverage ratios for Credit Suisse

Rounding differences may occur. Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

### Swiss leverage metrics

The leverage exposure used in the Swiss leverage ratio is measured on the same period-end basis as the leverage exposure for the BIS leverage ratio.

As of the end of 2Q17, our Swiss CET1 leverage ratio was 4.1%, our going concern leverage ratio was 5.8%, our gone

concern leverage ratio was 3.2% and our TLAC leverage ratio was 9.1%.

On a look-through basis, as of the end of 2Q17, our Swiss CET1 leverage ratio was 3.8%, our going concern leverage ratio was 5.1%, our gone concern leverage ratio was 3.2% and our TLAC leverage ratio was 8.3%.

## BANK REGULATORY DISCLOSURES

The following capital, RWA and leverage disclosures apply to the Bank. The business of the Bank is substantially the same as that of the Group, including business drivers and trends relating to capital, RWA and leverage metrics.

**OTHER REGULATORY DISCLOSURES**

In connection with the implementation of Basel III, certain regulatory disclosures for the Group and certain of its subsidiaries are required. The Group's Pillar 3 disclosure, regulatory disclosures, additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base, G-SIB financial indicators, reconciliation requirements, leverage ratios and certain liquidity disclosures as well as regulatory disclosures for subsidiaries can be found on our website.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for additional information.

**SHAREHOLDERS' EQUITY AND SHARE METRICS****Total shareholders' equity**

Our total shareholders' equity increased from CHF 41.7 billion as of the end of 1Q17 to CHF 43.5 billion as of the end of 2Q17. Total shareholders' equity was positively impacted by the issuance of common shares due to the rights offering, net income attributable to shareholders and an increase in the share-based compensation obligation. These movements were partially offset by foreign exchange-related movements on cumulative translation adjustments, losses on fair value elected liabilities relating to credit risk, dividends paid and transactions relating to the settlement of share-based compensation awards.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

# Risk management

In 2Q17, our available economic capital increased 5%, economic risk capital decreased 6%, overall position risk decreased 6% and average risk management VaR in US dollars increased 8%. Gross impaired loans remained stable at CHF 2.2 billion on a gross loan portfolio of CHF 274.9 billion.

## OVERVIEW AND RISK-RELATED DEVELOPMENTS

Fundamental to our business is the prudent taking of risk in line with our strategic priorities. The primary objectives of risk management are to protect our financial strength and reputation, while ensuring that capital is well deployed to support business activities. Our risk management framework is based on transparency, management accountability and independent oversight.

► Refer to "Key risk developments", "Risk management oversight", "Risk appetite framework" and "Risk coverage and management" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2016 for further information and additional details of our current risk management framework and activities, including definitions of certain terms and relevant metrics.

### Key risk developments

#### French presidential elections

In the run up to the presidential election in France we convened a working group to ensure appropriate contingency planning was in place in case of an unexpected result or adverse market reaction. A review of our exposures to France was conducted with a number of scenarios of varying severities explored and, as a result, we have introduced specific scenario limits and reduced our exposure to a number of European countries.

#### North Korean crisis

Tensions continue to run high on the Korean peninsula. In the event of a potential escalation of the crisis, our Korean fixed income business could be significantly impacted due to the nature of the portfolio and underlying market specifics. We have developed several scenarios to assess and monitor the related risks and make use of macro hedges to offset potential losses.

#### Cyber risk

The financial industry continues to face a rapidly evolving cyber threat from a variety of actors who are driven by monetary, political and other motivations. We continue to invest significantly in our information and cybersecurity program to strengthen our ability to anticipate, defend, detect and recover from cyber attacks. We regularly assess the effectiveness of our key controls and we conduct ongoing employee training and awareness activities, including for key management personnel, in order to embed a strong cyber risk culture.

#### Middle East

In early June 2017, several countries, including Saudi Arabia, the United Arab Emirates, Egypt and Bahrain severed diplomatic ties and cut transportation links with Qatar. We have business

relationships in all of these countries. At the end of 2Q17, the consensus expectation amongst regional analysts was for the dispute to continue rather than be quickly resolved. From a risk perspective, the longer the dispute continues the greater the potential threats to the regional economy and to local markets.

#### Brazil

In late June, the president of Brazil was formally indicted on corruption charges in the latest iteration of a long-running corruption investigation. The impact from this political development on Brazil's fiscal policy and the economy is still uncertain. From a risk perspective, the potential threats to Brazil's economic upswing and to its local markets are likely to stay relatively high. While Brazil is a significant market for Credit Suisse, we further reduced our exposure to this country during 2Q17 and continued assessing potential implications in the event of further deterioration of this political crisis.

### Update to the risk appetite framework

During 2Q17, we amended and enhanced our risk appetite framework to provide additional governance and controls within our relevant transaction approval processes to distinguish between those types of business exposures held in the Strategic Resolution Unit that will be allowed for execution in our strategic divisions and those that will be prohibited or for which we have limited risk appetite. The amendments introduce a specific risk appetite statement which together with the entire risk appetite framework will be reviewed annually in line with our current process. This framework has been approved by management at the Capital Allocation & Risk Management Committee (CARMC).

The risk appetite statement includes a detailed list of transaction and product types that are prohibited from being executed in our strategic businesses. These transaction and product types are classified in five categories: (i) specific products; (ii) risk types; (iii) counterparties; (iv) investment classes; and (v) operational and franchise considerations. In addition, the statement establishes a robust set of principles and guidelines that serve to limit the execution of non-strategic transactions or business activities in our strategic business divisions.

We have established a framework for approval of exceptions to the provisions outlined in our risk appetite framework for certain transactions which may arise. Execution of such exceptions requires the approval of the divisional chief risk officer and divisional chief executive officer or their delegates and, where needed, by CARMC and/or the legal entity board of directors. Proposed transactions or business activities within our relevant transaction approval processes are assessed against the risk appetite statement.

## ECONOMIC RISK CAPITAL REVIEW

Economic risk capital is used as a consistent and comprehensive tool for capital management, limit monitoring and performance management. Economic risk capital is our core Group-wide risk management tool for measuring and reporting the combined impact from quantifiable risks such as market, credit, operational, pension, expense and model risks, each of which has an impact on our capital position.

Economic risk capital measures risks in terms of economic realities rather than regulatory or accounting rules and estimates the amount of capital needed to remain solvent and in business under extreme market, business and operating conditions over the period of one year, given our target financial strength (our long-term credit rating). Economic risk capital is set to a level needed

to absorb unexpected losses at a confidence level of 99.97%. Our economic risk capital model is a set of methodologies used for measuring quantifiable risks associated with our business activities on a consistent basis. It is calculated separately for position risk (reflecting our exposure to market and credit risks), operational risk and other risks.

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of material methodology changes and dataset and model parameter updates, prior-period balances are restated in order to show meaningful trends.

► Refer to "Economic risk capital" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on economic risk capital.

<sup>1</sup> Includes primarily high- and low-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to BIS look-through CET1 capital to enable comparison between economic risk capital and available economic capital under the Basel III framework.

<sup>2</sup> This category comprises fixed income trading, foreign exchange, commodity and insurance exposures.

<sup>3</sup> This category comprises commercial and residential real estate (including RMBS and CMBS), ABS exposure, real estate acquired at auction and real estate fund investments.

<sup>4</sup> Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

<sup>5</sup> Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between available economic capital and economic risk capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain planned methodology changes.

<sup>6</sup> Ratio of available economic capital to economic risk capital.

In 2Q17, there were no changes to our economic risk capital methodology.

#### Available economic capital trends

As of the end of 2Q17, our available economic capital for the Group was CHF 49.2 billion, an increase of CHF 2.2 billion from the end

of 1Q17. BIS look-through CET1 capital increased CHF 3.5 billion, mainly reflecting our capital increase in June of 2017, partially offset by a negative foreign exchange impact. Economic adjustments decreased CHF 1.3 billion, mainly reflecting the release of dividend accruals with the payment of the 2016 dividend and the foreign exchange impact on contingent capital instruments.

<sup>1</sup> Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between available economic capital and economic risk capital.

#### Economic risk capital trends

Compared to the end of 1Q17, our economic risk capital decreased 6% to CHF 31.7 billion, mainly due to a 6% decrease in position risk and a 9% reduction in other risks. The decrease in position risk was mainly due to decreased residential mortgage-back securities (RMBS) exposures in the US in real estate & structured assets, reduced private banking corporate & retail lending exposures in Switzerland and Asia, reduced exposures in Turkey in emerging markets country event risk and lower loan commitments in international lending & counterparty exposures. The decrease in other risks primarily reflected lower pension risk due to the improved funding status of our Swiss pension plan and reduced foreign exchange risk between available economic capital and economic risk capital. Excluding the US dollar translation impact, economic risk capital decreased 3%.

For Swiss Universal Bank, economic risk capital decreased 1% to CHF 5.6 billion from the end of 1Q17, mainly due to a reduction in private banking corporate & retail lending exposures and lower pension risk reflecting the improved funding status of our Swiss pension plan.

For International Wealth Management, economic risk capital decreased 1% to CHF 4.4 billion from the end of 1Q17. Excluding the US dollar translation impact, economic risk capital increased 1%, mainly due to increased equity exposures in equity trading & investments related to a securitization, partially offset by lower pension risk reflecting the improved funding status of our Swiss pension plan.

For Asia Pacific, economic risk capital decreased 5% to CHF 4.0 billion from the end of 1Q17, mainly due to reduced equity derivatives exposures in equity trading & investments and a reduction in private banking corporate & retail lending exposures, partially offset by higher loan commitments in international lending & counterparty exposures.

For Global Markets, economic risk capital decreased 7% to CHF 8.6 billion compared to the end of 1Q17, mainly due to lower RMBS exposures in the US in real estate & structured assets.

For Investment Banking & Capital Markets, economic risk capital decreased 3% to CHF 5.1 billion from the end of 1Q17. Excluding the US dollar translation impact, economic risk capital increased 1%, mainly due to increased international lending & counterparty exposures.

For the Strategic Resolution Unit, economic risk capital decreased 12% to CHF 3.4 billion from the end of 1Q17, mainly due to reduced exposures in Turkey in emerging markets country event risk and reduced loan commitments in international lending & counterparty exposures.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

## MARKET RISK REVIEW

Market risk is the risk of financial loss arising from movements in market prices. Market risks arise from both our trading and non-trading business activities. The classification of assets into trading book and banking book portfolios determines the approach for analyzing our market risk exposure. Market risk in the trading book is measured using VaR and market risk in our banking book is measured using sensitivity analysis on related market factors.

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on market risk including our VaR methodology.

### Trading book

Market risks from our trading book relate to our trading activities primarily in Global Markets and Asia Pacific. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products. Some of the structured products are customized transactions using combinations of derivatives and are executed to meet specific client or internal needs. As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations.

VaR is a risk measure which quantifies the potential loss on a given portfolio of financial instruments over a certain holding period and that is expected to occur at a certain confidence level. VaR is an important tool in risk management and is used for measuring quantifiable risks from our activities exposed to market risk

on a daily basis. In addition, VaR is one of the main risk measures for limit monitoring, financial reporting, calculation of regulatory capital and regulatory backtesting.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 2Q17, we updated our VaR model to better reflect equity volatility risks by increasing the granularity of the short-term time series. These risks were previously included in risk not in VaR. The impact of these updates on our VaR measures was immaterial and prior periods have not been restated.

We continue to receive regulatory approval for ongoing enhancements to our VaR methodology used for the calculation of regulatory capital, and the model is subject to regular reviews by regulators.

Information required under Pillar 3 of the Basel framework related to risk is available on our website at [www.credit-suisse.com/pillar3](http://www.credit-suisse.com/pillar3).

The tables entitled "Average one-day, 98% risk management VaR by division" and "One-day, 98% risk management VaR" show our trading-related market risk exposure, as measured by one-day, 98% risk management VaR in Swiss francs and US dollars. As we measure trading book VaR for internal risk management purposes using the US dollar as the base currency, the VaR figures were translated into Swiss francs using daily foreign exchange translation rates. VaR estimates are computed separately for each risk type and for the whole portfolio using the historical simulation methodology. The different risk types are grouped into five categories including interest rate, credit spread, foreign exchange, commodity and equity.

### Average one-day, 98% risk management VaR by division

End of period	15	21	6	1	13	(28)	28

Excludes risks associated with counterparty and own credit exposures.

<sup>1</sup> As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

We measure VaR in US dollars, as the majority of our trading activities are conducted in US dollars.

Average risk management VaR increased 8% to USD 27 million from 1Q17, mainly driven by increased interest rate exposures in the US and in Europe and a decreased diversification benefit. These changes were partially offset by lower credit spread risk and a decrease in foreign exchange risk. For Global Markets, the increase in average risk management VaR was mainly driven by increased interest rate exposures in the US and in Europe, partially offset by lower credit spread risk reflecting reduced exposures in distressed credit products across credit markets and in RMBS in

the US and in Europe. For Asia Pacific, the decrease in average risk management VaR was primarily driven by decreased interest rate exposures in Japan and lower foreign exchange risk driven by a reduction in Korean derivatives.

Period-end risk management VaR decreased 8% to USD 24 million from 1Q17, mainly driven by decreased interest rate exposures in Japan and lower credit spread risk reflecting reduced exposures in distressed credit products across credit markets and in RMBS in the US and in Europe.

The chart entitled "Daily risk management VaR" shows the aggregated market risk in our trading book on a consolidated basis.

### Daily risk management VaR (rolling four quarters)

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 2Q17 with those for 1Q17 and 4Q16. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. We had no trading loss days in 2Q17 and 1Q17 and two trading loss days in 4Q16.

### Actual daily trading revenues

### VaR backtesting

Various techniques are used to assess the accuracy of the VaR methodology used for risk management and regulatory purposes and to assess if our regulatory capital is sufficient to absorb actual losses. Our VaR backtesting process is used to assess the accuracy and performance of our regulatory VaR model and to encourage developments to our VaR model. Backtesting involves comparing the results produced from the VaR model with the daily trading

revenues. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period calculated using a subset of the actual daily trading revenues also referred to as “hypothetical” trading revenues under the Basel framework. In the rolling 12-month period through the end of 2Q17, we had no backtesting exceptions in our regulatory VaR model calculated using the subset of actual daily trading revenues. Since there were fewer than five backtesting exceptions in the rolling 12-month period through the end of 2Q17, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

► Refer to “Market risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on VaR backtesting.

► Refer to “Other requirements” in Capital management – Swiss requirements for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

### Banking book

Market risks from our banking book primarily relate to asset and liability mismatch exposures, equity participations and investments in bonds and money market instruments. Our businesses and the Corporate Center have non-trading portfolios that carry market risks, mainly related to changes in interest rates but also to changes in foreign exchange rates, equity prices and, to a lesser extent, commodity prices.

Interest rate risk on banking book positions is measured by estimating the impact resulting from a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive banking book positions. As of the end of 2Q17, the impact of such a parallel increase in yield curves would have been an increase of CHF 4.1 million, compared to an increase of CHF 4.7 million as of the end of 1Q17.

### CREDIT RISK REVIEW

All transactions that are exposed to potential losses due to a counterparty failing to meet an obligation are subject to credit risk exposure measurement and management. The majority of our credit risk is concentrated in the private banking, corporate and institutional businesses and in the investment banking businesses.

► Refer to “Credit risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on credit risk.

► Refer to “Note 16 – Loans, allowance for loan losses and credit quality” and “Note 28 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information on loans and impaired loans and counterparty credit risk, respectively.

<sup>1</sup> Includes the Corporate Center, in addition to the divisions disclosed.

<sup>2</sup> The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 10,818 million and CHF 32,855 million, respectively, as of the end of 2Q17, CHF 11,470 million and CHF 33,168 million, respectively, as of the end of 1Q17, and CHF 11,266 million and CHF 33,515 million, respectively, as of the end of 4Q16.

<sup>3</sup> The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 18,567 million and CHF 1,519 million, respectively, as of the end of 2Q17, CHF 19,276 million and CHF 1,364 million, respectively, as of the end of 1Q17, and CHF 18,084 million and CHF 1,165 million, respectively, as of the end of 4Q16.

<sup>4</sup> The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 19,275 million and CHF 164 million, respectively, as of the end of 2Q17, CHF 19,363 million and CHF 169 million, respectively, as of the end of 1Q17, and CHF 21,135 million and CHF 175 million, respectively, as of the end of 4Q16.

<sup>5</sup> Allowance for loan losses are only based on loans that are not carried at fair value.

## Loans

Compared to the end of 1Q17, gross loans decreased CHF 2.5 billion to CHF 274.9 billion as of the end of 2Q17, mainly driven by lower commercial and industrial loans, lower loans to financial institutions and the US dollar translation impact, partially offset by higher loans collateralized by securities and higher mortgages. The net decrease of CHF 2.3 billion in commercial and industrial loans primarily reflected decreases in Global Markets, Swiss Universal Bank and the Strategic Resolution Unit, partially offset by an increase in Asia Pacific. Loans to financial institutions decreased CHF 1.5 billion, primarily in Asia Pacific, Global Markets, Swiss Universal Bank and the Strategic Resolution Unit. The net increase

of CHF 0.8 billion in loans collateralized by securities was mainly driven by Asia Pacific and International Wealth Management, partially offset by decreases in Swiss Universal Bank and Investment Banking & Capital Markets. The net increase of CHF 0.8 billion in mortgages was mainly driven by increases in Swiss Universal Bank and International Wealth Management.

On a divisional level, decreases in gross loans of CHF 1.4 billion in Global Markets, CHF 1.1 billion in the Strategic Resolution Unit, CHF 0.6 billion in Swiss Universal Bank and CHF 0.3 billion in Investment Banking & Capital Markets were partially offset by increases of CHF 0.8 billion in Asia Pacific and CHF 0.2 billion in International Wealth Management.

<sup>2</sup> Impaired loans are only based on loans that are not carried at fair value.

**Impaired loans**

Compared to the end of 1Q17, gross impaired loans remained stable at CHF 2.2 billion as of the end of 2Q17, mainly reflecting higher non-performing loans in International Wealth Management, Investment Banking & Capital Markets and Global Markets, largely offset by lower non-performing loans and lower restructured loans in the Strategic Resolution Unit.

In International Wealth Management, gross impaired loans increased CHF 75 million, primarily driven by new impaired exposures in export finance and ship finance, partially offset by a reduction in lombard lending. The additional impaired exposures in export finance are 95% collateralized by export credit insurance, backed by high investment grade-rated sovereigns. In Swiss Universal Bank, gross impaired loans increased CHF 29 million,

mainly reflecting new potential problem loans for private and wealth management clients within Private Clients as well as small and medium-sized enterprises in Switzerland, partially offset by upgrades to performing status. In the Strategic Resolution Unit, gross impaired loans decreased CHF 72 million, primarily driven by ship finance exposures, reflecting repayments, a write-off and an upgrade of a loan to performing status. In Asia Pacific, gross impaired loans were stable at CHF 141 million. Gross impaired loans for Global Markets and Investment Banking & Capital Markets were stable at CHF 38 million and CHF 33 million, respectively, while an increase in non-performing loans in both divisions was related to the downgrade of a potential problem loan in the supermarket sector in Europe.

### SELECTED EUROPEAN CREDIT RISK EXPOSURES

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion.

► Refer to "Selected European credit risk exposures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2016 for further information on selected European credit risk exposures.

### Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our overall risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses of our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G7 and non-G7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

### Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Cyprus, Croatia, Greece, Ireland, Italy, Malta, Portugal and Spain as of the end of 2Q17 was EUR 3,124 million, stable compared to EUR 3,107 million as of the end of 1Q17. Our net exposure to these sovereigns was EUR 1,207 million, 70% higher compared to EUR 712 million as of the end of 1Q17. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 2Q17 included net exposure to financial institutions of EUR 1,726 million and to corporates and other counterparties of EUR 2,162 million, 16% lower compared to EUR 2,046 million and 63% higher compared to EUR 1,326 million, respectively, as of the end of 1Q17.

► Refer to "Selected European credit risk exposures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2016 for further information on the presentation of selected European credit risk exposures.

### Sovereign debt rating developments

In 2Q17, the long-term sovereign debt ratings of the countries listed in the table changed as follows: Fitch decreased its rating for Italy from BBB+ to BBB.

# Balance sheet and off-balance sheet

Total assets were CHF 783.4 billion, total liabilities were CHF 739.6 billion and total equity was CHF 43.8 billion. Total assets decreased 4% and total liabilities decreased 4% for the quarter, reflecting the foreign exchange translation impact and lower operating activities. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

## BALANCE SHEET

Total assets were CHF 783.4 billion as of the end of 2Q17, a decrease of CHF 28.6 billion, or 4%, from the end of 1Q17, reflecting the foreign exchange translation impact and lower operating activities. Excluding the foreign exchange translation impact, total assets decreased CHF 7.0 billion.

Compared to the end of 1Q17, trading assets decreased CHF 18.8 billion, or 12%, mainly due to lower equity and debt securities transactions. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

decreased CHF 8.6 billion, or 6%, mainly driven by a decrease in cash collateral, partially offset by higher reverse repurchase transactions from banks. Brokerage receivables decreased CHF 1.4 billion, or 3%, primarily reflecting decreases in failed settlements and open trades, partially offset by an increase in margin lending. Net loans were stable. Cash and due from banks increased CHF 8.5 billion, or 8%, mainly driven by higher cash positions at the Luxembourg Central Bank, the SNB and the Fed. All other assets decreased CHF 5.7 billion, or 6%, including a decrease of CHF 4.2 billion, or 11%, in securities received as collateral.

<b>Total equity</b>	<b>43,836</b>	<b>42,079</b>	<b>42,311</b>	<b>4</b>	<b>4</b>
<b>Total liabilities and equity</b>	<b>783,411</b>	<b>811,979</b>	<b>819,861</b>	<b>(4)</b>	<b>(4)</b>

Total liabilities were CHF 739.6 billion as of the end of 2Q17, a decrease of CHF 30.3 billion, or 4%, from the end of 1Q17, reflecting the foreign exchange translation impact and lower operating activities. Excluding the foreign exchange translation impact, total liabilities decreased CHF 8.8 billion.

Compared to the end of 1Q17, long-term debt decreased CHF 10.6 billion, or 6%, primarily driven by maturities of senior debt, partially offset by issuances of senior debt. Brokerage payables decreased CHF 7.7 billion, or 19%, mainly due to decreases in margin lending and failed settlements. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions decreased CHF 7.4 billion, or 19%, primarily due to decreases in repurchase transactions with banks and customers. Trading liabilities decreased CHF 4.1 billion, or 9%, mainly reflecting a decrease in short positions. Due to banks decreased CHF 3.2 billion, or 15%, primarily due to a decrease in demand deposits with banks. Customer deposits were stable. All other liabilities decreased CHF 1.9 billion, or 2%, including a decrease of CHF 4.2 billion, or 11%, in obligation to return securities received as collateral and an increase of CHF 3.5 billion, or 25%, in short-term borrowings.

► Refer to "Funding sources and uses" in Liquidity and funding management and "Capital management" for further information, including our funding of the balance sheet and the leverage ratio.

## OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

► Refer to "Balance sheet, off-balance sheet and other contractual obligations" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 and "Note 26 – Guarantees and commitments" and "Note 30 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information.

## Report of Independent Registered Public Accounting Firm

To the Board of Directors of Credit Suisse Group AG, Zurich

We have reviewed the accompanying condensed consolidated balance sheet of Credit Suisse Group AG and subsidiaries (the "Group") as of June 30, 2017, the related condensed consolidated statements of operations, comprehensive income, and changes in equity for the three and six-month periods ended June 30, 2017 and 2016, and the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2017 and 2016. These condensed consolidated financial statements are the responsibility of the Group's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Group as of December 31, 2016, and the related consolidated statements of operations, comprehensive income, changes in equity, and cash flows for the year then ended (not presented herein); and in our report dated March 24, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

### Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with US GAAP and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the accounting principles generally accepted in the US (US GAAP) consolidated financial statements and notes thereto for the year ended December 31, 2016 included in the Credit Suisse Annual Report 2016.

► Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for a description of the Group's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current

period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 1Q17 consolidated statements of operations and comprehensive income, the 1Q17 consolidated balance sheets and the 2Q17, 1Q17 and 2Q16 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2 Recently issued accounting standards

### Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

► Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for a description of accounting standards adopted in 2016.

### ASC Topic 350 – Intangibles – Goodwill and Other

In January 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-04, "Simplifying the Test for Goodwill Impairment" (ASU 2017-04), an update to Accounting Standards Codification (ASC) Topic 805 – Business Combinations. ASU 2017-04 simplifies the subsequent measurement of goodwill by eliminating step two from the goodwill impairment test. ASU 2017-04 is effective for annual reporting periods beginning after December 15, 2019, and for the interim periods within those annual reporting periods. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. ASU 2017-04 is to be applied on a prospective basis. The Group elected to early adopt ASU 2017-04 on January 1, 2017, which did not have a material impact on the Group's financial position, results of operations or cash flows.

### ASC Topic 718 – Compensation – Stock Compensation

In March 2016, the FASB issued ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting" (ASU 2016-09), an update to ASC Topic 718 – Compensation—Stock Compensation. The amendments in ASU 2016-09 provide simplification updates for several aspects of the accounting for share-based payment

transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The adoption of ASU 2016-09 on January 1, 2017 resulted in the recognition of previously unrecorded deferred tax asset net operating loss balances which arose due to prior tax windfalls that did not immediately result in cash tax savings. The adjustment resulted in an increase in retained earnings of CHF 85 million upon adoption.

### ASC Topic 740 – Income Taxes

In October 2016, the FASB issued ASU 2016-16, "Intra-Entity Transfers of Assets Other Than Inventory" (ASU 2016-16), an update to ASC Topic 740 – Income Taxes. The amendments in ASU 2016-16 eliminate the exception for an intra-entity transfer of an asset other than inventory. ASU 2016-16 is required to be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted. The Group elected to early adopt ASU 2016-16 on January 1, 2017, which resulted in a reclassification from other assets to deferred tax assets. The net impact upon adoption was a reduction in retained earnings of CHF 81 million.

### ASC Topic 825 – Financial Instruments – Overall

In January 2016, the FASB issued ASU 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities" (ASU 2016-01), an update to ASC Topic 825 – Financial

Instruments – Overall. The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The amendments primarily affect the accounting for equity investments, financial liabilities under the fair value option and the presentation and disclosure requirements for financial instruments. ASU 2016-01 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption of the full standard is not permitted; however, certain sections of ASU 2016-01 relating to fair value option-elected financial liabilities can be early adopted in isolation. These amendments to ASU 2016-01 require the changes in fair value relating to instrument-specific credit risk of fair value option elected financial liabilities to be presented separately in accumulated other comprehensive income (AOCI). The Group has early adopted these sections of the update on January 1, 2016. As a result of adoption, a reclassification of a gain from retained earnings to AOCI of CHF 475 million, net of tax, was recorded. The Group is currently evaluating the impact of the adoption of the remaining sections of ASU 2016-01 on the Group's financial position, results of operations and cash flows.

#### **Standards to be adopted in future periods**

##### **ASC Topic 230 – Statement of Cash Flows**

In August 2016, the FASB issued ASU 2016-15, "Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)" (ASU 2016-15), an update to ASC Topic 230 – Statement of Cash Flows. The amendments in ASU 2016-15 provide guidance regarding classification of certain cash receipts and payments where diversity in practice was observed. ASU 2016-15 is required to be applied retrospectively to all periods presented beginning in the year of adoption. ASU 2016-15 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted, including adoption in an interim period. The Group is currently evaluating the impact of the adoption of ASU 2016-15 on the Group's financial position, results of operations and cash flows.

##### **ASC Topic 326 – Financial Instruments – Credit Losses**

In June 2016, the FASB issued ASU 2016-13, "Measurement of Credit Losses on Financial Instruments" (ASU 2016-13), creating ASC Topic 326 – Financial Instruments – Credit Losses. ASU 2016-13 is intended to improve financial reporting by requiring timelier recording of credit losses on financial assets measured at amortized cost basis (including, but not limited to loans), net investments in leases recognized as lessor and off-balance sheet credit exposures. ASU 2016-13 eliminates the probable initial recognition threshold under the current incurred loss methodology for recognizing credit losses. Instead, ASU 2016-13 requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. The Group will incorporate forward-looking information and macroeconomic factors into its

credit loss estimates. ASU 2016-13 requires enhanced disclosures to help investors and other financial statement users to better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. As the Group is a US Securities and Exchange Commission (SEC) filer, ASU 2016-13 is effective for annual reporting periods beginning after December 15, 2019, and for the interim periods within those annual reporting periods. Early application will be permitted for annual reporting periods and for the interim periods within those annual reporting periods, beginning after December 15, 2018.

The Group has established a cross-functional implementation team and governance structure for the project. The Group has decided on a current expected credit loss (CECL) methodology while it is adjusting for key interpretive issues. Furthermore, the Group will continue to monitor the initial scope assessment, as a basis to determine the requirements and data sourcing of the CECL models, and to design, build and test the models until the effective date.

The Group expects that the new CECL methodology would generally result in increased and more volatile allowance for loan losses. The main impact drivers include:

- the remaining life of the loans measured at amortized cost and the off-balance sheet credit exposures at the adoption date and subsequent reporting dates because of the new requirement to measure lifetime expected credit losses;
- the point of time in the economic cycle at the adoption date and subsequent reporting dates because of the new requirement to incorporate reasonable and supportable forward-looking information and macroeconomic factors; and
- the credit quality of the loans measured at amortized cost and the off-balance sheet credit exposures at the adoption date and subsequent reporting dates.

Upon adoption of the standard, the Group expects an adjustment to be posted to retained earnings for any changes in loan losses. As the implementation progresses, the Group will continue to evaluate the extent of the impact of the adoption of ASU 2016-13 on the Group's financial position, results of operations and cash flows.

##### **ASC Topic 606 – Revenue from Contracts with Customers**

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), an update to ASC Topic 606 – Revenue from Contracts with Customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU outlines key steps that an entity should follow to achieve the core principle. ASU 2014-09 and its subsequent amendments are effective for the annual reporting period beginning after December 15, 2017, and for the interim periods within those annual reporting periods.

The Group has established a cross-functional implementation team and governance structure for the project. The Group's implementation efforts include the identification of revenue and costs within the scope of the guidance, as well as the evaluation of revenue contracts under the new guidance and related accounting policies. The guidance does not apply to revenue associated with financial instruments, including loans and securities that are accounted for under other US GAAP guidance. To date, the recognition and timing impacts that the Group has identified relate to the timing of certain fees. The new guidance eliminates industry specific guidance and as a result will have an impact on the gross versus net presentation of certain income and expenses, for example a change from net to gross reporting of underwriting expenses and reimbursed costs from advisory activities. The changes identified thus far are not expected to have a material impact on the Group's financial position, results of operations or cash flows; however, the evaluation remains ongoing.

#### ASC Topic 715 – Compensation – Retirement Benefits

In March 2017, the FASB issued ASU 2017-07, "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost" (ASU 2017-07), an update to ASC Topic 715 – Compensation – Retirement Benefits. The amendments in ASU 2017-07 require that the service cost component of the net periodic benefit cost be presented in the same income statement line item(s) as other employee compensation costs arising from services rendered during the period. Other components of the net periodic benefit cost should be reported separately from the line item(s) that includes the service cost and outside of any subtotal of operating income. ASU 2017-07 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted. The Group is currently evaluating the impact of the adoption of ASU 2017-07 on the Group's financial position, results of operations and cash flows.

#### ASC Topic 842 – Leases

In February 2016, the FASB issued ASU 2016-02, "Leases" (ASU 2016-02), creating ASC Topic 842 – Leases. ASU 2016-02 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. ASU 2016-02 also includes disclosure requirements to provide more information about the amount, timing and uncertainty of cash flows arising from leases. Lessor accounting is substantially unchanged compared to the current accounting guidance. Under the current lessee accounting model, the Group is required to distinguish between finance leases, which are recognized on the balance sheet, and operating leases, which are not. ASU 2016-02 will require lessees to present a right-of-use asset and a corresponding lease liability on the balance sheet for all leases with a lease term of greater than twelve months. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and for the interim periods within those annual reporting periods.

The Group has established a cross-functional implementation team and governance structure for the project. The Group is currently reviewing its existing contracts to determine the impact of the adoption of ASU 2016-02. The Group expects an increase in total assets and total liabilities as a result of recognizing right-of-use assets and lease liabilities for all leases under the new guidance and is currently evaluating the extent of the impact of the adoption of ASU 2016-02 on the Group's results of operations and cash flows.

### 3 Business developments

#### Capital increase

On May 18, 2017, the Group held an Extraordinary General Meeting at which shareholders approved a capital increase by way of a rights offering. By the end of the rights exercise period on June 7, 2017, 99.2% of the rights had been exercised and 390,206,406

newly issued shares were subscribed. The remaining 3,026,166 newly issued shares that were not subscribed were sold in the market. The capital increase resulted in 393,232,572 newly issued shares and net proceeds for the Group of CHF 4.1 billion.

## 4 Segment information

The Group is a global financial services company domiciled in Switzerland and serves its clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specialized in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios from the former non-strategic units plus additional businesses and

positions that do not fit with the strategic direction. The segment information reflects the Group's six reportable segments and the Corporate Center, which are managed and reported on a pre-tax basis.

► Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on segment information, revenue sharing and cost allocation and funding.

<b>Basic net income/(loss) attributable to shareholders (CHF million)</b>					
<b>Net income/(loss) attributable to shareholders for basic earnings per share</b>	<b>303</b>	<b>596</b>	<b>170</b>	<b>899</b>	<b>(132)</b>
Available for common shares	303	596	167	899	(135)
Available for unvested share-based payment awards	0	0	3	0	3
<b>Diluted net income/(loss) attributable to shareholders (CHF million)</b>					
<b>Net income/(loss) attributable to shareholders for basic earnings per share</b>	<b>303</b>	<b>596</b>	<b>170</b>	<b>899</b>	<b>(132)</b>
Available for common shares	303	596	167	899	(135)
Available for unvested share-based payment awards	0	0	3	0	3
<b>Weighted-average shares outstanding (million)</b>					
<b>Weighted-average shares outstanding for basic earnings per share available for common shares</b>	<b>2,309.6</b>	<b>2,214.2</b>	<b>2,106.8</b>	<b>2,261.9</b>	<b>2,087.9</b>
Dilutive share options and warrants	4.2	3.8	3.7	4.0	0.0
Dilutive share awards	40.3	55.1	43.0	47.7	0.0
<b>Weighted-average shares outstanding for diluted earnings per share available for common shares <sup>1</sup></b>	<b>2,354.1</b>	<b>2,273.1</b>	<b>2,153.5</b>	<b>2,313.6</b>	<b>2,087.9 <sup>2</sup></b>
<b>Weighted-average shares outstanding for basic/diluted earnings per share available for unvested share-based payment awards</b>	<b>0.1</b>	<b>0.1</b>	<b>1.2</b>	<b>0.1</b>	<b>5.8</b>
<b>Earnings/(loss) per share available for common shares (CHF)</b>					
<b>Basic earnings/(loss) per share available for common shares</b>	<b>0.13</b>	<b>0.27</b>	<b>0.08</b>	<b>0.40</b>	<b>(0.06)</b>
<b>Diluted earnings/(loss) per share available for common shares</b>	<b>0.13</b>	<b>0.26</b>	<b>0.08</b>	<b>0.39</b>	<b>(0.06)</b>

Prior periods have been adjusted to reflect the increase in the number of shares outstanding as a result of the discount element in the 2017 rights issue and scrip dividend, as required under US GAAP.

<sup>1</sup> Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 10.4 million, 7.8 million, 12.0 million, 9.1 million and 9.8 million for 2Q17, 1Q17, 2Q16, 6M17 and 6M16, respectively.

<sup>2</sup> Due to the net loss in 6M16, 3.0 million of weighted-average share options and warrants outstanding and 48.4 million of weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

## 14 Trading assets and liabilities

end of	2Q17	1Q17	4Q16
<b>Trading assets (CHF million)</b>			
Debt securities	62,677	67,140	65,668

In accordance with US GAAP, the Group continually assesses whether or not there has been a triggering event requiring a review of goodwill. There was no triggering event in 2Q17. As of June 30, 2017, the Group's market capitalization was below book value.

On December 7, 2016, and on February 14, 2017, the Group announced a reorganization and change to financial reporting affecting its Swiss Universal Bank and Asia Pacific segments. During 1Q17, these measures were implemented. The Group determined that these changes constituted triggering events. The Group's reporting units as a result of these measures are defined as follows: Swiss Universal Bank – Private Clients (formerly Private Banking), Swiss Universal Bank – Corporate & Institutional Clients (formerly Corporate & Institutional Banking), International Wealth Management – Private Banking, International Wealth Management – Asset Management, Asia Pacific – Wealth Management & Connected (formerly Private Banking), Asia Pacific – Markets (formerly Investment Banking), Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit.

The carrying value of each reporting unit for the purpose of the goodwill impairment test is determined by considering the reporting units' risk-weighted assets usage, leverage ratio exposure, deferred tax assets, goodwill and intangible assets. Any residual

equity, after considering the total of these elements, is allocated to the reporting units on a pro-rata basis.

In estimating the fair value of its reporting units, the Group applied a combination of the market approach and the income approach. Under the market approach, consideration was given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows, which are determined from the Group's financial plan.

In determining the estimated fair value, the Group relied upon its updated five-year strategic business plan which included significant management assumptions and estimates based on its view of current and future economic conditions and regulatory changes.

Goodwill is tested for impairment before and immediately after a reorganization or restructuring of reporting units. As a result, the goodwill impairment test was performed during 1Q17 under the old business structure and then again under the modified structure according to the measures implemented in connection with the announcements on December 7, 2016 and on February 14, 2017.

The Group concluded that the estimated fair value for all of its reporting units impacted by the measures implemented in connection with the December 7, 2016 and February 14, 2017 announcements substantially exceeded their related carrying values and that no impairment was necessary.

The results of the impairment evaluation of each reporting unit's goodwill would be significantly impacted by adverse changes

in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a significant margin from its best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, the Group could potentially incur material impairment charges in the future.

