

FINER

An Attractive, Customized Solution for Cash Holdings – Structured Money Market Investments

All You Need to Know About FINER

A FINER combines a traditional money market investment with a currency or precious metals option. This special design makes it possible for a higher coupon than with traditional money market investments (e.g. fiduciary investment). The minimum investment is USD 25,000 (or the equivalent in another currency).

A FINER investment pays out either a predetermined coupon fixed on the repayment date (return-optimized FINER) or a variable coupon (FINER with capital protection) – depending on the product design. This is dependent on the performance of the selected underlying asset and relevant period of time. In addition, the redemption currency may differ from the investment currency.

Credit Suisse offers FINERs in various forms and currencies. In addition, you can incorporate your own individual needs and market expectations into the product design. This guarantees a customized investment solution, tailored precisely to your personal investment strategy.

Your Needs

- You would like to seize the opportunity of achieving an attractive yield compared to a traditional money market investment.
- You would like an investment solution tailored to your needs.
- You would like to optimally manage cash holdings in several currencies (return enhancement) or you would like at least the investment sum to be paid out (capital protection).

Your Benefits at a Glance

- You can choose from a wide-ranging offering with regard to investment currency, underlying asset, market expectations, risk profile, and investment period.
- You can diversify your portfolio simply and efficiently into currencies or precious metals.
- FINERs are short-term investment solutions (maturities starting from one week are available).
- FINERs are not subject to withholding tax (the issuer is not located in Switzerland).

Potential Risks

- FINERs with return enhancement involve the risk of receiving the investment sum and the coupon in the alternative currency on maturity (conversion). This may result in significant losses if the amount paid out is converted back into the original investment currency at then prevailing current exchange rate and is compared with the initial investment amount.
- For FINERs with capital protection at maturity, exiting the investment can mean that no coupon is paid out or that a lower coupon is paid out than for traditional money market investments.
- FINERs expose investors to counterparty credit risk. Capital protection does not protect investors against these types of losses.
- Investments in currencies which are not the investor's home currency can have a negative effect on the value of the investment (foreign exchange risk).
- Other potential risks can be found in the Authorization for Structured Money Market Investments, which must be signed in addition to the General Authorization for Fiduciary Deposits.

We Offer Two Types of FINER:

Return-optimized FINER Strategies (Fixed Coupon)

These FINER strategies always pay out a predetermined coupon on the redemption date. However, the coupon can be redeemed either in the investment currency or in the alternative currency (conversion). In the case of conversion, the investment sum and the coupon in the investment currency are exchanged into the alternative currency at the fixed conversion rate.

These products could be interesting for you if:

- You are prepared for your investment to be redeemed in the alternative currency, or specifically wish the repayment to be made in the alternative currency;
- You are looking for attractive investment instruments when prices are falling (a bear market).

FINER Strategies with Capital Protection upon Maturity (Variable Coupon)

These FINER strategies always pay back the investment in the investment currency on the redemption date. Depending on the outcome of the selected strategy, the coupon may not be paid out.

These products are particularly suitable for you if:

- You would like at least the investment sum to be repaid on the redemption date;
- You do not want the repayment to be made in any currency other than the investment currency.

It is not investment advice or otherwise based on a consideration of the personal circumstances of the addressee, nor is it the result of an objective or independent financial analysis. The information provided herein is not legally binding and it does not constitute an offer or invitation to enter into any type of financial transaction. This information was produced by Credit Suisse Group AG and/or its affiliates (hereinafter called "CS") with the greatest of care and to the best of its knowledge and belief. The information and views expressed in this document are those of CS at the time of writing and may be subject to change at any time without notice. They are derived from sources believed to be reliable. CS provides no guarantee with regard to the content or completeness of the information and cannot accept any liability for losses that might arise from its use. Unless otherwise indicated, all figures are unaudited. The information provided in this document is for the exclusive use of the recipient. Investments in commodities and corresponding derivatives or indices are subject to special risks and high volatility. The performance of such investments is dependent on unpredictable factors such as natural disasters, climate effects, production capacity, political unrest, seasonal fluctuations, and strong roll-over effects, in particular in the case of futures and indices. Investments in foreign currencies may involve the additional risk that the foreign currency may lose value against the investor's reference currency. Over-the-counter (OTC) transactions are complex derivative products that are not yet standardized or securitized. They are concluded and traded over-the-counter. OTC transactions are not settled via a clearing house and have no secondary market. OTC transactions may involve a high degree of risk. They are intended only for investors who understand and are capable of assuming all risks involved. The value of the products is dependent on the development of the underlying asset and on the creditworthiness of the counterparties, which may change over the term of the instrument. A CS company may be involved in other transactions related to any underlying asset of the above-mentioned products, which are not listed here. The binding terms of the transaction are defined in the relevant OTC contracts and confirmations. Upon request, your client advisor will be happy to provide you with further information about these products (such as the full terms and conditions). Neither this information nor copies of it may be sent to, taken into, or distributed in the United States or distributed to any US person (within the meaning of Regulation S of the US Securities Act of 1933 in its applicable form).