<sup>1</sup> At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 653,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 505,062,294 of these shares were reserved for capital instruments.

<sup>2</sup> At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 653,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 522,242,777 of these shares were reserved for capital instruments.

<sup>3</sup> At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 653,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 518,996,021 of these shares were reserved for capital instruments.

## 21 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

### Derivatives

The Group transacts bilateral OTC derivatives mainly under the International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC

derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values (PRV/NRV) and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Exchange-traded derivatives or OTC-cleared derivatives, that are fully margined and for which the daily margin payments constitute settlement of the outstanding exposure, are not included in the offsetting disclosures because they are not subject to offsetting due to the daily settlement. The daily margin payments, which are not settled until the next settlement cycle is conducted, are presented in brokerage receivables or brokerage payables. The notional amount for these daily settled derivatives is included in the fair value of derivative instruments table in "Note 25 – Derivatives and hedging activities".

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for a bifurcable hybrid debt instrument which the Group did not elect to account for at fair value. However, this bifurcated embedded derivative is not subject to an enforceable master netting agreement and is not recorded as a derivative instrument under trading assets and liabilities or other assets and other liabilities. Information on this bifurcated embedded derivative has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of

derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

### Offsetting of derivatives

<sup>1</sup> Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

### Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not

meet the criterion of having the same settlement date specified at inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

### Offsetting of securities purchased under resale agreements and securities borrowing transactions

end of	2Q17			4Q16		
	Gross	Offsetting	Net	Gross	Offsetting	Net
<b>Securities purchased under resale agreements and securities borrowing transactions (CHF billion)</b>						
Securities purchased under resale agreements	103.1	(26.3)	76.8	99.9	(26.9)	73.0

<b>Total not subject to enforceable master netting agreements <sup>1</sup></b>	<b>9.5</b>	<b>–</b>	<b>9.5</b>	<b>5.5</b>	<b>–</b>	<b>5.5</b>
<b>Total</b>	<b>95.4</b>	<b>(31.3)</b>	<b>64.1</b>	<b>97.0</b>	<b>(31.4)</b>	<b>65.6</b>
of which securities sold under repurchase agreements and securities lending transactions	62.0	(31.3)	30.7 <sup>2</sup>	64.4	(31.4)	33.0 <sup>2</sup>
of which obligation to return securities received as collateral, at fair value	33.4	0.0	33.4	32.6	0.0	32.6

<sup>1</sup> Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

<sup>2</sup> CHF 16,038 million and CHF 19,634 million of the total net amount as of the end of 2Q17 and 4Q16, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and

borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

### Amounts not offset in the consolidated balance sheets

end of	2Q17				4Q16			
	Net	Financial instruments <sup>1</sup>	Cash collateral received/pledged <sup>1</sup>	Net exposure	Net	Financial instruments <sup>1</sup>	Cash collateral received/pledged <sup>1</sup>	Net exposure
<b>Financial assets subject to enforceable master netting agreements (CHF billion)</b>								
Derivatives	16.7	5.6	0.0	11.1	21.3	6.3	0.0	15.0
Securities purchased under resale agreements	76.8	76.8	0.0	0.0	73.0	73.0	0.0	0.0
Securities borrowing transactions	13.4	12.9	0.0	0.5	19.5	18.6	0.0	0.9
<b>Total financial assets subject to enforceable master netting agreements</b>	<b>106.9</b>	<b>95.3</b>	<b>0.0</b>	<b>11.6</b>	<b>113.8</b>	<b>97.9</b>	<b>0.0</b>	<b>15.9</b>
<b>Financial liabilities subject to enforceable master netting agreements (CHF billion)</b>								
Derivatives	11.3	2.5	0.0	8.8	14.0	3.3	0.0	10.7
Securities sold under repurchase agreements	19.0	19.0	0.0	0.0	22.3	22.3	0.0	0.0
Securities lending transactions	5.4	5.1	0.0	0.3	5.9	5.7	0.0	0.2
Obligation to return securities received as collateral, at fair value	30.2	28.1	0.0	2.1	31.9	30.4	0.0	1.5
<b>Total financial liabilities subject to enforceable master netting agreements</b>	<b>65.9</b>	<b>54.7</b>	<b>0.0</b>	<b>11.2</b>	<b>74.1</b>	<b>61.7</b>	<b>0.0</b>	<b>12.4</b>

<sup>1</sup> The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of credit default swaps (CDS) and credit insurance contracts.

Therefore, the net exposure presented in the table above is not representative of the Group's counterparty exposure.

## 22 Tax

The 2Q17 income tax expense of CHF 276 million includes the impact of the continuous reassessment of the estimated annual effective tax rate as well as the impact of items that need to be recorded in the specific interim period in which they occur. Further details are outlined in the tax expense reconciliation below.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of June 30, 2017, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 4.8 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 67 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Brazil – 2012; Japan – 2012; Switzerland – 2011; the US – 2010; the UK – 2009; and the Netherlands – 2006.

### Effective tax rate

in	2Q17	1Q17	2Q16	6M17	6M16
Effective tax rate (%)	47.4	11.6	10.6	28.3	55.4

### Tax expense reconciliation

in	2Q17
<b>CHF million</b>	
Income tax expense computed at the Swiss statutory tax rate of 22%	128
Increase/(decrease) in income taxes resulting from	
Foreign tax rate differential	(14)
Other non-deductible expenses	149
Changes in deferred tax valuation allowance	83
Lower taxed income	(48)
Change in recognition of outside basis difference	(2)
(Windfall tax benefits)/shortfall tax charges on share-based compensation <sup>1</sup>	95
Other	(115)
<b>Income tax expense</b>	<b>276</b>

<sup>1</sup> As a result of the adoption of ASU 2016-09 windfall tax benefits and shortfall tax charges on share-based compensation are now recognized in the consolidated statements of operations and no longer in shareholders' equity.

### Foreign tax rate differential

2Q17 included a foreign tax benefit of CHF 14 million in respect of earnings in lower tax jurisdictions, such as Singapore, as well as earnings in higher tax jurisdictions, such as the US.

### Other non-deductible expenses

2Q17 included the impact of CHF 139 million relating to the non-deductible interest expenses and non-deductible bank levy costs and other non-deductible expenses of CHF 10 million.

### Changes in deferred tax valuation allowance

2Q17 included the impact of the increase of valuation allowances of CHF 96 million mainly in respect of four of the Group's operating entities, three in the UK and one in Switzerland, and a decrease of valuation allowances of CHF 13 million mainly in respect of two of the Group's operating entities, one in Hong Kong and one in Switzerland, related to estimated current year earnings.

### Lower taxed income

2Q17 included the impacts of CHF 21 million related to non-taxable life insurance income, a beneficial earnings mix in one of the Group's operating entities in Switzerland of CHF 25 million, and various smaller items.

**Other**

2Q17 included a tax benefit of CHF 107 million relating to the reassessment of deferred tax balances in one of the Group's operating entities in Switzerland, a tax benefit of CHF 56 million relating to the decrease of tax contingency accruals and a tax benefit of CHF 32 million from own-credit revaluation losses, partially offset by a tax expense of CHF 53 million from an adverse earnings mix in one of the Group's operating entities in Switzerland and a tax expense of CHF 13 million from prior year adjustments. The remaining balance included various smaller items.

**Net deferred tax assets**

end of	2Q17	1Q17
<b>Net deferred tax assets (CHF million)</b>		
Deferred tax assets	7,542	7,825
of which net operating losses	2,787	2,543

Deferred tax liabilities	(231)	(176)
<b>Net deferred tax assets</b>	<b>7,311</b>	<b>7,649</b>

**23 Employee deferred compensation**

The Group's current and previous deferred compensation plans include share awards, performance share awards, Contingent Capital Awards, Capital Opportunity Facility awards, Plus Bond awards, 2008 Partner Asset Facilities awards and other cash awards.

► Refer to "Note 29 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information.

The following tables show the compensation expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 2Q17 and prior periods and the remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized compensation expense was based on the fair value of each award on the grant date and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

**Deferred compensation expense**

in	2Q17	1Q17	2Q16	6M17	6M16
<b>Deferred compensation expense (CHF million)</b>					
Share awards	130	146	141	276	336
Performance share awards	87	98	87	185	206
Contingent Capital Awards	65	85	43	150	62
Contingent Capital share awards	6	5	6	11	6
Capital Opportunity Facility awards	3	4	3	7	6
Plus Bond awards <sup>1</sup>	0	0	0	0	5
2008 Partner Asset Facility awards <sup>2</sup>	0	7	(8)	7	(16)
Other cash awards	87	95	102	182	135
<b>Total deferred compensation expense</b>	<b>378</b>	<b>440</b>	<b>374</b>	<b>818</b>	<b>740</b>

<sup>1</sup> Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.

<sup>2</sup> Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

**Estimated unrecognized deferred compensation**

end of	2Q17
<b>Estimated unrecognized compensation expense (CHF million)</b>	
Share awards	715
Performance share awards	351
Contingent Capital Awards	209
Contingent Capital share awards	13
Other cash awards	227
<b>Total</b>	<b>1,515</b>
<b>Weighted-average requisite service period (years)</b>	
Aggregate remaining weighted-average requisite service period	1.3

**2Q17 activity**

In 2Q17, the Group granted deferred cash retention awards of CHF 65 million relating to the reorganization of the Asia Pacific business. These will be expensed over a two-year period from the grant date. Amortization of these awards totaled CHF 9 million in 2Q17 and was recognized in the Corporate Center.

**Share-based award activity**

	2Q17			6M17		
	Share awards	Performance share awards	Contingent Capital share awards	Share awards	Performance share awards	Contingent Capital share awards
Number of awards (in millions)						
<b>Share-based award activities</b>						
<b>Balance at beginning of period</b>	<b>113.0</b>	<b>77.7</b>	<b>13.5</b>	<b>73.2</b>	<b>48.4</b>	<b>13.5</b>

of which vested	10.0	5.4	1.1	10.0	5.4	1.1
of which unvested	77.1	51.1	7.8	77.1	51.1	7.8

<sup>1</sup> Includes an adjustment for share awards granted in 2Q17 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on May 18, 2017. The number of deferred share-based awards held by each individual was increased by 3.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional shares granted.

**24 Pension and other post-retirement benefits**

The Group expects to contribute CHF 442 million to the Swiss and international defined benefit plans and other post-retirement

defined benefit plans in 2017. As of the end of 2Q17, CHF 238 million of contributions have been made.

**Components of total benefit costs**

## 25 Derivatives and hedging activities

► Refer to "Note 32 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to "Note 28 – Financial instruments" for further information.

### Fair value of derivative instruments

<b>Details of cash flow hedges (CHF million)</b>					
Net gains/(losses) on the ineffective portion <sup>2</sup>	(2)	3	(1)	1	31

Represents gains/(losses) on effective portion.

<sup>1</sup> Included in interest and dividend income.

<sup>2</sup> Included in trading revenues.

<sup>3</sup> Included in other revenues.

<sup>4</sup> Included in total other operating expenses.

As of the end of 2Q17, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was five years.

The net loss associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months is CHF 17 million.

### Net investment hedges

in	2Q17	1Q17	2Q16	6M17	6M16
<b>Gains/(losses) recognized in AOCI on derivatives (CHF million)</b>					
Foreign exchange products	133	(187)	(232)	(54)	(252)
<b>Total</b>	<b>133</b>	<b>(187)</b>	<b>(232)</b>	<b>(54)</b>	<b>(252)</b>

Represents gains/(losses) on effective portion.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 7 – Trading revenues" for gains and losses on trading activities by product type.

### Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch, two-notch and a three-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

## Contingent credit risk

end of	2Q17							4Q16
	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total
<b>Contingent credit risk (CHF billion)</b>								
Current net exposure	7.0	0.1	1.0	<b>8.1</b>	10.5	0.2	1.1	<b>11.8</b>
Collateral posted	6.0	0.1	–	<b>6.1</b>	9.5	0.2	–	<b>9.7</b>

Additional collateral required in a two-notch downgrade event	1.0	0.3	0.5	<b>1.8</b>	1.3	0.4	0.5	<b>2.2</b>
Additional collateral required in a three-notch downgrade event	1.1	0.6	0.7	<b>2.4</b>	1.5	0.7	0.7	<b>2.9</b>

## Credit derivatives

► Refer to “Note 32 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on credit derivatives.

## Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its

underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Total return swaps (TRS) of CHF 7.5 billion and CHF 7.8 billion as of the end of 2Q17 and 4Q16, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

<sup>1</sup> Represents credit protection purchased with identical underlyings and recoveries.

<sup>2</sup> Based on internal ratings of BBB and above.

<sup>3</sup> Includes synthetic securitized loan portfolios.

**Credit protection sold**

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

**Credit protection purchased**

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

**Other protection purchased**

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

**Fair value of credit protection sold**

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

**Credit derivatives**

end of	2Q17	4Q16
<b>Credit derivatives (CHF billion)</b>		
Credit protection sold	208.9	238.6
Credit protection purchased	195.6	228.9
Other protection purchased	77.5	83.4
Other instruments <sup>1</sup>	7.3	7.8
<b>Total credit derivatives</b>	<b>489.3</b>	<b>558.7</b>

<sup>1</sup> Consists of total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

**Maturity of credit protection sold**

**26 Guarantees and commitments****Guarantees**

In the ordinary course of business, guarantees are provided that contingently obligate the Group to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, derivatives and other guarantees. The Group no longer provides guarantees for securities lending indemnifications.

► Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a detailed description of guarantees.

## Guarantees

end of	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Carrying value	Collateral received
<b>2Q17 (CHF million)</b>						
Credit guarantees and similar instruments	1,820	979	2,799	2,568	10	1,817
Performance guarantees and similar instruments	5,212	1,643	6,855	5,916	52	2,958
Derivatives <sup>2</sup>	17,216	10,274	27,490	27,490	702	– <sup>3</sup>
Other guarantees	3,566	1,743	5,309	5,304	40	3,336
<b>Total guarantees</b>	<b>27,814</b>	<b>14,639</b>	<b>42,453</b>	<b>41,278</b>	<b>804</b>	<b>8,111</b>
<b>4Q16 (CHF million)</b>						
Credit guarantees and similar instruments	1,962	1,171	3,133	2,913	13	2,043
Performance guarantees and similar instruments	5,109	2,005	7,114	6,124	76	3,090
Derivatives <sup>2</sup>	15,864	7,943	23,807	23,807	684	– <sup>3</sup>
Other guarantees	3,460	2,000	5,460	5,456	44	3,668
<b>Total guarantees</b>	<b>26,395</b>	<b>13,119</b>	<b>39,514</b>	<b>38,300</b>	<b>817</b>	<b>8,801</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

<sup>3</sup> Collateral for derivatives accounted for as guarantees is not significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2016 to June 30, 2017 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees. For the period July 1, 2017 to June 30, 2018, the Group's share in this deposit insurance guarantee program based on FINMA's estimate will be CHF 0.5 billion.

### Representations and warranties on residential mortgage loans sold

In connection with the former Investment Banking division's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac; institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the

mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims made within the statute of limitations (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

During the first six months of 2017, the Group received repurchase claims for residential mortgage loans that were not significant, and loans repurchased during this period and related losses were not significant. The balance of outstanding repurchase claims as of the end of 2Q17 was not significant.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in this Guarantees and commitments disclosure but are addressed in litigation and related loss contingencies and provisions. The Group is involved in litigation relating to representations and warranties on residential mortgages sold.

► Refer to "Note 30 – Litigation" for further information.

### Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the “Guarantees” table.

► Refer to “Disposal-related contingencies and other indemnifications” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a description of these guarantees.

### Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

► Refer to “Other commitments” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a description of these commitments.

### Other commitments

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Irrevocable loan commitments do not include a total gross amount of CHF 104,360 million and CHF 95,743 million of unused credit limits as of the end of 2Q17 and 4Q16, respectively, which were revocable at the Group's sole discretion upon notice to the client.

## 27 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

### TRANSFERS OF FINANCIAL ASSETS

#### Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities

(CMBS), RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include managed collateralized loan obligations (CLOs), CLOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CLOs are collateralized by loans transferred to the CLO vehicle and pay a return based on the returns on the loans. Leveraged finance structures are used to assist in

the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and loans involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 6M17 and 6M16 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group maintained continuing involvement from the time of the transaction, regardless of when the securitization occurred.

## Securitizations

in	6M17	6M16
<b>Gains and cash flows (CHF million)</b>		
<b>CMBS</b>		
Net gain <sup>1</sup>	34	2
Proceeds from transfer of assets	2,917	3,148
Cash received on interests that continue to be held	18	35
<b>RMBS</b>		
Net gain/(loss) <sup>1</sup>	6	(1)
Proceeds from transfer of assets	5,807	4,898
Servicing fees	1	2
Cash received on interests that continue to be held	146	262
<b>Other asset-backed financings</b>		
Net gain <sup>1</sup>	24	17
Proceeds from transfer of assets	3,404	1,305
Fees <sup>2</sup>	56	61
Cash received on interests that continue to be held	1	1

<sup>1</sup> Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

<sup>2</sup> Represents management fees and performance fees earned for investment management services provided to managed CLOs.

## Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

► Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 2Q17 and 4Q16, regardless of when the transfer of assets occurred.

## Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	2Q17	4Q16
<b>CHF million</b>		
<b>CMBS</b>		
Principal amount outstanding	26,521	28,779
Total assets of SPE	38,616	40,234
<b>RMBS</b>		
Principal amount outstanding	33,811	38,319
Total assets of SPE	35,000	39,680
<b>Other asset-backed financings</b>		
Principal amount outstanding	19,806	19,777
Total assets of SPE	36,004	36,049

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

## Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

### Key economic assumptions at the time of transfer

► Refer to "Note 28 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in	6M17		6M16	
	CMBS	RMBS	CMBS	RMBS
<b>CHF million, except where indicated</b>				
Fair value of beneficial interests	60	637	42	1,300
of which level 2	60	538	42	1,228
of which level 3	0	99	0	71
Weighted-average life, in years	7.7	9.5	10.7	6.7
Prepayment speed assumption (rate per annum), in % <sup>1</sup>	– <sup>2</sup>	6.7–16.8	– <sup>2</sup>	8.1–24.4
Cash flow discount rate (rate per annum), in % <sup>3</sup>	2.9–3.0	2.3–11.7	2.4–4.9	1.4–18.6
Expected credit losses (rate per annum), in %	0.0–0.0	3.2–3.7	0.0–0.0	0.0–0.0

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

<sup>1</sup> Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>2</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>3</sup> The rate was based on the weighted-average yield on the beneficial interests.

### Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 2Q17 and 4Q16.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

end of	2Q17			4Q16		
	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>
<b>CHF million, except where indicated</b>						
Fair value of beneficial interests	220	1,441	471	258	1,851	443
of which non-investment grade	106	367	31	70	523	32
Weighted-average life, in years	6.3	8.0	6.0	7.2	8.1	5.6
Prepayment speed assumption (rate per annum), in % <sup>3</sup>	–	1.0–21.4	–	–	2.0–26.9	–
Impact on fair value from 10% adverse change	–	(34.1)	–	–	(28.7)	–
Impact on fair value from 20% adverse change	–	(67.2)	–	–	(55.9)	–
Cash flow discount rate (rate per annum), in % <sup>4</sup>	1.2–13.2	1.9–37.0	1.1–21.2	2.3–28.8	1.7–47.2	0.8–21.2
Impact on fair value from 10% adverse change	(5.0)	(38.5)	(8.9)	(6.0)	(48.1)	(8.3)
Impact on fair value from 20% adverse change	(9.7)	(74.8)	(17.5)	(11.7)	(93.5)	(16.4)
Expected credit losses (rate per annum), in %	0.3–10.4	0.8–35.8	0.8–21.2	0.7–28.0	0.9–44.9	0.9–21.2
Impact on fair value from 10% adverse change	(3.2)	(22.1)	(5.0)	(3.5)	(27.3)	(5.1)
Impact on fair value from 20% adverse change	(6.3)	(43.3)	(10.0)	(6.9)	(53.3)	(10.0)

<sup>1</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>2</sup> CDOs and CLOs within this category are generally structured to be protected from prepayment risk.

<sup>3</sup> PSA is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the CPR assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>4</sup> The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

#### Transfers of financial assets where sale treatment was not achieved

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 2Q17 and 4Q16.

► Refer to "Note 29 – Assets pledged and collateral" for further information.

#### Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

<b>CHF million</b>		
<b>Other asset-backed financings</b>		
Trading assets	396	240
Other assets	0	12
Liability to SPE, included in Other liabilities	(396)	(252)

#### Transfers of financial assets accounted for as a sale

US GAAP requires the disclosure of a transaction accounted for as a sale that comprises both of the following: a transfer of financial assets to a transferee and an agreement entered into in contemplation of the initial transfer with the transferee that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. In the ordinary course of business, the Group transfers a financial asset accounted for as a sale and, in some instances, enters into an agreement in contemplation of that initial transfer with the same counterparty to retain substantially all of the economics of that transferred financial asset. As of the end of 2Q17 and 4Q16, the Group had agreements in the form of longevity swaps on life insurance policies.

The following table presents information about the transfers of financial assets accounted for as sales with agreements that result in the Group retaining substantially all of the exposure to the economic return on the transferred assets at the date of sale and remain outstanding as of the end of 2Q17 and 4Q16, respectively, gross cash proceeds received for assets derecognized at the date of sale and the fair values of transferred assets and the aforementioned agreements as of the end of 2Q17 and 4Q16.

#### Transfer of financial assets accounted for as sales – by transaction type

	at date of derecognition		end of

<b>Total transactions outstanding</b>	<b>259</b>	<b>319</b>	<b>353</b>	<b>522 <sup>2</sup></b>	<b>0</b>
<b>4Q16 (CHF million)</b>					
Sales with longevity swaps	277	340	374	556	–
<b>Total transactions outstanding</b>	<b>277</b>	<b>340</b>	<b>374</b>	<b>556 <sup>3</sup></b>	<b>0</b>

<sup>1</sup> Balances presented on a gross basis, before application of counterparty and cash collateral netting.

<sup>2</sup> As of the end of 2Q17, gross derivative assets of CHF 522 million were included in other products, as disclosed in Note 25 – Derivatives and hedging activities.

<sup>3</sup> As of the end of 4Q16, gross derivative assets of CHF 556 million were included in other products, as disclosed in Note 25 – Derivatives and hedging activities.

### Securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings

For securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings, US GAAP requires the disclosure of the collateral pledged and the associated risks to which a transferor continues to be exposed after the transfer. This provides an understanding of the nature and risks of short-term collateralized financing obtained through these types of transactions.

Securities sold under repurchase agreements and securities lending transactions represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activities. These transactions are collateralized principally by government debt securities, corporate debt securities, asset-backed securities, equity securities and other collateral and have terms ranging from on demand to a longer period of time.

In the event of the Group's default or a decline in fair value of collateral pledged, the repurchase agreement or security lending transaction provides the counterparty with the right to liquidate the collateral held or request additional collateral.

The following tables provide the gross obligation relating to securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral by the class of collateral pledged and by remaining contractual maturity as of the end of 2Q17 and 4Q16.

### Securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral – by class of collateral pledged

end of	2Q17	4Q16
<b>CHF billion</b>

Obligation to return securities received as collateral, at fair value	32.2	0.4	0.0	0.0	32.6
Total	45.7	34.7	8.4	8.2	97.0

<sup>1</sup> Includes contracts with no contractual maturity that may contain termination arrangements subject to a notice period.

<sup>2</sup> Includes overnight transactions.

► Refer to "Note 21 – Offsetting of financial assets and financial liabilities" for further information on the gross amount of securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral and the net amounts disclosed in the consolidated balance sheets.

## VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered variable interest entities (VIEs) and are grouped into three primary categories: CDO/CLOs, CP conduits and financial intermediation.

► Refer to “Variable interest entities” in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for a detailed description of VIEs, CDO/CLOs, CP conduit or financial intermediation.

### Collateralized debt and loan obligations

The Group engages in CDO/CLO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

### Commercial paper conduit

In 2Q16, the Group established Alpine Securitization Ltd (Alpine), a multi-seller asset-backed CP conduit used for client and Group financing purposes. The Group acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. The CP conduit can enter into liquidity facilities with third-party entities pursuant to which it may purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support to the CP conduit in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting

purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 144 days as of the end of 2Q17. Alpine was rated A-1(sf) by Standard & Poor's and P-1(sf) by Moody's and had exposures mainly in a reverse repurchase agreement, credit card receivables and car loans.

The Group's commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Group's economic risks associated with the CP conduit are included in the Group's risk management framework including counterparty, economic risk capital and scenario analysis.

### Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

### Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 2Q17 and 4Q16.

### Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory,

certain repurchase financings to funds and single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for further information on non-consolidated VIEs.

## 28 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes);
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

### CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's concentrations of credit risk.

### FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on fair value measurement of financial instruments and the definition of the levels of the fair value hierarchy.

## Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 6M17, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers from trading assets were mainly in exchange traded derivatives and equity securities as prices became observable. The transfers from trading liabilities were primarily in exchange traded derivatives as prices became observable.

In 6M17, transfers out of level 1 to level 2 were primarily from trading assets, mainly in debt and equity securities, for which suitable closing prices were unobtainable as of the end of 6M17.

**Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)**

in	6M17			6M16		
	Trading revenues	Other revenues	Total revenues	Trading revenues	Other revenues	Total revenues
<b>Gains and losses on assets and liabilities (CHF million)</b>						
Net realized/unrealized gains/(losses) included in net revenues	(557)	(161)	<b>(718)<sup>1</sup></b>	(80)	108	<b>28<sup>1</sup></b>
Whereof:						
Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date	(1,107)	11	<b>(1,096)</b>	(294)	13	<b>(281)</b>

<sup>1</sup> Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

**Transfers in and out of level 3**

Transfers into level 3 assets during 6M17 were CHF 1,238 million, primarily from trading assets and loans. The transfers were primarily in the credit, fixed income and financing businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 6M17 were CHF 1,707 million, primarily in trading assets. The transfers out of level 3 trading assets were primarily in the Strategic Resolution Unit and credit businesses due to increased observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 2Q17 were CHF 674 million, primarily from loans and trading assets. The transfers were primarily in the credit, fixed income and financing businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2Q17 were CHF 525 million, primarily in trading assets and loans. The transfers were primarily in the Strategic Resolution Unit and credit businesses due to increased observability of pricing data and increased availability of pricing information from external providers.

**Qualitative disclosures of valuation techniques**
**Overview**

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's valuation control framework.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables "Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

**Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions**

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. The significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

**Debt securities**

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance,

delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price and correlation. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

#### CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity, discount rate and credit spread. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

#### Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include market comparable price and earnings before interest, taxes, depreciation and amortization (EBITDA) multiple.

#### Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

The valuation of derivatives includes an adjustment for the cost of funding uncollateralized OTC derivatives.

#### Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options

and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility skew, prepayment rate and basis spread.

#### Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate, correlation and contingent probability.

#### Equity and index-related derivatives

Equity derivatives include a variety of products ranging from vanilla options and swaps to exotic structures with bespoke payoff profiles. The main inputs in the valuation of equity derivatives may include volatility, buyback probability, gap risk and correlation.

Generally, the interrelationship between the volatility and correlation is positively correlated.

#### Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread and correlation. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

#### Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable

instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

#### Other investments

##### Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published net asset values (NAVs) as permitted by ASC Topic 820 – Fair Value Measurement. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not in line with the fund's observable market data, it is probable that the investment will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs. The investments for which the fair value is measured using the NAV practical expedient are not categorized within the fair value hierarchy.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

##### Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance

instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

### Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a loan pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available. The fair value of the consolidated financial assets of RMBS and CMBS securitization vehicles, which qualify as CFEs, are measured on the basis of the more observable fair value of the VIEs' financial liabilities.

Accrual based loans in the Group's private, corporate and institutional banking businesses, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest

rates for the applicable maturity and currency and from counterparty-related credit spreads.

### Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

### Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcable and non-bifurcable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buy-back probability, gap risk, correlation, volatility, credit spread, mean reversion and price.

Generally, the interrelationships between volatility, correlation, gap risk and credit spread inputs are positively correlated.

### Other liabilities

#### Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

### Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

### Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of EBITDA multiple, market implied life expectancy (for life finance instruments), buyback probability, correlation, contingent probability, price, volatility, volatility skew or funding spread, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of market implied life expectancy (for life settlement and premium finance instruments), capitalization rate, discount rate, prepayment rate, gap risk, recovery rate or credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, in general, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input mean reversion would increase the fair value. An increase in the

significant unobservable input basis spread would decrease the fair value.

### Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

### Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

### Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above results in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

#### Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

#### Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates to collateral with a greater risk of default.

#### Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

#### Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

#### Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

#### Volatility and volatility skew

Volatility and its skew are both impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility may vary significantly between different underlying currencies and expiration dates on the options. Similarly, in the case of equity derivatives, the volatility attributed to a structure may vary depending upon the underlying reference name on the derivative.

#### Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of the insured.

#### Price

Bond equivalent price is a primary significant unobservable input for multiple products. Where market prices are not available for an instrument, benchmarking may be utilized to identify comparable issues (same industry and similar product mixes) while adjustments are considered for differences in deal terms and performance.

#### Buyback probability

Buyback probability is the probability assigned to structured notes being unwound prior to their legal maturity.

#### Gap risk

Gap risk is the primary significant unobservable input for fund-linked Constant Proportion Portfolio Insurance products and structures where the payoff may be sensitive to discontinuity in the hedging portfolio.

#### Mean reversion

Mean reversion is the primary significant unobservable input for callable constant maturity swap (CMS) spread exotics and represents the idea that prices and returns eventually move back towards the historical average.

#### Funding spread

Funding spread is the primary significant unobservable input for special purpose vehicle funding facilities. Synthetic funding curves which represent the assets pledged as collateral are used to value structured financing transactions. The curves provide an estimate of where secured funding can be sourced and are expressed as a basis point spread in relation to the referenced benchmark rate.

#### Capitalization rate

Capitalization rate is the primary significant unobservable input for CMBS loans and is used to estimate the potential return on investment. This is done by dividing the yearly income by the total value of the property.

#### Basis spread

Basis spread is the primary significant unobservable input for non-callable constant maturity treasury-CMS products and is used to determine interest rate risk as a result of differing lending and borrowing rates.

### EBITDA multiple

EBITDA multiple is a primary significant unobservable input for some equity deals which are benchmarked using industry comparables. The EBITDA multiple may be preferred over other measures because it is normalized for differences between the accounting policies of similar companies.

### Contingent probability

Contingent probability is the primary significant unobservable input for contingent foreign exchange forward trades where the delivery or exercise and the premium payment are contingent on an event such as completion of an M&A deal or regulatory approval for a product.

### Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount

of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which is generally up to 10 years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

<sup>7</sup> Includes CHF 67 million and CHF 88 million attributable to noncontrolling interests in 2Q17 and 4Q16, respectively.

### Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use. Nonrecurring measurements are completed as of the end of the period unless otherwise stated.

### FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in the investment banking businesses and International Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's election of the fair value option for certain of its financial statement captions.

### Difference between the aggregate fair value and the aggregate unpaid principal balances of loans and financial instruments

## 29 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

### Assets pledged

end of	2Q17	4Q16
<b>Assets pledged (CHF million)</b>		
Total assets pledged or assigned as collateral	112,294	122,805
of which encumbered	71,309	83,473

### Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

### Collateral

end of	2Q17	4Q16
<b>Collateral (CHF million)</b>		
Fair value of collateral received with the right to sell or repledge	398,459	402,690
of which sold or repledged	159,781	167,487

## 30 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 39 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016* and updated in subsequent quarterly reports (including those discussed below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described include (a) proceedings where the Group has accrued a loss contingency provision, given that it

is probable that a loss may be incurred and such loss is reasonably estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar

matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 39 referenced above and updated in quarterly reports (including below) for which the Group believes an estimate is possible is zero to CHF 1.3 billion.

In 2Q17, the Group recorded net litigation provisions of CHF 76 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

### **Mortgage-related matters**

#### **Civil litigation**

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

#### **Individual investor actions**

On June 29, 2017, following a settlement, the Supreme Court for the State of New York, New York County (SCNY), presiding in the action brought by Deutsche Zentral-Genossenschaftsbank AG, New York Branch dismissed with prejudice all claims against Credit Suisse Securities (USA) LLC (CSS LLC) and its affiliates related to approximately USD 111 million of RMBS at issue.

On June 5, 2017, Phoenix Light SF Ltd. and affiliated entities filed an amended complaint against CSS LLC and its affiliates in the SCNY, reducing the RMBS at issue by approximately USD 81 million; the action now relates to approximately USD 281 million of RMBS.

#### **Rates-related matters**

On June 26, 2017, in the multi-district litigation concerning US Dollar LIBOR, which includes multiple putative class actions and individual actions, the only named plaintiff with class claims remaining against a Credit Suisse entity that survived a motion to dismiss withdrew as a class representative. Credit Suisse AG has moved to dismiss this remaining putative class action on the ground that there are no remaining class representatives with claims against it.

On June 10, 2017, Credit Suisse Group AG and affiliates, along with other financial institutions, were named in a second putative class action brought in the US District Court for the Southern District of New York (SDNY) alleging manipulation of the foreign exchange market on behalf of indirect purchasers of foreign exchange instruments. Both putative class actions have been consolidated in the SDNY, and plaintiffs filed a consolidated complaint on June 30, 2017.

#### **CDS-related matters**

On June 8, 2017, Credit Suisse Group AG and affiliates, along with other financial institutions, were named in a civil action filed in the SDNY by Tera Group, Inc. and related entities (collectively "Tera"), alleging violations of antitrust law in connection with the allegation that credit default swap (CDS) dealers conspired to block Tera's electronic CDS trading platform from successfully entering the market.

#### **Customer account matters**

On June 26, 2017, the Geneva prosecutor indicted the former relationship manager in Switzerland for professional fraud, forgery and criminal mismanagement.

### 31 Subsidiary guarantee information

---

Certain wholly owned finance subsidiaries of the Group, including Credit Suisse Group Funding (Guernsey) Limited, which is a Guernsey incorporated non-cellular company limited by shares, have issued securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law for the Guernsey subsidiary, applicable to some of the Group's subsidiaries that may limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against

Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

As part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing intermediate holding companies in the US for non-US banks, legal entities are re-parented as subsidiaries of Credit Suisse (USA), Inc.

In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division, during 1Q17, the equity stakes in Neue Aargauer Bank AG, BANK-now AG and Swisscard AECS GmbH held by the Group were transferred to Credit Suisse (Schweiz) AG, a wholly owned subsidiary of the Bank.

Prior periods are restated to conform to the current presentation to reflect the impact of such transactions.

### Cautionary statement regarding forward-looking information

This document contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries or in emerging markets in 2017 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including cost efficiency, net new asset, pre-tax income/(loss), capital ratios and return on regulatory capital, leverage exposure threshold, risk-weighted assets threshold and other targets and ambitions;

- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyberattacks on our business or operations;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- the potential effects of proposed changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2016.

## Report of Independent Registered Public Accounting Firm

### To the Board of Directors of Credit Suisse AG, Zurich

We have reviewed the accompanying condensed consolidated balance sheet of Credit Suisse AG and subsidiaries (the "Bank") as of June 30, 2017 and the related condensed consolidated statements of operations, comprehensive income, changes in equity, and cash flows for the six-month periods ended June 30, 2017 and 2016. These condensed consolidated financial statements are the responsibility of the Bank's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Bank as of December 31, 2016, and the related consolidated statements of operations, comprehensive income, changes in equity, and cash flows for the year then ended (not presented herein); and in our report dated March 24, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

### Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse AG (the Bank) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2016, included in the Credit Suisse Group AG & Credit Suisse AG Annual Report 2016 (Credit Suisse Annual Report 2016).

► Refer to "Note 1 – Summary of significant accounting policies" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for a description of the Bank's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed

consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division, during 6M17, the equity stakes in Neue Aargauer Bank AG, BANK-now AG and Swisscard AECS GmbH held by the Group were transferred to Credit Suisse (Schweiz) AG, a wholly owned subsidiary of the Bank.

Prior periods have been restated to conform to the current presentation to reflect the impact of these transfers.

## 2 Recently issued accounting standards

► Refer to "Note 2 – Recently issued accounting standards" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for a description of accounting standards adopted in 2016.

► Refer to "Note 2 – Recently issued accounting standards" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q17 for the most recently adopted accounting standards and standards to be adopted in future periods.

The impact on the Bank's and Group's financial condition, results of operations or cash flows was or is expected to be identical.

## 3 Business developments

### Capital increase

On May 18, 2017, the Group held an Extraordinary General Meeting at which shareholders approved a capital increase by way of a rights offering. By the end of the rights exercise period on June 7, 2017, 99.2% of the rights had been exercised and 390,206,406 newly issued shares were subscribed. The 3,026,166 newly issued shares that were not subscribed were sold in the market. The capital increase resulted in 393,232,572 newly issued shares and net proceeds for the Group of CHF 4.1 billion. Of these proceeds, the Bank received CHF 4.1 billion as a capital contribution from the Group.

### Evolution of legal entity structure

The execution of the program evolving the Group's legal entity structure to support the realization of its strategic objectives,

increase the resilience of the Group and meet developing and future regulatory requirements has continued to progress.

- In February 2017, Credit Suisse (Schweiz) AG and Credit Suisse Asset Management International Holding Ltd (CSAM IHAG), with a participating interest of 49% and 51%, respectively, incorporated Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG (CSAM Holding), a holding company domiciled in Switzerland. CSAM Schweiz was incorporated in February 2017 and received the Swiss-related asset management business from Credit Suisse AG through a transfer of assets in accordance with the Swiss Merger Act. All transfers of participations were made at the participations' Swiss GAAP carrying value as recorded by the transferor.
- In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division,

the following equity stakes held by the Group were transferred to Credit Suisse (Schweiz) AG: (i) 100% equity stake in Neue Aargauer Bank AG, (ii) 100% equity stake in BANK-now AG,

and (iii) 50% equity stake in Swisscard AECS GmbH. The transfer was completed on March 31, 2017.

► Refer to "Evolution of legal entity structure" in I – Information on the company – Strategy in the Credit Suisse Annual Report 2016 for further information.

## 4 Segment information

► Refer to "Note 4 – Segment information" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2017 for further information.

For the purpose of presentation of reportable segments, the Bank has included accounts of affiliate entities wholly owned by the same parent which are managed together with the operating segments of the Bank.

<sup>1</sup> The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

## 21 Tax

The effective tax rate of 33.5% in 6M17 mainly reflected the impact of the geographical mix of results. Overall, net deferred tax assets increased CHF 1,627 million to CHF 7,343 million as of the end of 6M17 compared to 2016.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of June 30, 2017, the Bank had accumulated undistributed earnings from foreign subsidiaries of CHF 4.4 billion which are considered indefinitely reinvested. The Bank would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Bank is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 67 million in unrecognized tax benefits within 12 months of the reporting date.

The Bank remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Brazil – 2012; Japan – 2012; Switzerland – 2011; the US – 2010; the UK – 2009; and the Netherlands – 2006.

### Effective tax rate

<b>Income tax expense</b>	<b>386</b>

<sup>1</sup> As a result of the adoption of ASU 2016-09 windfall tax benefits and shortfall tax charges on share-based compensation are now recognized in the consolidated statements of operations and no longer in shareholders' equity.

### Foreign tax rate differential

6M17 included a foreign tax benefit of CHF 40 million in respect of earnings in lower tax jurisdictions, such as Singapore, as well as earnings in higher tax jurisdictions, such as the US.

### Other non-deductible expenses

6M17 included the impact of non-deductible interest expenses of CHF 295 million and non-deductible bank levy costs and other non-deductible compensation expenses of CHF 22 million.

### Changes in deferred tax valuation allowance

6M17 included the impact of the increase of valuation allowances of CHF 162 million mainly in respect of four of the Bank's operating entities, three in the UK and one in Hong Kong, and a decrease of valuation allowances of CHF 13 million mainly in respect of one of the Bank's operating entities in Switzerland, related to estimated current year earnings.

### Lower taxed income

6M17 included the impacts of CHF 43 million related to non-taxable life insurance income, a beneficial earnings mix in one of the Bank's operating entities in Switzerland of CHF 39 million, and various smaller items.

### Other

6M17 included a tax benefit of CHF 110 million associated with the establishment of Credit Suisse Asset Management & Investor

Services (Schweiz) Holding AG in Switzerland, a tax benefit of CHF 107 million relating to the reassessment of deferred tax balances in one of the Bank's operating entities in Switzerland, a tax benefit of CHF 87 million relating to the decrease of tax contingency accruals and a tax benefit for the reassessment relating to the tax deductibility on previously taken litigation accruals of CHF 85 million, partially offset by a tax expense of CHF 69 million from an adverse earnings mix in one of the Bank's operating entities in Switzerland and a tax expense of CHF 13 million from prior year adjustments. The remaining balance included various smaller items.

## 22 Employee deferred compensation

► Refer to "Note 23 – Employee deferred compensation" in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2017 and "Note 28 – Employee deferred compensation" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for further information.

### Deferred compensation expense

<b>Net deferred tax assets</b>	<b>7,343</b>	<b>5,716</b>

<sup>1</sup> Includes a reclassification from other assets to deferred tax assets in 6M17 as a result of the early adoption of ASU 2016-16. Refer to "Note 2 – Recently issued accounting standards" for further information.

### 6M17 activity

In 6M17, the Bank granted share awards, performance share awards and Contingent Capital Awards (CCA) as part of the 2016 deferred variable compensation. Expense recognition for these awards began in 6M17 and will continue over the remaining service or vesting period of each respective award.

### Share awards

In 6M17, the Bank granted 45.5 million shares at a weighted-average share price of CHF 14.40. Each share award granted entitles the holder of the award to receive one Group share, subject to service conditions. Share awards vest over three years with one third of the share awards vesting on each of the three anniversaries of the grant date (ratable vesting), with the exception of awards granted to individuals classified as risk managers or senior managers under the UK Prudential Regulatory Authority (PRA) Remuneration Code. Share awards granted to risk managers vest over five years with one fifth of the award vesting on each of the five anniversaries of the grant date, while share awards granted to senior managers vest over five years commencing on the third anniversary of the grant date, with one fifth of the award vesting on each of the third to seventh anniversaries of the grant date. Share awards are expensed over the service period of the awards.

### Performance share awards

In 6M17, the Bank granted 31.1 million performance shares at a weighted-average share price of CHF 14.41. Performance share awards are similar to share awards, except that the full balance of outstanding performance share awards, including those awarded in prior years, are subject to performance-based malus provisions.

### Contingent Capital Awards

In 6M17, the Bank awarded CHF 228 million of CCA. CCA are scheduled to vest on the third anniversary of the grant date, other than those granted to individuals classified as risk managers or senior managers under the UK PRA Remuneration Code, where CCA vest on the fifth and seventh anniversaries of the grant date, respectively, and will be expensed over the vesting period.

### Special cash awards

In 6M17, the Bank granted deferred cash retention awards of CHF 65 million relating to the reorganization of the Asia Pacific business. These will be expensed over a two-year period from the grant date. Amortization of these awards totaled CHF 9 million in 6M17 and was recognized in the Corporate Center.

### 2008 Partner Asset Facility

In 6M17, the final settlement of the outstanding 2008 Partner Asset Facility awards of CHF 789 million was made.

### Share-based award activity

	6M17		
	Share awards	Performance share awards	Contingent Capital share award
Number of awards (in millions)			
<b>Share-based award activities</b>			
<b>Balance at beginning of period</b>	<b>70.7</b>	<b>48.0</b>	<b>12.7</b>
Granted <sup>1</sup>	45.5	31.1	0.3
Settled	(31.5)	(22.9)	(4.8)
Forfeited <sup>2</sup>	(2.0)	(0.9)	(0.3)
<b>Balance at end of period</b>	<b>82.7</b>	<b>55.3</b>	<b>7.9</b>
of which vested	9.6	5.3	1.0
of which unvested	73.1	50.0	6.9

<sup>1</sup> Includes an adjustment for share awards granted in 6M17 to compensate for the proportionate dilution of Group shares resulting from the rights offering approved on May 18, 2017. The number of deferred share-based awards held by each individual was increased by 3.64%. The terms and conditions of the adjusted shares were the same as the existing share-based awards thereby ensuring that holders of the awards were neither advantaged nor disadvantaged by the additional shares granted.

<sup>2</sup> Includes the transfer of the share-based awards of Neue Aargauer Bank AG, Bank-now AG and Swisscard AECS GmbH.

### 23 Pension and other post-retirement benefits

► Refer to "Note 30 – Pension and other post-retirement benefits" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for further information.

The Bank expects to contribute CHF 34 million to the international single-employer defined benefit pension plans and other post-retirement defined benefit plans in 2017. As of the end of 6M17, CHF 17 million of contributions had been made.

### Components of total benefit costs

in	6M17	6M16
<b>Total benefit costs (CHF million)</b>		
Service costs on benefit obligation	11	11
Interest costs on benefit obligation	48	69
Expected return on plan assets	(66)	(88)
Amortization of recognized prior service cost/(credit)	0	0

<b>Net periodic benefit costs</b>	<b>24</b>	<b>20</b>
Curtailment losses/(gains)	(5)	0
<b>Total benefit costs</b>	<b>19</b>	<b>20</b>

## 24 Derivatives and hedging activities

► Refer to "Note 31 – Derivatives and hedging activities" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Bank.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Bank elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to "Note 27 – Financial instruments" for further information.

<b>Total</b>	<b>(19)</b>	<b>9</b>
<b>Details of cash flow hedges (CHF million)</b>		
Net gains on the ineffective portion <sup>2</sup>	1	31

<sup>1</sup> Included in interest and dividend income.

<sup>2</sup> Included in trading revenues.

<sup>3</sup> Included in total other operating expenses.

As of the end of 6M17, the maximum length of time over which the Bank hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions

related to the payment of variable interest on existing financial instruments, was five years.

The net loss associated with cash flow hedges expected to be reclassified from accumulated other comprehensive income (AOCI) within the next 12 months was CHF 10 million.

#### Net investment hedges

in	6M17	6M16
<b>Gains/(losses) recognized in AOCI on derivatives (CHF million)</b>		
Foreign exchange products	(54)	(253)
<b>Total</b>	<b>(54)</b>	<b>(253)</b>

Represents gains/(losses) on effective portion.

The Bank includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 7 – Trading revenues" for gains and losses on trading activities by product type.

#### Contingent credit risk

end of	6M17								2016

#### Credit derivatives

► Refer to "Note 31 – Derivatives and hedging activities" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for further information on credit derivatives.

#### Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the "Fair value of derivative instruments" tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its

#### Disclosures relating to contingent credit risk

The following table provides the Bank's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and special purpose entities (SPEs) that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch, two-notch and a three-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Total return swaps (TRS) of CHF 7.5 billion and CHF 7.8 billion as of the end of 6M17 and 2016, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

Derivatives <sup>2</sup>	15,864	7,943	23,807	23,807	684	– <sup>3</sup>
Other guarantees	3,460	2,034	5,494	5,490	44	3,668
<b>Total guarantees</b>	<b>26,395</b>	<b>13,148</b>	<b>39,543</b>	<b>38,329</b>	<b>817</b>	<b>8,801</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Bank had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

<sup>3</sup> Collateral for derivatives accounted for as guarantees is not considered significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by Swiss Financial Market Supervisory Authority FINMA (FINMA) or by compulsory liquidation of another deposit taking bank, the Bank's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Bank's banking subsidiaries in Switzerland, the Bank's share in the deposit insurance guarantee program for the period July 1, 2016 to June 30, 2017 was CHF 0.6 billion. These deposit

insurance guarantees were reflected in other guarantees. For the period July 1, 2017 to June 30, 2018, the Bank's share in this deposit insurance guarantee program based on FINMA's estimate will be CHF 0.5 billion.

### Representations and warranties on residential mortgage loans sold

In connection with the former Investment Banking's sale of US residential mortgage loans, the Bank has provided certain representations and warranties relating to the loans sold.

► Refer to "Note 26 – Guarantees and commitments" in III – Consolidated financial statements – unaudited in the Credit Suisse Financial Report 2Q17 and to "Note 32 – Guarantees and commitments" in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for further information.

## Other commitments

end of	6M17						2016			
	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Collateral received	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Collateral received

<b>Total other commitments</b>	<b>29,075</b>	<b>81,745</b>	<b>110,820</b>	<b>106,806</b>	<b>45,708</b>	<b>35,308</b>	<b>86,743</b>	<b>122,051</b>	<b>118,017</b>	<b>48,900</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Irrevocable loan commitments do not include a total gross amount of CHF 104,362 million and CHF 95,745 million of unused credit limits as of the end of 6M17 and 2016, respectively, which were revocable at the Bank's sole discretion upon notice to the client. The prior period has been adjusted to the current presentation.

## 26 Transfers of financial assets and variable interest entities

► Refer to "Note 27 – Transfers of financial assets and variable interest entities in III – Condensed consolidated financial statements – unaudited in the Credit Suisse Financial Report 2017 and "Note 33 – Transfers of financial assets and variable interest entities in VII – Consolidated financial statements – Credit Suisse (Bank) in the Credit Suisse Annual Report 2016 for further information.

## TRANSFERS OF FINANCIAL ASSETS

## Securitizations

The following table provides the gains or losses and proceeds from the transfer of assets relating to 6M17 and 6M16 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with cash flows between the Bank and the SPEs used in any securitizations in which the Bank maintained continuing involvement from the time of the transaction, regardless of when the securitization occurred.

## Securitizations

in	6M17	6M16
<b>Gains and cash flows (CHF million)</b>		
<b>CMBS</b>		
Net gain <sup>1</sup>	34	2
Proceeds from transfer of assets	2,917	3,148
Cash received on interests that continue to be held	18	35
<b>RMBS</b>		
Net gain/(loss) <sup>1</sup>	6	(1)
Proceeds from transfer of assets	5,807	4,898
Servicing fees	1	2
Cash received on interests that continue to be held	146	262
<b>Other asset-backed financings</b>		
Net gain <sup>1</sup>	24	17
Proceeds from transfer of assets	3,404	1,305
Fees <sup>2</sup>	56	61
Cash received on interests that continue to be held	1	1

<sup>1</sup> Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

<sup>2</sup> Represents management fees and performance fees earned for investment management services provided to managed CLOs.

### Continuing involvement in transferred financial assets

The following table provides the outstanding principal balance of assets to which the Bank continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 6M17 and 2016, regardless of when the transfer of assets occurred.

### Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	6M17	2016
<b>CHF million</b>		
<b>CMBS</b>		
Principal amount outstanding	26,521	28,779
Total assets of SPE	38,616	40,234
<b>RMBS</b>		
Principal amount outstanding	33,811	38,319
Total assets of SPE	35,000	39,680
<b>Other asset-backed financings</b>		
Principal amount outstanding	19,806	19,777
Total assets of SPE	36,004	36,049

Principal amount outstanding relates to assets transferred from the Bank and does not include principle amounts for assets transferred from third parties.

### Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Bank may utilize to hedge the inherent risks.

### Key economic assumptions at the time of transfer

► Refer to "Note 27 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in	6M17		6M16	
	CMBS	RMBS	CMBS	RMBS
<b>CHF million, except where indicated</b>				
Fair value of beneficial interests	60	637	42	1,300
of which level 2	60	538	42	1,228
of which level 3	0	99	0	71
Weighted-average life, in years	7.7	9.5	10.7	6.7
Prepayment speed assumption (rate per annum), in % <sup>1</sup>	– <sup>2</sup>	6.7–16.8	– <sup>2</sup>	8.1–24.4
Cash flow discount rate (rate per annum), in % <sup>3</sup>	2.9–3.0	2.3–11.7	2.4–4.9	1.4–18.6
Expected credit losses (rate per annum), in %	0.0–0.0	3.2–3.7	0.0–0.0	0.0–0.0

Transfers of assets in which the Bank does not have beneficial interests are not included in this table.

<sup>1</sup> Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>2</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>3</sup> The rate was based on the weighted-average yield on the beneficial interests.

### Key economic assumptions as of the reporting date

The following tables provide the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 6M17 and 2016.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

end of	6M17			2016		
	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>	CMBS <sup>1</sup>	RMBS	Other asset-backed financing activities <sup>2</sup>
<b>CHF million, except where indicated</b>						
Fair value of beneficial interests	220	1,441	471	258	1,851	443
of which non-investment grade	106	367	31	70	523	32
Weighted-average life, in years	6.3	8.0	6.0	7.2	8.1	5.6

Cash flow discount rate (rate per annum), in % <sup>4</sup>	1.2–13.2	1.9–37.0	1.1–21.2	2.3–28.8	1.7–47.2	0.8–21.2
Impact on fair value from 10% adverse change	(5.0)	(38.5)	(8.9)	(6.0)	(48.1)	(8.3)
Impact on fair value from 20% adverse change	(9.7)	(74.8)	(17.5)	(11.7)	(93.5)	(16.4)
Expected credit losses (rate per annum), in %	0.3–10.4	0.8–35.8	0.8–21.2	0.7–28.0	0.9–44.9	0.9–21.2
Impact on fair value from 10% adverse change	(3.2)	(22.1)	(5.0)	(3.5)	(27.3)	(5.1)
Impact on fair value from 20% adverse change	(6.3)	(43.3)	(10.0)	(6.9)	(53.3)	(10.0)

<sup>1</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>2</sup> CDOs within this category are generally structured to be protected from prepayment risk.

<sup>3</sup> PSA is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the CPR assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>4</sup> The rate was based on the weighted-average yield on the beneficial interests.

### Transfers of financial assets where sale treatment was not achieved

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 6M17 and 2016.

► Refer to “Note 28 – Assets pledged and collateral” for information on assets pledged or assigned.

### Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

end of	6M17	2016

Total	45.7	35.0	8.4	8.2	97.3

<sup>1</sup> Includes contracts with no contractual maturity that may contain termination arrangements subject to a notice period.

<sup>2</sup> Includes overnight transactions.

► Refer to "Note 20 – Offsetting of financial assets and financial liabilities" for further information on the gross amount of securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral and the net amounts disclosed in the consolidated balance sheets.

## VARIABLE INTEREST ENTITIES

### Commercial paper conduit

In 2Q16, the Bank established Alpine Securitization Ltd (Alpine), a multi-seller asset-backed CP conduit used for client and Bank financing purposes. The Bank acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. The CP conduit can enter into liquidity facilities with third-party entities pursuant to which it may purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support to the CP conduit in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Bank. However, its assets are available to satisfy only the claims of its creditors. In addition, the Bank, as administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Bank is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 144 days as of the end of 6M17. Alpine was rated A-1(sf) by Standard & Poor's and P-1(sf) by Moody's and had exposures mainly in a reverse repurchase agreement, credit card receivables and car loans.

The Bank's commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Bank to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Bank reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Bank's economic risks associated with the CP conduit are included in the Bank's risk management framework including counterparty, economic risk capital and scenario analysis.

### Consolidated VIEs

The consolidated variable interest entities (VIEs) tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 6M17 and 2016.

### Consolidated VIEs in which the Bank was the primary beneficiary

**Non-consolidated VIEs**

Non-consolidated VIE assets are related to the non-consolidated VIEs with which the Bank has variable interests. These amounts represent the assets of the entities themselves and are typically

unrelated to the exposures the Bank has with the entity and thus are not amounts that are considered for risk management purposes.

**Non-consolidated VIEs**

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the direct bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of "–" indicates not meaningful or not applicable.

# Credit Suisse at a glance

## Credit Suisse

Our strategy builds on Credit Suisse's core strengths: its position as a leading global wealth manager, its specialist investment banking capabilities and its strong presence in our home market of Switzerland. We seek to follow a balanced approach to wealth management, aiming to capitalize on both the large pool of wealth within mature markets as well as the significant growth in wealth in Asia Pacific and other emerging markets. Founded in 1856, we today have a global reach with operations in about 50 countries and 46,640 employees from over 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture growth opportunities around the world. We serve our clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specializing in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios from the former non-strategic units plus additional businesses and positions that do not fit with our strategic direction. Our business divisions cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

## Swiss Universal Bank

The Swiss Universal Bank division offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients primarily domiciled in our home market Switzerland, which offers attractive growth opportunities and where we can build on a strong market position across our key businesses. Our Private Clients business has a leading franchise in our Swiss home market and serves ultra-high-net-worth individuals, high-net-worth individuals, affluent and retail clients. Our Corporate & Institutional Clients business serves large corporate clients, small and medium-sized enterprises, institutional clients, external asset managers and financial institutions.

## Asia Pacific

In the Asia Pacific division, our wealth management, financing and underwriting and advisory teams work closely together to deliver integrated advisory services and solutions to our target ultra-high-net-worth, entrepreneur and corporate clients. Our Wealth Management & Connected business combines our activities in wealth management with our financing, underwriting and advisory activities. Our Markets business represents our equities and fixed income trading business in Asia Pacific, which supports our wealth management activities, but also deals extensively with a broader range of institutional clients.

## Investment Banking & Capital Markets

The Investment Banking & Capital Markets division offers a broad range of investment banking services to corporations, financial institutions, financial sponsors and ultra-high-net-worth individuals and sovereign clients. Our range of products and services includes advisory services related to mergers and acquisitions, divestitures, takeover defense mandates, business restructurings and spin-offs. The division also engages in debt and equity underwriting of public securities offerings and private placements.

## International Wealth Management

The International Wealth Management division through its Private Banking business offers comprehensive advisory services and tailored investment and financing solutions to wealthy private clients and external asset managers in Europe, the Middle East, Africa and Latin America, utilizing comprehensive access to the broad spectrum of Credit Suisse's global resources and capabilities as well as a wide range of proprietary and third-party products and services. Our Asset Management business offers investment solutions and services globally to a broad range of clients, including pension funds, governments, foundations and endowments, corporations and individuals.

## Global Markets

The Global Markets division offers a broad range of financial products and services to client-driven businesses and also supports Credit Suisse's global wealth management businesses and their clients. Our suite of equities, solutions and credit products and services includes global securities sales, trading and execution, prime brokerage and comprehensive investment research. Our clients include financial institutions, corporations, governments, institutional investors, such as pension funds and hedge funds, and private individuals around the world.

## Strategic Resolution Unit

The Strategic Resolution Unit was created to facilitate the immediate right-sizing of our business divisions from a capital perspective and includes remaining portfolios from former non-strategic units plus transfers of additional exposures from the business divisions. The unit's primary focus is on facilitating the rapid wind-down of capital usage and costs to reduce the negative impact on the Group's performance. Repositioned as a separate division, this provides clearer accountability, governance and reporting.

# Operating environment

During 1Q17, global economic indicators were generally positive and core inflation was stable. Global equity markets ended the quarter higher and European bank stocks in particular performed well. Government bond yields were mostly unchanged, and the US dollar depreciated against all major currencies.

## ECONOMIC ENVIRONMENT

On average business and consumer survey data for the US improved further in 1Q17, in part reaching multi-year highs. Real economic data, however, while remaining robust, did not show a similar acceleration during 1Q17. Headline inflation in the US and other major advanced economies rose significantly compared to 1Q16 as a result of increasing energy prices. Core inflation on the other hand was mostly stable. Confidence data also improved in the Eurozone and Chinese data indicated further signs of stabilizing and even slightly improved growth.

The US Federal Reserve (Fed) again raised the target range for the federal funds rate by 25 basis points at its meeting in mid-March, bringing it to 0.75-1.00%. The European Central Bank (ECB) left policy rates unchanged but announced that there was no extension of its targeted longer-term refinancing operations program. The Swiss National Bank (SNB) and the Bank of England (BoE) also left monetary policy unchanged. Among emerging markets, Brazil cut rates twice and Russia lowered its policy rates, while China and India left policy rates unchanged.

During 1Q17, global equities continued to show positive momentum (refer to the charts under "Equity markets") driven by improved macroeconomic data, corporate earnings and expectations of fiscal stimulus and tax reform in the US. Among developed markets, Eurozone, US and Swiss equities outperformed global

equity markets while Japanese equities suffered from appreciation of the yen. Emerging markets outperformed developed markets, and Chinese equities gained from resilient macroeconomic data and recent reforms. Oil and commodity exporting markets such as Russia and the Middle East underperformed due to a decrease in oil and commodity prices. During 1Q17, equity market volatility, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), remained low. Risk appetite, as measured by the Credit Suisse Equity Risk Appetite Index, remained positive throughout the quarter. The Credit Suisse Hedge Fund Index increased 2.1% in 1Q17.

After an increase in 4Q16, US Treasury yields were more stable in 1Q17 with the Fed declining to further raise its long-run fed funds rate projections. For euro-denominated sovereign bonds, yields increased slightly given ECB tapering concerns and political risks (refer to the charts under "Yield curves"). This led to a strong differentiation in total returns, with Italian and French bonds underperforming other major sovereign bonds, while UK Gilts and US Treasuries outperformed. In credit, emerging market bonds continued to perform well, with local currency bonds recording the best total returns on a US dollar, unhedged basis. High yield bonds also recorded a strong performance given the improving economic outlook (refer to the charts under "Credit spreads").

## Yield curves

In 1Q17, yield curves ended the quarter slightly higher, CHF remained mainly unchanged.

Source: Datastream, Credit Suisse

## Equity markets

Equity markets closed higher in 1Q17 with European bank stocks outperforming. Volatility remained low.

### Volatility

%

Source: Datastream, Credit Suisse

The US dollar depreciated against all major currencies in 1Q17, with the Australian dollar the strongest among major currencies. The Swiss franc ended the quarter little changed against the euro, after moderately appreciating in February amid improving Swiss economic data and lingering political risks in the Eurozone. The British pound ended the quarter slightly stronger against the US dollar as the British economy remained resilient. In emerging markets, the Mexican peso recovered some of its losses from last year, while the Turkish lira was among the weakest currencies in 1Q17.

After a strong performance in 2016, the Credit Suisse Commodities Benchmark slipped 3.3% in the first quarter, primarily due to weak energy and agricultural markets. Energy prices, specifically crude oil, declined during 1Q17 amid renewed oversupply concerns as US oil inventories rose through the quarter. A weaker US dollar led to increased precious metals prices, while improving industrial activity helped lift industrial metals. Despite divergent sector performance, overall volatility levels decreased.

## Credit spreads

Credit spreads traded in a narrow range throughout 1Q17.

<sup>2</sup> Dealogic.

**SECTOR ENVIRONMENT**

Bank equities in general underperformed global stocks in 1Q17, mainly due to the weaker performance of North American bank stocks. European bank stocks performed well and gained almost 7% during the quarter (refer to the charts under “Equity markets”).

In private banking, market conditions remained challenging in light of political and economic uncertainty, the persistence of the low interest rate environment, the uncertainty concerning central banks’ monetary policies going forward and increased concerns about global growth. The sector continues to face significant structural pressure as it adapts to industry-specific regulatory changes, tax regularization and anti-money laundering initiatives. In particular, regulatory requirements for investment advisory services continue to increase, including in the areas of client suitability and appropriateness of advice, information and documentation.

In investment banking, equity trading volumes decreased globally and in Europe compared to 1Q16 and increased compared to 4Q16. Announced mergers and acquisitions (M&A) increased globally and in Europe compared to 1Q16 and decreased compared to 4Q16. Global and European completed M&A volumes decreased compared to 1Q16 and 4Q16. Global and European equity underwriting volumes were higher compared to 1Q16 and 4Q16. Global and European debt underwriting volumes were also higher compared to 1Q16 and 4Q16. Compared to 1Q16, total US fixed income trading volumes were higher, mainly driven by an increase in federal agency and corporate volumes. Compared to 4Q16, total fixed income trading volumes decreased mainly driven by a decrease in mortgage-backed volumes.

# Credit Suisse

In 1Q17, we recorded net income attributable to shareholders of CHF 596 million. Diluted earnings per share were CHF 0.27 and return on equity attributable to shareholders was 5.7%. As of the end of 1Q17, our BIS CET1 ratio was 11.7% on a look-through basis.

<sup>1</sup> Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders as presented in our balance sheet. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

<sup>2</sup> Disclosed on a look-through basis.

## Credit Suisse reporting structure

Credit Suisse includes the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core Results do not include revenues and expenses from our Strategic Resolution Unit.

## RESULTS SUMMARY

In 1Q17, Credit Suisse reported net income attributable to shareholders of CHF 596 million compared to net losses attributable to shareholders of CHF (2,619) million in 4Q16 and CHF (302) million in 1Q16.

**Net revenues** of CHF 5,534 million increased 7% compared to 4Q16, primarily reflecting higher net revenues in Global Markets. The increase in Global Markets reflected a seasonal increase in client activity.

Net revenues increased 19% compared to 1Q16, primarily reflecting higher net revenues in Global Markets and Investment Banking & Capital Markets and lower negative net revenues in the Strategic Resolution Unit. Compared to a weak 1Q16, net revenues in Global Markets increased reflecting more favorable market conditions, particularly in its credit business. The movement in the Strategic Resolution Unit's net revenues was primarily driven by lower negative valuation adjustments and exit costs relating to our legacy investment banking portfolio, partially offset by lower fee-based revenues from the restructuring of select onshore businesses, in particular the transfer of our US private banking business. Net revenues in Investment Banking & Capital Markets increased, primarily driven by higher debt and equity underwriting revenues.

**Provision for credit losses** of CHF 53 million primarily related to a net provision for credit losses of CHF 24 million in the Strategic Resolution Unit, CHF 10 million in Swiss Universal Bank and CHF 6 million in Investment Banking & Capital Markets.

**Total operating expenses** of CHF 4,811 million decreased 34% compared to 4Q16, reflecting a 61% decrease in general and administrative expenses, primarily due to significant litigation provisions in the Strategic Resolution Unit in 4Q16 mainly related to the

settlements with the US Department of Justice and the National Credit Union Administration Board regarding our legacy residential mortgage-backed securities business. These decreases were partially offset by a CHF 88 million increase in restructuring expenses. In 1Q17, we incurred CHF 137 million of restructuring expenses in connection with the implementation of our strategy, of which CHF 129 million were related to compensation and benefits.

Total operating expenses decreased 3% compared to 1Q16, reflecting an 11% decrease in general and administrative expenses, mainly due to lower professional fees, and a 46% decrease in restructuring expenses. These decreases were partially offset by a 7% increase in compensation and benefits, mainly in the Corporate Center reflecting fair value adjustments on certain deferred compensation plans not allocated to the segments and certain deferred compensation retention awards relating to Global Markets and Investment Banking & Capital Markets intended to support the restructuring of the Group predominately through the end of 2017.

**Income tax expense** of CHF 78 million recorded in 1Q17 mainly reflected a tax charge relating to the geographical mix of results, partially offset by a tax benefit associated with the establishment of Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG and the re-assessment relating to the tax deductibility on previously taken litigation accruals. Overall, net deferred tax assets increased CHF 1,950 million to CHF 7,649 million, mainly driven by the adoption of new accounting standards relating to intra-entity asset transfer rules and share-based payments and the tax benefits noted above, partially offset by earnings and the foreign exchange impact. Deferred tax assets on net operating losses increased CHF 365 million to CHF 2,543 million during 1Q17. The Credit Suisse effective tax rate was 11.6% in 1Q17, compared to (18.8)% in 4Q16.

<sup>1</sup> Disclosed on a look-through basis.

**UPDATE TO THE COMPENSATION REPORT**

After the publication of our Annual Report 2016 on March 24, 2017 and the Compensation Report contained therein, the Chairman of the Board of Directors, Urs Rohner, and the chairman of the Compensation Committee, Jean Lanier, conducted a thorough engagement with many of our shareholders. Feedback on the Group's strategy and its execution was supportive. There were, however, some shareholders who expressed reservations regarding certain aspects of compensation.

In order to address these shareholder concerns and to ensure that the Executive Board is able to continue to focus on the successful turnaround of Credit Suisse and the implementation of our strategy, the CEO and the Executive Board proposed to the Board of Directors that both the 2016 Short-Term Incentive awards as well as the 2017 Long-Term Incentive opportunities, previously proposed to be awarded to them by the Board of Directors, be reduced by 40%. This proposal was approved by the Board of Directors.

In addition, the Board of Directors has also decided to maintain total Board of Directors compensation at the level of 2015 and 2016, with no incremental increase in 2017 as proposed in the Compensation Report.

These compensation proposals were approved at our Annual General Meeting on April 28, 2017.

**PROPOSED CAPITAL RAISE AND OTHER STRATEGY MATTERS**

The Board of Directors will propose to an Extraordinary General Meeting of shareholders to be held on May 18, 2017 a rights offering and share capital increase through the issuance of new shares to existing shareholders of Credit Suisse Group AG, if permitted under applicable local laws. Under the terms of this rights offering, Credit Suisse Group AG plans to issue up to 404,526,794 new registered shares with a par value of CHF 0.04 each. We expect the net proceeds of the rights offering to amount to approximately CHF 4 billion, excluding the issuance of any new shares resulting from the exercise of rights allotted on shares received as scrip dividend.

Through the proposed share capital increase, we intend to strengthen our capital and leverage position, to continue to implement our strategy and advance our restructuring plans, pursue attractive growth opportunities and address expected increases in regulatory capital requirements. On a pro-forma basis, based on our end-1Q17 risk-weighted assets and leverage exposure amounts including the net proceeds of the capital increase, our look-through BIS CET1 capital ratio would have been approximately 13.4% and our look-through BIS tier 1 leverage ratio would have been approximately 5.1%.

We have decided not to pursue a partial initial public offering of our Swiss banking subsidiary Credit Suisse (Schweiz) AG, thus retaining full ownership of a historically stable income stream in our home market of Switzerland and avoiding complexity in the business structure and activities of a key division of the Group.

We intend to accelerate the release of capital from our Strategic Resolution Unit and bring forward capital targets for this division by one year without incremental impact on pre-tax income. We now plan to complete the wind-down of the Strategic Resolution Unit by the end of 2018 without incremental impact to our existing targets for pre-tax losses from this division.

Further, we have decided to revise our dividend policy beginning in 2017 by discontinuing the proposal of a scrip alternative at the option of shareholders and by instead proposing to pay an all-cash dividend per share at a level similar to the cash component (as opposed to the stock component) per share of the total dividend that our shareholders elected in recent years, subject to performance and to the decision of the Board of Directors and approval of our shareholders in due course. In future years, we plan to return excess capital to our shareholders, subject to meeting our capital targets. After the anticipated changes to the Basel III capital framework have been finalized, we expect to have greater clarity on our capital requirements, but in the interim we seek to maintain a look-through BIS CET1 capital ratio of approximately 13% and look-through BIS tier 1 leverage ratio of approximately 5%.

**CORE RESULTS**

In 1Q17, Core Results net revenues of CHF 5,740 million increased 7% compared to 4Q16, primarily reflecting higher net revenues in Global Markets. Provision for credit losses was CHF 29 million, primarily reflecting net provisions of CHF 10 million in Swiss Universal Bank and CHF 6 million in Investment Banking & Capital Markets. Total operating expenses of CHF 4,502 million decreased 3% compared to 4Q16. General and administrative expenses of CHF 1,441 million decreased 12%, primarily related to decreased expenses in Swiss Universal Bank, Corporate Center, Global Markets and International Wealth Management. Compensation and benefits of CHF 2,570 million were stable compared to 4Q16, primarily due to an increase in Global Markets, partially offset by a decrease in Swiss Universal Bank. Compared to 4Q16, restructuring expenses of CHF 130 million increased 171%, primarily in Swiss Universal Bank and International Wealth Management.

Core Results net revenues increased 11% compared to 1Q16, primarily reflecting higher net revenues in Global Markets and Investment Banking & Capital Markets. Total operating expenses increased 3% compared to 1Q16. Compensation and benefits increased 13%, primarily related to increases in Corporate Center and in Investment Banking & Capital Markets and International Wealth Management, primarily due to increased discretionary compensation expenses. Total operating expenses in 1Q17 were also impacted by restructuring expenses of CHF 130 million. These increases were partially offset by a 7% decrease in general and administrative expenses, primarily related to Global Markets, reflecting reduced allocated corporate function costs, and in the Corporate Center, primarily related to costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements.

## Reconciliation of adjusted results

Adjusted results referred to in this report are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

Certain transaction-based revenues in Swiss Universal Bank and certain fixed income and equity sales and trading revenues in Asia Pacific and Global Markets relate to the Group's global advisory and underwriting business. Refer to "Global advisory and underwriting revenues" in Investment Banking & Capital Markets for further information.

<sup>1</sup> Reflects certain financing revenues in Asia Pacific that are not included in the Group's global advisory and underwriting revenues.

## EMPLOYEES AND OTHER HEADCOUNT

There were 46,640 Group employees as of the end of 1Q17, a decrease of 530 compared to 4Q16, primarily reflecting the impact of our cost efficiency initiatives and the right-sizing of business activities, especially in Swiss Universal Bank and International Wealth Management. These decreases were partially offset by an increase relating to business growth in Asia Pacific and Investment Banking & Capital Markets and an expansion in corporate functions, driven by increases relating to our compliance and regulatory function. The number of outsourced roles, contractors and consultants decreased by 230 compared to 4Q16.

### Employees and other headcount

end of	1Q17	4Q16	1Q16

<b>Other headcount</b>			
Outsourced roles, contractors and consultants	22,800	23,030	28,250
<b>Total employees and other headcount</b>	<b>69,440</b>	<b>70,200</b>	<b>76,010</b>

## REGULATORY CAPITAL

As of the end of 1Q17, our Bank for International Settlements (BIS) common equity tier 1 (CET1) ratio was 11.7% and our risk-weighted assets were CHF 263.7 billion, both on a look-through basis.

► Refer to "Capital management" in II – Treasury, risk, balance sheet and off-balance sheet for further information.

## INFORMATION AND DEVELOPMENTS

### Format of presentation

In managing our business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging

positions. For this reason, specific individual revenue categories in isolation may not be indicative of performance.

Certain reclassifications have been made to prior periods to conform to the current presentation.

### Return on regulatory capital

Credit Suisse measures firm-wide returns against total shareholders' equity and tangible shareholders' equity. In addition, it also measures the efficiency of the firm and its divisions with regard to the usage of capital as determined by the minimum requirements set by regulators. This regulatory capital is calculated as the worst of 10% of risk-weighted assets and 3.5% of the leverage exposure. Return on regulatory capital is calculated using income after tax and assumes a tax rate of 30% and capital allocated based on the worst of 10% of average risk-weighted assets and 3.5% of average leverage exposure. These percentages are used in the calculation in order to reflect the 2019 fully phased in Swiss regulatory minimum requirements for Basel III CET1 capital and leverage ratio. For Global Markets and Investment Banking & Capital Markets, return on regulatory capital is based on US dollar denominated numbers.

End of / in 1Q17 (CHF billion, except where indicated)

Shareholders' equity		41.7
Return on equity	5.7%	
Tangible shareholders' equity		36.7
Return on tangible shareholders' equity	6.5%	5.0
Regulatory capital		32.8
Return on regulatory capital	5.7%	3.9

### Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

► Refer to "Note 1 – Summary of significant accounting policies" and "Note 28 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 1Q17, 40% and 26% of our total assets and total liabilities, respectively, were measured at fair value.

The majority of our level 3 assets are recorded in our investment banking businesses. Total assets at fair value recorded as level 3 decreased CHF 3.8 billion to CHF 19.6 billion as of the end of 1Q17, primarily reflecting net sales, mainly in trading assets, net settlements, primarily in trading assets and loans, and net transfers out of level 3, mainly in trading assets.

As of the end of 1Q17, our level 3 assets comprised 2% of total assets and 6% of total assets measured at fair value compared to 3% and 7%, respectively, as of the end of 4Q16.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition; however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

#### **EVOLUTION OF LEGAL ENTITY STRUCTURE**

The execution of the program evolving the Group's legal entity structure to support the realization of our strategic objectives, increase the resilience of the Group and meet developing and future regulatory requirements has continued to progress.

- In February 2017, Credit Suisse (Schweiz) AG and Credit Suisse Asset Management International Holding Ltd (CSAM IHAG), with a participating interest of 49% and 51%, respectively, incorporated Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG (CSAM Holding), a holding company domiciled in Switzerland. CSAM Schweiz was incorporated in February 2017 and received the Swiss-related asset management business from Credit Suisse AG through a transfer of assets in accordance with the Swiss Merger Act. All transfers of participations were made at the participations' Swiss GAAP carrying value as recorded by the transferor.
- In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division, the following equity stakes held by the Group were transferred to

Credit Suisse (Schweiz) AG: (i) 100% equity stake in Neue Aargauer Bank AG, (ii) 100% equity stake in BANK-now AG, and (iii) 50% equity stake in Swisscard AECS GmbH. The transfer was completed on March 31, 2017.

► Refer to "Evolution of legal entity structure" in I – Information on the company – Strategy in the Credit Suisse Annual Report 2016 for further information.

#### **REGULATORY DEVELOPMENTS AND PROPOSALS**

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

On March 24, 2017, the Fed and the Federal Deposit Insurance Corporation released guidance for the 2018 and subsequent US resolution plans submitted by the "first wave" foreign filers, including Credit Suisse. Like the guidance issued in 2016 to "first wave" US filers, the new guidance includes additional requirements for more detailed analyses on a number of issues. However, in contrast to the regulators' evaluations of the "first wave" US filers' 2015 US resolution plans, no credibility determinations were made for "first wave" foreign filers' 2015 US resolution plans. Credit Suisse is required to file its next US resolution plan by July 1, 2018.

On March 29, 2017, the United Kingdom (UK) government submitted the formal notification under Article 50 of the Lisbon Treaty to the European Council of the intention of the UK to withdraw from the European Union (EU). Unless all EU member states agree to an extension, the deadline for the conclusion of a withdrawal agreement under Article 50 is March 29, 2019. If a withdrawal agreement is concluded, the UK will leave the EU on the date that agreement comes into force. If no withdrawal agreement is concluded, the UK will leave the EU at midnight on March 29, 2019.

On April 5, 2017, Credit Suisse Holdings (USA), Inc., our US intermediate holding company (IHC), filed its first annual capital plan with the Fed pursuant to the Fed's capital planning and IHC rules.

On April 18, 2017, the Fed approved our request for an extension of the Volcker Rule conformance period for certain of our illiquid fund holdings, extending the period of time for us to divest or conform these investments by five additional years (i.e., until July 21, 2022).

► Refer to "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2016 for further information and "Regulatory framework" and "Regulatory developments and proposals" in II – Treasury, risk, balance sheet and off-balance sheet – Liquidity and funding management and Capital management, respectively, for further information.

# Swiss Universal Bank

In 1Q17, we reported income before taxes of CHF 404 million and net revenues of CHF 1,354 million. Income before taxes was 6% higher compared to 4Q16 and 6% lower compared to 1Q16.

## RESULTS SUMMARY

Effective January 1, 2017, we commenced serving our clients through the following four dedicated business areas in order to better serve our Swiss client base: Private & Wealth Management Clients and Premium Clients within the Private Clients business (formerly Private Banking), and Corporate Clients and Institutional Clients within the Corporate & Institutional Clients business (formerly Corporate & Institutional Banking). The most significant change which arose pursuant to this modification in organizational structure related to the transfer of the external asset managers business from the former Private Banking business to the former Corporate & Institutional Banking business. Prior periods have been reclassified to conform to the current presentation.

### 1Q17 results

In 1Q17, we reported income before taxes of CHF 404 million and net revenues of CHF 1,354 million. Compared to 4Q16, net revenues were slightly lower, mainly due to gains on the sale of real estate in 4Q16, slightly lower net interest income and lower recurring commissions and fees, partially offset by higher transaction-based revenues. Total operating expenses were 4% lower

compared to 4Q16, primarily reflecting lower general and administrative expenses and lower compensation and benefits partially offset by higher restructuring expenses.

Compared to 1Q16, net revenues were stable, with slightly lower transaction-based revenues offset by higher recurring commissions and fees. Total operating expenses increased slightly compared to 1Q16, reflecting higher general and administrative expenses and restructuring expenses, partially offset by lower compensation and benefits.

Adjusted income before taxes of CHF 483 million was 28% higher compared to 4Q16 and slightly higher compared to 1Q16.

### Capital and leverage metrics

As of the end of 1Q17, we reported risk-weighted assets of CHF 65.6 billion, stable compared to the end of 4Q16. An increase from methodology and policy changes reflecting the phase-in of the Swiss mortgage multipliers was offset by lower risk levels and a foreign exchange impact. Leverage exposure was CHF 257.4 billion, reflecting an increase of CHF 4.5 billion compared to the end of 4Q16, driven by increased high-quality liquid assets (HQLA).

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction-based income. Other revenues include fair value gains/(losses) on synthetic securitized loan portfolios and other gains and losses.

## PRIVATE CLIENTS

## RESULTS

Income before taxes of CHF 161 million was 7% lower compared to 4Q16, primarily reflecting decreased net revenues, partially offset by lower total operating expenses. Compared to 1Q16, income before taxes was 5% lower, primarily reflecting slightly lower net revenues, partially offset by slightly lower total operating expenses. Adjusted income before taxes of CHF 208 million increased 39% compared to 4Q16 and was stable compared to 1Q16.

## Net revenues

Compared to 4Q16, net revenues of CHF 711 million were 5% lower, primarily due to gains on the sale of real estate of CHF 20 million in 4Q16 reflected in other revenues and lower recurring commissions and fees. Recurring commissions and fees of CHF 197 million were 9% lower, reflecting lower discretionary mandate management fees, partially offset by higher investment product management fees and banking services fees. Transaction-based revenues of CHF 100 million were 8% higher, driven by higher revenues from trading services and increased brokerage and product issuing fees. Net interest income of CHF 413 million

was slightly lower with stable loan margins and higher deposit margins on stable average loan and deposit volumes.

Compared to 1Q16, net revenues decreased slightly, primarily reflecting slightly lower net interest income and lower transaction-based revenues. Net interest income was slightly lower with slightly higher loan margins and higher deposit margins on slightly higher average loan and deposit volumes. Transaction-based revenues were 7% lower primarily due to lower fees from foreign exchange client business and decreased revenues from trading services, which were mainly foreign exchange-related. Recurring commissions and fees were stable.

## Provision for credit losses

The Private Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities and, to a lesser extent, consumer finance loans.

In 1Q17, Private Clients recorded provision for credit losses of CHF 12 million compared to CHF 10 million in 4Q16 and CHF 9 million in 1Q16. The provision was primarily related to our consumer finance business.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

**Total operating expenses**

Compared to 4Q16, total operating expenses of CHF 538 million decreased 5%, primarily reflecting lower general and administrative expenses and decreased compensation and benefits, partially offset by higher restructuring expenses. General and administrative expenses of CHF 203 million decreased 19%, primarily due to lower advertising and marketing expenses, lower professional services fees and decreased allocated corporate function costs. Compensation and benefits of CHF 242 million were 15% lower, primarily reflecting lower pension expenses, lower salary expenses due to a release of Swiss holiday accruals in 1Q17 as well as lower social security costs and discretionary compensation expenses, partially offset by higher allocated corporate function costs. Restructuring expenses increased CHF 50 million to CHF 47 million. Adjusted total operating expenses of CHF 491 million were 14% lower compared to 4Q16.

Compared to 1Q16, total operating expenses were slightly lower, despite investments in regulatory and compliance functions, primarily reflecting lower compensation and benefits, partially offset by higher commission expenses and restructuring expenses in 1Q17. Compensation and benefits were 14% lower, primarily reflecting lower salary expenses and decreased allocated corporate function costs. General and administrative expenses were slightly lower, primarily reflecting decreased professional services fees. Adjusted total operating expenses were 4% lower compared to 1Q16.

**MARGINS****Gross margin**

Our gross margin was 146 basis points in 1Q17, ten basis points lower compared to 4Q16, mainly driven by lower recurring commissions and fees and gains on the sale of real estate in 4Q16 on slightly higher average assets under management. Compared to 1Q16, our gross margin was nine basis points lower, primarily due to slightly lower net interest income and lower transaction-based revenues on 4.0% higher average assets under management.

► Refer to "Assets under management" for further information.

**Net margin**

Our net margin was 33 basis points in 1Q17, three basis points lower compared to 4Q16, mainly due to lower net revenues on slightly higher average assets under management, partially offset by lower total operating expenses. Compared to 1Q16, our net margin was three basis points lower, primarily reflecting slightly lower net revenues on the 4.0% higher average assets under management, partially offset by slightly lower total operating expenses. On the basis of adjusted income before taxes, our net margin was 43 basis points in 1Q17, twelve basis points higher compared to 4Q16 and one basis point lower compared to 1Q16.

**ASSETS UNDER MANAGEMENT**

As of the end of 1Q17, assets under management of CHF 198.2 billion were CHF 6.0 billion higher compared to the end of 4Q16, mainly driven by favorable market movements and net new assets of CHF 2.0 billion. Net new assets reflected positive contributions from all businesses.

## CORPORATE &amp; INSTITUTIONAL CLIENTS

## RESULTS

Income before taxes of CHF 243 million increased 16% compared to 4Q16, primarily due to higher provision for credit losses in 4Q16 and lower total operating expenses in 1Q17. Compared to 1Q16, income before taxes was 7% lower, reflecting higher total operating expenses, partially offset by slightly higher net revenues. Adjusted income before taxes of CHF 275 million increased 21% compared to 4Q16 and was slightly higher compared to 1Q16.

## Net revenues

Compared to 4Q16, net revenues of CHF 643 million were stable with slightly lower net interest income, offset by slightly higher transaction-based revenues and recurring commissions and fees. Net interest income of CHF 313 million decreased slightly, with stable loan margins on stable average loan volumes and lower deposit margins on slightly lower average deposit volumes. Recurring commissions and fees of CHF 165 million were slightly higher,

mainly due to increased fees from lending activities, partially offset by lower discretionary mandate management fees. Transaction-based revenues of CHF 180 million were slightly higher, mainly due to higher revenues from trading services, including a revaluation gain on an equity investment of CHF 6 million, partially offset by lower revenues from our Swiss investment banking business and lower corporate advisory fees.

Compared to 1Q16, net revenues were slightly higher, driven by increased recurring commissions and fees and higher revenues from our Swiss investment banking business, partially offset by lower revenues from trading services. Recurring commissions and fees were 11% higher, driven by higher fees from lending activities and higher security account and custody services fees, partially offset by lower discretionary mandate management fees. Net interest income and transaction-based revenues were stable compared to 1Q16.

### Provision for credit losses

The Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

In 1Q17, Corporate & Institutional Clients recorded a release of provision for credit losses of CHF 2 million compared to provision for credit losses of CHF 24 million in 4Q16 and a release of provision for credit losses of CHF 3 million in 1Q16.

### Total operating expenses

Compared to 4Q16, total operating expenses of CHF 402 million were 4% lower, primarily reflecting lower general and administrative expenses. General and administrative expenses of CHF 153 million decreased 8%, primarily due to lower allocated corporate function costs and lower professional services fees. Compensation and benefits of CHF 210 million were stable. Adjusted total operating expenses of CHF 370 million were 7% lower compared to 4Q16.

Compared to 1Q16, total operating expenses were 9% higher, mainly driven by higher general and administrative expenses and higher compensation and benefits, partially offset by lower commission expenses. General and administrative expenses increased 24%, primarily due to higher litigation provisions. Compensation and benefits increased 7% mainly due to higher allocated corporate function costs, higher salary expenses and higher discretionary compensation expenses. Adjusted total operating expenses were slightly higher compared to 1Q16.

### ASSETS UNDER MANAGEMENT

As of the end of 1Q17, assets under management of CHF 348.9 billion were CHF 9.6 billion higher compared to the end of 4Q16, primarily driven by favorable market movements. Net asset inflows were offset by outflows related to terminated relationships with certain external asset managers.

# International Wealth Management

In 1Q17, we reported income before taxes of CHF 291 million and net revenues of CHF 1,221 million. Income before taxes was 12% and 3% lower compared to 4Q16 and 1Q16, respectively.

## RESULTS SUMMARY

### 1Q17 results

In 1Q17, we reported income before taxes of CHF 291 million and net revenues of CHF 1,221 million. Compared to 4Q16, net revenues decreased 6% due to lower other revenues, lower transaction- and performance-based revenues and slightly lower net interest income, partially offset by higher recurring commissions and fees. Other revenues in 4Q16 included a gain on the sale of real estate of CHF 54 million, reflected in Private Banking, while transaction- and performance-based revenues in 4Q16 included year-end performance fees in Asset Management. Provision for credit losses was CHF 2 million compared to CHF 6 million in 4Q16. Total operating expenses were 4% lower compared to 4Q16, mainly driven by lower general and administrative expenses and slightly lower compensation and benefits, partially offset by higher restructuring expenses.

Compared to 1Q16, net revenues increased 4% reflecting higher recurring commissions and fees, higher other revenues

and higher net interest income. This increase was partially offset by lower transaction- and performance-based revenues as 1Q16 included a residual gain from a private equity interest in Asset Management. Provision for credit losses was CHF 2 million compared to a release of CHF 2 million in 1Q16. Total operating expenses were 6% higher with higher compensation and benefits and higher restructuring expenses, partially offset by lower general and administrative expenses.

Adjusted income before taxes of CHF 327 million increased 9% and 6% compared to 4Q16 and 1Q16, respectively.

### Capital and leverage metrics

As of the end of 1Q17, we reported risk-weighted assets of CHF 35.8 billion, an increase of CHF 0.5 billion compared to the end of 4Q16. Leverage exposure of CHF 93.6 billion was stable compared to the end of 4Q16.

## PRIVATE BANKING

### RESULTS

Income before taxes of CHF 239 million increased 5% compared to 4Q16, reflecting lower total operating expenses, partially offset by lower net revenues. Compared to 1Q16, income before taxes increased slightly mainly driven by higher net revenues, partially offset by slightly higher total operating expenses. Adjusted income before taxes of CHF 262 million increased 36% and 8% compared to 4Q16 and 1Q16, respectively.

#### Net revenues

Compared to 4Q16, net revenues of CHF 883 million were 4% lower, with significantly lower other revenues and slightly lower net interest income, partially offset by higher transaction- and performance-based revenues and higher recurring commissions and fees. Other revenues of CHF 1 million decreased CHF 52 million, mainly driven by the gain on the sale of real estate of CHF 54 million in 4Q16. Net interest income of CHF 342 million decreased slightly with stable deposit margins and higher loan margins on stable average deposit and loan volumes. Transaction- and

performance-based revenues of CHF 250 million increased 6%, mainly driven by higher revenues from trading services, including a revaluation gain on an equity investment of CHF 13 million, and higher brokerage and product issuing fees, partially offset by lower performance fees. Recurring commissions and fees of CHF 290 million were 5% higher, mainly due to higher banking services fees, higher security account and custody services fees and higher investment product management fees.

Compared to 1Q16, net revenues increased 4%, with higher net interest income and higher recurring commissions and fees, partially offset by slightly lower transaction- and performance-based revenues. Net interest income increased 5%, primarily reflecting higher loan and deposit margins on higher average loan and deposit volumes. Recurring commissions and fees increased 5%, mainly due to higher investment product management fees and higher security account and custody services fees. Transaction- and performance-based revenues decreased slightly, driven by lower revenues from trading services, partially offset by higher brokerage and product issuing fees.

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction- and performance-based income.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

**Provision for credit losses**

In 1Q17, provision for credit losses was CHF 2 million, compared to provision for credit losses of CHF 6 million in 4Q16 and a release of provision for credit losses of CHF 2 million in 1Q16.

**Total operating expenses**

Compared to 4Q16, total operating expenses of CHF 642 million decreased 6%, mainly due to lower general and administrative expenses, partially offset by higher restructuring expenses. General and administrative expenses of CHF 197 million decreased 19%, mainly reflecting lower litigation provisions, lower allocated corporate function costs and lower professional services fees. Restructuring expenses of CHF 23 million increased CHF 12 million, reflecting efficiency measures including targeted headcount reductions completed in 1Q17. Compensation and benefits of CHF 381 million were stable. Adjusted total operating expenses of CHF 619 million were 7% lower compared to 4Q16.

Compared to 1Q16, total operating expenses increased slightly, mainly driven by higher compensation and benefits and higher restructuring expenses, partially offset by lower general and administrative expenses. Compensation and benefits increased 9%, mainly due to higher discretionary compensation expenses. Restructuring expenses increased CHF 13 million reflecting efficiency measures including targeted headcount reductions completed in 1Q17. General and administrative expenses decreased 11%, primarily reflecting lower litigation provisions, lower contractor services fees and lower allocated corporate function costs. Adjusted total operating expenses were stable compared to 1Q16.

**MARGINS****Gross margin**

Our gross margin was 108 basis points in 1Q17, a decline of eight basis points compared to 4Q16, primarily driven by lower other revenues reflecting the gain on the sale of real estate in 4Q16, a 3.5% increase in average assets under management and slightly lower net interest income, partially offset by higher transaction- and performance-based revenues and higher recurring commissions and fees. Our gross margin was eleven basis points lower compared to 1Q16, mainly reflecting a 13.8% increase in average assets under management, partially offset by higher net interest income and higher recurring commissions and fees. On the basis of adjusted net revenues, our gross margin was 108 basis points in 1Q17, one basis point lower compared to 4Q16 and eleven basis points lower compared to 1Q16.

► Refer to "Assets under management" for further information.

**Net margin**

Our net margin of 29 basis points in 1Q17 was stable compared to 4Q16, reflecting lower total operating expenses, offset by lower net revenues and the 3.5% increase in average assets under management. Our net margin was three basis points lower compared to 1Q16, reflecting the 13.8% increase in average assets under management and slightly higher total operating expenses, partially offset by higher net revenues. On the basis of adjusted income before taxes, our net margin was 32 basis points in 1Q17, eight basis points higher compared to 4Q16 and two basis points lower compared to 1Q16.

## ASSETS UNDER MANAGEMENT

As of the end of 1Q17, assets under management of CHF 336.2 billion were CHF 13.0 billion higher compared to the end of 4Q16, reflecting favorable market movements and net new assets of CHF 4.7 billion, partially offset by unfavorable foreign exchange-related movements. The net new assets reflected solid inflows from emerging markets and Europe, both at a 6% annualized growth rate.

Management fees include fees on assets under management, asset administration revenues and transaction fees related to the acquisition and disposal of investments in the funds being managed. Performance revenues relate to the performance or return of the funds being managed and includes investment-related gains and losses from proprietary funds. Placement revenues arise from our third-party private equity fundraising activities and secondary private equity market advisory services. Investment and partnership income includes equity participation income from seed capital returns and from minority investments in third-party asset managers, income from strategic partnerships and distribution agreements, and other revenues.

## RESULTS

Income before taxes of CHF 52 million decreased 50% compared to 4Q16, driven by lower net revenues and slightly higher total operating expenses. Income before taxes decreased 22% compared to 1Q16, driven by higher total operating expenses, partially offset by higher net revenues. Adjusted income before taxes of CHF 65 million decreased 40% compared to 4Q16 and was stable compared to 1Q16.

## Net revenues

Compared to 4Q16, net revenues of CHF 338 million decreased 11%, mainly driven by significantly lower performance and placement revenues, partially offset by higher management fees. Performance and placement revenues decreased CHF 66 million to CHF 42 million mainly due to year-end performance fees in 4Q16, lower placement fees and lower investment-related gains. Investment and partnership income decreased CHF 3 million to CHF 42 million. Management fees of CHF 254 million increased 11%, reflecting higher average assets under management.

Compared to 1Q16, net revenues increased 6%, mainly due to higher management fees and higher performance and placement

revenues, partially offset by lower investment and partnership income. Management fees increased 13% reflecting higher average assets under management. Performance and placement revenues increased CHF 25 million, mainly driven by higher placement fees and higher performance fees. Investment and partnership income decreased 46%, mainly as 1Q16 included a residual gain from a private equity interest of CHF 45 million.

## Total operating expenses

Compared to 4Q16, total operating expenses of CHF 286 million increased slightly, mainly due to higher general and administrative expenses and higher restructuring expenses, partially offset by lower compensation and benefits. General and administrative expenses of CHF 85 million increased 12%, mainly due to higher allocated corporate function costs. Restructuring expenses of CHF 13 million increased CHF 8 million, reflecting efficiency measures including targeted headcount reductions completed in 1Q17. Compensation and benefits of CHF 175 million decreased 4% mainly from lower deferred compensation expenses from prior-year awards. Adjusted total operating expenses of CHF 273 million were stable compared to 4Q16.

Compared to 1Q16, total operating expenses increased 13%, reflecting higher compensation and benefits and higher restructuring expenses. Compensation and benefits were 15% higher, mainly driven by higher discretionary compensation expenses and higher salary expenses, partially offset by lower deferred compensation expenses from prior-year awards. Restructuring expenses were CHF 15 million higher, reflecting efficiency measures including targeted headcount reductions completed in 1Q17. Adjusted total operating expenses were 7% higher compared to 1Q16.

#### ASSETS UNDER MANAGEMENT

As of the end of 1Q17, assets under management of CHF 367.1 billion were CHF 45.5 billion higher compared to the end of 4Q16, reflecting a structural effect from assets under management reported for multi-asset class solutions, net new assets of CHF 15.0 billion and favorable market movements, partially offset by unfavorable foreign exchange-related movements. Net new assets reflected inflows of CHF 6.2 billion in traditional and alternative investments, also reflecting collaboration with Credit Suisse's global wealth management business, and CHF 8.8 billion from emerging market joint ventures.

# Asia Pacific

In 1Q17, we reported income before taxes of CHF 147 million and net revenues of CHF 881 million. Income before taxes increased 43% compared to 4Q16 and decreased 44% compared to 1Q16.

## RESULTS SUMMARY

In 1Q17, we implemented a change to the financial reporting for our Asia Pacific division. Our wealth management, financing and underwriting and advisory teams are working more closely together to deliver integrated advisory services and solutions to our target ultra-high-net-worth, entrepreneur and corporate clients. Our new Wealth Management & Connected business now combines our activities in wealth management (our Private Banking business) with our financing, underwriting and advisory activities (formerly part of the Investment Banking business) for this important client group. Our new Markets business (formerly part of the Investment Banking business) represents our existing equities and fixed income trading business in Asia Pacific, which continues to support our wealth management activities, but also deals extensively with a broader range of institutional clients. Prior periods have been reclassified to conform to the current presentation.

### 1Q17 results

In 1Q17, we reported income before taxes of CHF 147 million and net revenues of CHF 881 million. Compared to 4Q16, net revenues increased slightly, driven by the Wealth Management & Connected business, as higher revenues from the ultra-high-net-worth

and high-net-worth individual client business in Private Banking were partially offset by lower advisory, underwriting and financing revenues. Net revenues from the Markets business decreased due to lower equity sales and trading revenues, partially offset by higher fixed income sales and trading revenues. Provision for credit losses was CHF 4 million in 1Q17, compared to a provision of CHF 11 million in 4Q16. Total operating expenses of CHF 730 million decreased slightly, primarily due to lower commission expenses.

Compared to 1Q16, net revenues decreased slightly, driven by significantly lower revenues in the Markets business, mainly due to lower fixed income and equity sales and trading revenues, partially offset by the Wealth Management & Connected business, reflecting higher Private Banking revenues and higher advisory, underwriting and financing revenues. Total operating expenses increased 10%, primarily from higher general and administrative expenses, increased compensation and benefits driven by growth-related higher headcount, including in risk and compliance functions, and higher restructuring expenses reflecting ongoing cost management initiatives.

Adjusted income before taxes of CHF 166 million increased 36% compared to 4Q16 and decreased 37% compared to 1Q16.

## Capital and leverage metrics

At the end of 1Q17, we reported risk-weighted assets of CHF 33.1 billion, a decrease of CHF 1.5 billion compared to the end of 4Q16, mainly reflecting lower risk levels, primarily from market risk,

and a foreign exchange impact, partially offset by increases from methodology changes. Leverage exposure was CHF 106.5 billion, reflecting a decrease of CHF 2.5 billion compared to the end of 4Q16, mainly reflecting the foreign exchange impact.

## WEALTH MANAGEMENT &amp; CONNECTED

## RESULTS

Income before taxes of CHF 201 million increased 24% compared to 4Q16, primarily reflecting higher net revenues, lower provision for credit losses and lower total operating expenses. Higher net revenues reflected increased Private Banking revenues, partially offset by lower advisory, underwriting and financing revenues. Compared to 1Q16, income before taxes increased 65%, primarily from higher net revenues across both Private Banking and advisory, underwriting and financing, partially offset by higher total operating expenses and higher provision for credit losses. Adjusted income before taxes of CHF 205 million increased 23% compared to 4Q16 and 67% compared to 1Q16.

## Net revenues

Net revenues of CHF 589 million increased 5% compared to 4Q16, mainly driven by increased transaction-based revenues, partially offset by lower recurring commissions and fees and lower

advisory, underwriting and financing revenues. Transaction-based revenues increased 43% to CHF 163 million, mainly due to higher brokerage and product issuing fees. Recurring commissions and fees decreased 12% to CHF 81 million, primarily due to lower other commissions and fees reflecting the absence of the positive impact of an adjustment relating to treasury allocations of CHF 19 million in 4Q16, partially offset by higher wealth structuring solutions fees. Advisory, underwriting and financing revenues decreased 5% to CHF 178 million, due to lower financing revenues and lower fees from equity underwriting reflecting a decline in client activity with regard to IPOs, partially offset by an increase in fees from debt underwriting and M&A transactions. The lower financing revenues included a positive net fair value impact of CHF 29 million in 1Q17, compared to CHF 75 million in 4Q16, from an impaired loan portfolio in recovery management. Net interest income was stable at CHF 168 million.

<sup>1</sup> Net revenues divided by average assets under management.

<sup>2</sup> Income before taxes divided by average assets under management.

Compared to 1Q16, net revenues increased 44%, mainly driven by higher advisory, underwriting and financing revenues, increased transaction-based revenues and higher net interest income. Advisory, underwriting and financing revenues increased 100% due to higher financing revenues including the positive net fair value impact from the impaired loan portfolio in recovery management, higher advisory fees from M&A transactions and higher debt underwriting revenues. Transaction-based revenues increased 27%, primarily reflecting higher brokerage and product issuing fees and higher corporate advisory fees arising from integrated solutions. Net interest income increased 25% reflecting higher deposit margins on higher average deposit volumes and lower loan margins on higher average loans volumes. Other revenues increased CHF 15 million as 1Q16 included a reversal of gains on credit hedges that was offset by a corresponding release of provision for credit losses. Recurring commissions and fees increased 11%, mainly due to higher investment product management and wealth structuring solutions fees.

#### Provision for credit losses

The Wealth Management & Connected loan portfolio primarily comprises Private Banking lombard loans, mainly backed by listed securities, and secured and unsecured loans to corporates.

In 1Q17, Wealth Management & Connected recorded a provision for credit losses of CHF 4 million, compared to a provision for credit losses of CHF 11 million in 4Q16 and a release of provision for credit losses of CHF 19 million in 1Q16.

#### Total operating expenses

Total operating expenses were stable at CHF 384 million compared to 4Q16, mainly reflecting lower general and administrative expenses, partially offset by slightly higher compensation and benefits. General and administrative expenses decreased 7% to CHF 99 million, mainly due to lower expenses for product development and support and IT infrastructure, and lower professional services fees. Compensation and benefits increased slightly to CHF 267 million, primarily driven by higher deferred compensation expenses from prior-year awards and higher discretionary compensation expenses, partially offset by lower salary expenses.

Compared to 1Q16, total operating expenses increased 26%, mainly reflecting higher compensation and benefits and higher general and administrative expenses. Compensation and benefits increased 27%, primarily driven by higher salary expenses and higher discretionary compensation expenses reflecting growth-related higher headcount. General and administrative expenses increased 19%, mainly due to higher allocated corporate function costs, primarily for risk management and compliance support.

#### MARGINS

Margin calculations are aligned with the performance metrics of our Private Banking business and its related assets under management within the Wealth Management & Connected business.

#### Gross margin

Our Private Banking gross margin was 96 basis points in 1Q17, nine basis points higher compared to 4Q16, mainly reflecting higher transaction-based revenues. Compared to 1Q16, our gross margin was ten basis points higher, mainly reflecting higher transaction-based revenues and higher net interest income, partially offset by a 15.3% increase in average assets under management.

► Refer to "Assets under management" for further information.

#### Net margin

Our Private Banking net margin was 33 basis points in 1Q17, eleven basis points higher compared to 4Q16, mainly reflecting higher transaction-based revenues. Compared to 1Q16, our net margin was one basis point higher, mainly reflecting higher net revenues, partially offset by higher total operating expenses and higher provision for credit losses.

#### ASSETS UNDER MANAGEMENT

Assets under management and net new assets relate to our Private Banking business within the Wealth Management & Connected business. As of the end of 1Q17, assets under management of CHF 177.4 billion were CHF 10.5 billion higher compared to the end of 4Q16, mainly reflecting favorable market movements and net new assets of CHF 5.3 billion. Net new assets reflected inflows primarily from Greater China, South East Asia and Japan.

## MARKETS

## RESULTS

Loss before taxes of CHF 54 million in 1Q17 decreased 8% compared to the loss before taxes of CHF 59 million in 4Q16, mainly due to lower total operating expenses, partially offset by lower net revenues. The loss before taxes in 1Q17 compared to income before taxes of CHF 142 million in 1Q16. The related decrease of CHF 196 million primarily reflected lower net revenues, partially offset by lower total operating expenses. Adjusted loss before taxes of CHF 39 million in 1Q17 compared to adjusted loss before taxes of CHF 45 million in 4Q16 and adjusted income before taxes of CHF 142 million in 1Q16.

## Net revenues

Net revenues of CHF 292 million decreased slightly compared to 4Q16, reflecting lower equity sales and trading revenues, partially offset by higher fixed income sales and trading revenues. Equity sales and trading revenues decreased 13% to CHF 234 million,

mainly due to lower revenues from prime services and challenging operating conditions in systematic market making. The transition of this business to International Wealth Management was completed in 1Q17. Fixed income sales and trading revenues increased 81% to CHF 58 million, mainly due to higher revenues from emerging markets rates products and credit products, partially offset by lower revenues from foreign exchange products.

Compared to 1Q16, net revenues decreased 41%, due to lower fixed income and equity sales and trading revenues. Fixed income sales and trading revenues decreased 74%, mainly driven by lower revenues from developed markets rates products and foreign exchange products reflecting lower client activity, partially offset by higher revenues from credit products. Equity sales and trading revenues decreased 16%, mainly due to lower revenues from equity derivatives, primarily driven by reduced market volatility in China and emerging markets, partially offset by reduced losses from systematic market making.

### Total operating expenses

Total operating expenses of CHF 346 million decreased 4% compared to 4Q16, mainly due to lower commission expenses and lower compensation and benefits, partially offset by higher general and administrative expenses. Commission expenses decreased 22% to CHF 53 million, primarily reflecting the transition of the systematic market making business to the Asset Management business in International Wealth Management and the absence of the adjustment relating to commission expenses charged by Global Markets in 4Q16. Compensation and benefits decreased 6% to CHF 157 million, primarily driven by lower deferred compensation expenses from prior-year awards and lower salary expenses. General and administrative expenses increased 8% to CHF 121 million, mainly due to higher marketing expenses and professional services fees. Adjusted total operating expenses of CHF 331 million decreased 5% compared to 4Q16.

Compared to 1Q16, total operating expenses decreased 4%, mainly reflecting lower compensation and benefits, partially offset by restructuring expenses in 1Q17, reflecting ongoing cost management initiatives, and higher general and administrative expenses. Compensation and benefits decreased 19%, primarily driven by lower deferred compensation expenses from prior-year awards and lower salary expenses. Commission expenses decreased 10%, primarily reflecting the transition of the systematic market making business to the Asset Management business in International Wealth Management. General and administrative expenses increased 13%, mainly due to higher prime services expenses and marketing expenses. Adjusted total operating expenses decreased 8% compared to 1Q16.

# Global Markets

In 1Q17, Global Markets reported income before taxes of CHF 317 million and net revenues of CHF 1,609 million. Net revenues increased 27% compared to 4Q16, reflecting a seasonal increase in client activity.

## RESULTS SUMMARY

### 1Q17 results

In 1Q17, we reported income before taxes of CHF 317 million and net revenues of CHF 1,609 million. Compared to 4Q16, net revenues increased 27%, reflecting a 50% increase in credit revenues, a 4% increase in equities revenues and stable solutions revenues. Compared to a weak 1Q16, net revenues increased 29%, reflecting more favorable market conditions, particularly in our credit businesses which increased 135%. This increase was partially offset by lower equities revenues which declined 13% and solutions revenues which decreased 24%.

Total operating expenses of CHF 1,287 million increased slightly compared to 4Q16, as higher discretionary compensation expenses were mostly offset by lower allocated corporate function costs. Compared to 1Q16, total operating expenses decreased

9%, reflecting lower restructuring costs of CHF 20 million incurred in 1Q17 and reduced allocated corporate function costs. We delivered a substantial improvement in profitability with an adjusted income before taxes of CHF 337 million in 1Q17, compared to an adjusted income before taxes of CHF 20 million in 4Q16 and an adjusted loss before taxes of CHF 98 million in 1Q16.

### Capital and leverage metrics

As of the end of 1Q17, we reported risk-weighted assets of USD 52.0 billion, reflecting an increase of USD 1.5 billion compared to the end of 4Q16. Leverage exposure was USD 287.2 billion, reflecting an increase of USD 9.4 billion compared to the end of 4Q16. Both risk weighted assets and leverage exposure increased compared to 4Q16 due to a seasonal increase in client activity.

## RESULTS

## Equities

In 1Q17, equities revenues of CHF 463 million increased 4% compared to 4Q16, reflecting a seasonal increase in client activity. Cash equities revenues increased driven by significantly higher industry-wide equities underwriting activity as well as improved trading results across regions. Prime services revenues increased, reflecting growth in client balances and higher commissions in listed derivatives.

Compared to 1Q16, equities revenues declined 13%, primarily due to challenging operating conditions in systematic market making and the transition of the business to International Wealth Management in 1Q17. This was partially offset by significantly increased equities underwriting revenues as more favorable market conditions, particularly low levels of volatility, led to higher initial public offering (IPO) and follow-on activity. Cash trading revenues

were higher, particularly in Latin America, despite an overall challenging market environment, characterized by low volumes and volatility across Europe, Middle East and Africa and the US. We also had resilient, albeit slightly lower prime services revenues, as reduced client activity in line with lower volumes was offset by growth in client balances.

## Credit

In 1Q17, credit revenues of CHF 918 million increased 50% compared to 4Q16, reflecting a seasonal increase in client activity and favorable market conditions. Securitized products revenues increased across all products reflecting higher trading volumes, particularly in our non-agency and agency businesses. Global credit products revenues increased, reflecting improved leveraged finance and investment grade industry-wide issuance which resulted in higher trading revenues.

Compared to 1Q16, credit revenues increased 135%, reflecting more favorable market conditions, notably improved credit asset prices and lower volatility, which supported increased client activity. In 1Q16, results reflected reduced levels of client activity related to challenging credit market conditions, which adversely impacted our securitized products and global credit products franchises. Securitized products trading revenues increased significantly, reflecting a marked improvement in non-agency and agency trading results. This compares to subdued 1Q16 results, which were negatively impacted by mark-to-market losses in certain collateralized loan obligations (CLO) and non-agency and agency commercial mortgage-backed securities (CMBS). Global credit products revenues increased significantly, albeit from subdued levels, primarily reflecting a substantial rebound in leveraged finance industry-wide issuance activity, particularly in the Americas, which led to higher trading revenues. In addition, corporate lending revenues rebounded compared to weak 1Q16 results, which included mark-to-market losses related to lower oil prices.

### **Solutions**

In 1Q17, solutions revenues of CHF 262 million were stable compared to 4Q16, as improved global macro products and emerging markets revenues were offset by lower equity derivatives revenues. Global macro products revenues increased, reflecting higher rates and foreign exchange results. We also had higher emerging markets revenues driven by an increase in structured products revenues. These gains were offset by lower equity derivatives results as low levels of volatility led to reduced client activity.

Compared to 1Q16, solutions revenues decreased 24%, as reduced client activity in equity derivatives and global macro products more than offset a rebound in emerging markets revenues. Global macro products revenues declined compared to strong 1Q16 performance, primarily due to our reduced issuance of

structured notes. In addition, equity derivatives revenues declined as reduced client activity in corporate and flow derivatives offset improved structured derivatives and convertibles performance. These declines were partially offset by a substantial increase in emerging markets revenues, albeit from subdued 1Q16 levels, reflecting higher trading activity in Brazil and improved financing revenues.

### **Provision for credit losses**

Global markets recorded a provision for credit losses of CHF 5 million in 1Q17. This compares to a release of provision of CHF 4 million in 4Q16 and a provision for credit losses of CHF 23 million in 1Q16.

### **Total operating expenses**

In 1Q17, total operating expenses of CHF 1,287 million were slightly higher compared to 4Q16, as higher compensation and benefits expenses were partially offset by lower general and administrative expenses. The increase in compensation and benefits was primarily driven by higher discretionary compensation expenses, partially offset by lower salary expenses. The decrease in general and administrative expenses was primarily driven by reduced allocated corporate function costs.

Compared to 1Q16, total operating expenses decreased 9%, reflecting lower restructuring costs of CHF 20 million incurred in 1Q17 and reduced general and administrative expenses, partially offset by increased compensation and benefits. General and administrative expenses declined due to reduced allocated corporate function costs. The increase in compensation and benefits was primarily due to higher discretionary compensation expenses, partially offset by both lower deferred compensation expenses from prior-year awards and salary expenses. Adjusted total operating expenses decreased 4%.

# Investment Banking & Capital Markets

In 1Q17, Investment Banking & Capital Markets reported income before taxes of CHF 149 million and net revenues of CHF 606 million. Net revenues increased 56% compared to 1Q16, outperforming the industry-wide fee pool which was up 25%.

## RESULTS SUMMARY

### 1Q17 results

In 1Q17, we reported income before taxes of CHF 149 million, stable compared to 4Q16. Net revenues of CHF 606 million increased 6% compared to 4Q16, due to higher revenues from underwriting and improved performance from our corporate lending portfolio, partially offset by lower revenues from advisory and other fees. Compared to 4Q16, debt underwriting revenues increased 28%, equity underwriting revenues increased 4% and revenues from advisory and other fees decreased 19%. Total operating expenses of CHF 451 million increased 6%, driven by higher compensation and benefits and restructuring expenses.

Compared to 1Q16, our reported income before taxes increased significantly to CHF 149 million in 1Q17, driven by

higher revenues and lower restructuring expenses. Net revenues increased 56%, primarily driven by higher debt and equity underwriting revenues. Debt underwriting revenues increased 64% and equity underwriting revenues increased 134%, while revenues from advisory and other fees decreased 5%.

### Capital and leverage metrics

As of the end of 1Q17, risk-weighted assets were USD 18.6 billion, an increase of USD 1.0 billion compared to the end of 4Q16. The increase was driven primarily by regulatory methodology changes and modest growth in the Corporate Bank. Leverage exposure was USD 44.0 billion, a decrease of USD 0.6 billion compared to the end of 4Q16, driven by a reduction in HQLA.

## RESULTS

### Advisory and other fees

In 1Q17, revenues from advisory and other fees of CHF 218 million decreased 19% compared to 4Q16, reflecting lower revenues from completed M&A transactions.

Revenues decreased 5% compared to 1Q16, slightly more than the industry-wide decline in the overall M&A fee pool.

### Debt underwriting

In 1Q17, debt underwriting revenues of CHF 291 million increased 28% compared to 4Q16, driven by higher leveraged finance and investment grade underwriting revenues, partially offset by lower derivatives financing revenues.

Compared to 1Q16, revenues increased 64%, driven by higher leveraged finance and investment grade underwriting revenues, partially offset by lower derivatives financing revenues.

### Equity underwriting

In 1Q17, revenues from equity underwriting of CHF 103 million increased 4% compared to 4Q16, primarily driven by higher revenues from rights offerings.

Compared to 1Q16, revenues increased 134%, primarily driven by higher revenues from IPOs and follow-on offerings.

### Provision for credit losses

In 1Q17, we recorded a provision for credit losses of CHF 6 million. There was no provision for credit losses recorded in 4Q16, while in 1Q16 we recorded a provision for credit losses of CHF 29 million, primarily relating to the energy sector.

**Total operating expenses**

Total operating expenses of CHF 451 million increased 6% compared to 4Q16, driven by higher compensation and benefits and restructuring expenses. Compensation and benefits of CHF 348 million increased 6%, reflecting higher deferred compensation, partially offset by a lower discretionary compensation accrual. General and administrative expenses of CHF 101 million remained stable.

Compared to 1Q16, total operating expenses increased 7%, driven by an increase in compensation and benefits primarily due to an increased discretionary compensation accrual in line with the improvement in business performance, partially offset by lower restructuring expenses.

**Global advisory and underwriting revenues**

The Group's global advisory and underwriting business operates across multiple business divisions that work in close collaboration with each other to generate these revenues. In order to reflect the global performance and capabilities of this business and for enhanced comparability versus its peers, the following table aggregates total advisory and underwriting revenues for the Group into a single metric in US dollar terms before cross-divisional revenue sharing agreements.

	in			% change

# Strategic Resolution Unit

In 1Q17, the Strategic Resolution Unit reported a loss before taxes of CHF 539 million and decreased its risk-weighted assets by USD 3.1 billion and its leverage exposure by USD 20.8 billion.

## RESULTS SUMMARY

### 1Q17 results

In 1Q17, we reported a loss before taxes of CHF 539 million compared to losses of CHF 2,895 million in 4Q16 and CHF 1,253 million in 1Q16. In 1Q17, we reported an adjusted loss before taxes of CHF 500 million, compared to adjusted losses of CHF 521 million in 4Q16 and CHF 1,170 million in 1Q16.

We reported negative net revenues of CHF 206 million in 1Q17, primarily driven by overall funding costs, partially offset by revenues from our legacy cross-border and small markets businesses. Total operating expenses in 1Q17 were CHF 309 million, including CHF 207 million of general and administrative expenses, of which CHF 81 million were litigation provisions, and CHF 88 million were compensation and benefits expenses. In 1Q17, we reported adjusted total operating expenses of CHF 232 million, compared to CHF 289 million in 4Q16 and CHF 518 million in 1Q16.

### Capital and leverage metrics

As of the end of 1Q17, we reported risk-weighted assets of USD 41.3 billion, a decrease of USD 3.1 billion and USD 25.6 billion compared to the end of 4Q16 and 1Q16, respectively. Leverage exposure was USD 82.6 billion as of the end of 1Q17, reflecting a decrease of USD 20.8 billion and USD 84.3 billion compared to the end of 4Q16 and 1Q16, respectively. In 1Q17, risk-weighted assets and leverage exposure reduction was achieved by various initiatives, including wholesale portfolio exits, the sale of certain loan facilities to third parties, and the continued novations, compressions and unwinds across our legacy investment banking derivatives portfolio.

## RESULTS

## Net revenues

We reported negative net revenues of CHF 206 million in 1Q17 compared to negative net revenues of CHF 202 million in 4Q16 and CHF 541 million in 1Q16. Compared to 4Q16, the movement was driven by lower fee-based revenues as a result of accelerated business exits relating to our legacy investment banking portfolio. This movement was partially offset by lower negative net revenues relating to the restructuring of our former Asset Management division and higher revenues relating to the restructuring of select

onshore businesses, including the sale of our wealth management business in Monaco. Compared to 1Q16, the improvement was primarily driven by lower negative valuation adjustments and exit costs relating to our legacy investment banking portfolio, partially offset by lower fee-based revenues from the restructuring of select onshore businesses, in particular the transfer of our US private banking business. Valuation adjustments in 1Q17 primarily reflected mark-to-market losses on our legacy investment banking portfolio, including our credit trading and emerging markets loan portfolios.

**Provision for credit losses**

In 1Q17, there was a provision for credit losses of CHF 24 million compared to CHF 28 million in 4Q16 and CHF 115 million in 1Q16. Provision for credit losses in 1Q17 was primarily related to corporate loans and the disposal of a portfolio of senior financing on US middle market loans in 1Q17.

**Total operating expenses**

Total operating expenses of CHF 309 million decreased CHF 2,356 million compared to 4Q16, primarily reflecting lower general and administrative expenses, due to lower litigation provisions of CHF 2,307 million mainly in connection with

mortgage-related matters. Compared to 1Q16, total operating expenses decreased CHF 288 million, primarily due to lower compensation and benefits, general and administrative expenses and restructuring expenses as a result of various cost reduction initiatives, including the impact of the transfer of our US private banking business. Total operating expenses in 1Q17 included costs of CHF 51 million to meet requirements related to the settlements with US authorities regarding US cross-border matters. Adjusted total operating expenses were CHF 232 million in 1Q17, compared to CHF 289 million in 4Q16 and CHF 518 million in 1Q16, a decline of 20% and 55%, respectively.

# Corporate Center

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

<sup>1</sup> Disclosed on a look-through basis.

Corporate services and business support, including in finance, operations, human resources, legal, compliance, risk management and IT, are provided by corporate functions, and the related costs are allocated to the segments and the Corporate Center based on their requirements and other relevant measures.

### 1Q17 results

In 1Q17, Corporate Center recorded a loss before taxes of CHF 99 million compared to a loss before taxes of CHF 278 million in 4Q16 and income before taxes of CHF 33 million in 1Q16.

Compensation and benefits mainly reflect fair value adjustments on certain deferred compensation plans not allocated to the segments and certain deferred compensation retention awards relating to Global Markets and Investment Banking & Capital Markets intended to support the restructuring of the Group predominantly through the end of 2017. General and administrative expenses primarily reflected costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements. Other revenues include required elimination adjustments associated with trading in own shares.

# Assets under management

As of the end of 1Q17, assets under management were CHF 1,304.2 billion, 4.2% higher compared to the end of 4Q16, reflecting net new assets of CHF 24.4 billion and favorable market movements.

## Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by the Asset Management business of International Wealth Management for other businesses are reported in each applicable business and eliminated at the Group level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic

participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

## Net new assets

Net new assets include individual cash payments, delivery of securities and cash flows resulting from loan increases or repayments.

Interest and dividend income credited to clients and commissions, interest and fees charged for banking services as well as changes in assets under management due to currency and market volatility are not taken into account when calculating net new assets, as such charges or market movements are not directly related to the Group's success in acquiring assets under management. Similarly structural effects mainly relate to asset inflows and outflows due to acquisition or divestiture, exit from businesses or markets or exits due to new regulatory requirements and are not taken into account when calculating net new assets. The Group reviews relevant policies regarding client assets on a regular basis.

**1Q17 results**

As of the end of 1Q17, assets under management of CHF 1,304.2 billion increased CHF 53.1 billion compared to the end of 4Q16. The increase was mainly driven by net new assets of CHF 24.4 billion, a structural effect from assets under management reported for multi-asset class solutions in International Wealth Management and favorable market movements, partially offset by unfavorable foreign exchange-related movements.

Net new assets of CHF 24.4 billion reflected net new assets of CHF 15.0 billion in the Asset Management business of International Wealth Management, mainly reflecting inflows from

emerging market joint ventures and from traditional and alternative investments, net new assets of CHF 5.3 billion in the Private Banking business of Asia Pacific, primarily from inflows in Greater China, South East Asia and Japan and net new assets of CHF 4.7 billion in the Private Banking business of International Wealth Management from solid inflows from emerging markets and Europe.

## Treasury, risk, balance sheet and off-balance sheet

Liquidity and funding management	48
Capital management	53
Risk management	69
Balance sheet and off-balance sheet	79

# Liquidity and funding management

In 1Q17, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

## OVERVIEW

Securities for funding and capital purposes have historically been issued primarily by the Bank, our principal operating subsidiary and a US registrant. In response to regulatory reform, we are now focusing our issuance strategy on offering long-term debt securities at the Group level. Proceeds from issuances are lent to operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements and the former as desired by management to support business initiatives and liquidity needs.

Our internal liquidity risk management framework is subject to review and monitoring by the Swiss Financial Market Supervisory Authority FINMA (FINMA), other regulators and rating agencies.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on liquidity and funding management.

## REGULATORY FRAMEWORK

### Basel III liquidity framework

In 2010, the Basel Committee on Banking Supervision (BCBS) issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR). As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our interpretation of such requirements, including relevant assumptions and estimates. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown in this report.

The LCR, which is being phased in from January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have unencumbered high-quality liquid assets (HQLA) available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of HQLA in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% per year until January 1, 2019.

The NSFR establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's on- and off-balance sheet activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable

long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and, once in effect, should always be at least 100%. Following an observation period which began in 2012, the NSFR will become a minimum standard on January 1, 2018, at which time banks will be required to comply with disclosure requirements prescribed by the BCBS and implemented by national regulators.

### Swiss liquidity requirements

In 2012, the Swiss Federal Council adopted a liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making, including with respect to the final Basel III LCR rules adopted in 2014. Under the Liquidity Ordinance, as amended, certain Swiss banks became subject to an initial 60% LCR requirement, with incremental increases by 10% per year until January 1, 2019. Systemically relevant banks like Credit Suisse became subject to an initial minimum LCR requirement of 100% beginning on January 1, 2015 and the associated disclosure requirements. Further, beginning in May 2015, FINMA required us to maintain a minimum LCR of 110% at all times.

In connection with the implementation of Basel III, regulatory LCR disclosures for the Group and certain subsidiaries are required. Further details on our LCR can be found on our website.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for additional information.

In 2014, FINMA published reporting instructions that required us to report the NSFR to FINMA. The reports were submitted on a quarterly basis from the fourth quarter of 2014 through the second quarter of 2015, and have been submitted on a monthly basis thereafter. The reporting instructions are generally aligned with the final BCBS NSFR requirements.

Our liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on the Basel III liquidity framework and Swiss liquidity requirements.

## LIQUIDITY RISK MANAGEMENT FRAMEWORK

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers

unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we expect to have sufficient liquidity to sustain operations for a period of time in excess of our minimum limit. This includes potential currency mismatches, which are not deemed to be a major risk but are monitored and subject to limits, particularly in the significant currencies of euro, Japanese yen, pound sterling, Swiss franc and US dollar.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information on our approach to liquidity risk management, governance and contingency planning.

## LIQUIDITY METRICS

### Liquidity pool

Treasury manages a sizeable portfolio of liquid assets comprised of cash held at central banks and securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top-rated counterparties. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash held at central banks and highly rated government bonds and on short-term reverse repurchase agreements. These government bonds are eligible as collateral for liquidity facilities with various central banks including the SNB, the Fed, the ECB and the BoE. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities.

### Liquidity pool – Group

	Swiss franc	US dollar	Euro	Other currencies	Total	Total
<b>Liquid assets (CHF million)</b>						
Cash held at central banks	69,188	20,887	7,153	2,681	99,909	98,294
Securities	4,637	61,949	5,906	19,210	91,702	91,680
<b>Liquid assets <sup>1</sup></b>	<b>73,825</b>	<b>82,836</b>	<b>13,059</b>	<b>21,891</b>	<b>191,611</b>	<b>189,974</b>

<sup>1</sup> Reflects a pre-cancellation view.

### Liquidity Coverage Ratio

Our calculation methodology for the LCR is prescribed by FINMA. The FINMA calculation of HQLA takes into account a cancellation mechanism (post-cancellation view) and is therefore not directly comparable to the assets presented in the financial statements that could potentially be monetized under a severe stress scenario. The cancellation mechanism effectively excludes the impact of certain secured financing transactions from available HQLA and simultaneously adjusts the level of net cash outflows calculated. Application of the cancellation mechanism adjusts both the numerator and denominator of the LCR calculation, meaning that the impact is mostly neutral on the LCR itself.

For disclosure purposes our LCR is calculated using a three-month average which, beginning in 1Q17, is measured using daily calculations during the quarter rather than the month-end metrics used for 2015 and 2016. This change in the LCR averaging

The liquidity pool may be used to meet the liquidity requirements of our operating companies.

As of the end of 1Q17, our liquidity pool managed by Treasury had an HQLA value of CHF 191.6 billion. The liquidity pool consisted of CHF 99.9 billion of cash held at major central banks, primarily the SNB, the Fed and the ECB, and CHF 91.7 billion market value of securities issued by governments and government agencies, primarily from the US, UK and France.

In addition to the liquidity portfolio managed by Treasury, there is also a portfolio of unencumbered liquid assets managed by various businesses, primarily in the Global Markets and Investment Banking & Capital Markets divisions. These assets generally include high-grade bonds and highly liquid equity securities that form part of major indices. In coordination with the businesses, Treasury can access these assets to generate liquidity if required.

As of the end of 1Q17, the portfolio that is not managed by Treasury had a market value of CHF 37.3 billion, consisting of CHF 14.1 billion of high-grade bonds and CHF 23.3 billion of highly liquid equity securities. Under our internal model, an average stress-level haircut of 15% is applied to these assets. The haircuts applied to these portfolios reflect our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities. These haircuts have been updated in 2017 as part of the introduction of the new version of our internal liquidity barometer.

methodology resulted from updated FINMA requirements that became effective January 1, 2017.

On the basis of the daily averaging methodology, the level of our average LCR increased from 4Q16 to 205% as of the end of 1Q17, representing an average HQLA of CHF 192.6 billion and average net cash outflows of CHF 94.1 billion. The level of the average LCR at the end of 1Q17 reflects our efforts to ensure that Group entities meet applicable local liquidity requirements as well as the conservative liquidity position we held leading up to the final settlement with the US Department of Justice (DOJ) in late January 2017 related to our legacy residential mortgage-backed securities (RMBS) business. Average net cash outflows were stable, reflecting outflow increases in secured wholesale funding offset by reductions in additional requirements relating to derivative exposures, as well as increased net cash inflows from secured lending.

Following the DOJ RMBS settlement, we actively managed down the level of our HQLA during the latter part of 1Q17. Additionally, we revised the HQLA measurement methodology to exclude potentially eligible HQLA available for use by entities of the Group in certain jurisdictions that may not be readily accessible for use by the Group as a whole. These HQLA eligible amounts may be restricted for reasons such as local regulatory requirements, including large exposure requirements, or other binding constraints that could limit the transferability to other Group entities in other

jurisdictions. These two actions together resulted in a reduction of the HQLA on March 31, 2017 to CHF 145.6 billion compared to CHF 202.1 billion on December 31, 2016.

The additional amount of period-end HQLA excluded under the revised methodology was CHF 24.8 billion on March 31, 2017, which leads to an LCR of 157.1%. Under the previous methodology without the additional exclusion, the LCR would have been 183.9%.

### Liquidity coverage ratio – Group

Calculated using a three-month average which beginning in 1Q17 is calculated on a daily basis.

<sup>1</sup> Calculated as outstanding balances maturing or callable within 30 days.

<sup>2</sup> Calculated after the application of haircuts for high-quality liquid assets or inflow and outflow rates.

<sup>3</sup> Consists of cash and eligible securities as prescribed by FINMA and reflects a post-cancellation view.

### FUNDING SOURCES AND USES

We fund our balance sheet primarily through core customer deposits, long-term debt, including structured notes, and shareholders' equity. We monitor the funding sources, including their concentrations against certain limits, according to their counterparty, currency, tenor, geography and maturity, and whether they are secured or unsecured.

A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 16% as of the end of 1Q17, compared to 14% as of the end of 4Q16, primarily reflecting a small increase in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as the haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 320 billion as of the end of 1Q17, compared to CHF 312 billion as of the end of 4Q16, reflecting a small increase in the customer deposit base in our private banking and corporate & institutional banking businesses. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proven to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

► Refer to the chart "Balance sheet funding structure" and "Balance sheet" in Balance sheet, and off-balance sheet for further information.

## DEBT ISSUANCES AND REDEMPTIONS

Our long-term debt includes senior, senior bail-in and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or historically from our own international covered bond program.

## Balance sheet funding structure

as of March 31, 2017 (CHF billion)

Reverse repurchase agreements <sup>56</sup>			76	Repurchase agreements
Encumbered trading assets	50	<b>Match funded</b>	30	Short positions
Funding-neutral assets <sup>1</sup>	80		80	Funding-neutral liabilities <sup>1</sup>
			10	Other short-term liabilities <sup>2</sup>
Cash & due from banks	103		53	Due to banks
			14	Short-term borrowings
Unencumbered liquid assets <sup>3</sup>	137			
				time 85
				demand 144
				savings 64
				fiduciary 27
Loans <sup>4</sup>	275	<b>116% coverage</b>	320	Deposits <sup>4</sup>
			187	Long-term debt
Other illiquid assets	111		42	Total equity
<b>Assets</b>	<b>812</b>		<b>812</b>	<b>Liabilities and Equity</b>

<sup>1</sup> Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.

<sup>2</sup> Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.

<sup>3</sup> Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.

<sup>4</sup> Excludes loans with banks.

<sup>5</sup> Excludes due to banks and certificates of deposit.

As of the end of 1Q17, we had outstanding long-term debt of CHF 187.3 billion, which included senior and subordinated instruments. We had CHF 61.1 billion and CHF 18.3 billion of structured notes and covered bonds outstanding, respectively, as of the end of 1Q17 compared to CHF 59.5 billion and CHF 19.5 billion, respectively, as of the end of 4Q16.

► Refer to "Issuances and redemptions" in Capital management for information on capital issuances, including buffer and progressive capital notes.

As of the end of 1Q17, the weighted average maturity of long-term debt was 5.8 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Short-term borrowings decreased to CHF 13.8 billion as of the end of 1Q17 compared to CHF 15.4 billion as of the end of 4Q16, mainly due to a decrease in commercial papers.

The following table provides information on long-term debt issuances, maturities and redemptions in 1Q17, excluding structured notes.

### Debt issuances and redemptions

in 1Q17	Senior	Senior bail-in	Sub- ordinated	Long-term debt
<b>Long-term debt (CHF billion, notional value)</b>				
<b>Issuances</b>	<b>0.5</b>	<b>4.1</b>	<b>1.9</b>	<b>6.5</b>
of which unsecured	0.0	4.1	1.9	6.0
of which secured <sup>1</sup>	0.5	0.0	0.0	0.5
<b>Maturities / Redemptions</b>	<b>7.8</b>	<b>0.0</b>	<b>2.0</b>	<b>9.8</b>
of which unsecured	6.2	0.0	2.0	8.2
of which secured <sup>1</sup>	1.6	0.0	0.0	1.6

Excludes structured notes.

<sup>1</sup> Includes covered bonds.

### CREDIT RATINGS

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.3 billion, CHF 1.9 billion and CHF 2.6 billion, respectively, as of the end of 1Q17, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

Potential cash outflows on these derivative contracts associated with a downgrade of our long-term debt credit ratings, such as the requirement to post additional collateral to the counterparty, the loss of re-hypothecation rights on any collateral received and impacts arising from additional termination events are monitored and taken into account in the calculation of our liquidity requirements. There are additional derivative related risks that do not relate to the downgrade of our long term debt credit ratings and which may impact our liquidity position, including risks relating to holdings of derivatives collateral or potential movements in the valuation of derivatives positions. The potential outflows resulting across all derivative product types are monitored as part of the LCR scenario parameters and the internal liquidity reporting.

► Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information.

# Capital management

As of the end of 1Q17, our BIS CET1 ratio was 12.7% and 11.7% on a look-through basis. Our BIS tier 1 leverage ratio was 5.2% and 4.6% on a look-through basis.

## REGULATORY CAPITAL FRAMEWORK

Effective January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements). Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business.

References to phase-in and look-through included herein refer to Basel III capital requirements and Swiss Requirements. Phase-in reflects that, for the years 2014 – 2018, there will be a five-year (20% per annum) phase-in of goodwill, other intangible assets and other capital deductions (e.g., certain deferred tax assets) and the phase-out of an adjustment for the accounting treatment of pension plans and, for the years 2013 – 2022, there will be a phase-out of certain capital instruments. Look-through assumes the full phase-in of goodwill and other intangible assets and other regulatory adjustments and the phase-out of certain capital instruments.

► Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 for further information.

## BIS REQUIREMENTS

The BCBS, the standard setting committee within the BIS, issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and become fully effective on January 1, 2019 for those countries that have adopted Basel III.

► Refer to the table "BIS phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum CET1 requirement is 4.5% of risk-weighted assets (RWA). In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends and make discretionary bonus payments and other earnings distributions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified Credit Suisse as a G-SIB and currently requires Credit Suisse to maintain a 1.5% progressive buffer.

In addition to the CET1 requirements, there is also a requirement for 1.5% of additional tier 1 capital and 2% of tier 2 capital. These requirements may also be met with CET1 capital.

## Basel III capital frameworks for Credit Suisse

<sup>1</sup> Does not include any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

### BIS phase-in requirements for Credit Suisse

For	2017	2018	2019
<b>Capital ratios</b>			
CET1	4.5%	4.5%	4.5%
Capital conservation buffer	1.250% <sup>1</sup>	1.875% <sup>1</sup>	2.5%
Progressive buffer for G-SIB	0.750% <sup>1</sup>	1.125% <sup>1</sup>	1.5%
<b>Total CET1</b>	<b>6.5%</b>	<b>7.5%</b>	<b>8.5%</b>
Additional tier 1	1.5%	1.5%	1.5%
<b>Tier 1</b>	<b>8.0%</b>	<b>9.0%</b>	<b>10.0%</b>
Tier 2	2.0%	2.0%	2.0%
<b>Total capital</b>	<b>10.0%</b>	<b>11.0%</b>	<b>12.0%</b>
Phase-in deductions from CET1 <sup>2</sup>	80.0% <sup>1</sup>	100.0%	100.0%
Capital instruments subject to phase-out	Phased out over a 10-year horizon beginning 2013 through 2022		

<sup>1</sup> Indicates phase-in period.

<sup>2</sup> Includes goodwill, other intangible assets and certain deferred tax assets.

To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125% as well as a trigger at the point of non-viability.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1. This requirement is imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

Capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, are phased out at their effective maturity date, which is generally the date of the first step-up coupon.

Banks are required to maintain a tier 1 leverage ratio of 3% beginning on January 1, 2018.

### SWISS REQUIREMENTS

The legislation implementing the Basel III framework in Switzerland in respect of capital requirements for systemically relevant banks, including Credit Suisse, goes beyond the Basel III minimum standards for systemically relevant banks.

In May 2016, the Swiss Federal Council amended the Capital Adequacy Ordinance applicable to Swiss banks. The amendment recalibrates and expands the existing "Too Big to Fail" regime in Switzerland. Under the amended regime, systemically important banks operating internationally, such as Credit Suisse, will be subject to two different minimum requirements for loss-absorbing capacity: G-SIBs must hold sufficient capital that absorbs current operating losses to ensure continuity of service (going concern requirement) and they must issue sufficient debt instruments to fund restructuring without recourse to public resources (gone concern requirement). Going concern capital and gone concern capital together form our total loss-absorbing capacity (TLAC). The going concern and gone concern requirements are generally aligned with the FSB's total loss-absorbing capacity standard. The amended Capital Adequacy Ordinance came into effect on July 1, 2016, subject to phase-in and

grandfathering provisions for certain outstanding instruments, and has to be fully applied by January 1, 2020.

### Going concern requirement

The going concern requirement applicable in 2020 for a G-SIB consists of (i) a base requirement of 12.86% of RWA and 4.5% of leverage exposure; and (ii) a surcharge, which reflects the G-SIB's systemic importance. For Credit Suisse, this currently translates into a going concern requirement of 14.3% of RWA, of which the minimum CET1 component is 10%, with the remainder to be met with a maximum of 4.3% additional tier 1 capital, which includes high-trigger capital instruments that would be converted into common equity or written down if the CET1 ratio falls below 7%. Under the going concern requirement, the Swiss leverage ratio must be 5%, of which the minimum CET1 component is 3.5%, with the remainder to be met with a maximum of 1.5% additional tier 1 capital, which includes high-trigger capital instruments.

### Gone concern requirement

The gone concern requirement of a G-SIB is equal to its total going concern requirement, which in 2020, consists of a base requirement of 12.86% of RWA and 4.5% of leverage exposure, plus any surcharges applicable to the relevant G-SIB. The gone concern requirement does not include any countercyclical buffers. Credit Suisse is currently subject to a gone concern requirement of 14.3% of RWA and a 5% Swiss leverage ratio and is subject to potential capital rebates for resolvability and for certain tier 2 low-trigger instruments recognized as gone concern capital.

The gone concern requirement should primarily be fulfilled with bail-in debt instruments that are designed to absorb losses after the write-down or conversion into equity of regulatory capital of a G-SIB in a restructuring scenario, but before the write-down or conversion into equity of other senior obligations of the G-SIB. Bail-in debt instruments do not feature capital triggers that may lead to a write-down and/or a conversion into equity outside of restructuring, but only begin to bear losses once the G-SIB is formally in restructuring proceedings and FINMA orders capital measures (i.e., a write-down and/or a conversion into equity) in the restructuring plan.

According to the amended Capital Adequacy Ordinance, bail-in debt instruments must fulfill certain criteria in order to qualify under the gone concern requirement, including FINMA approval. In addition to bail-in debt instruments, the gone concern requirement may further be fulfilled with other capital instruments, including CET1, additional tier 1 capital instruments or tier 2 capital instruments.

### Grandfathering provisions

The Capital Adequacy Ordinance provides for a number of grandfathering provisions with regard to the qualification of previously issued additional tier 1 capital instruments and tier 2 capital instruments:

- Additional tier 1 capital instruments with a low trigger qualify as going concern capital until their first call date. Additional tier 1 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital;

## Swiss capital and leverage phase-in requirements for Credit Suisse

Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital. As of the end of 1Q17, the Swiss countercyclical buffer for both the Group and the Bank was CHF 422 million, which is equivalent to 0.2% of CET1 capital. As of the end of 1Q17, the required extended countercyclical buffer for the Group and the Bank were insignificant.

- Tier 2 capital instruments with a high trigger qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity; and
- Tier 2 capital instruments with a low trigger also qualify as going concern capital until the earlier of (i) their maturity date or first call date; and (ii) December 31, 2019. Tier 2 capital instruments that no longer qualify as going concern capital pursuant to this provision qualify as gone concern capital until one year before their final maturity.

Furthermore, to be eligible as gone concern capital, outstanding bail-in debt instruments issued before July 1, 2016 and bail-in debt instruments issued by a (Swiss or foreign) special purpose vehicle before January 1, 2017 must have been approved by FINMA.

Both the going concern and the gone concern requirements are subject to a phase-in with gradually increasing requirements and have to be fully applied by January 1, 2020.

### Other requirements

Effective July 1, 2016, Switzerland implemented an extended countercyclical buffer, which is based on the BIS countercyclical buffer that could require banks to hold up to 2.5% of RWA in the form of CET1 capital. The extended countercyclical buffer relates to a requirement that can be imposed by national regulators when credit growth is deemed to be excessive and leading to the build-up of system-wide risk.

The Swiss Federal Council has not activated the BIS countercyclical buffer for Switzerland but instead requires banks to hold CET1 capital in the amount of 2% of their RWA pertaining to mortgage loans that finance residential property in Switzerland (Swiss countercyclical buffer).

In 2013, FINMA introduced increased capital charges for mortgages that finance owner occupied residential property in Switzerland (mortgage multiplier) to be phased in through January 1, 2019. The mortgage multiplier applies for purposes of both BIS and FINMA requirements.

In December 2013, FINMA issued a decree (FINMA Decree) specifying capital adequacy requirements for the Bank, on a stand-alone basis (Bank parent company), and the Bank and the Group, each on a consolidated basis, as systemically relevant institutions.

► Refer to "Regulatory developments and proposals" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management in the Credit Suisse Annual Report 2016 for further information on the FINMA Decree.

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR), risks not in VaR (RNIV) and advanced credit valuation adjustment (CVA).

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for

every regulatory VaR backtesting exception over four in the prior rolling 12-month period. In 1Q17, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

► Refer to "Market risk review" in Risk management for further information.

## REGULATORY DEVELOPMENTS AND PROPOSALS

In March 2017, the BCBS released the interim regulatory treatment of accounting provisions and standards for transitional arrangements. These measures are in response to the forthcoming international accounting standards on expected credit loss provisioning that will replace the incurred loss models. The BCBS will retain the current regulatory treatment of provisions under the Basel framework for an interim period. The BCBS sets out that jurisdictions may adopt transitional arrangements to address any significant negative impact on regulatory capital which may arise on day one from the introduction of expected credit losses provisioning for accounting. Accounting principles generally accepted in the US (US GAAP) require that these credit loss provisioning standards, which require the use of expected credit loss models, become effective as of January 1, 2020.

In March 2017, the BCBS published revised Pillar 3 disclosure requirements which consolidate all existing BCBS disclosure requirements into the Pillar 3 framework. Furthermore, the revised disclosure requirements reflect ongoing reforms to the regulatory framework, such as the TLAC regime for G-SIBs and the revised market risk framework. The effective dates of the revised Pillar 3 disclosure requirements are between December 2017 and December 2019.

In April 2017, the BCBS published the regulatory capital treatment related to changes to lease accounting standards under forthcoming US GAAP and international accounting standards. The new accounting rules, which become effective as of January 1, 2019, require that most leases will be reflected on a lessee's balance sheet as an obligation to make lease payments (a liability) and a related right-of-use asset (an asset). The BCBS standard requires that for leases, where the underlying asset being leased is a tangible asset, the right-of-use asset should be risk-weighted with 100%.

## ISSUANCES AND REDEMPTIONS

### Issuances

#### Bail-in instruments

The following bail-in instruments were issued by the Group in 1Q17:

- USD 1.75 billion 3.574% senior notes due 2023; and
- USD 2.25 billion 4.282% senior notes due 2028.

#### Other issuances

In 1Q17, the Group issued USD 1.5 billion 7.125% high-trigger additional tier 1 capital instruments and CHF 200 million 3.875% high-trigger additional tier 1 capital instruments.

### Redemptions

In 1Q17, Credit Suisse redeemed CHF 750 million 7.125% high-trigger tier 2 capital instruments.

### Higher Trigger Capital Amount

The capital ratio write-down triggers for certain of our outstanding capital instruments take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert into equity or be written down prior to the write-down of such capital instruments. The amount of additional capital that is expected to be contributed by such conversion into equity or write-down is referred to as the Higher Trigger Capital Amount.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5.125%, the Higher Trigger Capital Amount was CHF 7.6 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 2.9%, both as of the end of 1Q17.

With respect to the capital instruments that specify a trigger event if the CET1 ratio were to fall below 5%, the Higher Trigger Capital Amount was CHF 12.6 billion and the Higher Trigger Capital Ratio was 4.7%, both as of the end of 1Q17.

► Refer to the table "BIS capital metrics – Group" for further information on the BIS metrics used to calculate such measures.

► Refer to "Higher Trigger Capital Amount" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Issuances and redemptions in the Credit Suisse Annual Report 2016 for further information on the Higher Trigger Capital Amount.

### BIS CAPITAL METRICS

Our CET1 ratio was 12.7% as of the end of 1Q17 compared to 13.5% as of the end of 4Q16, reflecting lower CET1 capital and lower RWA. Our tier 1 ratio was 18.3% as of the end of 1Q17 compared to 18.0% as of the end of 4Q16. Our total capital ratio was 20.3% as of the end of 1Q17 compared to 20.5% as of the end of 4Q16.

CET1 capital was CHF 33.8 billion as of the end of 1Q17 compared to CHF 36.6 billion as of the end of 4Q16, mainly reflecting an additional annual 20% phase-in of regulatory deductions from CET1 (from 60% to 80%), including goodwill, other intangible assets and certain deferred tax assets, and an additional annual 20% decrease in the adjustment for the accounting treatment of pension plans (from 40% to 20%), pursuant to phase-in requirements. CET1 capital was also affected by a negative foreign exchange impact, partially offset by net income attributable to shareholders.

Additional tier 1 capital increased to CHF 14.7 billion as of the end of 1Q17 compared to CHF 12.3 billion as of the end of 4Q16,

mainly reflecting the issuance of high-trigger additional tier 1 capital instruments and an additional annual 20% phase-in of regulatory deductions (from 40% to 20%), including goodwill, other intangible assets and other capital deductions, partially offset by a negative foreign exchange impact.

Tier 2 capital was CHF 5.4 billion as of the end of 1Q17 compared to CHF 6.9 billion as of the end of 4Q16, mainly reflecting the redemption of the high-trigger tier 2 capital instruments and the impact of the prescribed amortization requirements as instruments move closer to their maturity date.

Total eligible capital was CHF 53.8 billion as of the end of 1Q17 compared to CHF 55.7 billion as of the end of 4Q16, primarily reflecting the decreases in CET1 capital and tier 2 capital.

As of the end of 1Q17, the look-through CET1 ratio was 11.7% compared to 11.5% as of the end of 4Q16. As of the end of 1Q17, the look-through total capital ratio was 18.0% compared to 17.4% as of the end of 4Q16.

<sup>1</sup> Includes regulatory adjustments not subject to phase-in, including a cumulative dividend accrual.

<sup>2</sup> Net of deferred tax liability.

<sup>3</sup> Includes cash flow hedge reserve.

<sup>4</sup> Reflects 80% phase-in deductions, including goodwill, other intangible assets and certain deferred tax assets, and 20% of an adjustment primarily for the accounting treatment of pension plans pursuant to phase-in requirements.

<sup>5</sup> Includes hybrid capital instruments that are subject to phase-out.

<sup>6</sup> Includes 20% of goodwill and other intangible assets (CHF 1.0 billion) and other capital deductions, including the regulatory reversal of gains/(losses) due to changes in own credit risk on fair-valued financial liabilities, which will be deducted from CET1 once Basel III is fully implemented.

<sup>1</sup> Includes US GAAP cumulative translation adjustments and the foreign exchange impact on regulatory CET1 adjustments.

<sup>2</sup> Includes the impact of a dividend accrual, the net effect of share-based compensation and pensions and a change in other regulatory adjustments (e.g., the net regulatory impact of gains/(losses) on fair-valued financial liabilities due to changes in own credit risk and certain deferred tax assets).

<sup>3</sup> Includes the net regulatory impact of gains/(losses) on fair-valued financial liabilities due to changes in own credit risk, which will be deducted from CET1 once Basel III is fully implemented.

<sup>4</sup> Primarily reflects the impact of the prescribed amortization requirement as instruments move closer to their maturity date.

## RISK-WEIGHTED ASSETS

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as credit, market, operational and non-counterparty risk RWA. When assessing RWA, it is not the nominal size, but rather the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds).

The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in credit risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty risk RWA primarily reflect the capital requirements for our premises and equipment.

RWA decreased 2% to CHF 265.3 billion as of the end of 1Q17 compared to CHF 271.4 billion as of the end of 4Q16, primarily driven by a reduction in risk levels, mainly in credit risk and market risk, a negative foreign exchange impact and internal methodology and policy changes in market risk. These decreases were partially offset by increases resulting from external methodology and policy changes in credit risk.

Excluding the foreign exchange impact, the decrease in **credit risk** was primarily driven by movements in risk levels, partially offset by increases related to external methodology and policy changes. The decrease in risk levels attributable to book size was mainly due to reductions in advanced CVA resulting from decreased exposures primarily in Global Markets, Strategic Resolution Unit and Swiss Universal Bank, a decrease resulting from the impact of the Basel III phase-in requirements in Corporate Center and decreases in commercial lending and banking book securitization exposures in the Strategic Resolution Unit. These decreases were partially offset by increases in commercial lending exposures in Asia Pacific, Global Markets and Investment Banking & Capital Markets and portfolio increases in banking book securitization exposures in Global Markets. The decrease in risk levels attributable to book quality was due to decreases in retail lending exposures, mainly in Asia Pacific and Swiss Universal Bank. External methodology and policy changes were mainly related to an additional phase-in of the multiplier on non-income producing real estate (IPRE) exposures and IPRE, both within Swiss Universal Bank, and an additional phase-in of a multiplier on certain investment banking corporate exposures in Investment Banking & Capital Markets, Global Markets and Asia Pacific. External methodology and policies were also impacted by a phase-in impact from a FINMA requirement to treat share-backed lending without personal guarantees as corporate exposures, which was introduced in 3Q16, and an update of the drawdown factor applied to private banking loans in Asia Pacific, International Wealth Management and Swiss Universal Bank.

## Risk-weighted assets and capital ratios – Group

Excluding the foreign exchange impact, the decrease in **market risk** was primarily driven by movements in risk levels and internal methodology and policy changes. The decrease in risk levels was primarily related to Asia Pacific. Decreases in internal methodology and policy changes were mainly due to model enhancements to VaR and RNIV in connection with Korean interest rate derivatives, primarily in Global Markets, Asia Pacific and the Strategic Resolution Unit.

<sup>1</sup> Represents changes in portfolio size.<sup>2</sup> Represents changes in average risk weighting across credit risk classes.<sup>3</sup> Represents movements arising from updates to models and recalibrations of parameters.<sup>4</sup> Represents internal changes impacting how exposures are treated.<sup>5</sup> Represents externally prescribed regulatory changes impacting how exposures are treated.<sup>6</sup> The look-through adjustment impacts only credit risk within the Corporate Center. The difference between phase-in and look-through risk-weighted assets relates to transitional arrangements such as the impact from pension assets and deferred tax assets not deducted from CET1 during the phase-in period and the transitional impact from threshold-related risk-weighted assets.

**LEVERAGE METRICS**

Beginning in 1Q15, Credit Suisse adopted the BIS leverage ratio framework, as issued by the BCBS and implemented in Switzerland by FINMA. Under the BIS framework, the leverage ratio measures tier 1 capital against the end-of-period exposure. BIS leverage amounts are calculated based on our interpretation of, and assumptions and estimates related to, the BIS requirements as implemented in Switzerland by FINMA. Changes in the interpretation of these requirements in Switzerland or in any of our interpretations, assumptions or estimates could result in different numbers from those shown here.

As used herein, leverage exposure is based on the BIS leverage ratio framework and consists of period-end balance sheet assets and prescribed regulatory adjustments.

The look-through leverage exposure was CHF 935.9 billion as of the end of 1Q17, a decrease of 2% compared to CHF 950.8 billion as of the end of 4Q16. The movement was primarily due to a reduction in the Group's consolidated balance sheet, reflecting a foreign exchange translation impact, partially offset by higher operating activities. In addition, higher reversals of securities received as collateral, which are excluded from the leverage exposure, resulted in higher adjustments on securities financing transactions.

► Refer to "Balance sheet and off-balance sheet" for further information on the reduction in the Group's consolidated balance sheet.

**Look-through leverage exposure – Group**

end of	1Q17	4Q16
<b>Look-through leverage exposure (CHF million)</b>		
Swiss Universal Bank	257,397	252,889
International Wealth Management	93,629	94,092
Asia Pacific	106,474	108,926
Global Markets	287,456	284,143
Investment Banking & Capital Markets	44,018	45,571
Strategic Resolution Unit	82,718	105,768
Corporate Center	64,219	59,374
<b>Leverage exposure</b>	<b>935,911</b>	<b>950,763</b>

**BIS leverage ratios – Group**

The tier 1 leverage ratio was 5.2% as of the end of 1Q17, with a CET1 component of 3.6%. On a look-through basis, the tier 1 leverage ratio was 4.6%, with a CET1 component of 3.3%.

The CET1 leverage ratio of 3.6% as of the end of 1Q17 decreased compared to 3.8% as of the end of 4Q16, reflecting the decrease in CET1 capital, partially offset by lower leverage exposure.

The tier 1 leverage ratio of 5.2% as of the end of 1Q17 increased compared to 5.1% as of the end of 4Q16, mainly reflecting the lower leverage exposure.

## SWISS CAPITAL AND LEVERAGE METRICS

### Swiss capital metrics

► Refer to "Swiss Requirements" for further information on Swiss regulatory requirements.

As of the end of 1Q17, our Swiss CET1 ratio was 12.6%, our going concern capital ratio was 18.9%, our gone concern capital ratio was 11.4% and our TLAC ratio was 30.3%.

On a look-through basis, as of the end of 1Q17, our Swiss CET1 capital was CHF 30.8 billion and our Swiss CET1 ratio was 11.6%. Our going concern capital was CHF 43.3 billion and our going concern capital ratio was 16.4%. Our gone concern capital was CHF 29.7 billion and our gone concern capital ratio was 11.2%. Our total loss-absorbing capacity was CHF 73.1 billion and our TLAC ratio was 27.6%.

### Swiss capital and leverage ratios for Credit Suisse

Rounding differences may occur. Does not include the effects of the countercyclical buffers and any rebates for resolvability and for certain tier 2 low-trigger instruments recognized in gone concern capital.

### Swiss leverage metrics

The leverage exposure used in the Swiss leverage ratio is measured on the same period-end basis as the leverage exposure for the BIS leverage ratio.

As of the end of 1Q17, our Swiss CET1 leverage ratio was 3.6%, our going concern leverage ratio was 5.4%, our gone

concern leverage ratio was 3.2% and our TLAC leverage ratio was 8.6%.

On a look-through basis, as of the end of 1Q17, our Swiss CET1 leverage ratio was 3.3%, our going concern leverage ratio was 4.6%, our gone concern leverage ratio was 3.2% and our TLAC leverage ratio was 7.8%.

**BANK REGULATORY DISCLOSURES**

The following capital, RWA and leverage disclosures apply to the Bank. The business of the Bank is substantially the same as that of the Group, including business drivers and trends relating to capital, RWA and leverage metrics.

During 1Q17, the equity stakes in Neue Aargauer Bank AG, BANK-now AG and Swisscard AECS GmbH held by the Group

were transferred to Credit Suisse (Schweiz) AG, a wholly owned subsidiary of the Bank. Prior periods were restated to reflect the impact of such transactions.

**BIS capital and leverage metrics – Bank**

## OTHER REGULATORY DISCLOSURES

In connection with the implementation of Basel III, certain regulatory disclosures for the Group and certain of its subsidiaries are required. The Group's Pillar 3 disclosure, regulatory disclosures, additional information on capital instruments, including the main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base, G-SIB financial indicators, reconciliation requirements, leverage ratios and certain liquidity disclosures as well as regulatory disclosures for subsidiaries can be found on our website.

► Refer to [www.credit-suisse.com/regulatorydisclosures](http://www.credit-suisse.com/regulatorydisclosures) for additional information.

## SHAREHOLDERS' EQUITY AND SHARE METRICS

### Total shareholders' equity

Our total shareholders' equity decreased from CHF 41.9 billion as of the end of 4Q16 to CHF 41.7 billion as of the end of 1Q17. Total shareholders' equity was negatively impacted by losses on fair value elected liabilities relating to credit risk and foreign exchange-related movements on cumulative translation adjustments. These movements were partially offset by net income attributable to shareholders and an increase in the share-based compensation obligation.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

## Shareholders' equity and share metrics

	% change		
end of	1Q17	4Q16	QoQ
<b>Shareholders' equity (CHF million)</b>			
Common shares	84	84	0
Additional paid-in capital	32,388	32,131	1
Retained earnings	26,552	25,954	2
Treasury shares, at cost	(99)	0	–
Accumulated other comprehensive loss	(17,223)	(16,272)	6
<b>Total shareholders' equity</b>	<b>41,702</b>	<b>41,897</b>	0
Goodwill	(4,831)	(4,913)	(2)

<b>Par value</b>	<b>0.04</b>	<b>0.04</b>	0
<b>Book value per share (CHF)</b>			
<b>Total book value per share</b>	<b>20.01</b>	<b>20.05</b>	0
Goodwill per share	(2.32)	(2.35)	(1)
Other intangible assets per share	(0.09)	(0.11)	(18)
<b>Tangible book value per share<sup>1</sup></b>	<b>17.60</b>	<b>17.59</b>	0

<sup>1</sup> Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

# Risk management

In 1Q17, our available economic capital increased 2%, economic risk capital decreased 3%, overall position risk decreased 6% and average risk management VaR in US dollars decreased 7%. Gross impaired loans decreased CHF 261 million to CHF 2.2 billion on a gross loan portfolio of CHF 277.4 billion.

## OVERVIEW AND RISK-RELATED DEVELOPMENTS

Fundamental to our business is the prudent taking of risk in line with our strategic priorities. The primary objectives of risk management are to protect our financial strength and reputation, while ensuring that capital is well deployed to support business activities. Our risk management framework is based on transparency, management accountability and independent oversight.

► Refer to "Key risk developments", "Risk management oversight", "Risk appetite framework" and "Risk coverage and management" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2016 for further information and additional details of our current risk management framework and activities, including definitions of certain terms and relevant metrics.

### The European political landscape

Parliamentary elections took place in the Netherlands in 1Q17 and political campaigning was robust ahead of the 2Q17 presidential and national assembly elections in France. The UK formally initiated the process of its withdrawal from the EU at the end of March. To manage our exposures, we began running a suite of risk stress scenarios. The potential impact of changes in the European political landscape on our structural exposures are managed through an enterprise stress test and our risk appetite framework.

### Ship finance

There were mixed trends in the shipping industry during the first quarter of 2017. The dry bulk segment saw a recovery of vessels' earnings and values compared to the same quarter last year, which improved the risk profile of our loan portfolio. The container segment stabilized at weak levels and for tankers the seasonal gains in earnings during the last quarter of 2016 were reversed by the end of March, although ship values remained stable. We continue to execute a rigorous credit risk monitoring process given the uncertainty in the shipping industry.

## ECONOMIC RISK CAPITAL REVIEW

Economic risk capital is used as a consistent and comprehensive tool for capital management, limit monitoring and performance management. Economic risk capital is our core Group-wide risk management tool for measuring and reporting the combined impact from quantifiable risks such as market, credit, operational, pension, expense and model risks, each of which has an impact on our capital position.

Economic risk capital measures risks in terms of economic realities rather than regulatory or accounting rules and estimates the amount of capital needed to remain solvent and in business under extreme market, business and operating conditions over the period of one year, given our target financial strength (our long-term credit rating). Economic risk capital is set to a level needed to absorb unexpected losses at a confidence level of 99.97%. Our economic risk capital model is a set of methodologies used for measuring quantifiable risks associated with our business activities on a consistent basis. It is calculated separately for position risk (reflecting our exposure to market and credit risks), operational risk and other risks.

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of material methodology changes and dataset and model parameter updates, prior-period balances are restated in order to show meaningful trends.

► Refer to "Economic risk capital" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on economic risk capital.

In 1Q17, there were no changes to our economic risk capital methodology.

<sup>1</sup> Includes primarily high- and low-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to BIS look-through CET1 capital to enable comparison between economic risk capital and available economic capital under the Basel III framework.

<sup>2</sup> This category comprises fixed income trading, foreign exchange, commodity and insurance exposures.

<sup>3</sup> This category comprises commercial and residential real estate (including RMBS and CMBS), ABS exposure, real estate acquired at auction and real estate fund investments.

<sup>4</sup> Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

<sup>5</sup> Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between available economic capital and economic risk capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain planned methodology changes.

<sup>6</sup> Ratio of available economic capital to economic risk capital.

### Available economic capital trends

As of the end of 1Q17, our available economic capital for the Group was CHF 47.0 billion, an increase of CHF 1.1 billion from the end of 4Q16. BIS look-through CET1 capital increased CHF 0.2 billion, mainly reflecting net income attributable to shareholders, partially

offset by a negative foreign exchange impact. Economic adjustments increased CHF 0.9 billion, mainly reflecting the issuance of high-trigger tier 1 instruments, partially offset by the redemption of high-trigger tier 2 instruments.

### Economic risk capital by division

	End of period			Average		
	1Q17	4Q16	% change QoQ	1Q17	4Q16	% change QoQ
<b>Economic risk capital by division (CHF million)</b>						
Swiss Universal Bank	5,693	5,789	(2)	5,741	5,763	0
International Wealth Management	4,442	3,816	16	4,129	3,976	4

<b>Economic risk capital – Group</b>	<b>33,676 <sup>2</sup></b>	<b>34,647 <sup>2</sup></b>	<b>(3)</b>	<b>34,162</b>	<b>34,372</b>	<b>(1)</b>

<sup>1</sup> Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between available economic capital and economic risk capital.

<sup>2</sup> Includes a diversification benefit of CHF 1 million and CHF 0 million as of the end of 1Q17 and 4Q16, respectively.

### Economic risk capital trends

Compared to the end of 4Q16, our economic risk capital decreased 3% to CHF 33.7 billion mainly due to a 6% decrease in position risk, partially offset by a 4% increase in other risks. The decrease in position risk was mainly due to reduced traded credit spread exposures from high-yield bonds in the US and lower interest rate risk from derivatives in the US and in Switzerland in fixed income trading, lower loan commitments and counterparty risk in international lending & counterparty exposures and reduced equity derivatives risk in the US and in Asia in equity trading & investments. These reductions were partially offset by higher emerging markets country event risk and higher RMBS exposures in the US in real estate & structured assets. The increase in other risks primarily reflects increased higher pension risk driven by a change in discount rates in our Swiss pension plan.

For Swiss Universal Bank, economic risk capital decreased 2% to CHF 5.7 billion from the end of 4Q16, mainly due to lower loan commitments in private banking corporate & retail lending, partially offset by higher pension risk driven by a change in discount rates in our Swiss pension plan.

For International Wealth Management, economic risk capital increased 16% to CHF 4.4 billion from the end of 4Q16. Excluding the US dollar translation impact, economic risk capital increased 19%, mainly due to higher pension risk driven by a change in discount rates in our Swiss pension plan and higher loan commitments in private banking corporate & retail lending.

For Asia Pacific, economic risk capital decreased 7% to CHF 4.2 billion from the end of 4Q16, mainly due to lower loan commitments in international lending & counterparty exposures and reduced traded credit spread exposures, partially offset by higher emerging markets country event risk.

For Global Markets, economic risk capital was stable at CHF 9.3 billion compared to the end of 4Q16.

For Investment Banking & Capital Markets, economic risk capital increased 4% to CHF 5.3 billion from the end of 4Q16. Excluding the US dollar translation impact, economic risk capital increased 6%, mainly due to increased international lending & counterparty exposures reflecting enhancements to the investment banking lending dataset and increased lending.

For the Strategic Resolution Unit, economic risk capital decreased 25% to CHF 3.8 billion from the end of 4Q16, mainly due to reduced traded credit spread exposures from high-yield bonds in the US in fixed income trading and lower loan commitments in international lending & counterparty exposures.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

### MARKET RISK REVIEW

Market risk is the risk of financial loss arising from movements in market prices. Market risks arise from both our trading and non-trading business activities. The classification of assets into trading

book and banking book portfolios determines the approach for analyzing our market risk exposure. Market risk in the trading book is measured using VaR and market risk in our banking book is measured using sensitivity analysis on related market factors.

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on market risk including our VaR methodology.

### Trading book

Market risks from our trading book relate to our trading activities primarily in Global Markets and Asia Pacific. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products. Some of the structured products are customized transactions using combinations of derivatives and are executed to meet specific client or internal needs. As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations.

VaR is a risk measure which quantifies the potential loss on a given portfolio of financial instruments over a certain holding period and that is expected to occur at a certain confidence level. VaR is an important tool in risk management and is used for measuring quantifiable risks from our activities exposed to market risk on a daily basis. In addition, VaR is one of the main risk measures for limit monitoring, financial reporting, calculation of regulatory capital and regulatory backtesting.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 1Q17, we updated our VaR model to capture higher order risks in exotic equity derivatives, Korean interest rate derivatives and foreign exchange derivatives. These higher order risks were previously included in risk-not-in-VaR. The impact of these updates on our VaR measures was immaterial and prior periods have not been restated.

We continue to receive regulatory approval for ongoing enhancements to our VaR methodology used for the calculation of regulatory capital, and the model is subject to regular reviews by regulators.

Information required under Pillar 3 of the Basel framework related to risk is available on our website at [www.credit-suisse.com/pillar3](http://www.credit-suisse.com/pillar3).

The tables entitled "Average one-day, 98% risk management VaR by division" and "One-day, 98% risk management VaR" show our trading-related market risk exposure, as measured by one-day, 98% risk management VaR in Swiss francs and US dollars. As we measure trading book VaR for internal risk management purposes using the US dollar as the base currency, the VaR figures were translated into Swiss francs using daily foreign exchange translation rates. VaR estimates are computed separately for each risk type and for the whole portfolio using the historical simulation methodology. The different risk types are grouped into five categories including interest rate, credit spread, foreign exchange, commodity and equity.

**Average one-day, 98% risk management VaR by division**

End of period	15	21	6	1	13	(28)	28

Excludes risks associated with counterparty and own credit exposures.

<sup>1</sup> As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

We measure VaR in US dollars, as the majority of our trading activities are conducted in US dollars.

Average risk management VaR decreased 7% to USD 25 million from 4Q16, mainly driven by reduced equity derivative exposures in the US and in Europe and lower credit spread exposures from CMBS in the US. Interest rate and foreign exchange risk increased, mainly driven by the VaR methodology update implemented to capture higher order risks in Korean interest rate derivatives and foreign exchange derivatives. These increases had no significant impact on total average VaR due to an increased

diversification benefit between these risk types. Average risk management VaR on a divisional level was stable for all divisions.

Period-end risk management VaR decreased 7% to USD 26 million from 4Q16, which was also mainly driven by reduced equity derivative exposures in the US and in Europe and lower credit spread exposures from CMBS in the US. Increases in interest rate and foreign exchange risk were also driven by the VaR methodology update, which had no significant impact on total period-end VaR.

The chart entitled “Daily risk management VaR” shows the aggregated market risk in our trading book on a consolidated basis.

### Daily risk management VaR (rolling four quarters)

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 1Q17 with those for 4Q16. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. We had no trading loss days in 1Q17, compared to one trading loss day in 4Q16.

### Actual daily trading revenues

### VaR backtesting

Various techniques are used to assess the accuracy of the VaR methodology used for risk management and regulatory purposes and to assess if our regulatory capital is sufficient to absorb actual losses. Our VaR backtesting process is used to assess the accuracy and performance of our regulatory VaR model and to encourage developments to our VaR model. Backtesting involves

comparing the results produced from the VaR model with the daily trading revenues. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period calculated using a subset of the actual daily trading revenues also referred to as “hypothetical” trading revenues under the Basel framework. In the rolling 12-month period through the end of 1Q17, we had no backtesting exceptions in our regulatory VaR model calculated using the subset of actual daily trading revenues. Since there were fewer than five backtesting exceptions in the rolling 12-month period through the end of 1Q17, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

► Refer to “Market risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on VaR backtesting.

► Refer to “Other requirements” in Capital management – Swiss requirements for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

### Banking book

Market risks from our banking book primarily relate to asset and liability mismatch exposures, equity participations and investments in bonds and money market instruments. Our businesses and the Corporate Center have non-trading portfolios that carry market risks, mainly related to changes in interest rates but also to changes in foreign exchange rates, equity prices and, to a lesser extent, commodity prices.

Interest rate risk on banking book positions is measured by estimating the impact resulting from a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive banking book positions. The impact of a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive banking book positions would have been an increase of CHF 4.7 million as of the end of 1Q17, compared to CHF 4.9 million as of the end of 4Q16.

### CREDIT RISK REVIEW

All transactions that are exposed to potential losses due to a counterparty failing to meet an obligation are subject to credit risk exposure measurement and management. The majority of our credit risk is concentrated in the private banking, corporate and institutional businesses and in the investment banking businesses.

► Refer to “Credit risk” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk coverage and management in the Credit Suisse Annual Report 2016 for further information on credit risk.

► Refer to “Note 16 – Loans, allowance for loan losses and credit quality” and “Note 28 – Financial instruments” in III – Condensed consolidated financial statements – unaudited for further information on loans and impaired loans and counterparty credit risk, respectively.

<sup>2</sup> The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 11,470 million and CHF 33,168 million, respectively, as of the end of 1Q17 and CHF 11,266 million and CHF 33,515 million, respectively, as of the end of 4Q16.

<sup>3</sup> The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 19,276 million and CHF 1,364 million, respectively, as of the end of 1Q17, CHF 18,084 million and CHF 1,165 million, respectively, as of the end of 4Q16.

<sup>4</sup> The values of financial collateral and mortgages related to secured loans, considered up to the amount of the related loans, were CHF 19,363 million and CHF 169 million, respectively, as of the end of 1Q17, CHF 21,135 million and CHF 175 million, respectively, as of the end of 4Q16.

<sup>5</sup> Allowance for loan losses are only based on loans that are not carried at fair value.

## Loans

Compared to the end of 4Q16, gross loans increased CHF 0.3 billion to CHF 277.4 billion as of the end of 1Q17, mainly driven by higher loans collateralized by securities and higher consumer finance loans, partially offset by lower loans to financial institutions, lower commercial and industrial loans and the US dollar translation impact. The net increase of CHF 2.2 billion in loans collateralized by securities was mainly driven by Investment Banking & Capital Markets and Asia Pacific. The net increase of CHF 0.5 billion in consumer finance loans was mainly driven by International Wealth Management and Swiss Universal Bank. Loans to financial institutions decreased CHF 1.9 billion, primarily in the Strategic Resolution Unit and International Wealth Management, partially

offset by increases in Global Markets, Swiss Universal Bank and Asia Pacific. The net decrease of CHF 1.0 billion in commercial and industrial loans reflected decreases in Investment Banking & Capital Markets, the Strategic Resolution Unit, Swiss Universal Bank and Asia Pacific, partially offset by increases in International Wealth Management and Global Markets.

On a divisional level, increases in gross loans of CHF 2.0 billion in Global Markets, CHF 1.1 billion in International Wealth Management, CHF 0.7 billion in Asia Pacific and CHF 0.4 billion in Swiss Universal Bank were partially offset by decreases of CHF 4.0 billion in the Strategic Resolution Unit. Gross loans in Investment Banking & Capital Markets were stable.

## Impaired loans

<sup>1</sup> Includes the Corporate Center, in addition to the divisions disclosed.

<sup>2</sup> Impaired loans are only based on loans that are not carried at fair value.

### Impaired loans

Compared to the end of 4Q16, gross impaired loans decreased CHF 261 million to CHF 2.2 billion as of the end of 1Q17, mainly reflecting lower non-performing and non-interest-earning loans in the Strategic Resolution Unit and lower non-performing loans in Asia Pacific, partially offset by higher non-performing loans in Swiss Universal Bank. Net increases in potential problem loans were primarily driven by increases in Investment Banking & Capital Markets, Global Markets and International Wealth Management, partially offset by a decrease in Swiss Universal Bank.

In the Strategic Resolution Unit, gross impaired loans decreased CHF 250 million, primarily driven by the upgrade, sale and repayment of oil and gas exposures in 1Q17 in the amount

of CHF 176 million, a repayment of an impaired export finance loan and reduced impaired ship finance exposures. In Asia Pacific, gross impaired loans decreased CHF 122 million, primarily driven by the repayment of share-backed exposures. In International Wealth Management, gross impaired loans increased CHF 46 million, primarily driven by new defaults of European mortgages and aviation finance exposures, partially offset by a reduction of impaired share-backed loans. The increases in gross impaired loans of CHF 32 million in Investment Banking & Capital Markets and of CHF 22 million in Global Markets were both driven by a newly impaired exposure in the supermarket sector in Europe. In Swiss Universal Bank, gross impaired loans were stable at CHF 764 million.

### SELECTED EUROPEAN CREDIT RISK EXPOSURES

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion.

► Refer to "Selected European credit risk exposures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2016 for further information on selected European credit risk exposures.

### Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our overall risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses of our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G7 and non-G7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

### Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Cyprus, Croatia, Greece, Ireland, Italy, Malta, Portugal and Spain as of the end of 1Q17 was EUR 3,107 million, stable compared to EUR 2,959 million as of the end of 4Q16. Our net exposure to these sovereigns was EUR 712 million, 34% higher compared to EUR 531 million as of the end of 4Q16. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 1Q17 included net exposure to financial institutions of EUR 2,046 million and to corporates and other counterparties of EUR 1,326 million, slightly higher compared to EUR 1,994 million and stable compared to EUR 1,311 million, respectively, as of the end of 4Q16.

► Refer to "Selected European credit risk exposures" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Risk review and results in the Credit Suisse Annual Report 2016 for further information on the presentation of selected European credit risk exposures.

### Sovereign debt rating developments

In 1Q17, the long-term sovereign debt ratings of the countries listed in the table changed as follows: Standard & Poor's increased its rating for Cyprus from BB to BB+.

# Balance sheet and off-balance sheet

Total assets were CHF 812.0 billion, total liabilities were CHF 769.9 billion and total equity was CHF 42.1 billion. Total assets decreased 1% and total liabilities decreased 1% for the quarter, reflecting the foreign exchange translation impact, partially offset by higher operating activities. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

## BALANCE SHEET

Total assets were CHF 812.0 billion as of the end of 1Q17, a decrease of CHF 7.9 billion, or 1%, from the end of 4Q16, reflecting the foreign exchange translation impact, partially offset by higher operating activities. Excluding the foreign exchange translation impact, total assets increased CHF 1.6 billion.

Compared to the end of 4Q16, cash and due from banks decreased CHF 19.3 billion, or 16%, mainly driven by lower cash positions at the Luxembourg Central Bank, the SNB and the Fed. Trading assets decreased CHF 5.4 billion, or 3%, mainly due to lower derivative instruments and other trading assets, primarily

reflecting reduction in loans as several loan positions were liquidated in 1Q17, partially offset by higher debt securities. Brokerage receivables increased CHF 8.3 billion, or 25%, mainly driven by increases in margin lending and failed settlements. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions increased CHF 3.1 billion, or 2%, mainly driven by an increase in reverse repurchase transactions from banks. Net loans were stable. All other assets increased CHF 5.0 billion, or 6%, including an increase of CHF 5.1 billion, or 16%, in securities received as collateral and a decrease of CHF 0.6 billion, or 2%, in other assets.

## Balance sheet summary

Net loans	276,370	275,976	0
Brokerage receivables	41,700	33,431	25
All other assets	94,283	89,304	6
<b>Total assets</b>	<b>811,979</b>	<b>819,861</b>	<b>(1)</b>
<b>Liabilities and equity (CHF million)</b>			
Due to banks	20,820	22,800	(9)
Customer deposits	352,092	355,833	(1)
Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions	38,113	33,016	15
Trading liabilities	47,662	44,930	6
Long-term debt	187,321	193,315	(3)
Brokerage payables	41,226	39,852	3
All other liabilities	82,666	87,804	(6)
<b>Total liabilities</b>	<b>769,900</b>	<b>777,550</b>	<b>(1)</b>
<b>Total shareholders' equity</b>	<b>41,702</b>	<b>41,897</b>	<b>0</b>
Noncontrolling interests	377	414	(9)
<b>Total equity</b>	<b>42,079</b>	<b>42,311</b>	<b>(1)</b>
<b>Total liabilities and equity</b>	<b>811,979</b>	<b>819,861</b>	<b>(1)</b>

Total liabilities were CHF 769.9 billion as of the end of 1Q17, a decrease of CHF 7.7 billion, or 1%, from the end of 4Q16, reflecting the foreign exchange translation impact, partially offset by higher operating activities. Excluding the foreign exchange translation impact, total liabilities increased CHF 2.1 billion.

Compared to the end of 4Q16, long-term debt decreased CHF 6.0 billion, or 3%, primarily driven by maturities of senior debt and the foreign exchange translation impact, partially offset by issuances of senior and subordinated debt. Customer deposits were stable. Due to banks decreased CHF 2.0 billion, or 9%, mainly driven by a repayment of outstanding deposits. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions increased CHF 5.1 billion, or 15%, primarily due to increases in repurchase transactions with banks and customers and an increase in cash collateral from banks. Trading liabilities increased CHF 2.7 billion, or 6%, mainly reflecting an increase in short positions, partially offset by a decrease in derivative instruments. Brokerage payables increased by CHF 1.4 billion, or 3%, mainly reflecting an increase in failed settlements. All other liabilities decreased CHF 5.1 billion, or 6%, including decreases of CHF 8.6 billion, or 22%, in other liabilities and CHF 1.6 billion, or 10%, in short-term borrowings and an increase of CHF 5.1 billion, or 16%, in obligation to return securities received as collateral.

► Refer to "Funding sources and uses" in Liquidity and funding management and "Capital management" for further information, including our funding of the balance sheet and the leverage ratio.

## OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

► Refer to "Liquidity and funding management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2016 and "Note 26 – Guarantees and commitments" and "Note 30 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information.

## Report of Independent Registered Public Accounting Firm

To the Board of Directors of Credit Suisse Group AG, Zurich

We have reviewed the accompanying condensed consolidated balance sheets of Credit Suisse Group AG and subsidiaries (the "Group") as of March 31, 2017, the related condensed consolidated statements of operations, comprehensive income, changes in equity, and cash flows, for the three-month periods ended March 31, 2017 and 2016. These condensed consolidated financial statements are the responsibility of the Group's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of the Group as of December 31, 2016, and the related consolidated statements of operations, comprehensive income, changes in equity, and cash flows for the year then ended (not presented herein); and in our report dated March 24, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

# Notes to the condensed consolidated financial statements – unaudited

## 1 Summary of significant accounting policies

### Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with US GAAP and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2016 included in the Credit Suisse Annual Report 2016.

► Refer to “Note 1 – Summary of significant accounting policies” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for a description of the Group’s significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made to the prior period’s consolidated financial statements to conform to the current

period’s presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 4Q16 consolidated statements of operations and comprehensive income and the 4Q16 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP. The results of operations for interim periods are not indicative of results for the entire year.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 2 Recently issued accounting standards

### Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

► Refer to “Note 2 – Recently issued accounting standards” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for a description of accounting standards adopted in 2016.

#### ASC Topic 350 – Intangibles – Goodwill and Other

In January 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-04, “Simplifying the Test for Goodwill Impairment” (ASU 2017-04), an update to Accounting Standards Codification (ASC) Topic 805 – Business Combinations. ASU 2017-04 simplifies the subsequent measurement of goodwill by eliminating step two from the goodwill impairment test. ASU 2017-04 is effective for annual reporting periods beginning after December 15, 2019, and for the interim periods within those annual reporting periods. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. ASU 2017-04 is to be applied on a prospective basis. The Group elected to early adopt ASU 2017-04 on January 1, 2017, which did not have a material impact on the Group’s financial position, results of operations or cash flows.

#### ASC Topic 718 – Compensation – Stock Compensation

In March 2016, the FASB issued ASU 2016-09, “Improvements to Employee Share-Based Payment Accounting” (ASU 2016-09), an update to ASC Topic 718 – Compensation—Stock Compensation. The amendments in ASU 2016-09 provide simplification updates for several aspects of the accounting for share-based payment

transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The adoption of ASU 2016-09 on January 1, 2017 resulted in the recognition of previously unrecorded deferred tax asset net operating loss balances which arose due to prior tax windfalls that did not immediately result in cash tax savings. The adjustment resulted in an increase in retained earnings of CHF 85 million upon adoption.

#### ASC Topic 740 – Income Taxes

In October 2016, the FASB issued ASU 2016-16, “Intra-Entity Transfers of Assets Other Than Inventory” (ASU 2016-16), an update to ASC Topic 740 – Income Taxes. The amendments in ASU 2016-16 eliminate the exception for an intra-entity transfer of an asset other than inventory. ASU 2016-16 is required to be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. ASU 2016-16 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted. The Group elected to early adopt ASU 2016-16 on January 1, 2017, which resulted in a reclassification from other assets to deferred tax assets. The net impact upon adoption was a reduction in retained earnings of CHF 81 million.

#### ASC Topic 825 – Financial Instruments – Overall

In January 2016, the FASB issued ASU 2016-01, “Recognition and Measurement of Financial Assets and Financial Liabilities” (ASU 2016-01), an update to ASC Topic 825 – Financial

Instruments – Overall. The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The amendments primarily affect the accounting for equity investments, financial liabilities under the fair value option and the presentation and disclosure requirements for financial instruments. ASU 2016-01 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption of the full standard is not permitted; however, certain sections of ASU 2016-01 relating to fair value option-elected financial liabilities can be early adopted in isolation. These amendments to ASU 2016-01 require the changes in fair value relating to instrument-specific credit risk of fair value option elected financial liabilities to be presented separately in accumulated other comprehensive income (AOCI). The Group has early adopted these sections of the update on January 1, 2016. As a result of adoption, a reclassification of a gain from retained earnings to AOCI of CHF 475 million, net of tax, was recorded. The Group is currently evaluating the impact of the adoption of the remaining sections of ASU 2016-01 on the Group's financial position, results of operations and cash flows.

#### **Standards to be adopted in future periods**

##### **ASC Topic 230 – Statement of Cash Flows**

In August 2016, the FASB issued ASU 2016-15, "Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)" (ASU 2016-15), an update to ASC Topic 230 – Statement of Cash Flows. The amendments in ASU 2016-15 provide guidance regarding classification of certain cash receipts and payments where diversity in practice was observed. ASU 2016-15 is required to be applied retrospectively to all periods presented beginning in the year of adoption. ASU 2016-15 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted, including adoption in an interim period. The Group is currently evaluating the impact of the adoption of ASU 2016-15 on the Group's financial position, results of operations and cash flows.

##### **ASC Topic 326 – Financial Instruments – Credit Losses**

In June 2016, the FASB issued ASU 2016-13, "Measurement of Credit Losses on Financial Instruments" (ASU 2016-13), creating ASC Topic 326 – Financial Instruments – Credit Losses. ASU 2016-13 is intended to improve financial reporting by requiring timelier recording of credit losses on financial assets measured at amortized cost basis (including, but not limited to loans), net investments in leases recognized as lessor and off-balance sheet credit exposures. ASU 2016-13 eliminates the probable initial recognition threshold under the current incurred loss methodology for recognizing credit losses. Instead, ASU 2016-13 requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. The Group will incorporate forward-looking information and macroeconomic factors into its credit loss estimates. ASU 2016-13 requires enhanced disclosures

to help investors and other financial statement users to better understand significant estimates and judgments used in estimating credit losses, as well as the credit quality and underwriting standards of an organization's portfolio. As the Group is a US Securities and Exchange Commission (SEC) filer, ASU 2016-13 is effective for annual reporting periods beginning after December 15, 2019, and for the interim periods within those annual reporting periods. Early application will be permitted for annual reporting periods and for the interim periods within those annual reporting periods, beginning after December 15, 2018.

The Group has established a cross-functional implementation team and governance structure for the project. The Group has decided on a current expected credit loss (CECL) methodology while it is adjusting for key interpretive issues. Furthermore, the Group will continue to monitor the initial scope assessment, as a basis to determine the requirements and data sourcing of the CECL models, and to design, build and test the models until the effective date.

The Group expects that the new CECL methodology would generally result in increased and more volatile allowance for loan losses. The main impact drivers include:

- the remaining life of the loans measured at amortized cost and the off-balance sheet credit exposures at the adoption date and subsequent reporting dates because of the new requirement to measure lifetime expected credit losses;
- the point of time in the economic cycle at the adoption date and subsequent reporting dates because of the new requirement to incorporate reasonable and supportable forward-looking information and macroeconomic factors; and
- the credit quality of the loans measured at amortized cost and the off-balance sheet credit exposures at the adoption date and subsequent reporting dates.

Upon adoption of the standard, the Group expects an adjustment to be posted to retained earnings for any changes in loan losses. As the implementation progresses, the Group will continue to evaluate the extent of the impact of the adoption of ASU 2016-13 on the Group's financial position, results of operations and cash flows.

##### **ASC Topic 606 – Revenue from Contracts with Customers**

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09), an update to ASC Topic 606 – Revenue from Contracts with Customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU outlines key steps that an entity should follow to achieve the core principle. ASU 2014-09 and its subsequent amendments are effective for the annual reporting period beginning after December 15, 2017, and for the interim periods within those annual reporting periods.

The Group has established a cross-functional implementation team and governance structure for the project. The Group's implementation efforts include the identification of revenue and

costs within the scope of the guidance, as well as the evaluation of revenue contracts under the new guidance and related accounting policies. The guidance does not apply to revenue associated with financial instruments, including loans and securities that are accounted for under other US GAAP guidance. To date, the recognition and timing impacts that the Group has identified relate to the timing of certain fees. The new guidance eliminates industry specific guidance and as a result will have an impact on the gross versus net presentation of certain income and expenses, for example a change from net to gross reporting of underwriting expenses. The changes identified thus far are not expected to have a material impact in regards to the timing, amount or presentation of revenue recognition; however, the evaluation remains ongoing.

#### ASC Topic 715 – Compensation – Retirement Benefits

In March 2017, the FASB issued ASU 2017-07, “Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost” (ASU 2017-07), an update to ASC Topic 715 – Compensation – Retirement Benefits. The amendments in ASU 2017-07 require that the service cost component of the net periodic benefit cost be presented in the same income statement line item(s) as other employee compensation costs arising from services rendered during the period. Other components of the net periodic benefit cost should be reported separately from the line item(s) that includes the service cost and outside of any subtotal of operating income. ASU 2017-07 is effective for annual reporting periods beginning after December 15, 2017, and for the interim periods within those annual reporting periods. Early adoption is permitted. The Group is currently evaluating the impact of the adoption of ASU 2017-07 on the Group’s financial position, results of operations and cash flows.

#### ASC Topic 842 – Leases

In February 2016, the FASB issued ASU 2016-02, “Leases” (ASU 2016-02), creating ASC Topic 842 – Leases. ASU 2016-02 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. ASU 2016-02 also includes disclosure requirements to provide more information about the amount, timing and uncertainty of cash flows arising from leases. Lessor accounting is substantially unchanged compared to the current accounting guidance. Under the current lessee accounting model, the Group is required to distinguish between finance leases, which are recognized on the balance sheet, and operating leases, which are not. ASU 2016-02 will require lessees to present a right-of-use asset and a corresponding lease liability on the balance sheet for all leases with a lease term of greater than twelve months. ASU 2016-02 is effective for annual reporting periods beginning after December 15, 2018, and for the interim periods within those annual reporting periods.

The Group has established a cross-functional implementation team and governance structure for the project. The Group is currently reviewing its existing contracts to determine the impact of the adoption of ASU 2016-02. The Group expects an increase in total assets and total liabilities as a result of recognizing right-of-use assets and lease liabilities for all leases under the new guidance and is currently evaluating the extent of the impact of the adoption of ASU 2016-02 on the Group’s results of operations and cash flows.

### 3 Business developments

#### Legal entity structure

In February 2017, Credit Suisse (Schweiz) AG and Credit Suisse Asset Management International Holding Ltd (CSAM IHAG), with a participating interest of 49% and 51%, respectively, incorporated Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG (CSAM Holding), a holding company domiciled in Switzerland. Credit Suisse AG transferred participating interests of 49% in four fund management companies and in Credit Suisse Asset Management (Schweiz) AG (CSAM Schweiz) to Credit Suisse (Schweiz) AG by way of an a-fonds-perdu contribution (i.e., without consideration). Subsequently, Credit Suisse (Schweiz) AG contributed these participating interests to CSAM Holding. The remaining 51% in these five entities were contributed to CSAM Holding through CSAM IHAG. CSAM Schweiz was incorporated in February 2017 and received the Swiss-related asset management business from Credit Suisse AG through a transfer of assets in accordance with the Swiss Merger Act. All transfers of participations were made at the participations’ Swiss GAAP carrying value as recorded by the transferor.

In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division, the following equity stakes held by the Group were transferred to Credit Suisse (Schweiz) AG: (i) 100% equity stake in Neue Aargauer Bank AG, (ii) 100% equity stake in BANK-now AG, and (iii) 50% equity stake in Swisscard AECS GmbH. The transfer of these equity stakes took place by way of an a-fonds-perdu contribution from the Group to Credit Suisse AG and immediately thereafter via a subsequent sale of those equity stakes from Credit Suisse AG to Credit Suisse (Schweiz) AG. The a-fonds-perdu contribution and the subsequent sale took place at the respective equity stakes’ aggregate Swiss GAAP carrying value as recorded by the Group. The transfer was completed on March 31, 2017.

#### Proposed capital increase

The Board of Directors will propose to an Extraordinary General Meeting of shareholders to be held on May 18, 2017 a rights offering and share capital increase through the issuance of new shares to existing shareholders of Credit Suisse Group AG, if permitted

under applicable local laws. Under the terms of this rights offering, Credit Suisse Group AG plans to issue up to 404,526,794 new registered shares with a par value of CHF 0.04 each. The Group expects the net proceeds of the rights offering to amount to approximately CHF 4 billion, excluding the issuance of any new

shares resulting from the exercise of rights allotted on shares received as scrip dividend. In connection with the announcement of the proposed capital increase, the Group also announced that it will not pursue a partial initial public offering of the Swiss banking subsidiary Credit Suisse (Schweiz) AG.

## 4 Segment information

### Overview

The Group is a global financial services company domiciled in Switzerland and serves its clients through three regionally focused divisions: Swiss Universal Bank, International Wealth Management and Asia Pacific. These regional businesses are supported by two other divisions specialized in investment banking capabilities: Global Markets and Investment Banking & Capital Markets. The Strategic Resolution Unit consolidates the remaining portfolios

from the former non-strategic units plus additional businesses and positions that do not fit with the strategic direction. The segment information reflects the Group's six reportable segments and the Corporate Center, which are managed and reported on a pre-tax basis.

► Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on segment information, revenue sharing and cost allocation and funding.

## 12 Restructuring expenses

In connection with the strategic review of the Group, restructuring expenses of CHF 137 million and CHF 49 million and CHF 255 million were recognized in 1Q17, 4Q16 and 1Q16, respectively.

Restructuring expenses primarily include termination costs, expenses in connection with the acceleration of certain deferred compensation awards and real estate contract termination costs.

<sup>1</sup> The following items for which expense accretion was accelerated in 1Q17, 4Q16 and 1Q16 due to the restructuring of the Group are not included in the restructuring provision: unsettled share-based compensation of CHF 15 million, CHF (14) million and CHF 33 million, respectively, and unsettled pension obligations of CHF 42 million, CHF (6) million and CHF 23 million, respectively, which remain classified as a component of total shareholders' equity; and unsettled cash-based deferred compensation of CHF 10 million, CHF 14 million and CHF 70 million, respectively, which remain classified as compensation liabilities; and accelerated accumulated depreciation and impairment of CHF 0 million, CHF 18 million and CHF 0 million, respectively, which remain classified as premises and equipment. The settlement date for the unsettled share-based compensation remains unchanged at three years.

### 13 Earnings per share

in	1Q17	4Q16	1Q16
<b>Basic net income/(loss) attributable to shareholders (CHF million)</b>			
<b>Net income/(loss) attributable to shareholders for basic earnings per share</b>	<b>596</b>	<b>(2,619)</b>	<b>(302)</b>
Available for common shares	596	(2,619)	(302)
Available for unvested share-based payment awards	0	0	0
<b>Diluted net income/(loss) attributable to shareholders (CHF million)</b>			
<b>Net income/(loss) attributable to shareholders for diluted earnings per share</b>	<b>596</b>	<b>(2,619)</b>	<b>(302)</b>
Available for common shares	596	(2,619)	(302)
Available for unvested share-based payment awards	0	0	0
<b>Weighted-average shares outstanding (million)</b>			
<b>Weighted-average shares outstanding for basic earnings per share available for common shares</b>	<b>2,125.9</b>	<b>2,102.0</b>	<b>1,980.7</b>
Dilutive share options and warrants	3.8	0.0	0.0
Dilutive share awards	55.1	0.0	0.0
<b>Weighted-average shares outstanding for diluted earnings per share available for common shares <sup>1</sup></b>	<b>2,184.8</b>	<b>2,102.0 <sup>2</sup></b>	<b>1,980.7 <sup>2</sup></b>
<b>Weighted-average shares outstanding for basic/diluted earnings per share available for unvested share-based payment awards</b>	<b>0.1</b>	<b>0.1</b>	<b>10.3</b>
<b>Earnings/(loss) per share available for common shares (CHF)</b>			
<b>Basic earnings/(loss) per share available for common shares</b>	<b>0.28</b>	<b>(1.25)</b>	<b>(0.15)</b>
<b>Diluted earnings/(loss) per share available for common shares</b>	<b>0.27</b>	<b>(1.25)</b>	<b>(0.15)</b>

<sup>1</sup> Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 7.8 million, 12.1 million and 7.5 million for 1Q17, 4Q16 and 1Q16, respectively.

<sup>2</sup> Due to the net losses in 4Q16 and 1Q16, 3.7 million and 2.3 million, respectively, of weighted-average share options and warrants outstanding and 68.8 million and 53.7 million, respectively, of weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

In 1Q17, 4Q16 and 1Q16, the Group did not experience a default on any loan that had been restructured within the previous 12 months.

In 1Q17, the loan modifications of the Group included extended loan repayment and interest payment terms, including the suspension of annual loan amortizations, modifications of covenants and a waiver of a loan termination.

## 17 Goodwill

## Goodwill

1Q17	Swiss Universal Bank	International Wealth Management	Asia Pacific	Global Markets	Investment Banking & Capital Markets	Strategic Resolution Unit	Credit Suisse Group
<b>Gross amount of goodwill (CHF million)</b>							
Balance at beginning of period	623	1,612	2,318	3,195	1,044	12	8,804
Foreign currency translation impact	(7)	(28)	(24)	(8)	(11)	0	(78)
Other	0	(4)	0	0	0	0	(4)
Balance at end of period	616	1,580	2,294	3,187	1,033	12	8,722
<b>Accumulated impairment (CHF million)</b>							
Balance at beginning of period	0	0	772	2,719	388	12	3,891
Balance at end of period	0	0	772	2,719	388	12	3,891
<b>Net book value (CHF million)</b>							
Net book value	616	1,580	1,522	468	645	0	4,831

In accordance with US GAAP, the Group continually assesses whether or not there has been a triggering event requiring a review of goodwill. As of March 31, 2017, the Group's market capitalization was below book value.

On December 7, 2016, and on February 14, 2017, the Group announced a reorganization and change to financial reporting affecting its Swiss Universal Bank and Asia Pacific segments. During 1Q17, these measures were implemented. The Group determined that these changes constituted triggering events. The Group's reporting units as a result of these measures are defined as follows: Swiss Universal Bank – Private Clients (formerly Private Banking), Swiss Universal Bank – Corporate & Institutional Clients (formerly Corporate & Institutional Banking), International Wealth Management – Private Banking, International Wealth Management – Asset Management, Asia Pacific – Wealth Management & Connected (formerly Private Banking), Asia Pacific – Markets (formerly Investment Banking), Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit.

The carrying value of each reporting unit for the purpose of the goodwill impairment test is determined by considering the

reporting units' risk-weighted assets usage, leverage ratio exposure, deferred tax assets, goodwill and intangible assets. Any residual equity, after considering the total of these elements, is allocated to the reporting units on a pro-rata basis.

In estimating the fair value of its reporting units, the Group applied a combination of the market approach and the income approach. Under the market approach, consideration was given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows, which are determined from the Group's financial plan.

In determining the estimated fair value, the Group relied upon its updated five-year strategic business plan which included significant management assumptions and estimates based on its view of current and future economic conditions and regulatory changes.

Goodwill is tested for impairment before and immediately after a reorganization or restructuring of reporting units. As a result, the

goodwill impairment test was performed during 1Q17 under the old business structure and then again under the modified structure according to the measures implemented in connection with the announcements on December 7, 2016 and on February 14, 2017.

The Group concluded that the estimated fair value for all of its reporting units impacted by the measures implemented in connection with the December 7, 2016 and February 14, 2017 announcements substantially exceeded their related carrying values and that no impairment was necessary.

The results of the impairment evaluation of each reporting unit's goodwill would be significantly impacted by adverse changes in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a significant margin from its best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, the Group could potentially incur material impairment charges in the future.

## 18 Other assets and other liabilities

In addition to the treasury shares, a maximum of 680,000,000 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 515,145,579 of these shares were reserved for capital instruments.

## 21 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

### Derivatives

The Group transacts bilateral OTC derivatives mainly under the International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC

derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values (PRV/NRV) and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Exchange-traded derivatives or OTC-cleared derivatives, that are fully margined and for which the daily margin payments constitute settlement of the outstanding exposure, are not included in the offsetting disclosures because they are not subject to offsetting due to the daily settlement. The daily margin payments, which are not settled until the next settlement cycle is conducted, are presented in brokerage receivables or brokerage payables. The notional amount for these daily settled derivatives is included in the fair value of derivative instruments table in "Note 25 – Derivatives and hedging activities".

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcable hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and trading liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

<sup>1</sup> Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

### Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at

inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, substantially all of the collateral received that may be sold or repledged was sold or repledged as of March 31, 2017 and December 31, 2016. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

### Offsetting of securities purchased under resale agreements and securities borrowing transactions

<b>Total</b>	<b>168.4</b>	<b>(30.4)</b>	<b>138.0 <sup>2</sup></b>	<b>166.1</b>	<b>(31.4)</b>	<b>134.7 <sup>2</sup></b>

<sup>1</sup> Represents securities purchased under resale agreements and securities borrowing transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

<sup>2</sup> CHF 94,113 million and CHF 87,331 million of the total net amount as of March 31, 2017 and December 31, 2016, respectively, are reported at fair value.

The following table presents the gross amount of securities sold under repurchase agreements and securities lending transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities sold under repurchase

agreements and securities lending transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

### Offsetting of securities sold under repurchase agreements and securities lending transactions

end of	1Q17			4Q16		
	Gross	Offsetting	Net	Gross	Offsetting	Net
<b>Securities sold under repurchase agreements and securities lending transactions (CHF billion)</b>						
Securities sold under repurchase agreements	51.3	(27.8)	23.5	51.3	(29.0)	22.3
Securities lending transactions	9.9	(2.6)	7.3	8.3	(2.4)	5.9
Obligation to return securities received as collateral, at fair value	37.6	0.0	37.6	31.9	0.0	31.9

<b>Total not subject to enforceable master netting agreements <sup>1</sup></b>	<b>7.3</b>	<b>–</b>	<b>7.3</b>	<b>5.5</b>	<b>–</b>	<b>5.5</b>
<b>Total</b>	<b>106.1</b>	<b>(30.4)</b>	<b>75.7</b>	<b>97.0</b>	<b>(31.4)</b>	<b>65.6</b>
of which securities sold under repurchase agreements and securities lending transactions	68.5	(30.4)	38.1 <sup>2</sup>	64.4	(31.4)	33.0 <sup>2</sup>
of which obligation to return securities received as collateral, at fair value	37.6	0.0	37.6	32.6	0.0	32.6

<sup>1</sup> Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

<sup>2</sup> CHF 21,150 million and CHF 19,634 million of the total net amount as of March 31, 2017 and December 31, 2016, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and

borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

### Amounts not offset in the consolidated balance sheets

end of	1Q17				4Q16			
	Net	Financial instruments <sup>1</sup>	Cash collateral received/pledged <sup>1</sup>	Net exposure	Net	Financial instruments <sup>1</sup>	Cash collateral received/pledged <sup>1</sup>	Net exposure
<b>Financial assets subject to enforceable master netting agreements (CHF billion)</b>								
Derivatives	17.5	5.3	0.0	12.2	21.3	6.3	0.0	15.0
Securities purchased under resale agreements	77.7	77.7	0.0	0.0	73.0	73.0	0.0	0.0
Securities borrowing transactions	20.0	19.2	0.0	0.8	19.5	18.6	0.0	0.9
<b>Total financial assets subject to enforceable master netting agreements</b>	<b>115.2</b>	<b>102.2</b>	<b>0.0</b>	<b>13.0</b>	<b>113.8</b>	<b>97.9</b>	<b>0.0</b>	<b>15.9</b>
<b>Financial liabilities subject to enforceable master netting agreements (CHF billion)</b>								
Derivatives	10.7	2.9	0.0	7.8	14.0	3.3	0.0	10.7
Securities sold under repurchase agreements	23.5	23.5	0.0	0.0	22.3	22.3	0.0	0.0
Securities lending transactions	7.3	7.0	0.0	0.3	5.9	5.7	0.0	0.2
Obligation to return securities received as collateral, at fair value	37.6	35.5	0.0	2.1	31.9	30.4	0.0	1.5
<b>Total financial liabilities subject to enforceable master netting agreements</b>	<b>79.1</b>	<b>68.9</b>	<b>0.0</b>	<b>10.2</b>	<b>74.1</b>	<b>61.7</b>	<b>0.0</b>	<b>12.4</b>

<sup>1</sup> The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of credit default swaps (CDS) and credit insurance contracts.

Therefore, the net exposure presented in the table above is not representative of the Group's counterparty exposure.

## 22 Tax

The 1Q17 income tax expense of CHF 78 million includes the impact of the continuous reassessment of the estimated annual effective tax rate as well as the impact of items that need to be recorded in the specific interim period in which they occur. Further details are outlined in the tax expense reconciliation below.

Net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities are presented in the following manner. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of March 31, 2017, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 5.2 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 115 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Japan – 2012; Switzerland – 2011; Brazil – 2010; the US – 2010; the UK – 2009; and the Netherlands – 2005.

### Effective tax rate

in	1Q17	4Q16	1Q16
Effective tax rate (%)	11.6	(18.8)	37.0

### Tax expense reconciliation

in	1Q17
<b>CHF million</b>	
<b>Income tax expense computed at the Swiss statutory tax rate of 22%</b>	<b>147</b>
Increase/(decrease) in income taxes resulting from	
Foreign tax rate differential	(25)
Changes in tax law and rates	0
Other non-deductible expenses	168
Changes in deferred tax valuation allowance	76
Lower taxed income	(36)
Change in recognition of outside basis difference	3
Other	(255)
<b>Income tax expense</b>	<b>78</b>

### Foreign tax rate differential

1Q17 included a foreign tax benefit of CHF 25 million in respect of earnings in lower tax jurisdictions, such as Singapore, as well as earnings in higher tax jurisdictions, such as the US.

### Other non-deductible expenses

1Q17 included the impact of CHF 155 million relating to the non-deductible interest expenses and non-deductible bank levy costs and other non-deductible expenses of CHF 13 million.

### Changes in deferred tax valuation allowance

1Q17 included the impact of the increase of valuation allowances of CHF 80 million mainly in respect of four of the Group's operating entities, two in the UK, one in Asia and one in Switzerland, and a decrease of valuation allowances of CHF 4 million mainly in respect of one of the Group's operating entities in Switzerland, related to estimated current year earnings.

### Lower taxed income

1Q17 included the impacts of CHF 22 million related to non-taxable life insurance income and a beneficial earnings mix in one of the Group's operating entities in Switzerland of CHF 14 million.

### Change in recognition of outside basis difference

1Q17 included a CHF 3 million income tax expense related to a change in the outside basis difference relating to Swiss subsidiary investments.

### Other

1Q17 included a tax benefit of CHF 110 million associated with the establishment of Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG in Switzerland and a tax benefit for the reassessment relating to the tax deductibility of previously taken litigation accruals of CHF 85 million, a tax benefit of CHF 32 million relating to the decrease of tax contingency accruals and a tax benefit of CHF 9 million from own-credit revaluation losses. The remaining balance included various smaller items.

### Net deferred tax assets

end of	1Q17	4Q16
<b>Net deferred tax assets (CHF million)</b>		
Deferred tax assets <sup>1</sup>	7,825	5,828
of which net operating losses	2,543	2,178
of which deductible temporary differences	5,282	3,650
Deferred tax liabilities	(176)	(129)
<b>Net deferred tax assets</b>	<b>7,649</b>	<b>5,699</b>

<sup>1</sup> Includes a reclassification from other assets to deferred tax assets in 1Q17 as a result of the early adoption of ASU 2016-16. Refer to "Note 2 – Recently issued accounting standards" for further information.

## 23 Employee deferred compensation

The Group's current and previous deferred compensation plans include share awards, performance share awards, Contingent Capital Awards (CCA), Capital Opportunity Facility awards, Plus Bond awards, 2008 Partner Asset Facilities awards (PAF) and other cash awards.

► Refer to "Note 29 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information.

The following tables show the compensation expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 1Q17 and prior periods and the remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized compensation expense was based on the fair value of each award on the grant date and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

### Deferred compensation expense

in	1Q17	4Q16	1Q16
<b>Deferred compensation expense (CHF million)</b>			
Share awards	146	147	195
Performance share awards	98	84	119
Contingent Capital Awards	85	89	19
Contingent Capital share awards	5	14	–
Capital Opportunity Facility awards	4	3	3
Plus Bond awards <sup>1</sup>	0	0	5
2008 Partner Asset Facility awards <sup>2</sup>	7	8	(8)
Other cash awards	95	93	33
<b>Total deferred compensation expense</b>	<b>440</b>	<b>438</b>	<b>366</b>

<sup>1</sup> Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.

<sup>2</sup> Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

**Estimated unrecognized deferred compensation**

end of	1Q17
<b>Estimated unrecognized compensation expense (CHF million)</b>	
Share awards	862
Performance share awards	453
Contingent Capital Awards	268
Contingent Capital share awards	18
Other cash awards	209
<b>Total</b>	<b>1,810</b>
<b>Weighted-average requisite service period (years)</b>	
Aggregate remaining weighted-average requisite service period	1.4

**1Q17 activity**

In 1Q17, the Group granted share awards, performance share awards and CCA as part of the 2016 deferred variable compensation. Expense recognition for these awards began in 1Q17 and will continue over the remaining service or vesting period of each respective award.

**Share awards**

In 1Q17, the Group granted 41.7 million share awards at a weighted-average share price of CHF 15.42. Each share award granted entitles the holder of the award to receive one Group share, subject to service conditions. Share awards vest over three years with one third of the share awards vesting on each of the three anniversaries of the grant date (ratable vesting), with the exception of awards granted to individuals classified as risk managers or senior managers under the UK Prudential Regulatory Authority (PRA) Remuneration Code. Share awards granted to risk managers vest over five years with one fifth of the award vesting on each of the five anniversaries of the grant date, while share awards granted to senior managers vest over five years commencing on the third anniversary of the grant date, with one fifth of the award vesting on each of the third to seventh anniversaries of the grant date. Share awards are expensed over the service period of the awards.

**Share-based award activity**

	1Q17		
	Share awards	Performance share awards	Contingent Capital share awards
Number of awards (in millions)			
<b>Share-based award activities</b>			
<b>Balance at beginning of period</b>	<b>73.2</b>	<b>48.4</b>	<b>13.5</b>
Granted	41.7	29.4	0.0
Settled	(1.7)	0.0	0.0
Forfeited	(0.2)	(0.1)	0.0
<b>Balance at end of period</b>	<b>113.0</b>	<b>77.7</b>	<b>13.5</b>
of which vested	37.2	27.1	5.6
of which unvested	75.8	50.6	7.9

**Performance share awards**

In 1Q17, the Group granted 29.4 million performance share awards at a weighted-average share price of CHF 15.42. Performance share awards are similar to share awards, except that the full balance of outstanding performance share awards, including those awarded in prior years, are subject to performance-based malus provisions.

**Contingent Capital Awards**

In 1Q17, the Group awarded CHF 229 million of CCA. CCA are scheduled to vest on the third anniversary of the grant date, other than those granted to individuals classified as risk managers or senior managers under the UK PRA Remuneration Code, where CCA vest on the fifth and seventh anniversaries of the grant date, respectively, and will be expensed over the vesting period.

**2008 Partner Asset Facility**

In 1Q17, the final settlement of the outstanding PAF awards of CHF 754 million was made.

## 24 Pension and other post-retirement benefits

The Group expects to contribute CHF 442 million to the Swiss and international defined benefit plans and other post-retirement defined benefit plans in 2017. As of the end of 1Q17, CHF 136 million of contributions have been made.

### Components of total benefit costs

in	1Q17	4Q16	1Q16
<b>Total benefit costs (CHF million)</b>			
Service costs on benefit obligation	66	76	77
Interest costs on benefit obligation	37	66	70
Expected return on plan assets	(152)	(178)	(178)
Amortization of recognized prior service cost/(credit)	(32)	(29)	(29)
Amortization of recognized actuarial losses	101	102	105
<b>Net periodic benefit costs</b>	<b>20</b>	<b>37</b>	<b>45</b>
Settlement losses/(gains)	(1)	94	2
Curtailment losses/(gains)	(18)	(7)	(7)
Special termination benefits	0	11	1
<b>Total benefit costs</b>	<b>1</b>	<b>135</b>	<b>41</b>

## 25 Derivatives and hedging activities

► Refer to "Note 32 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information.

### Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to "Note 28 – Financial instruments" for further information.

### Fair value of derivative instruments

<sup>3</sup> Included in other revenues.

<sup>4</sup> Included in total other operating expenses.

As of the end of 1Q17, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was five years.

The net loss associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months is CHF 19 million.

### Net investment hedges

in	1Q17	4Q16	1Q16
<b>Gains/(losses) recognized in AOCI on derivatives (CHF million)</b>			
Foreign exchange products	(187)	(156)	(20)
<b>Total</b>	<b>(187)</b>	<b>(156)</b>	<b>(20)</b>

Represents gains/(losses) on effective portion.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 7 – Trading revenues" for gains and losses on trading activities by product type.

### Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch, two-notch and a three-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

## Contingent credit risk

end of	1Q17							4Q16
	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total	Bilateral counterparties	Special purpose entities	Accelerated terminations	Total

## Credit derivatives

► Refer to “Note 32 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on credit derivatives.

## Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its

underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Total return swaps (TRS) of CHF 7.6 billion and CHF 7.8 billion as of the end of 1Q17 and 4Q16, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

<sup>1</sup> Represents credit protection purchased with identical underlyings and recoveries.

<sup>2</sup> Based on internal ratings of BBB and above.

<sup>3</sup> Includes synthetic securitized loan portfolios.

**Credit protection sold**

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

**Credit protection purchased**

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

**Other protection purchased**

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

**Fair value of credit protection sold**

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

**Credit derivatives**

end of	1Q17	4Q16
<b>Credit derivatives (CHF billion)</b>		
Credit protection sold	242.6	238.6
Credit protection purchased	227.6	228.9
Other protection purchased	80.9	83.4
Other instruments <sup>1</sup>	7.3	7.8
<b>Total credit derivatives</b>	<b>558.4</b>	<b>558.7</b>

<sup>1</sup> Consists of total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

**Maturity of credit protection sold**

end of	Maturity less than 1 year	Maturity between 1 to 5 years	Maturity greater than 5 years	Total
<b>1Q17 (CHF billion)</b>

<b>Total instruments</b>	<b>59.4</b>	<b>141.6</b>	<b>41.6</b>	<b>242.6</b>
<b>4Q16 (CHF billion)</b>				
Single-name instruments	24.2	72.7	5.8	102.7
Multi-name instruments	27.5	84.7	23.7	135.9
<b>Total instruments</b>	<b>51.7</b>	<b>157.4</b>	<b>29.5</b>	<b>238.6</b>

**26 Guarantees and commitments****Guarantees**

In the ordinary course of business, guarantees are provided that contingently obligate the Group to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the higher of the initial fair value (generally the related fee received or receivable) less cumulative amortization and the Group's current

best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, derivatives and other guarantees. The Group no longer provides guarantees for securities lending indemnifications.

► Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a detailed description of guarantees.

## Guarantees

end of	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Carrying value	Collateral received
<b>1Q17 (CHF million)</b>						
Credit guarantees and similar instruments	2,097	1,075	3,172	2,954	12	1,972
Performance guarantees and similar instruments	5,132	1,705	6,837	5,851	58	2,988
Derivatives <sup>2</sup>	16,943	8,150	25,093	25,093	608	– <sup>3</sup>
Other guarantees	3,726	1,595	5,321	5,317	46	3,447
<b>Total guarantees</b>	<b>27,898</b>	<b>12,525</b>	<b>40,423</b>	<b>39,215</b>	<b>724</b>	<b>8,407</b>
<b>4Q16 (CHF million)</b>						
Credit guarantees and similar instruments	1,962	1,171	3,133	2,913	13	2,043
Performance guarantees and similar instruments	5,109	2,005	7,114	6,124	76	3,090
Derivatives <sup>2</sup>	15,864	7,943	23,807	23,807	684	– <sup>3</sup>
Other guarantees	3,460	2,000	5,460	5,456	44	3,668
<b>Total guarantees</b>	<b>26,395</b>	<b>13,119</b>	<b>39,514</b>	<b>38,300</b>	<b>817</b>	<b>8,801</b>

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

<sup>3</sup> Collateral for derivatives accounted for as guarantees is not significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2016 to June 30, 2017 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees.

### Representations and warranties on residential mortgage loans sold

In connection with the former Investment Banking division's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac; institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value

ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims made within the statute of limitations (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

During the first three months of 2017, the Group received repurchase claims for residential mortgage loans that were not significant, and loans repurchased during this period and related losses were not significant. The balance of outstanding repurchase claims as of the end of 1Q17 was not significant.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in this Guarantees and commitments disclosure but are addressed in litigation and related loss contingencies and provisions. The Group is involved in litigation relating to representations and warranties on residential mortgages sold.

► Refer to "Note 30 – Litigation" for further information.

### Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the “Guarantees” table.

► Refer to “Disposal-related contingencies and other indemnifications” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a description of these guarantees.

### Other commitments

end of	1Q17					4Q16				
	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Collateral received	Maturity less than 1 year	Maturity greater than 1 year	Total gross amount	Total net amount <sup>1</sup>	Collateral received

<sup>1</sup> Total net amount is computed as the gross amount less any participations.

<sup>2</sup> Irrevocable loan commitments do not include a total gross amount of CHF 102,858 million and CHF 95,743 million of unused credit limits as of the end of 1Q17 and 4Q16, respectively, which were revocable at the Group's sole discretion upon notice to the client.

## 27 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

### TRANSFERS OF FINANCIAL ASSETS

#### Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue CMBS, RMBS and asset-backed

### Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

► Refer to “Other commitments” in V – Consolidated financial statements – Credit Suisse Group – Note 33 – Guarantees and commitments in the Credit Suisse Annual Report 2016 for a description of these commitments.

securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repack an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include managed CLOs, CLOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CLOs are collateralized by loans transferred to the CLO vehicle and pay a return based on the returns on the loans. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client

collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and loans involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 1Q17 and 1Q16 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

## Securitizations

in	1Q17	1Q16
<b>Gains and cash flows (CHF million)</b>		
<b>CMBS</b>		
Net gain/(loss) <sup>1</sup>	18	(2)
Proceeds from transfer of assets	1,256	2,427
Cash received on interests that continue to be held	10	19
<b>RMBS</b>		
Net gain/(loss) <sup>1</sup>	5	(1)
Proceeds from transfer of assets	2,602	2,718
Servicing fees	1	1
Cash received on interests that continue to be held	66	99
<b>Other asset-backed financings</b>		
Net gain <sup>1</sup>	11	8
Proceeds from transfer of assets	990	554
Fees <sup>2</sup>	28	29
Cash received on interests that continue to be held	0	1

<sup>1</sup> Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

<sup>2</sup> Represents management fees and performance fees earned for investment management services provided to managed CLOs.

## Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

► Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 1Q17 and 4Q16, regardless of when the transfer of assets occurred.

## Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

end of	1Q17	4Q16
<b>CHF million</b>		
<b>CMBS</b>		
Principal amount outstanding	25,565	28,779
Total assets of SPE	37,387	40,234
<b>RMBS</b>		
Principal amount outstanding	37,275	38,319
Total assets of SPE	38,546	39,680
<b>Other asset-backed financings</b>		
Principal amount outstanding	16,194	19,777
Total assets of SPE	32,720	36,049

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

## Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

### Key economic assumptions at the time of transfer

► Refer to "Note 28 – Financial instruments" for information on fair value hierarchy levels.

### Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

at time of transfer, in	1Q17		1Q16	
	CMBS	RMBS	CMBS	RMBS
<b>CHF million, except where indicated</b>				
Fair value of beneficial interests	49	169	29	720
of which level 2	49	167	29	670
of which level 3	0	3	0	50
Weighted-average life, in years	7.6	6.8	11.1	6.6
Prepayment speed assumption (rate per annum), in % <sup>1</sup>	– <sup>2</sup>	5.0–15.7	– <sup>2</sup>	8.1–22.3
Cash flow discount rate (rate per annum), in % <sup>3</sup>	2.5–3.3	2.3–7.5	2.9–4.9	1.4–7.1
Expected credit losses (rate per annum), in %	0.9–0.9	1.0–3.0	0.0–0.0	0.0–0.0

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

<sup>1</sup> Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>2</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>3</sup> The rate was based on the weighted-average yield on the beneficial interests.

### Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 1Q17 and 4Q16.

### Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

end of	1Q17			4Q16

Impact on fair value from 10% adverse change	(2.5)	(20.6)	(4.7)	(3.5)	(27.3)	(5.1)
Impact on fair value from 20% adverse change	(4.9)	(40.2)	(9.3)	(6.9)	(53.3)	(10.0)

<sup>1</sup> To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

<sup>2</sup> CDOs and CLOs within this category are generally structured to be protected from prepayment risk.

<sup>3</sup> PSA is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the CPR assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2 percentage points thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

<sup>4</sup> The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

#### Transfers of financial assets where sale treatment was not achieved

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 1Q17 and 4Q16.

► Refer to "Note 29 – Assets pledged and collateral" for further information.

Other assets	17	12
Liability to SPE, included in Other liabilities	(395)	(252)

#### Transfers of financial assets accounted for as a sale

US GAAP requires the disclosure of a transaction accounted for as a sale that comprises both of the following: a transfer of financial assets to a transferee and an agreement entered into in contemplation of the initial transfer with the transferee that results in the transferor retaining substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. In the ordinary course of business, the Group transfers a financial asset accounted for as a sale and, in some instances, enters into an agreement in contemplation of that initial transfer with the same counterparty to retain substantially all of the economics of that transferred financial asset. As of the end of 1Q17 and 4Q16, the Group had agreements in the form of longevity swaps on life insurance policies.

The following table presents information about the transfers of financial assets accounted for as sales with agreements that result in the Group retaining substantially all of the exposure to the economic return on the transferred assets at the date of sale and remain outstanding as of the end of 1Q17 and 4Q16, respectively, gross cash proceeds received for assets derecognized at the date of sale and the fair values of transferred assets and the aforementioned agreements as of the end of 1Q17 and 4Q16.

#### Transfer of financial assets accounted for as sales – by transaction type

	at date of derecognition		end of

<sup>1</sup> Balances presented on a gross basis, before application of counterparty and cash collateral netting.

<sup>2</sup> As of the end of 1Q17, gross derivative assets of CHF 534 million were included in other products, as disclosed in Note 25 – Derivatives and hedging activities.

<sup>3</sup> As of the end of 4Q16, gross derivative assets of CHF 556 million were included in other products, as disclosed in Note 25 – Derivatives and hedging activities.

### Securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings

For securities sold under repurchase agreements and securities lending transactions accounted for as secured borrowings, US GAAP requires the disclosure of the collateral pledged and the associated risks to which a transferor continues to be exposed after the transfer. This provides an understanding of the nature and risks of short-term collateralized financing obtained through these types of transactions.

Securities sold under repurchase agreements and securities lending transactions represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activities. These transactions are collateralized principally by government debt securities, corporate debt securities, asset-backed securities, equity securities and other collateral and have terms ranging from on demand to a longer period of time.

In the event of the Group's default or a decline in fair value of collateral pledged, the repurchase agreement or security lending transaction provides the counterparty with the right to liquidate the collateral held or request additional collateral.

The following tables provide the gross obligation relating to securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral by the class of collateral pledged and by remaining contractual maturity as of the end of 1Q17 and 4Q16.

<sup>1</sup> Includes contracts with no contractual maturity that may contain termination arrangements subject to a notice period.

<sup>2</sup> Includes overnight transactions.

► Refer to "Note 21 – Offsetting of financial assets and financial liabilities" for further information on the gross amount of securities sold under repurchase agreements, securities lending transactions and obligation to return securities received as collateral and the net amounts disclosed in the consolidated balance sheets.

## VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDO/CLOs, CP conduits and financial intermediation.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

### Collateralized debt obligations

The Group engages in CDO/CLO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

### Commercial paper conduit

In 2Q16, the Group established Alpine Securitization Ltd (Alpine), a multi-seller asset-backed CP conduit used for client and Group financing purposes. The Group acts as the administrator and provider of liquidity and credit enhancement facilities for Alpine. Alpine discloses to CP investors certain portfolio and asset data and submits its portfolio to rating agencies for public ratings. This CP conduit purchases assets such as loans and receivables or enters into reverse repurchase agreements and finances such activities through the issuance of CP backed by these assets. The CP conduit can enter into liquidity facilities with third-party entities pursuant to which it may purchase assets from these entities to provide them with liquidity and credit support. The financing transactions are structured to provide credit support to the CP conduit in the form of over-collateralization and other asset-specific enhancements. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity facility provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting

purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 127 days as of the end of 1Q17. Alpine was rated A-1(sf) by Standard & Poor's and P-1(sf) by Moody's and had exposures in a reverse repurchase agreement, credit card receivables, car loans and student loans.

The Group's commitment to this CP conduit consists of obligations under liquidity agreements. The liquidity agreements are asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The asset-specific credit enhancements provided by the client seller of the assets remain unchanged as a result of such a purchase. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit.

The Group's economic risks associated with the CP conduit are included in the Group's risk management framework including counterparty, economic risk capital and scenario analysis.

### Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

### Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 1Q17 and 4Q16.

### Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory,

certain repurchase financings to funds and single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 34 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2016 for further information on non-consolidated VIEs.

## 28 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes);
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

### CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's concentrations of credit risk.

### FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on fair value measurement of financial instruments and the definition of the levels of the fair value hierarchy.

## Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 1Q17, transfers to level 1 out of level 2 were primarily from trading assets. The transfers from trading assets were mainly in equity securities as prices became observable.

In 1Q17, transfers out of level 1 to level 2 were primarily from securities received as collateral, obligations to return securities received as collateral and trading liabilities, mainly in equity securities, for which suitable closing prices were unobtainable as of the end of 1Q17.

Whereof:						
Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date	(487)	(3)	<b>(490)</b>	95	(8)	<b>87</b>

<sup>1</sup> Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

**Transfers in and out of level 3**

Transfers into level 3 assets during 1Q17 were CHF 564 million, primarily from trading assets and loans. The transfers were primarily in the credit and fixed income businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 1Q17 were CHF 1,182 million, primarily in trading assets. The transfers out of level 3 trading assets were primarily in the Strategic Resolution Unit and credit businesses due to increased observability of pricing data and increased availability of pricing information from external providers.

**Qualitative disclosures of valuation techniques**
**Overview**

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's valuation control framework.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables

"Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

**Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions**

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. The significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

**Debt securities**
**Foreign governments and corporates**

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price and correlation. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

#### CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and discount rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity, discount rate and credit spread. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

#### Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs

may include market comparable price and earnings before interest, taxes, depreciation and amortization (EBITDA) multiple.

#### Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

The valuation of derivatives includes an adjustment for the cost of funding uncollateralized OTC derivatives.

#### Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility skew, prepayment rate and basis spread.

#### Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted

future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate, correlation and contingent probability.

#### Equity and index-related derivatives

Equity derivatives include a variety of products ranging from vanilla options and swaps to exotic structures with bespoke payoff profiles. The main inputs in the valuation of equity derivatives may include volatility, buyback probability, gap risk and correlation.

Generally, the interrelationship between the volatility and correlation is positively correlated.

#### Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread and correlation. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

#### Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose,

occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

#### Other investments

##### Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published net asset values (NAVs) as permitted by ASC Topic 820 – Fair Value Measurement. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not in line with the fund's observable market data, it is probable that the investment will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs. The investments for which the fair value is measured using the NAV practical expedient are not categorized within the fair value hierarchy.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

##### Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

#### Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans,

leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a loan pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available. The fair value of the consolidated financial assets of RMBS and CMBS securitization vehicles, which qualify as CFEs, are measured on the basis of the more observable fair value of the VIEs' financial liabilities.

Accrual based loans in the Group's private, corporate and institutional banking businesses, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

### Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an

estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

### Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcable and non-bifurcable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility, credit spread, mean reversion and price.

Generally, the interrelationships between volatility, correlation, gap risk and credit spread inputs are positively correlated.

### Other liabilities

#### Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

### Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

### Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of EBITDA multiple, market implied life expectancy (for life finance instruments), buyback probability, correlation, contingent probability, price, volatility, volatility skew or funding spread, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets with a significant unobservable input of market implied life expectancy (for life settlement and premium finance instruments), capitalization rate, discount rate, prepayment rate, gap risk, recovery rate or credit spread, in general, an

increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities, in general, an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input mean reversion would increase the fair value. An increase in the significant unobservable input basis spread would decrease the fair value.

#### Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial

instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

#### Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

#### Quantitative information about level 3 assets at fair value

### Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above results in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

#### Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

#### Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates to collateral with a greater risk of default.

#### Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

#### Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

#### Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

#### Volatility and volatility skew

Volatility and its skew are both impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility may vary significantly between different underlying currencies and expiration dates on the options. Similarly, in the case of equity derivatives, the volatility attributed to a structure may vary depending upon the underlying reference name on the derivative.

#### Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of the insured.

#### Price

Bond equivalent price is a primary significant unobservable input for multiple products. Where market prices are not available for an instrument, benchmarking may be utilized to identify comparable issues (same industry and similar product mixes) while adjustments are considered for differences in deal terms and performance.

#### Buyback probability

Buyback probability is the probability assigned to structured notes being unwound prior to their legal maturity.

#### Gap risk

Gap risk is the primary significant unobservable input for fund-linked Constant Proportion Portfolio Insurance products and structures where the payoff may be sensitive to discontinuity in the hedging portfolio.

#### Mean reversion

Mean reversion is the primary significant unobservable input for callable constant maturity swap (CMS) spread exotics and represents the idea that prices and returns eventually move back towards the historical average.

#### Funding spread

Funding spread is the primary significant unobservable input for special purpose vehicle funding facilities. Synthetic funding curves which represent the assets pledged as collateral are used to value structured financing transactions. The curves provide an estimate of where secured funding can be sourced and are expressed as a basis point spread in relation to the referenced benchmark rate.

#### Capitalization rate

Capitalization rate is the primary significant unobservable input for CMBS loans and is used to estimate the potential return on investment. This is done by dividing the yearly income by the total value of the property.

#### Basis spread

Basis spread is the primary significant unobservable input for non-callable constant maturity treasury-CMS products and is used to determine interest rate risk as a result of differing lending and borrowing rates.

### EBITDA multiple

EBITDA multiple is a primary significant unobservable input for some equity deals which are benchmarked using industry comparables. The EBITDA multiple may be preferred over other measures because it is normalized for differences between the accounting policies of similar companies.

### Contingent probability

Contingent probability is the primary significant unobservable input for contingent foreign exchange forward trades where the delivery or exercise and the premium payment are contingent on an event such as completion of an M&A deal or regulatory approval for a product.

### Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount

of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which is generally up to 10 years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

### Fair value, unfunded commitments and term of redemption conditions

<sup>1</sup> 64% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period primarily of less than 30 days, 18% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 16% is redeemable on a quarterly basis with a notice period primarily of more than 45 days, and 2% is redeemable on an annual basis with a notice period of more than 60 days.

<sup>2</sup> 58% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period primarily of less than 30 days, 23% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 17% is redeemable on a quarterly basis with a notice period primarily of more than 45 days, and 2% is redeemable on an annual basis with a notice period of more than 60 days.

<sup>3</sup> 61% of the redeemable fair value amount of hedge funds is redeemable on a monthly basis with a notice period primarily of less than 30 days, 34% is redeemable on a quarterly basis with a notice period primarily of more than 45 days, and 5% is redeemable on demand with a notice period primarily of less than 30 days.

<sup>4</sup> 68% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 26% is redeemable on a monthly basis with a notice period primarily of less than 30 days, 5% is redeemable on demand with a notice period primarily of less than 30 days, and 1% is redeemable on an annual basis with a notice period primarily of more than 45 days.

<sup>5</sup> Includes CHF 232 million and CHF 334 million attributable to noncontrolling interests in 1Q17 and 4Q16, respectively.

<sup>6</sup> Includes CHF 216 million and CHF 231 million attributable to noncontrolling interests in 1Q17 and 4Q16, respectively.

<sup>7</sup> Includes CHF 74 million and CHF 88 million attributable to noncontrolling interests in 1Q17 and 4Q16, respectively.

**Nonrecurring fair value changes**

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use. Nonrecurring measurements are completed as of the end of the period unless otherwise stated.

<b>Assets held-for-sale recorded at fair value on a nonrecurring basis</b>	<b>0.1</b>	<b>0.1</b>
of which level 2	0.1	0.1

**FAIR VALUE OPTION**

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in the investment banking businesses and International Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

► Refer to "Note 35 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016 for further information on the Group's election of the fair value option for certain of its financial statement captions.

**Difference between the aggregate fair value and the aggregate unpaid principal balances of loans and financial instruments**

<sup>1</sup> Primarily includes cash and due from banks, interest-bearing deposits with banks, brokerage receivables, loans held-for-sale, cash collateral on derivative instruments, interest and fee receivables and non-marketable equity securities.

<sup>2</sup> Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

## 29 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

### Assets pledged

end of	1Q17	4Q16
<b>Assets pledged (CHF million)</b>		
Total assets pledged or assigned as collateral	124,876	122,805
of which encumbered	84,953	83,473

### Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

### Collateral

end of	1Q17	4Q16
<b>Collateral (CHF million)</b>		
Fair value of collateral received with the right to sell or repledge	415,274	402,690
of which sold or repledged	176,825	167,487

## 30 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 39 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2016* and updated in subsequent quarterly reports (including those discussed below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably estimable; and (b) proceedings where the Group has not accrued

such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must

be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 39 referenced above and updated in quarterly reports (including below) for which the Group believes an estimate is possible is zero to CHF 1.2 billion.

In 1Q17, the Group recorded net litigation provisions of CHF 143 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

#### **Enron-related litigation**

On March 31, 2017, the US District Court for the Southern District of New York (SDNY) presiding in the action *Silvercreek Management Inc. v. Citigroup, Inc., et al.*, granted in part defendants' motion to dismiss, dismissing certain claims against Credit Suisse Securities (USA) LLC (CSS LLC) and its affiliates.

#### **Mortgage-related matters**

##### **Civil litigation**

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

##### **Individual investor actions**

On April 12, 2017, the Supreme Court of the State of New York, New York County (SCNY) presiding in the action brought by Royal Park Investments SA/NV, dismissed with prejudice all

claims against CSS LLC and its affiliate relating to approximately USD 360 million of RMBS at issue.

On May 2, 2017, following a settlement in the amount of USD 400 million, the US District Court for District of Kansas presiding in the action brought by the National Credit Union Administration Board (NCUA) as liquidating agent of the US Central Federal Credit Union, Western Corporate Federal Credit Union and Southwest Corporate Federal Credit Union dismissed with prejudice all claims against CSS LLC and its affiliate related to approximately USD 715 million of RMBS at issue.

##### **Monoline insurer disputes**

On March 31, 2017, the SCNY ruled on both parties' respective summary judgment motions in the action filed by MBIA Insurance Corp. (MBIA) against CSS LLC and certain of its affiliates. The SCNY granted in part and denied in part both parties' respective summary judgment motions, which resulted, among other things, in the dismissal of MBIA's fraud claim with prejudice. Both MBIA and the Credit Suisse entities involved in this action have filed notices of appeal.

#### **Rates-related matters**

On March 24, 2017, plaintiffs filed an amended complaint in lieu of opposing defendants' motions to dismiss in the putative class action in the SDNY, alleging manipulation of the foreign exchange market on behalf of indirect purchasers of foreign exchange instruments. On April 28, 2017, plaintiffs dismissed the pending action and filed the amended complaint as a new putative class action in the SDNY.

On April 7, 2017, plaintiffs filed a consolidated amended complaint in the consolidated class action in the SDNY relating to supranational, sub-sovereign and agency (SSA) bonds. The amended complaint generally alleges that defendants conspired to fix the prices of SSA bonds sold to and purchased from investors in the secondary market.

#### **ATA litigation**

On April 12, 2017, the US District Court for the Southern District of Illinois entered an order granting defendants' motion to transfer the case filed against a number of banks, including Credit Suisse AG, alleging claims under the United States Anti-Terrorism Act (ATA), to the Eastern District of New York for further proceedings.

#### **Cross-border private banking matters**

Credit Suisse offices in various locations have been contacted by regulatory and law enforcement authorities seeking records and information concerning investigations into our historical private banking services on a cross-border basis. Credit Suisse is conducting a review of these issues and has been cooperating with the authorities. Credit Suisse applies a strict zero tolerance policy on tax evasion.

### 31 Subsidiary guarantee information

---

Certain wholly owned finance subsidiaries of the Group, including Credit Suisse Group Funding (Guernsey) Limited, which is a Guernsey incorporated non-cellular company limited by shares, have issued securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law for the Guernsey subsidiary, applicable to some of the Group's subsidiaries that may limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against

Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

As part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing intermediate holding companies in the US for non-US banks, legal entities are re-parented as subsidiaries of Credit Suisse (USA), Inc.

In order to align the corporate structure of Credit Suisse (Schweiz) AG with that of the Swiss Universal Bank division, during 1Q17, the equity stakes in Neue Aargauer Bank AG, BANK-now AG and Swisscard AECS GmbH held by the Group were transferred to Credit Suisse (Schweiz) AG, a wholly owned subsidiary of the Bank.

Prior periods are restated to conform to the current presentation to reflect the impact of such transactions.

### Cautionary statement regarding forward-looking information

This document contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries or in emerging markets in 2017 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including cost efficiency, net new asset, pre-tax income/(loss), capital ratios and return on regulatory capital, leverage exposure threshold, risk-weighted assets threshold and other targets and ambitions;

- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyberattacks on our business or operations;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- the potential effects of proposed changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2016.

## Media Release

### **Annual General Meeting of Credit Suisse Group AG: All Proposals Put Forward by the Board of Directors Approved**

Zurich, April 28, 2017 The shareholders of Credit Suisse Group AG approved all of the proposals of the Board of Directors at today's Annual General Meeting in Zurich. Shareholders approved the distribution for the 2016 financial year of CHF 0.70 per registered share, which they can elect to receive either in the form of new shares (scrip dividend) or in cash or a combination thereof. The increase in authorized capital to service the scrip dividend was also approved by shareholders. In addition, the Annual General Meeting approved the compensation of the Board of Directors and the Executive Board and accepted the 2016 Compensation Report. The Chairman and the other members of the Board of Directors proposed for re-election were confirmed in office for a further term of one year. Andreas Gottschling and Alexandre Zeller were elected as new members of the Board of Directors.

At today's Annual General Meeting of Credit Suisse Group AG in Zurich, shareholders approved all of the proposals put forward by the Board of Directors.

#### **Distribution payable out of capital contribution reserves**

With a majority of 94.99%, shareholders approved a distribution of CHF 0.70 per registered share payable out of capital contribution reserves for the 2016 financial year in the form of a scrip dividend, a cash distribution or a combination thereof. The distribution remains subject to the provisions of foreign law concerning the acquisition of new shares. Should no choice be made, the distribution will be paid out entirely in cash.

Both the delivery of the new shares and the distribution in cash are scheduled for May 24, 2017. The issue price of the new shares will be based on the five-day average of the daily volume-weighted average prices from May 15, 2017 to May 19, 2017 of the registered shares of Credit Suisse Group AG listed on the SIX Swiss Exchange AG, less a discount of 8%.

Further information on the scrip dividend can be found in the 'Shareholder Information – Summary Document', which is available on the Credit Suisse website at: [www.credit-suisse.com/agm](http://www.credit-suisse.com/agm)

#### **Increase of Authorized Capital for Scrip Dividend**

With a majority of 92.95%, shareholders approved the increase in authorized capital in order to service the 2017 scrip dividend. Following the approval by shareholders, the authorized capital reserved for the scrip dividend will be increased from currently CHF 6,299,274.64 (equivalent to 157,481,866 registered shares) to CHF 9,520,000 (equivalent to 238,000,000 registered shares), and Art. 27 of the Articles of Association will be amended accordingly.

**Media Release**  
April 28, 2017  
Page 2/4

#### **Approval of the Compensation of the Board of Directors and the Executive Board**

The Annual General Meeting adopted the proposal to approve a maximum amount of compensation for the Board of Directors of CHF 12.0 million for the period until the 2018 Annual General Meeting with a majority of 73.09%.

Additionally, the Annual General Meeting adopted the proposal of the Board of Directors to approve the aggregate amount of CHF 17.01 million for short-term variable compensation for the Executive Board for the 2016 financial year, with a majority of 59.59%. The Annual General Meeting also adopted the proposal to approve a maximum amount of CHF 31.0 million for the fixed compensation for the Executive Board for the period until the 2018 Annual General Meeting with a majority of 81.69% and approved the maximum amount of CHF 31.2 million for long-term variable compensation for the 2017 financial year, with a majority of 73.52%.

#### **Consultative Vote on the 2016 Compensation Report**

In a consultative vote, shareholders accepted the 2016 Compensation Report, with a majority of 57.98%.

#### **Elections to the Board of Directors**

Chairman Urs Rohner and the other members of the Board of Directors who stood for re-election were confirmed for a further term of office of one year.

Andreas Gottschling and Alexandre Zeller were elected to the Board of Directors as new members for a term of office of one year.

Andreas Gottschling was a member of the management board and chief risk officer of Erste Group Bank AG, Vienna, from 2013 to 2016. From 2012 to 2013, he was a senior advisor in the risk practice at McKinsey & Company, Zurich. Prior to that, he was with Deutsche Bank in London and Frankfurt, as a member of the Risk Executive Committee and Divisional Board from 2005 to 2012, with additional responsibility as Global Head of Operational Risk from 2006 to 2010. From 2003 to 2005, he held the role of Head of Quant Research at LGT Capital Management in Pfäffikon. From 2000 to 2003, he was a consultant at Euroquants, Frankenthal, and a Professor of Finance at Washington State University, Washington. He started his career at Deutsche Bank Research in 1997. Prior to that he studied Mathematics and Economics at Albert-Ludwigs University of Freiburg im Breisgau and Harvard University, and holds a Master and a PhD in Economics from the University of California, San Diego. Andreas Gottschling is a German citizen.

Alexandre Zeller was appointed Chairman of the Board of Directors of Credit Suisse (Schweiz) AG with effect from October 1, 2016. Prior to that, he was Chairman of the Board of Directors of SIX Group AG from May 2013. After completing his studies at the University of Lausanne (Business Administration) and Harvard Business School in Boston (Advanced Management

Program), he worked in International Operational Audit at Nestlé in Vevey from 1984 to 1987. He subsequently held various functions at Credit Suisse in Zurich until 2002, during which time he was appointed to the Executive Board of Credit Suisse Private Banking in 1999 and to the position of CEO Private Banking Switzerland in 2002. After working as the CEO of Banque Cantonale Vaudoise in Lausanne from 2002 to 2008, he then moved to HSBC Private Bank (Suisse) in Geneva, where he worked until 2012 as the CEO, Country Manager Switzerland, and the Regional CEO Global Private Banking EMEA. Since 2012, Alexandre Zeller has held mandates as

**Media Release**

April 28, 2017

Page 3/4

a professional board member with various companies and foundations in Switzerland. Alexandre Zeller is a Swiss citizen.

### **Re-Election of the Members of the Compensation Committee**

The Annual General Meeting re-elected Iris Bohnet, Andreas N. Koopmann, Kai S. Nargolwala as members of the Compensation Committee for a term of one year. Alexandre Zeller was also elected as a new member of the Compensation Committee for a term of one year. Kai S. Nargolwala will serve as Chairman of the Compensation Committee for a term of one year.

**Urs Rohner, Chairman of the Board of Directors of Credit Suisse Group**, commented: "On behalf of the Board of Directors, I would like to thank the shareholders for confirming their support and approving all proposals put forward today. We have noted shareholders' sentiment surrounding compensation. Also going forward, we will continue engaging with our shareholders and duly considering their views in our compensation approach. Following today's elections, I am delighted to welcome Andreas Gottschling and Alexandre Zeller as new members of our Board of Directors. I believe that the Board of Directors will benefit significantly from their strong track record and expertise in financial services and risk management. I also wish to express my considerable thanks to Noreen Doyle, Jean Lanier and Jassim Bin Hamad J.J. Al Thani for their personal contributions to the Board of Directors."

### **Voting Results**

All the voting results, together with the speeches of Urs Rohner, Chairman of the Board of Directors, and Tidjane Thiam, Chief Executive Officer, are available online in English, German and French at: [www.credit-suisse.com/agm](http://www.credit-suisse.com/agm)

### **Composition of the Board of Directors as of April 28, 2017**

The composition of the Board of Directors has changed following the elections. Richard E. Thornburgh was appointed Vice-Chair for a further term of one year. Severin Schwan was newly appointed as Vice-Chair as well as Lead Independent Director for a term of one year. See pdf for table showing the new composition of the Board of Directors.

### **Credit Suisse AG**

Credit Suisse AG is one of the world's leading financial services providers and is part of the Credit Suisse group of companies (referred to here as 'Credit Suisse'). As an integrated bank, Credit Suisse offers clients its combined expertise in the areas of private banking, investment banking and asset management. Credit Suisse provides advisory services, comprehensive solutions and innovative products to companies, institutional clients and high-net-worth private clients globally, as well as to retail clients in Switzerland. Credit Suisse is headquartered in Zurich and operates in about 50 countries worldwide. The group employs approximately 46,640 people. The registered shares (CSGN) of Credit Suisse's parent company, Credit Suisse Group AG, are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found at [www.credit-suisse.com](http://www.credit-suisse.com).

A "Shareholder Information – Summary Document" containing a more detailed description of the option to receive the distribution in new shares is available to shareholders of Credit Suisse Group. The conditions for the exercise of the scrip alternative, including possible restrictions to its availability to some Credit Suisse Group shareholders, are specified in such "Shareholder Information – Summary

Document". This media release does not constitute an offer to sell or an invitation to subscribe for, or the solicitation of an offer to buy or subscribe for, securities of Credit Suisse Group, nor shall it (or any part of it) or the fact of its distribution form the basis of, or be relied on in connection with, any contract therefor. This media release does not constitute a prospectus within the meaning of any applicable law. Eligible shareholders should make their decision to receive a cash distribution or to receive new shares of Credit Suisse Group as part of the 2017 distribution solely based on the terms and conditions of the 2017 distribution and the additional information contained in the relevant documents. This media release does not constitute a recommendation to shareholders to elect to receive new shares of Credit Suisse Group as part of the 2017 distribution. Eligible shareholders are furthermore advised to consult their bank, tax or financial advisor before making any decision.

**Cautionary statement regarding forward-looking information**

This media release contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market volatility and interest rate fluctuations and developments affecting interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries or in emerging markets in 2017 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of us, sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including cost efficiency, net new asset, pre-tax income/(loss), capital ratios and return on regulatory capital, leverage exposure threshold, risk-weighted assets threshold and other targets and ambitions;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, exchange rate, trade and tax policies, as well as currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- the risk of cyberattacks on our business or operations;
- actions taken by regulators with respect to our business and practices and possible resulting changes to our business organization, practices and policies in countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices in countries in which we conduct our operations;
- the potential effects of proposed changes in our legal entity structure;
- competition or changes in our competitive position in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation, regulatory proceedings and other contingencies; and
- other unforeseen or unexpected events and our success at managing these and the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in "Risk factors" in I – Information on the company in our Annual Report 2016.

# Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Swiss Universal Bank, International Wealth Management, Asia Pacific, Global Markets, Investment Banking & Capital Markets and the Strategic Resolution Unit segments. These segment results are included in Core Results, except for the Strategic Resolution Unit, which is part of the Credit Suisse Results. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank. Certain other assets, liabilities and results of operations are managed as part of the activities of the six segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to:

- Neue Aargauer Bank AG, with banking activity in the Swiss canton of Aargau, which is managed as part of Swiss Universal Bank;
- BANK-now SA, with private credit and car leasing activity in Switzerland, which is managed as part of Swiss Universal Bank;
- financing vehicles of the Group, which include special purpose vehicles for various funding activities of the Group, including for the purpose of raising capital; and
- hedging activities relating to share-based compensation awards.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

<sup>1</sup> Based on tangible shareholders' equity attributable to shareholders, a non-GAAP financial measure, which is calculated by deducting goodwill and other intangible assets from total shareholders' equity attributable to shareholders as presented in our balance sheet. Management believes that the return on tangible shareholders' equity attributable to shareholders is meaningful as it allows consistent measurement of the performance of businesses without regard to whether the businesses were acquired.

<sup>2</sup> Disclosed on a look-through basis.

## Credit Suisse reporting structure

Credit Suisse includes the results of our six reporting segments, including the Strategic Resolution Unit, and the Corporate Center. Core Results do not include revenues and expenses from our Strategic Resolution Unit.

## RESULTS SUMMARY

In 1Q17, Credit Suisse reported net income attributable to shareholders of CHF 596 million compared to net losses attributable to shareholders of CHF (2,619) million in 4Q16 and CHF (302) million in 1Q16.

**Net revenues** of CHF 5,534 million increased 7% compared to 4Q16, primarily reflecting higher net revenues in Global Markets. The increase in Global Markets reflected a seasonal increase in client activity.

Net revenues increased 19% compared to 1Q16, primarily reflecting higher net revenues in Global Markets and Investment Banking & Capital Markets and lower negative net revenues in the Strategic Resolution Unit. Compared to a weak 1Q16, net revenues in Global Markets increased reflecting more favorable market conditions, particularly in its credit business. The movement in the Strategic Resolution Unit's net revenues was primarily driven by lower negative valuation adjustments and exit costs relating to our legacy investment banking portfolio, partially offset by lower fee-based revenues from the restructuring of select onshore businesses, in particular the transfer of our US private banking business. Net revenues in Investment Banking & Capital Markets increased, primarily driven by higher debt and equity underwriting revenues.

**Provision for credit losses** of CHF 53 million primarily related to a net provision for credit losses of CHF 24 million in the Strategic Resolution Unit, CHF 10 million in Swiss Universal Bank and CHF 6 million in Investment Banking & Capital Markets.

**Total operating expenses** of CHF 4,811 million decreased 34% compared to 4Q16, reflecting a 61% decrease in general and administrative expenses, primarily due to significant litigation provisions in the Strategic Resolution Unit in 4Q16 mainly related to the

settlements with the US Department of Justice and the National Credit Union Administration Board regarding our legacy residential mortgage-backed securities business. These decreases were partially offset by a CHF 88 million increase in restructuring expenses. In 1Q17, we incurred CHF 137 million of restructuring expenses in connection with the implementation of our strategy, of which CHF 129 million were related to compensation and benefits.

Total operating expenses decreased 3% compared to 1Q16, reflecting an 11% decrease in general and administrative expenses, mainly due to lower professional fees, and a 46% decrease in restructuring expenses. These decreases were partially offset by a 7% increase in compensation and benefits, mainly in the Corporate Center reflecting fair value adjustments on certain deferred compensation plans not allocated to the segments and certain deferred compensation retention awards relating to Global Markets and Investment Banking & Capital Markets intended to support the restructuring of the Group predominately through the end of 2017.

**Income tax expense** of CHF 78 million recorded in 1Q17 mainly reflected a tax charge relating to the geographical mix of results, partially offset by a tax benefit associated with the establishment of Credit Suisse Asset Management & Investor Services (Schweiz) Holding AG and the re-assessment relating to the tax deductibility on previously taken litigation accruals. Overall, net deferred tax assets increased CHF 1,950 million to CHF 7,649 million, mainly driven by the adoption of new accounting standards relating to intra-entity asset transfer rules and share-based payments and the tax benefits noted above, partially offset by earnings and the foreign exchange impact. Deferred tax assets on net operating losses increased CHF 365 million to CHF 2,543 million during 1Q17. The Credit Suisse effective tax rate was 11.6% in 1Q17, compared to (18.8)% in 4Q16.

**UPDATE TO THE COMPENSATION REPORT**

Since the publication of our Annual Report 2016 on March 24, 2017 and the Compensation Report contained therein, the Chairman of the Board of Directors, Urs Rohner, and the chairman of the Compensation Committee, Jean Lanier, conducted a thorough engagement with many of our shareholders. Feedback on the Group's strategy and its execution was supportive. There were, however, some shareholders who expressed reservations regarding certain aspects of compensation.

In order to address these certain shareholder concerns and to ensure that the Executive Board is able to continue to focus on the successful turnaround of Credit Suisse and the implementation of our strategy, the CEO and the Executive Board proposed to the Board of Directors that both the 2016 Short-Term Incentive awards as well as the 2017 Long-Term Incentive opportunities, previously proposed to be awarded to them by the Board of Directors, be reduced by 40%. This proposal was approved by the Board of Directors.

In addition, the Board of Directors has also decided to maintain total Board of Directors compensation at the level of 2015 and 2016, with no incremental increase in 2017 as proposed in the Compensation Report.

For further information on these compensation proposals and updates relevant to the agenda and voting materials at our Annual General Meeting on April 28, 2017, please refer to our website at [www.credit-suisse.com/ch/en/about-us/investor-relations/annual-general-meeting.html](http://www.credit-suisse.com/ch/en/about-us/investor-relations/annual-general-meeting.html).

**PROPOSED CAPITAL RAISE AND OTHER STRATEGY MATTERS**

The Board of Directors will propose to an Extraordinary General Meeting of shareholders to be held on May 18, 2017 a rights offering and share capital increase through the issuance of new shares to existing shareholders of Credit Suisse Group AG, if permitted under applicable local laws. Under the terms of this rights offering, Credit Suisse Group AG plans to issue up to 404,526,794 new registered shares with a par value of CHF 0.04 each. We expect the net proceeds of the rights offering to amount to approximately CHF 4 billion, excluding the issuance of any new shares resulting from the exercise of rights allotted on shares received as scrip dividend.

Through the proposed share capital increase, we intend to strengthen our capital and leverage position, to continue to implement our strategy and advance our restructuring plans, pursue attractive growth opportunities and address expected increases in regulatory capital requirements. On a pro-forma basis, based on our end-1Q17 risk-weighted assets and leverage exposure amounts including the net proceeds of the capital increase, our look-through BIS CET1 capital ratio would have been approximately 13.4% and our look-through BIS tier 1 leverage ratio would have been approximately 5.1%.

We have decided not to pursue a partial initial public offering of our Swiss banking subsidiary Credit Suisse (Schweiz) AG, thus

retaining full ownership of a historically stable income stream in our home market of Switzerland and avoiding complexity in the business structure and activities of a key division of the Group.

We intend to accelerate the release of capital from our Strategic Resolution Unit and bring forward capital targets for this division by one year without incremental impact on pre-tax income. We now plan to complete the wind-down of the Strategic Resolution Unit by the end of 2018.

We will also propose to revise our dividend policy beginning in 2017 by discontinuing the use of a scrip alternative at the option of shareholders and by proposing to pay a cash dividend at a similar level, on a per share basis, to recent years, subject to performance and to the decision of our Board of Directors and approval of our shareholders in due course. In future years, we plan to return excess capital to our shareholders, subject to meeting our capital targets. After the anticipated changes to the Basel III capital framework have been finalized, we expect to have greater clarity on our capital requirements, but in the interim we seek to maintain a look-through BIS CET1 capital ratio of approximately 13% and look-through BIS tier 1 leverage ratio of approximately 5%.

**CORE RESULTS**

In 1Q17, Core Results net revenues of CHF 5,740 million increased 7% compared to 4Q16, primarily reflecting higher net revenues in Global Markets. Provision for credit losses was CHF 29 million, primarily reflecting net provisions of CHF 10 million in Swiss Universal Bank and CHF 6 million in Investment Banking & Capital Markets. Total operating expenses of CHF 4,502 million decreased 3% compared to 4Q16. General and administrative expenses of CHF 1,441 million decreased 12%, primarily related to decreased expenses in Swiss Universal Bank, Corporate Center, Global Markets and International Wealth Management. Compensation and benefits of CHF 2,570 million were stable compared to 4Q16, primarily due to an increase in Global Markets, partially offset by a decrease in Swiss Universal Bank. Compared to 4Q16, restructuring expenses of CHF 130 million increased 171%, primarily in Swiss Universal Bank and International Wealth Management.

Core Results net revenues increased 11% compared to 1Q16, primarily reflecting higher net revenues in Global Markets and Investment Banking & Capital Markets. Total operating expenses increased 3% compared to 1Q16. Compensation and benefits increased 13%, primarily related to increases in Corporate Center and in Investment Banking & Capital Markets and International Wealth Management, primarily due to increased discretionary compensation expenses. Total operating expenses in 1Q17 were also impacted by restructuring expenses of CHF 130 million. These increases were partially offset by a 7% decrease in general and administrative expenses, primarily related to Global Markets, reflecting reduced allocated corporate function costs, and in the Corporate Center, primarily related to costs associated with the evolution of our legal entity structure to meet developing and future regulatory requirements.

## Reconciliation of adjusted results

Adjusted results referred to in this report are non-GAAP financial measures that exclude goodwill impairment and certain other revenues and expenses included in our reported results. Management believes that adjusted results provide a useful presentation of our operating results for purposes of assessing our Group and divisional performance consistently over time, on a basis that excludes items that management does not consider representative of our underlying performance. Provided below is a reconciliation of our adjusted results to the most directly comparable US GAAP measures.

Adjusted return on regulatory capital is calculated using adjusted results, applying the same methodology used to calculate return on regulatory capital.

# Swiss Universal Bank

In 1Q17, we reported income before taxes of CHF 404 million and net revenues of CHF 1,354 million. Income before taxes was 6% higher compared to 4Q16 and 6% lower compared to 1Q16.

## RESULTS SUMMARY

Effective January 1, 2017, we commenced serving our clients through the following four dedicated business areas in order to better serve our Swiss client base: Private & Wealth Management Clients and Premium Clients within the Private Clients business (formerly Private Banking), and Corporate Clients and Institutional Clients within the Corporate & Institutional Clients business (formerly Corporate & Institutional Banking). The most significant change which arose pursuant to this modification in organizational structure related to the transfer of the external asset managers business from the former Private Banking business to the former Corporate & Institutional Banking business. Prior periods have been reclassified to conform to the current presentation.

### 1Q17 results

In 1Q17, we reported income before taxes of CHF 404 million and net revenues of CHF 1,354 million. Compared to 4Q16, net revenues were slightly lower, mainly due to gains on the sale of real estate in 4Q16, slightly lower net interest income and lower recurring commissions and fees, partially offset by higher transaction-based revenues. Total operating expenses were 4% lower

compared to 4Q16, primarily reflecting lower general and administrative expenses and lower compensation and benefits partially offset by higher restructuring expenses.

Compared to 1Q16, net revenues were stable, with slightly lower transaction-based revenues offset by higher recurring commissions and fees. Total operating expenses increased slightly compared to 1Q16, reflecting higher general and administrative expenses and restructuring expenses, partially offset by lower compensation and benefits.

Adjusted income before taxes of CHF 483 million was 28% higher compared to 4Q16 and slightly higher compared to 1Q16.

### Capital and leverage metrics

As of the end of 1Q17, we reported risk-weighted assets of CHF 65.6 billion, stable compared to the end of 4Q16. An increase from methodology and policy changes reflecting the phase-in of the Swiss mortgage multipliers was offset by lower risk levels and a foreign exchange impact. Leverage exposure was CHF 257.4 billion, reflecting an increase of CHF 4.5 billion compared to the end of 4Q16, driven by increased high-quality liquid assets (HQLA).

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees, fees for general banking products and services and revenues from wealth structuring solutions. Transaction-based revenues arise primarily from brokerage and product issuing fees, fees from foreign exchange client transactions, trading and sales income, equity participations income and other transaction-based income. Other revenues include fair value gains/(losses) on synthetic securitized loan portfolios and other gains and losses.

## PRIVATE CLIENTS

## RESULTS

Income before taxes of CHF 161 million was 7% lower compared to 4Q16, primarily reflecting decreased net revenues, partially offset by lower total operating expenses. Compared to 1Q16, income before taxes was 5% lower, primarily reflecting slightly lower net revenues, partially offset by slightly lower total operating expenses. Adjusted income before taxes of CHF 208 million increased 39% compared to 4Q16 and was stable compared to 1Q16.

## Net revenues

Compared to 4Q16, net revenues of CHF 711 million were 5% lower, primarily due to gains on the sale of real estate of CHF 20 million in 4Q16 reflected in other revenues and lower recurring commissions and fees. Recurring commissions and fees of CHF 197 million were 9% lower, reflecting lower discretionary mandate management fees, partially offset by higher investment product management fees and banking services fees. Transaction-based revenues of CHF 100 million were 8% higher, driven by higher revenues from trading services and increased brokerage and product issuing fees. Net interest income of CHF 413 million

was slightly lower with stable loan margins and higher deposit margins on stable average loan and deposit volumes.

Compared to 1Q16, net revenues decreased slightly, primarily reflecting slightly lower net interest income and lower transaction-based revenues. Net interest income was slightly lower with slightly higher loan margins and higher deposit margins on slightly higher average loan and deposit volumes. Transaction-based revenues were 7% lower primarily due to lower fees from foreign exchange client business and decreased revenues from trading services, which were mainly foreign exchange-related. Recurring commissions and fees were stable.

## Provision for credit losses

The Private Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities and, to a lesser extent, consumer finance loans.

In 1Q17, Private Clients recorded provision for credit losses of CHF 12 million compared to CHF 10 million in 4Q16 and CHF 9 million in 1Q16. The provision was primarily related to our consumer finance business.

<sup>2</sup> Income before taxes divided by average assets under management.

**Total operating expenses**

Compared to 4Q16, total operating expenses of CHF 538 million decreased 5%, primarily reflecting lower general and administrative expenses and decreased compensation and benefits, partially offset by higher restructuring expenses. General and administrative expenses of CHF 203 million decreased 19%, primarily due to lower advertising and marketing expenses, lower professional services fees and decreased allocated corporate function costs. Compensation and benefits of CHF 242 million were 15% lower, primarily reflecting lower pension expenses, lower salary expenses due to a release of Swiss holiday accruals in 1Q17 as well as lower social security costs and discretionary compensation expenses, partially offset by higher allocated corporate function costs. Restructuring expenses increased CHF 50 million to CHF 47 million. Adjusted total operating expenses of CHF 491 million were 14% lower compared to 4Q16.

Compared to 1Q16, total operating expenses were slightly lower, despite investments in regulatory and compliance functions, primarily reflecting lower compensation and benefits, partially offset by higher commission expenses and restructuring expenses in 1Q17. Compensation and benefits were 14% lower, primarily reflecting lower salary expenses and decreased allocated corporate function costs. General and administrative expenses were slightly lower, primarily reflecting decreased professional services fees. Adjusted total operating expenses were 4% lower compared to 1Q16.

**MARGINS****Gross margin**

Our gross margin was 146 basis points in 1Q17, ten basis points lower compared to 4Q16, mainly driven by lower recurring commissions and fees and gains on the sale of real estate in 4Q16 on slightly higher average assets under management. Compared to 1Q16, our gross margin was nine basis points lower, primarily due to slightly lower net interest income and lower transaction-based revenues on 4.0% higher average assets under management.

► Refer to "Assets under management" for further information.

**Net margin**

Our net margin was 33 basis points in 1Q17, three basis points lower compared to 4Q16, mainly due to lower net revenues on slightly higher average assets under management, partially offset by lower total operating expenses. Compared to 1Q16, our net margin was three basis points lower, primarily reflecting slightly lower net revenues on the 4.0% higher average assets under management, partially offset by slightly lower total operating expenses. On the basis of adjusted income before taxes, our net margin was 43 basis points in 1Q17, twelve basis points higher compared to 4Q16 and one basis point lower compared to 1Q16.

**ASSETS UNDER MANAGEMENT**

As of the end of 1Q17, assets under management of CHF 198.2 billion were CHF 6.0 billion higher compared to the end of 4Q16, mainly driven by favorable market movements and net new assets of CHF 2.0 billion. Net new assets reflected positive contributions from all businesses.

## CORPORATE &amp; INSTITUTIONAL CLIENTS

## RESULTS

Income before taxes of CHF 243 million increased 16% compared to 4Q16, primarily due to higher provision for credit losses in 4Q16 and lower total operating expenses in 1Q17. Compared to 1Q16, income before taxes was 7% lower, reflecting higher total operating expenses, partially offset by slightly higher net revenues. Adjusted income before taxes of CHF 275 million increased 21% compared to 4Q16 and was slightly higher compared to 1Q16.

## Net revenues

Compared to 4Q16, net revenues of CHF 643 million were stable with slightly lower net interest income, offset by slightly higher transaction-based revenues and recurring commissions and fees. Net interest income of CHF 313 million decreased slightly, with stable loan margins on stable average loan volumes and lower deposit margins on slightly lower average deposit volumes. Recurring commissions and fees of CHF 165 million were slightly higher,

mainly due to increased fees from lending activities, partially offset by lower discretionary mandate management fees. Transaction-based revenues of CHF 180 million were slightly higher, mainly due to higher revenues from trading services, including a revaluation gain on an equity investment of CHF 6 million, partially offset by lower revenues from our Swiss investment banking business and lower corporate advisory fees.

Compared to 1Q16, net revenues were slightly higher, driven by increased recurring commissions and fees and higher revenues from our Swiss investment banking business, partially offset by lower revenues from trading services. Recurring commissions and fees were 11% higher, driven by higher fees from lending activities and higher security account and custody services fees, partially offset by lower discretionary mandate management fees. Net interest income and transaction-based revenues were stable compared to 1Q16.
